JPS-03198: Can not get enablePerfStats from ARME config file
Cause: Cannot get enablePerfStats from arme config file.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security

JPS-03199: Configuration file is [{0}]
Cause: Configuration file is [{0}].
Action: No actions are required.
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-03200: getDebugStore: IOException caught.
Cause: getDebugStore: IOException happens.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security

JPS-03201: Privilege name error: {0}
Cause: privilege name error: {0}.
Error Messages

JPS-03202: Resource name or application name invalid.
Cause: Resource name or application name invalid.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security

JPS-03203: Resource name is wrong according to ALES naming logic
Cause: Resource name is wrong according to ALES naming logic.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security

JPS-03204: Invalid object name
Cause: Invalid object name.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security

JPS-03205: Logical name {0} is invalid
Cause: Logical name {0} is invalid.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security

JPS-03206: Logical name {0} is undefined
Cause: Logical name {0} is undefined.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security

JPS-03207: IOException occurred when storing logical names {0}
Cause: IOException occurred when storing logical names {0}.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security
JPS-03208: Logical names record is not correct
  Cause: Logical names record is not correct.
  Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security
JPS-03209: objectTree is initialized properly
  Cause: ObjectTree is initialized properly.
  Action: No actions are required.

Level: 1
Type: NOTIFICATION
Impact: Security
JPS-03210: Can not close data files: [0]
  Cause: Cannot close data files: [0].
  Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security
JPS-03211: Blocking queue is broken
  Cause: Blocking queue is broken.
  Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security
JPS-03212: Session data could not be loaded. Session abandoned
  Cause: Session data could not be loaded. Session abandoned.
  Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security
JPS-03213: args value is null or wrong type
  Cause: Args value is null or wrong type.
  Action: Refer to the log files for details and correct the error.
JPS-03214: Could not add attribute(s) to cache
  Cause: Could not add attribute(s) to cache.
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-03215: Caught BadParameterException during get attribute: {0}
  Cause: Caught BadParameterException while getting attribute: {0}.
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03216: Installing custom retriever: {0}
  Cause: Installing custom retriever: {0}.
  Action: No actions are required.
  Level: 1
  Type: NOTIFICATION
  Impact: Security

JPS-03217: Caught exception while retrieving attribute from context: {0} Continue retrieving static attribute value.
  Cause: Caught exception while retrieving attribute from context: {0} Continue retrieving static attribute value.
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03218: Failed to transport AttributeValue to AttributeElement, caught {0}: {1}
  Cause: Failed to transport AttributeValue to AttributeElement, caught {0}: {1}.
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03219: AttributeValue type error, not single and list, return null
  Cause: AttributeValue type error, not single and list, return null.
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
Impact: Security

JPS-03220: Exception from the LDAP/DB server, code: {0}, trying alternate connection
Cause: Exception from the LDAP/DB server, code: {0}, trying alternate connection.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: WARNING
Impact: Security

JPS-03221: Alternate LDAP/DB connection failed, code: {0}
Cause: Alternate LDAP/DB connection failed, code: {0}.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security

JPS-03222: Null extendedContext is passed to attribute retriever, cannot look for value.
Cause: Null extendedContext is passed to attribute retriever, cannot look for value.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: WARNING
Impact: Security

JPS-03223: Caught exception while retrieving attribute: {0}
Cause: Caught exception while retrieving attribute: {0}.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security

JPS-03224: Parameter value is null or wrong type.
Cause: Parameter value is null or wrong type.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security

JPS-03225: Calling RBACEvals:{0}
Cause: Calling RBACEvals:{0}.
Action: No actions are required.
Level: 1
Type: NOTIFICATION
Impact: Security
JPS-03226: Empty Application name or Obligation name is passed to report_obligation function.
Cause: Empty Application name or Obligation name is passed to report_obligation function.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security
JPS-03227: Unexpected error: invalid parameter instances.
Cause: Unexpected error: invalid parameter instances.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security
JPS-03228: The value of args is null
Cause: args is null.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security
JPS-03229: Error during initialization of RetrieverConfiguration.
Cause: Error during initialization of RetrieverConfiguration.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security
JPS-03230: args value type is null or wrong type value
Cause: args value type is null or wrong type value.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security
JPS-03231: {0} supplied to subject_in_group is not a qualified group, will qualify
Cause: {0} supplied to subject_in_group is not a qualified group, will qualify.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security
JPS-03232: Qualified group is {0}
  Cause: qualified group is {0}.
  Action: Refer to the log files for details and correct the error.
  Level: 1
Type: ERROR
Impact: Security
JPS-03233: Type of args should be String[]
  Cause: args should be String[].
  Action: Refer to the log files for details and correct the error.
  Level: 1
Type: ERROR
Impact: Security
JPS-03234: No value is passed to {0}
  Cause: No value is passed to {0}.
  Action: Refer to the log files for details and correct the error.
  Level: 1
Type: ERROR
Impact: Security
JPS-03235: No attribute name is passed to sys_obj_exists
  Cause: No attribute name is passed to sys_obj_exists.
  Action: Refer to the log files for details and correct the error.
  Level: 1
Type: ERROR
Impact: Security
JPS-03236: Failed to get attribute {0} for eval function {0}
  Cause: Failed to get attribute {0} for eval function {0}.
  Action: Refer to the log files for details and correct the error.
  Level: 1
Type: ERROR
Impact: Security
JPS-03237: Value passed to {0} is not valid, {1}
  Cause: Value passed to {0} is not valid, {1}.
  Action: Refer to the log files for details and correct the error.
  Level: 1
Type: ERROR
Impact: Security
JPS-03238: {0} is not a valid value for {1}
  Cause: {0} is not a valid value for {1}.
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03239: valid_timeval called for unexpected eval function {0}
  Cause: valid_timeval called for unexpected eval function {0}.
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03240: Unknown eval function {0} used in valid_until_timeofday
  Cause: Unknown eval function {0} used in valid_until_timeofday.
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03241: Disabling extended performance data...
  Cause: Disabling extended performance data...
  Action: No actions are required.
  Level: 1
  Type: NOTIFICATION
  Impact: Security

JPS-03242: The extended performance data have been retrieved. The total number of attributes is {0}, the total number of functions is {1}.
  Cause: The extended performance data have been retrieved. The total number of attributes is {0}, the total number of functions is {1}.
  Action: No actions are required.
  Level: 1
  Type: NOTIFICATION
  Impact: Security

JPS-03243: Unexpected MBean attribute get method: {0}
  Cause: Unexpected mbean attribute get method: {0}.
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security
JPS-03244: {0} specified but no response collector supplied
  Cause:  {0} specified but no response collector supplied.
  Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03245: Received {0} in isProtectedResource
  Cause: Received {0} in isProtectedResource.
  Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03246: Role object passed into wles atz provider is null, ignoring
  Cause: Null role object passed into wles atz provider, ignoring.
  Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03247: A SecurityRole object passed to the authorization engine has role name equal to null. The object will be ignored. The string representation of the object is {0}.
  Cause: A SecurityRole object passed to the authorization engine has role name equal to null. The object will be ignored. The string representation of the object is {0}.
  Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03248: Error {0}
  Cause: Error {0}.
  Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03249: ASI shutdown failed
  Cause: ASI shutdown failed.
  Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-03250: getInstance: Warning: The parent classloaders are different.
Cause: getInstance: Warning: The parent classloaders are different.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: ERROR
Impact: Security

JPS-03251: addClassJars: {0}
Cause: addClassJars: {0}.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-03252: Missing JAR file: {0}
Cause: Missing JAR file: {0}.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-03253: Error initializing URLs in classloader. Vector: {0}
Cause: Error initializing URLs in classloader. Vector: {0}.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-03254: lazy getRoles failed with error {0}
Cause: lazy getRoles failed with error {0}.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-03255: null value returned in roles list, ignoring
Cause: null value returned in roles list, ignoring.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security
JPS-03256: Internal error. Method queryRoles has returned role \{0\} that starts with an incorrect prefix for a role. The role will be ignored.
   Cause: Internal error. Method queryRoles has returned role \{0\} that starts with an incorrect prefix for a role. The role will be ignored.
   Action: Refer to the log files for details.

   Level: 1
   Type: ERROR
   Impact: Security

JPS-03257: Passed an non URLResource, in getAttributeValue
   Cause: Passed a non URLResource, in getAttributeValue.
   Action: Refer to the log files for details.

   Level: 1
   Type: ERROR
   Impact: Security

JPS-03258: Initializing UserUtils; \{0\}
   Cause: Initializing UserUtils; \{0\}.
   Action: No actions are required.

   Level: 1
   Type: NOTIFICATION
   Impact: Security

JPS-03259: Invalid built in type received
   Cause: Invalid built in type received.
   Action: Refer to the log files for details.

   Level: 1
   Type: ERROR
   Impact: Security

JPS-03260: Attempt to \{0\} when CRED is wrong type
   Cause: Attempt to \{0\} when CRED is wrong type.
   Action: Refer to the log files for details.

   Level: 1
   Type: ERROR
   Impact: Security

JPS-03261: No locally defined evaluator found for function \{0\}.
   Cause: No locally defined evaluator found for function \{0\}.
   Action: Refer to the log files for details.

   Level: 1
   Type: ERROR
   Impact: Security
JPS-03262: DiscoveryModeRoleMap does not support this operation
  Cause: DiscoveryModeRoleMap does not support this operation
  Action: Do not call method not supported
  Level: 1
  Type: WARNING
  Impact: Configuration

JPS-03263: DiscoveryModeRoleMap never contains data
  Cause: DiscoveryModeRoleMap never contains data
  Action: Do not try to get data from DiscoveryModeRoleMap.
  Level: 1
  Type: WARNING
  Impact: Configuration

JPS-03264: The attribute dependency leads to a dead loop, {1} depends on {0} already.
  Cause: The attribute dependency leads to a dead loop, {1} depends on {0} already.
  Action: Please check the configuration.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03265: Data source based DB query failed, try again.
  Cause: Data source based DB query failed, try again.
  Action: Refer to the log files for details.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03266: Failed to retrieve connection for url {0} due to following exception {1}.
  Cause: Failed to retrieve connection for {0}.
  Action: Refer to the log files for details.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-03267: Ignoring credential variable exception in computeObligation for {0}.
  Cause:
  Action:
  Level: 1
  Type: NOTIFICATION
  Impact: Security
JPS-03268: In Policy {0}, an invalid Resource Name Expression {1} was encountered. The Policy will not participate in the runtime authorization evaluation. Reason: {2}

Cause: Resource name expression in policy is invalid
Action: Correct the resource name expression.

Level: 1
Type: ERROR
Impact: Security

JPS-03269: Size of bag provided for type-one-and-only function is not one.
Cause: Size of bag provided to type one and only function is not one.
Action: Provide correct function.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-03270: Invalid value of year {0} or month {1} in yearMonthDuration .Must be between max and min values for integer.
Cause: Value provided for year or month is outside the supported integer range on this JVM.
Action: Provide a valid integer value.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-03271: Function name passed to evaluator is null.
Cause: Function name is null.
Action: Provide a valid function name.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-03272: No arguments passed to function {0}.
Cause: No arguments passed to function.
Action: Provide a valid function arguments.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-03273: Application {0} attribute {1} is not available.
Cause: Application {0} attribute {1} is not available.
Action: None.

Level: 1
Type: WARNING
Impact: Programmatic

JPS-04000: Cannot get the default policy store.
   Cause: Could not find to the default policy store.
   Action: Refer to the log files for details and correct the error.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-04001: Cannot read the default policy store.
   Cause: Could not read the default policy store.
   Action: Refer to the log files for details and correct the error.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-04002: Cannot get application policy for application "{0}".
   Cause: Encountered a policy store internal error.
   Action: Refer to the log files for details and correct the error.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-04003: Duplicate principal present "{0}" in a grant request.
   Cause: Found that list of principals in the grantee for the grant contains duplicate
   Action: Correct the list of principals in the grantee.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-04004: Duplicate permission present "{0}" in a grant request.
   Cause: Found that list of permissions in the grant contains duplicate.
   Action: Correct the list of permissions in the grant.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-04005: More than one result found for given Application Name:{0}, Query:{1}, Actual results:{2}.
   Cause: More than one results found for application name.
   Action: Refer to the log files for details and correct the error.
   Level: 1
   Type: WARNING
   Impact: Security
JPS-04006: No results found for given Application Name:{0}, DN: {1}, Query: {2}.
Cause: No results found for application name.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: WARNING
Impact: Security

JPS-04021: Application Policy "{0}" already exists.
Cause: Encountered two application policy contexts with identical names.
Action: Modify an application policy context to have a distinct name.
Level: 1
Type: WARNING
Impact: Security

JPS-04022: Cannot create application policy context "{0}".
Cause: Failed to complete persist operation while creating an application policy.
Action: Refer to the base exception in log files and correct the error.
Level: 1
Type: WARNING
Impact: Security

JPS-04026: Cannot delete application policy context "{0}".
Cause: Could not find a policy context with the provided name.
Action: Verify that a context with the provided name exists.
Level: 1
Type: WARNING
Impact: Security

JPS-04027: Role with name "{0}" does not exist.
Cause: Could not find a role with name {0}.
Action: Verify that a role with the provided name exists.
Level: 1
Type: ERROR
Impact: Configuration

JPS-04028: Application with name "{0}" does not exist.
Cause: Could not find application with name {0}.
Action: Verify that an application with the provided name exists.
Level: 1
Type: ERROR
Impact: Configuration

JPS-04029: Cannot create principal with class name "{0}".
Cause: Could not create principal with class name {0}.
Action: Verify that the provided class name is valid.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04030: Cannot delete application policy context "(0)".
Cause: Failed to complete persist operation while deleting an application policy.
Action: Refer to the base exception in log files and correct the error.

Level: 1
Type: WARNING
Impact: Security

JPS-04031: Parameter "(0)" is null or empty.
Cause: Supplied parameter (0) was null or empty.
Action: Verify that the supplied parameter is non-null. If it is of type String, ensure that its length is positive.

Level: 1
Type: WARNING
Impact: Security

JPS-04032: Parameter "(0)" supplied is not the instance of "(1)".
Cause: Parameter (0) supplied is not the instance of (1).
Action: Ensure parameter is of correct datatype.

Level: 1
Type: WARNING
Impact: Security

JPS-04033: Parameter "(0)" supplied is not of the type "(1)" (as expected).
Cause: Parameter (0) supplied is not of the type (1) (as expected).
Action: Ensure parameter is of correct datatype.

Level: 1
Type: WARNING
Impact: Security

JPS-04034: Failed to modify properties for Application "(0)".
Cause: Cannot modify application policy.
Action: Check the logs for errors.

Level: 1
Type: WARNING
Impact: Security

JPS-04035: AttributeName (0) supplied should start with alphabet or an underscore. Name cannot contain characters other than alphanumeric and/or underscores.
**Cause:** AttributeName {0} supplied should start with alphabet or an underscore. Name cannot contain characters contain other than alphanumeric and/or underscores.

**Action:** Ensure attribute name is of correct datatype.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**JPS-04036:** Function Name {0} supplied should start with alphabet or an underscore. Name cannot contain characters other than alphanumeric and/or underscores.

**Cause:** Function Name {0} supplied should start with alphabet or an underscore. Name cannot contain characters contain other than alphanumeric and/or underscores.

**Action:** Ensure function name is of correct datatype.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**JPS-04037:** Name "{0}" starts or ends with whitespace.

**Cause:** Object name should not start with or end with whitespace.

**Action:** Ensure object name has no whitespace in the beginning and end.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**JPS-04038:** Object name only contains whitespace.

**Cause:** Object name should not only contain whitespace.

**Action:** Ensure object name doesn’t only contain whitespace.

**Level:** 1

**Type:** WARNING

**Impact:** Security

**JPS-04039:** Application "{0}", Deleting {1} entries under "{2}", Maximum remaining re-tries {3}.

**Cause:**

**Action:**

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Security

**JPS-04080:** Scanning of system policy failed. Reason {0}

**Cause:** Scan of system policy failed.

**Action:** Check the system policy setup and the provider setup.

**Level:** 1
Type: WARNING  
Impact: Security  
JPS-04081: Policy store purge thread interrupted. Reason {0}.  
Cause: Purge thread interrupted in policy caching.  
Action: Check the policy setup and the provider setup  
Level: 1  
Type: WARNING  
Impact: Security  
JPS-04082: Deletion of system policy failed. Reason {0}  
Cause: Deletion of system policy failed.  
Action: Provide legal non empty values for policy name  
Level: 1  
Type: WARNING  
Impact: Security  
JPS-04083: Creation of system policy failed. Reason {0}  
Cause: Creation of system policy failed.  
Action: Provide legal non empty values for policy name  
Level: 1  
Type: WARNING  
Impact: Security  
JPS-04084: Migration of application policy failed. Further migration of application policies halted. Reason: {0}.  
Cause: Exception in migration of application policy  
Action: Check application policy setup or contact system administrator  
Level: 1  
Type: WARNING  
Impact: Security  
JPS-04085: Migration of codebase policy failed. Reason: {0}.  
Cause: Exception in migration of codebase policy  
Action: Check codebase policy setup or contact system administrator  
Level: 1  
Type: WARNING  
Impact: Security  
JPS-04086: Could not perform isPolicyModified. Reason {0}  
Cause: Is policy modification check failed.  
Action: Contact system administrator  
Level: 1  
Type: WARNING
Impact: Security

JPS-04089: Could not get policy cache count. Reason {0}
  Cause: Could not retrieve policy cache count.
  Action: Contact system administrator
  Level: 1
  Type: WARNING

JPS-04090: The policy store property {0} is invalid or not defined.
  Cause: The policy store property {0} was invalid or not defined.
  Action: Check the configuration of this property.
  Level: 1
  Type: ERROR

Impact: Requests/Responses

JPS-04091: Application {0} is being deployed with policy migration option set to {1}, start policy migration.
  Cause: Start application policy migration
  Action: No action required
  Level: 1
  Type: NOTIFICATION

JPS-04092: Application {0} is being deployed with policy migration option set to neither OVERWRITE nor MERGE, skip policy migration.
  Cause: Skip application policy migration
  Action: No action required
  Level: 1
  Type: NOTIFICATION

Impact: Security

JPS-04093: Application policy migration for application {0} is completed successfully.
  Cause: Complete application policy migration
  Action: No action required
  Level: 1
  Type: NOTIFICATION

JPS-04094: Start removing application policies for Application {0}.
  Cause: Start application policy removal
  Action: No action required
  Level: 1
  Type: NOTIFICATION
JPS-04095: Application policy removal for application {0} is completed successfully.
   Cause: Complete application policy removal
   Action: No action required
   Level: 1
   Type: NOTIFICATION
   Impact: Security

JPS-04096: Application policies for application {0} was NOT removed in application undeployment with jps.policystore.removal set to OFF.
   Cause: Skip application policy removal
   Action: No action required
   Level: 1
   Type: NOTIFICATION
   Impact: Security

JPS-04097: Application {0} is being deployed without existing application policies found in static deployment, start policy migration.
   Cause: Start application policy migration in static deployment
   Action: No action required
   Level: 1
   Type: NOTIFICATION
   Impact: Security

JPS-04098: Start codebase policy migration for application {0}.
   Cause: Start codebase policy migration
   Action: No action required
   Level: 1
   Type: NOTIFICATION
   Impact: Security

JPS-04099: Codebase policy migration for {0} is completed successfully.
   Cause: Complete codebase policy migration
   Action: No action required
   Level: 1
   Type: NOTIFICATION
   Impact: Security

JPS-04100: Application Role "{0}" already exists.
   Cause: Encountered two roles with identical names.
   Action: Modify a role to have a distinct name.
   Level: 1
   Type: WARNING
Impact: Security

JPS-04101: Cannot create application role "\{0\}"
Cause: Failed to complete persist operation while creating an application role.
Action: Refer to the base exception in logs to resolve the issue.

Level: 1
Type: WARNING
Impact: Security

JPS-04102: Cannot create application role. Cause: Invalid Argument -- Multiple role categories supplied for single application role
Cause: Persist operation failed because more than one role category supplied for create role
Action: Ensure supplied parameters are correct.

Level: 1
Type: WARNING
Impact: Security

JPS-04110: Cannot delete application role "\{0\}". Cause: Application role not found.
Cause: Could not find an application role in the application policy.
Action: Check the name of the application role.

Level: 1
Type: WARNING
Impact: Security

JPS-04111: Cannot delete application role "\{0\}"
Cause: Could not remove application role from policy store.
Action: Refer to the base exception in log files and correct the error.

Level: 1
Type: WARNING
Impact: Security

JPS-04112: Cannot delete application role "\{0\}"
Cause: Could not remove application role "\{0\}" because it may be in use; this role is a member of one or more other application roles (nested role hierarchy).
Action: Flatten the nested role hierarchy, and then remove the desired role. Alternatively, remove the application role using the option force set to true.

Level: 1
Type: WARNING
Impact: Security

JPS-04113: Cannot delete application role "\{0\}"
Cause: Could not remove application role "\{0\}" because it may be in use, or contains enterprise groups or enterprise users.
Action: Remove the enterprise groups and enterprise users from the application role, or remove the application role using the option force set to true.
Level: 1
Type: WARNING
Impact: Security

JPS-04114: Cannot delete application role "[0]".
Cause: Could not remove application role "[0]" because it may be in use; this role has one or more permissions granted to it.
Action: Revoke the permission(s) from the application role, and then remove the role. Alternatively, remove the application role using the option force set to true.

Level: 1
Type: WARNING
Impact: Security

JPS-04120: Cannot add principal to application role.
Cause: Encountered an internal policy store error.
Action: Refer to the base exception in log files and correct the error.

Level: 1
Type: WARNING
Impact: Security

JPS-04121: Cannot add principal to application role "[0]".
Cause: Could not find application role in the application policy context.
Action: Ensure the application role is present in the application policy.

Level: 1
Type: WARNING
Impact: Security

JPS-04122: Cannot add principal to application role; principal(s) "[0]" is already a member of application role "[1]".
Cause: Found that principal [0] is already a member of the application role [1].
Action: Correct the principal name.

Level: 1
Type: WARNING
Impact: Security

JPS-04123: Cannot add principal to the application role.
Cause: Attempted to insert an application role as a member of itself.
Action: Correct the application role principal name. The containment in the role hierarchy must be cycle-free.

Level: 1
Type: WARNING
Impact: Security

JPS-04124: The application role [0] added to [1] has no GUID defined.
Cause: The application role [0] added to [1] has no GUID defined.
Action: Ensure the application role has GUID before adding it as a member of an application role.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-04125: Application Role {0} granted to role category {1} cannot be found in application {2}
Cause: Application Role {0} granted to role category {1} cannot be found in application {2}
Action: Ensure application role exists before assigning it to a role category

Level: 1
Type: WARNING
Impact: Security

JPS-04130: Cannot remove principal from application role.
Cause: Encountered an internal policy store error.
Action: Refer to the base exception in log files and correct the error.

Level: 1
Type: WARNING
Impact: Security

JPS-04131: Cannot remove principal from application role; cannot find application role "{0}" in application policy context.
Cause: Could not find the specified application role in the application policy context.
Action: Correct the application role name.

Level: 1
Type: WARNING
Impact: Security

JPS-04132: Cannot remove principal from application role; principal "{0}" is not member of application role "{1}".
Cause: See error message.
Action: Correct the principal role name.

Level: 1
Type: WARNING
Impact: Security

JPS-04135: Resource name not specified in application {0}.
Cause: Resource name not specified in application {0}.
Action: Ensure the resource name is not null.

Level: 1
Type: WARNING
Impact: Security

JPS-04136: Resource type name not specified in application {0}.
Cause: Resource type name not specified in application {0}.
Action: Ensure the resource type name is not null.
Level: 1
Type: WARNING
Impact: Security

JPS-04137: Permission set name not specified in application {0}.
Cause: Permission set name not specified in application {0}.
Action: Ensure the permission set name is not null.
Level: 1
Type: WARNING
Impact: Security

JPS-04138: Application role name not specified in application {0}.
Cause: Application role name not specified in application {0}.
Action: Ensure the application role name is not null.
Level: 1
Type: WARNING
Impact: Security

JPS-04140: Cannot complete application role search because search expression "{0}" is incorrect.
Cause: Found an invalid search pattern.
Action: Refer to the base exception in log files and correct the error.
Level: 1
Type: WARNING
Impact: Security

JPS-04141: Cannot complete application role search because of internal error {0}.
Cause: Encountered an internal policy store error while searching the policy store.
Action: Refer to the base exception in log files and correct the error.
Level: 1
Type: WARNING
Impact: Security

JPS-04142: Cannot complete application role search because search role attribute "{0}" is incorrect.
Cause: Could not complete the search because the application role attribute {0} was invalid.
Action: Supply a valid role attribute name.
Level: 1
Type: WARNING
Impact: Security
JPS-04143: Cannot find application role "{0}".
  Cause: Could not find application role in the application policy context.
  Action: Supply the name of an existing application role name.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04144: Cannot get granted application role for principal "{0}".
  Cause: Encountered an internal policy store error.
  Action: Refer to the base exception in log files and correct the error.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04145: Cannot get all application roles for application "{0}".
  Cause: Encountered an internal policy store error.
  Action: Refer to the base exception in log files and correct the error.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04146: Cannot complete application role search because search role attribute name is null.
  Cause: Could not complete the search because the role attribute name was NULL.
  Action: Provide a non-null role attribute name.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04147: Cannot get members of application role "{0}".
  Cause: Could not find application role in the application policy context.
  Action: Supply the name of an existing application role name.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-04148: Exception when converting "{0}" to number, msg is "{1}".
  Cause: Exception when converting {0} to number, msg is {1}
  Action: Only number is allowed
  Level: 1
  Type: WARNING
  Impact: Security
JPS-04150: Cannot alter application role {0} since multiple entries found for the application name:{1} query: {2} and actual result is {3}.
Cause: Encountered the policy store error {0}.
Action: Check the error details to resolve the issue.
Level: 1
Type: WARNING
Impact: Security

JPS-04151: Cannot alter application role.
Cause: Could not find application role {0} in the application policy context.
Action: Provide an existing application role name.
Level: 1
Type: WARNING
Impact: Security

JPS-04153: In Domain {0}, Application {1} is not present.
Cause: Application not found in the policystore
Action: Check the name of the application in the policystore.
Level: 1
Type: WARNING
Impact: Security

JPS-04154: Refresh of application policy failed. Reason {0}
Cause: Refresh of application policy failed.
Action: Check the application policy setup and the provider setup
Level: 1
Type: WARNING
Impact: Security

JPS-04155: Scanning of application policy failed. Reason {0}
Cause: Scan of application policy failed.
Action: Check the application policy setup and the provider setup
Level: 1
Type: WARNING
Impact: Security

JPS-04156: RoleCategory modification attribute "{0}" is invalid.
Cause: Invalid RoleCategory modify attribute
Action: Check whether the attribute you are trying to modify is valid or not.
Level: 1
Type: WARNING
Impact: Security

JPS-04157: RoleCategory "{0}" already exists.
Cause: The role category already exists.
Action: Supply a different role category name.
Level: 1
Type: WARNING
Impact: Security

JPS-04158: RoleCategory {0} does not exist
Cause: The role category does not exist.
Action: Supply a different role category name.
Level: 1
Type: WARNING
Impact: Security

JPS-04159: Role category search value: {0}, is invalid for matcher type: {1}
Cause: The role category search query has invalid parameter value
Action: Modify the search query and supply correct parameter value.
Level: 1
Type: WARNING
Impact: Security

JPS-04160: Cannot find PermissionSet {0} in policy store.
Cause: Could not find PermissionSet in policy store.
Action: Provide the name of a valid PermissionSet.
Level: 1
Type: WARNING
Impact: Security

JPS-04161: Search for PermissionSet {0} by name yielded more than one result.
Cause: Found a duplicate PermissionSet name in search context.
Action: Ensure that all PermissionSet names in the current search context are distinct.
Level: 1
Type: WARNING
Impact: Security

JPS-04162: PermissionSet "{0}" already exists in policy store.
Cause: Permission Set already exists.
Action: Create a PermissionSet with a different name.
Level: 1
Type: WARNING
Impact: Security

JPS-04163: PermissionSet {0} cannot have empty ResourceActions.
Cause: PermissionSet {0} has empty ResourceActions.
Action: Ensure PermissionSet has ResourceActions.
Level: 1
Type: WARNING
Impact: Security

JPS-04164: MemberResource {0} of type {1} not found in application {1}.
Cause: MemberResource {0} of type {1} not found in application {1}.
Action: Ensure the Resource exists in the PolicyStore.
Level: 1
Type: WARNING
Impact: Security

JPS-04165: ResourceType {0} referenced by MemberResource {1} not found in application {2}.
Cause: ResourceType {0} referenced by MemberResource {1} not found in application {2}.
Action: Ensure the ResourceType exists in the PolicyStore.
Level: 1
Type: WARNING
Impact: Security

JPS-04166: MemberResource {0} of type {1} does not have actions defined.
Cause: MemberResource {0} of type {1} does not have actions defined.
Action: Ensure the MemberResource has valid actions.
Level: 1
Type: WARNING
Impact: Security

JPS-04167: MemberResource {0} of type {1} has actions defined.
Cause: MemberResource {0} of type {1} has actions defined.
Action: Ensure the MemberResource does not have actions.
Level: 1
Type: WARNING
Impact: Security

JPS-04168: PermissionSet {0} cannot be created without ResourceActions.
Cause: PermissionSet {0} cannot be created without ResourceActions.
Action: Create a PermissionSet with ResourceActions.
Level: 1
Type: WARNING
Impact: Security

JPS-04169: ResourceAction {0} used to modify PermissionSet {1} has invalid actions for ResourceType {2}.
Cause: ResourceAction \([0]\) used to modify PermissionSet \([1]\) has invalid actions for ResourceType \([2]\).

Action: Modify PermissionSet using a ResourceAction that has valid actions.

Level: 1
Type: WARNING
Impact: Security

JPS-04173: The resource type \([0]\) is not found in store

Cause: Unsupported Resource Type \([0]\).

Action: Check Resource Type.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04179: The resource type reference for resource \([0]\) is not found in the application \([1]\). Hence using the first occurrence

Cause: The resource type reference for resource \([0]\) is not found in the application \([1]\). Hence using the first occurrence.

Action: Ensure the ResourceType reference exists for every resource.

Level: 1
Type: WARNING
Impact: Security

JPS-04190: Cannot find resource.

Cause: Could not find resource in the resource store.

Action: Modify your search query.

Level: 1
Type: WARNING
Impact: Security

JPS-04191: Cannot find unregistered resource finder for resource type "\([0]\)".

Cause: Could not find a registered resource finder for the resource type.

Action: Provide a resource finder implementation for the resource type, and register it with JPS.

Level: 1
Type: WARNING
Impact: Security

JPS-04192: Cannot load resource finder with provider name "\([0]\)".

Cause: Found an incorrect implementation: argumentless public constructor is missing.

Action: Revisit the implementation to provide an argumentless public constructor.

Level: 1
Type: WARNING
Impact: Security

JPS-04193: Cannot load resource finder with provider name "[0]" and class "[1]".
Cause: Could not load resource finder class: error encountered while reading a registered class file for resource finder.
Action: Check the configuration of the class property in jps-config.xml.

Level: 1
Type: WARNING
Impact: Security

JPS-04194: Cannot initialize resource finder with provider name "[0]" and class name ":[1]".
Cause: Found an error while initializing a registered class for resource finder.
Action: Check the configuration of the class property in jps-config.xml.

Level: 1
Type: WARNING
Impact: Security

JPS-04195: Cannot load the resource finder with provider "[0]".
Cause: Found an error in external resource finder configuration: a required property was missing.
Action: Check the configuration of the class property in jps-config.xml.

Level: 1
Type: WARNING
Impact: Security

JPS-04198: Resource [0] in application [1] has a non existent resource type [2]. Ignoring this resource.
Cause: Resource [0] in application [1] has a non existent resource type [2]. Ignoring this resource.
Action: Ensure the ResourceType exists for every resource.

Level: 1
Type: WARNING
Impact: Security

JPS-04200: Cannot grant policy due to a policy store internal error.
Cause: Encountered a policy store error.
Action: Check the error details to resolve the issue.

Level: 1
Type: WARNING
Impact: Security

JPS-04201: Cannot grant permission(s). Grant already exists for grantee [0].
Cause: Permissions already granted to grantee.
Action: Grant a different set of permissions.
Level: 1
Type: WARNING
Impact: Security

JPS-04202: Cannot revoke policy.
Cause: Encountered an internal policy store error while revoking a policy.
Action: Refer to the base exception in log files and correct the error.

Level: 1
Type: WARNING
Impact: Security

JPS-04203: Cannot revoke permission.
Cause: Found that a permission has not been granted.
Action: Provide the appropriate permission to the grantee.

Level: 1
Type: WARNING
Impact: Security

JPS-04204: Cannot revoke permissions.
Cause: Found that permissions have not been granted.
Action: Provide the appropriate permissions to the grantee.

Level: 1
Type: WARNING
Impact: Security

JPS-04205: Cannot revoke permissions.
Cause: Found that permissions have not been granted to principals.
Action: Provide the appropriate permissions to principals.

Level: 1
Type: WARNING
Impact: Security

JPS-04206: Cannot revoke permissions.
Cause: Found that permissions have not been granted to code source.
Action: Correct the code source grantee.

Level: 1
Type: WARNING
Impact: Security

JPS-04207: Matching Grantee not found: {0}.
Cause: Found that permissions have not been granted to principals or code source.
Action: Correct the list of principals and code source in the grantee, or revoke permissions granted to this grantee.
Level: 1
Type: WARNING
Impact: Security

JPS-04208: Cannot modify policy due to a policy store internal error.
Cause: Encountered an internal policy store error while modifying the policy store.
Action: Refer to the base exception in log files and correct the error.

Level: 1
Type: WARNING
Impact: Security

JPS-04209: Cannot modify property {0}.
Cause: Could not modify a property.
Action: Supply the name of a property that can be modified.

Level: 1
Type: WARNING
Impact: Security

JPS-04210: Modification code {0} is invalid.
Cause: Found an unsupported modification code.
Action: Ensure that the modification code is ADD, REMOVE, or REPLACE.

Level: 1
Type: WARNING
Impact: Security

JPS-04211: Cannot query, update, or delete Object with type "{0}" and name "{1}".
Cause: Attempted to query, update, or delete an invalid policy store object.
Action: Ensure that the object to be queried, updated, or deleted belongs to the appropriate policy domain.

Level: 1
Type: WARNING
Impact: Security

JPS-04212: PermissionSet "{0}" is in use, cannot delete.
Cause: Permission set already existed.
Action: Permission set with the same name cannot be created. Use different name.

Level: 1
Type: WARNING
Impact: Security

JPS-04213: Cannot modify a grant with an empty permission entry.
Cause: Encountered empty permission entry list while modifying a grant.
Action: Pass a non empty permission entry list while modifying a grant.
JPS-04216: Cannot grant/revoke permissions because type "[0]" is not known.
   Cause: Resource type validation for Permission set failed
   Action: Check whether the grant’s permission’s resourcetype is provisioned in the policystore.

JPS-04217: Grant/revoke failed for grantee "[0]", permission class "[1]", resource name "[2]", permission actions "[3]", resource type "[4]". Reason: permission actions is not a subset of resource type actions "[5]".
   Cause: Resource type validation for Permission set failed
   Action: Check whether the actions in the Permission are valid actions for the resource type provisioned in the policy store.

JPS-04218: Grant/revoke failed for grantee "[0]", permission class "[1]", resource Name "[2]", permission actions "[3]", resource type "[4]". Reason: permission class is not equal to resource type matcher class "[5]".
   Cause: Resource type validation for Permission set failed
   Action: Check whether the matcher class in the Permission is valid for the resource type provisioned in the policy store.

JPS-04219: The action [0] is invalid for resource type [1].
   Cause: The action [0] is invalid for resource type [1].
   Action: Check the ResourceActionsEntry parameter.

JPS-04220: Cannot search because the search query "[0]" was empty (has no child query).
   Cause: The search query [0] was empty (has no child query).
   Action: Provide a non-empty search query in.
Impact: Requests/Responses

JPS-04221: Cannot search because the grant search query "{0}" has illegal object type for search property "{1}".
Cause: The grant search query {0} has wrong object type in search value for search property {1}.
Action: Provide an object type corresponding to the search property.
Level: 1
Type: WARNING
Impact: Security

JPS-04222: Cannot search because the search query was null for "{0}".
Cause: The search query was null for {0}.
Action: Provide a non-null search query.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-04223: Access to tenant system policy is not allowed.
Cause: Access to tenant system policy is not allowed.
Action: Access global system policy instead.
Level: 1
Type: WARNING
Impact: Security

JPS-04227: The object name "{0}" is invalid.
Cause: The object name {0} is invalid.
Action: Pass a correct object name in.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-04300: Cannot save policy.
Cause: Could not save policy. Cause {0}.
Action: Check the log files and resolve the error.
Level: 1
Type: ERROR
Impact: Security

JPS-04301: Cannot read from policy store. Reason is {0}, {1}
Cause: Could not read from the policy store.
Action: Check the log files and resolve the error.
Level: 1
Type: ERROR
Impact: Security

JPS-04302: Cannot read from policy store.
  Cause: Could not find the location property '{1}' in instance '{0}'.
  Action: Ensure the location is set to a valid policy store file.

  Level: 1
  Type: ERROR
  Impact: Configuration

JPS-04303: Cannot read from policy store.
  Cause: Could not find value for system property '{0}' or for location property '{2}' in instance '{1}'.
  Action: Ensure the location is set to a valid policy store file.

  Level: 1
  Type: ERROR
  Impact: Configuration

JPS-04304: Policy store instance descriptor {0}, location value {1} is ignored.
  Cause: Could not find value for the system property '{0}', which overrides the descriptor property '{1}' in the policy store service instance.
  Action: Unset the system property so that the location is picked up from configuration in jps-config.xml.

  Level: 1
  Type: WARNING
  Impact: Configuration

JPS-04305: Could not determine the work folder for controlled and mixed mode PD.
  Cause: Could not determine the work folder for controlled and mixed mode PD.
  Action: Ensure system property "oracle.security.jps.config" or "domain.home" is set and jps-config.xml is present under ${domain.home}/config/fmwconfig.

  Level: 1
  Type: ERROR
  Impact: Configuration

JPS-04410: Cannot create JACC module policy context "{0}" for application {1}.
  Cause: Could not create application policy because found two application module contexts with identical names.
  Action: Ensure that all application module context names are distinct.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-04411: Cannot create application "{0}" JACC module policy context "\{1\}".
  Cause: Could not create application module policy; persist operation failed.
  Action: Refer to the base exception in log files and correct the error.
Level: 1
Type: WARNING
Impact: Security

JPS-04412: Cannot delete JACC module "{0}".
  Cause: Could not find JACC policy context to delete.
  Action: Check the JACC policy context name.

Level: 1
Type: WARNING
Impact: Security

JPS-04413: Cannot delete JACC module policy context "{0}".
  Cause: Could not delete JACC policy; persist operation failed.
  Action: Refer to the base exception in log files and correct the error.

Level: 1
Type: WARNING
Impact: Security

JPS-04420: Application policy context name is missing from application role {0}.
  Cause: Could not find application policy context in the application role principal.
  Action: Ensure that the application role principal has an application context.

Level: 1
Type: WARNING
Impact: Security

JPS-04421: Administrator role name is invalid.
  Cause: Found an invalid administrator role name.
  Action: Correct the name of the administrator role.

Level: 1
Type: WARNING
Impact: Security

JPS-04422: Policy is malformed.
  Cause: Found system policy that granted permissions to application role(s).
  Action: Grants to application roles are not allowed in a system policy. Remove such grants.

Level: 1
Type: WARNING
Impact: Security

JPS-04423: Application role name "{0}" is invalid.
  Cause: Found invalid application role name {0}.
  Action: Verify that the application role name conforms with the role name syntax.

Level: 1
Type: WARNING
Impact: Security

JPS-04502: Java SSO Login
Cause: This was JSSO page title.
Action: No action needed.

Level: 1
Type: TRACE
Impact: Requests/Responses

JPS-04503: Enter your single sign-on username and password.
Cause: User name and password were required for logging into JSSO.
Action: Enter a valid user name and password.

Level: 1
Type: TRACE
Impact: Requests/Responses

JPS-04504: Username
Cause: This was JSSO login user name.
Action: No action needed.

Level: 1
Type: TRACE
Impact: Requests/Responses

JPS-04505: Password
Cause: This was JSSO login user password.
Action: No action needed.

Level: 1
Type: TRACE
Impact: Requests/Responses

JPS-04506: Login
Cause: Submit button.
Action: Press submit.

Level: 1
Type: TRACE
Impact: Requests/Responses

JPS-04507: Cancel
Cause: Cancel button.
Action: Press cancel to abort login.

Level: 1
Type: TRACE
Impact: Requests/Responses
JPS-04508: Failed.
  Cause: JSSO login failed.
  Action: Check user name and password used for login.
  Level: 1
  Type: ERROR
  Impact: Requests/Responses

JPS-04509: The maximum number of login attempts is exceeded. Contact the application administrator, or retry after 0 minutes.
  Cause: Maximum login attempts was exceeded.
  Action: Contact the system administrator.
  Level: 1
  Type: ERROR
  Impact: Requests/Responses

JPS-04510: Incorrect username or password.
  Cause: User name or password was invalid.
  Action: Check the user name and password used for login.
  Level: 1
  Type: ERROR
  Impact: Requests/Responses

JPS-04511: Java SSO Application Error.
  Cause: Encountered and internal error.
  Action: Contact the system administrator.
  Level: 1
  Type: ERROR
  Impact: Requests/Responses

JPS-04512: application error
  Cause: Encountered and internal error.
  Action: Contact the system administrator.
  Level: 1
  Type: ERROR
  Impact: Requests/Responses

JPS-04513: The Java SSO application is not properly configured.
  Cause: The Java SSO application was not correctly configured.
  Action: Reconfigure the application.
  Level: 1
  Type: ERROR
  Impact: Configuration

JPS-04514: Configuration error: {0}. 
Cause: The Java SSO application was not correctly configured.
Action: Reconfigure the application.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04515: Usage arguments:
Cause: Defines the keytool usage.
Action: See error message.

Level: 1
Type: TRACE
Impact: Requests/Responses

JPS-04516: No key type for algorithm.
Cause: The algorithm key type was not specified.
Action: Configure the algorithm key type.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04517: Key does not match any known algorithm.
Cause: The given key did not match the corresponding algorithm.
Action: Reconfigure the algorithm key type.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04518: The number of JSSO cookies is zero or invalid.
Cause: Could not find JSSO cookie in header.
Action: Login again or contact the system administrator.

Level: 1
Type: TRACE
Impact: Requests/Responses

JPS-04519: The number of Oracle Access Manager cookies is zero or invalid.
Cause: Could not find Oracle Access Manager cookie in header.
Action: Login again or contact the system administrator.

Level: 1
Type: TRACE
Impact: Requests/Responses

JPS-04520: Token type is invalid: expected type is COOKIE_TOKEN, but found {0}.
Cause: The token type configured was invalid: it should be COOKIE_TOKEN.
Action: Reconfigure the token type to a valid value.
JPS-04521: The JSSO property {0} is not set.
  Cause: JSSO property was not correctly configured.
  Action: Reconfigure the property to a correct value.

JPS-04522: The authentication type {0} is invalid.
  Cause: JSSO did not support this authentication type.
  Action: Reconfigure the type to a supported type.

JPS-04523: Token is no longer valid.
  Cause: The incoming token was no longer valid.
  Action: Login again.

JPS-04524: Cannot create token from JSSO cookie.
  Cause: Could not create token from the JSSO cookie; cookie may have expired.
  Action: Login again.

JPS-04525: The number of cookies is zero or the invalid number {0}.
  Cause: Could not find at least one cookie in the request.
  Action: Login again.

JPS-04526: Token has invalid version number.
  Cause: Token had invalid version number.
  Action: Login again.
Impact: Requests/Responses

JPS-04527: Token has an invalid format.
Cause: Token was corrupted or had invalid format.
Action: Login again.

Level: 1
Type: ERROR

Impact: Requests/Responses

JPS-04528: An error occurred while encoding JSSO token.
Cause: Could not encode JSSO token.
Action: Specify a valid, supported encoding.

Level: 1
Type: ERROR

Impact: Configuration

JPS-04529: Cannot verify signature in the JSSO token.
Cause: Could not verify signature: the token was tampered with, or the signature algorithm was invalid.
Action: Specify a supported signature algorithm.

Level: 1
Type: ERROR

Impact: Requests/Responses

JPS-04530: Algorithm is unsupported.
Cause: Specified algorithm was unsupported.
Action: Check documentation for the list of supported algorithms.

Level: 1
Type: ERROR

Impact: Configuration

JPS-04531: Error creating cipher.
Cause: Could not create cipher.
Action: Check documentation for the list of supported cipher algorithms.

Level: 1
Type: ERROR

Impact: Configuration

JPS-04532: JSSO logout URL is not configured.
Cause: The logout URL was not configured or invalid.
Action: Check the logout URL configuration properties, and reconfigure it to a valid URL.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04533: JSSO has encountered an unexpected error.
Cause: An internal error occurred.
Action: Contact the system administrator.
Level: 1
Type: ERROR

Impact: Requests/Responses

JPS-04534: JSSO symmetric key is missing.
Cause: The symmetric key configuration was missing.
Action: Ensure that the properties "custom.sso.cred.key" and "custom.sso.cred.alias" are configured in the service instance, and that the symmetric key is present in the credential store.
Level: 1
Type: ERROR

Impact: Configuration

JPS-04535: Identity name is invalid.
Cause: User identity was invalid or missing.
Action: Provide a valid user identity.
Level: 1
Type: ERROR

Impact: Configuration

JPS-04536: The token name {0} is missing in request object.
Cause: Token name was missing in the request object.
Action: Ensure that the token name is present in the request object.
Level: 1
Type: ERROR

Impact: Configuration

JPS-04537: No token name is specified for token collector {0}.
Cause: Token collector was invalid or missing.
Action: Configure a valid token collector with the property "idm.token.collector.class".
Level: 1
Type: ERROR

Impact: Configuration

JPS-04538: The request object class is invalid.
Cause: The request object class was invalid.
Action: Ensure that the request object is valid.
Level: 1
Type: ERROR
Impact: Configuration

JPS-04539: Token collector is not properly initialized.
Cause: Could not initialize the token collector.
Action: Ensure that the token collector is correctly configured and initialized.
Level: 1
Type: ERROR
Impact: Configuration

JPS-04540: The token asserter is not properly initialized.
Cause: Could not initialize the token asserter.
Action: Ensure that the token asserter is correctly configured and initialized.
Level: 1
Type: ERROR
Impact: Configuration

JPS-04541: Cannot find authenticated identity.
Cause: Authentication failed.
Action: Provide a valid identity.
Level: 1
Type: ERROR
Impact: Configuration

JPS-04542: The token collector class {0} is not properly configured in the configuration file.
Cause: Token collector class was missing.
Action: Configure a valid token collector class with the property "idm.token.collector.class".
Level: 1
Type: ERROR
Impact: Configuration

JPS-04543: No login module is configured for application.
Cause: Could not find configured login module.
Action: Configure a login module in jps-config.xml.
Level: 1
Type: ERROR
Impact: Configuration

JPS-04544: The subject of the identity is invalid.
Cause: Subject was missing.
Action: Ensure that the valid Subject is present.
Level: 1
Type: ERROR
Impact: Configuration

JPS-04545: Cannot verify the Subject {0}.
Cause: Could not verify Subject.
Action: Check the user credentials.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04546: The configuration (idm.subject.loginmodule.disabled=true) specifies that the Subject is populated by the token asserter.
Cause: Could not find Subject asserter.
Action: Configure an asserter to use a login module that returns a valid Subject.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04547: The token type {0} is not properly configured in the configuration file.
Cause: Could not find token type configuration.
Action: Configure a token type in the service instance with the property "idm.token.type".

Level: 1
Type: ERROR
Impact: Configuration

JPS-04548: The token asserter class {0} is not properly configured in the configuration file.
Cause: Could not find token asserter class configuration.
Action: Configure a token asserter class in the service instance with the property "idm.token.asserter.class".

Level: 1
Type: ERROR
Impact: Configuration

JPS-04549: Token is no longer valid.
Cause: Found invalid or expired token.
Action: Check that the token is valid and has not expired.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04550: Token type is invalid: expected type is HEADER_TOKEN, but found {0}.
Cause: Token type was invalid: it should be HEADER_TOKEN.
Action: Reconfigure the token type to a valid type.

Level: 1
Type: ERROR
Impact: Configuration

JPS-04551: The number of OSSO headers is zero or an invalid number.
Cause: Could not find OSSO header in HTTP request.
Action: Login again, or contact the system administrator.
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-04552: The required Oracle Access Manager property {0} is missing or invalid.
Cause: A required Oracle Access Manager property was missing or invalid.
Action: Configure the property "access.sdk.install.path" in the service instance in jps-config.xml.
Level: 1

Type: ERROR
Impact: Configuration

JPS-04553: The user identity {0} for Oracle Access Manager is invalid.
Cause: The user identity for Oracle Access Manager was invalid.
Action: Login again.
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-04554: The user password for Oracle Access Manager is invalid.
Cause: The user password for Oracle Access Manager was invalid.
Action: Login again.
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-04555: The user {0} is not logged in to Oracle Access Manager. The error is {1}.
Cause: The user was not logged in Oracle Access Manager.
Action: Login again.
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-04556: The user {0} is not authorized to access a resource type authentication in Oracle Access Manager.
Cause: The user was not logged in Oracle Access Manager.
Action: Login again.
Level: 1
Type: ERROR
Impact: Requests/Responses
JPS-04557: Invalid parameter {0} supplied. Cannot be null or empty.
Cause: Invalid parameter {0} supplied. Cannot be null or empty.
Action: Ensure the parameter is not null or empty.
Level: 1

Type: WARNING
Impact: Requests/Responses
JPS-04558: The SSO service is not properly configured: {0}.
Cause: The SSO service is not properly configured: {0}.
Action: Check the SSO Service configuration.
Level: 1

Type: ERROR
Impact: Configuration
JPS-04559: Failed to create the {0} token. Cause: {1}.
Cause: Failed to create the {0} token. Cause: {1}.
Action: Re-login.
Level: 1

Type: ERROR
Impact: Requests/Responses
JPS-04560: SSO provider cannot initiate SSO process: {0}.
Cause: SSO provider cannot initiate SSO process: {0}.
Action: Check the SSO Service configuration.
Level: 1

Type: ERROR
Impact: Requests/Responses
JPS-04561: Invalid parameter {0} supplied. Cannot be null.
Cause: Invalid parameter {0} supplied. Cannot be null.
Action: Ensure the parameter is not null.
Level: 1

Type: WARNING
Impact: Requests/Responses
JPS-04601: Cannot obtain audit service for policy store.
Cause: Could not query audit service about audit logging level for policy store messages.
Action: Ensure that auditing is configured correctly.
Level: 1
Impact: Security

**JPS-04602: Cannot log policy management event to the audit service.**
Cause: Could not log policy management audit messages to the audit service.
Action: Ensure that auditing is configured correctly in your environment and application.
Level: 1
Type: WARNING

Impact: Security

**JPS-05500: Cannot create the user manager MBean.**
Cause: Could not create the user manager MBean.
Action: Check errors in log files and contact the domain administrator.
Level: 1
Type: ERROR

Impact: Configuration

**JPS-05501: Cannot create the role manager MBean.**
Cause: Could not create the role manager MBean.
Action: Check the log files for errors and contact domain administrator.
Level: 1
Type: ERROR

Impact: Configuration

**JPS-05502: Cannot create the identity store MBean.**
Cause: Could not create the identity store MBean.
Action: Check log files and contact the domain administrator.
Level: 1
Type: ERROR

Impact: Configuration

**JPS-05513: Failed to determine realms to migrate file {0}. Reason {1}.**
Cause: Failed determine realms to migrate file {0}. Reason {1}.
Action: Check log files and try again.
Level: 1
Type: WARNING

Impact: Programmatic

**JPS-05521: Invalid jaas.login.controlFlag {0} found for {1} service instance. Valid values should be {2}.**
Cause: Invalid jaas.login.controlFlag {0} found for {1} service instance. Valid values should be {2}.
Action: Use a valid value.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-05542: Bootstrap credential store context missing
   Cause: Could not find bootstrap credstore context
   Action: Contact system administrator
   Level: 1
   Type: WARNING
   Impact: Compliance

JPS-05546: Bootstrap credential store service missing
   Cause: Could not find bootstrap credstore service
   Action: Contact system administrator
   Level: 1
   Type: WARNING
   Impact: Compliance

JPS-05626: Bootstrap credential already present in store
   Cause: Credential already present in the store
   Action: use different map name or key name for the credential
   Level: 1
   Type: WARNING
   Impact: Compliance

JPS-05657: Bootstrap credential store context {0} missing
   Cause: Could not find bootstrap credential store context
   Action: Contact system administrator
   Level: 1
   Type: WARNING
   Impact: Compliance

JPS-05658: Bootstrap credential store service {0} missing from bootstrap credential store context {1}
   Cause: Could not find bootstrap credential store service
   Action: Contact system administrator
   Level: 1
   Type: WARNING
   Impact: Compliance

JPS-05659: location attribute missing from bootstrap credential store service {0}
   Cause: Could not find location attribute of bootstrap credential store service
   Action: Contact system administrator
   Level: 1
   Type: WARNING
   Impact: Compliance
JPS-06000: The source context {0} is missing in jps configuration file.
   Cause: While migrating a security store, found that the context, specified as source {0}, did not exist in jps-config.xml.
   Action: Provide a context for source that is present in jps-config.xml.
   Level: 1
   Type: ERROR
   Impact: Configuration

JPS-06001: The destination context {0} is missing in jps configuration file.
   Cause: While migration of a security store, found that the context, specified as destination {0}, did not exist in jps-config.xml.
   Action: Provide a context for destination that is present in jps-config.xml.
   Level: 1
   Type: ERROR
   Impact: Configuration

JPS-06002: Cannot clean the destination credential store. Reason {0}.
   Cause: A codebase grant was found without the required permissions.
   Action: Set the right permissions to the codebase grant.
   Level: 1
   Type: WARNING
   Impact: Upgrade

JPS-06003: Cannot migrate credential folder/key {0}/{1}.Reason {2}.
   Cause: Cannot migrate this credential.
   Action: Verify that the credential is correctly specified.
   Level: 1
   Type: WARNING
   Impact: Upgrade

JPS-06004: Cannot migrate an unknown user. Reason {0}.
   Cause: Cannot migrate this user.
   Action: Verify that the user is correctly specified.
   Level: 1
   Type: WARNING
   Impact: Upgrade

JPS-06005: Cannot get password of user {0}. Reason {1}.
   Cause: Cannot get this user password.
   Action: Verify that the password is correctly specified.
   Level: 1
   Type: WARNING
   Impact: Upgrade
JPS-06006: Cannot migrate user {0}. Reason {1}.
  Cause: Cannot migrate this user name.
  Action: Verify that the user name is correctly specified.
  Level: 1
  Type: WARNING
  Impact: Upgrade

JPS-06007: Cannot migrate an unknown role. Reason {0}.
  Cause: Cannot migrate this role.
  Action: Verify that the role is correctly specified.
  Level: 1
  Type: WARNING
  Impact: Upgrade

JPS-06008: Cannot migrate role {0}. Reason {1}.
  Cause: Cannot migrate this role name.
  Action: Verify that the role name is correctly specified.
  Level: 1
  Type: WARNING
  Impact: Upgrade

JPS-06009: Cannot migrate any member of role {0}. Reason {1}.
  Cause: Cannot migrate members.
  Action: Verify that the members are correctly specified.
  Level: 1
  Type: WARNING
  Impact: Upgrade

JPS-06010: Cannot migrate an unknown member of role {0}. Reason {1}.
  Cause: Cannot migrate this member.
  Action: Verify that the member is correctly specified.
  Level: 1
  Type: WARNING
  Impact: Upgrade

JPS-06011: Cannot migrate member {0} of role: {1}. Reason {2}.
  Cause: Cannot migrate this member name.
  Action: Verify that the member name is correctly specified.
  Level: 1
  Type: WARNING
  Impact: Upgrade

JPS-06012: Cannot migrate a global grant. Reason {0}.
  Cause: Could not migrate a global grant. Reason {0}.
Action: Verify that the grant is correctly specified.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06013: Cannot migrate an application grant. Reason {0}.
Cause: Could not migrate an application grant. Reason {0}.
Action: Verify that the application grant is correctly specified.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06014: Cannot migrate an indirect password for {0}. Reason {1}.
Cause: Could not migrate an indirect password due to an exception.
Action: Verify that the indirect password is correctly specified.

Level: 1
Type: WARNING
Impact: Upgrade

JPS-06015: Cannot migrate an indirect password for {0} because the specified realm is null.
Cause: Could not migrate an indirect password because the given realm was null.
Action: Provide a non-null realm.

Level: 1
Type: WARNING
Impact: Upgrade

JPS-06016: Cannot migrate an indirect password for {0} because the specified user name is null.
Cause: Could not migrate an indirect password because the given user name was null.
Action: Provide a non-null user name.

Level: 1
Type: WARNING
Impact: Upgrade

JPS-06017: Cannot migrate an indirect password for {0} because the specified realm does not exist.
Cause: Could not migrate an indirect password because the input realm does not exist.
Action: Provide an existing realm.

Level: 1
Type: WARNING
Impact: Upgrade
JPS-06018: Cannot migrate an indirect password for {0} because the specified user does not exist.
Cause: Could not migrate an indirect password because the input user does not exist.
Action: Provide an existing user.
Level: 1
Type: WARNING
Impact: Upgrade

JPS-06019: The identity store associated with context {0} is missing in jps-config.xml.
Cause: While migration of a policy store, found that the context, specified as containing the associated identity store {0}, did not exist in jps-config.xml.
Action: Provide a context to associate identity store that is present in jps-config.xml.
Level: 1
Type: ERROR
Impact: Configuration

JPS-06020: The principal class {0} specified in the source policy store cannot be loaded. Reason {1}.
Cause: Could not load a class. Reason {0}.
Action: Ensure the class is in the class path.
Level: 1
Type: ERROR
Impact: Upgrade

JPS-06021: Cannot migrate the credentials in the folder {0}. Reason: {1}.
Cause: Cannot migrate the credentials in this folder.
Action: Check the folder in the source credential store.
Level: 1
Type: WARNING
Impact: Upgrade

JPS-06022: Cannot determine the folder to be migrated.
Cause: The credential store has more than one folder and the folder to be migrated was not defined.
Action: Specify the folder to be migrated.
Level: 1
Type: WARNING
Impact: Upgrade

JPS-06023: The input file {0} specified for migration or upgrade is not valid.
Cause: The file {0} was non-readable, empty, or did not exist.
Action: Provide a valid file.
Level: 1
Type: ERROR
Impact: Upgrade

**JPS-06024: Cannot initialize the destination identity store.**
*Cause:* One or more required configuration properties were not be properly defined.
*Action:* Check the configuration of the destination identity store.

Level: 1
Type: ERROR
Impact: Upgrade

**JPS-06025: There are undefined credential properties for the destination identity store.**
*Cause:* One or more required configuration properties for credentials were not defined.
*Action:* Check the configuration of the destination identity store.

Level: 1
Type: ERROR
Impact: Upgrade

**JPS-06026: Cannot get credentials for the destination identity store from the domain credential store.**
*Cause:* Credentials were not found in the domain credential store.
*Action:* Ensure that the domain credential store has the appropriate credentials.

Level: 1
Type: ERROR
Impact: Upgrade

**JPS-06027: Cannot migrate the specified realm.**
*Cause:* The specified realm was not found in the source store.
*Action:* Specify a valid realm name.

Level: 1
Type: ERROR
Impact: Upgrade

**JPS-06028: The required identity store property \{0\} required for migration is undefined.**
*Cause:* A property required for migration was not configured in the identity store.
*Action:* Specify the missing configuration property.

Level: 1
Type: ERROR
Impact: Other

**JPS-06029: JAZN properties cannot be read from config file \{0\}.**
*Cause:* JAZN properties could not be read from config file \{0\}.
*Action:* Check the configuration file and try again.
Level: 1
Type: ERROR
Impact: Upgrade

JPS-06030: The required JAZN property {0} could not be read.
Cause: A required JAZN property {0} could not be read.
Action: Check the configuration file and try again.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06031: No application is configured in the source policy store.
Cause: No application was configured in the source policy store.
Action: Check the source policy store.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06032: Unable to determine the application policy to migrate.
Cause: More than one application was configured in the source policy store.
Action: Check the source policy store.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06033: The source credential store contains no credentials.
Cause: The requested credential was not found in the credential store.
Action: Ensure that the credential store has the requested credential.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-06034: The folder {0} is missing in the credential store.
Cause: The requested map name was not found in the credential store.
Action: Ensure that the credential store contains the requested map name.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-06035: The destination file {0} already exists; the existing LDIF file will not be appended or overwritten.
Cause: The destination file is already present.
Action: Delete the destination file, or provide the name of a non-existing file.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-06036: Cannot determine the default realm to migrate file {0}. Reason {1}.
Cause: An internal error occurred while determining the default realm.
Action: Check log files and try again.

Level: 1

Type: WARNING
Impact: Programmatic

JPS-06037: Cannot initialize the source credential store.
Cause: The configuration for the credential store was invalid.
Action: Verify that the credential store configuration is correct and try again.

Level: 1

Type: ERROR
Impact: Upgrade

JPS-06038: Cannot initialize the destination credential store.
Cause: The configuration for the credential store was invalid.
Action: Verify that the credential store configuration is correct and try again.

Level: 1

Type: ERROR
Impact: Upgrade

JPS-06039: Cannot migrate property {0} of user {1}. Reason {2}.
Cause: Cannot migrate property {0} for user {1}. Reason {2}.
Action: Check the log files and retry migrating.

Level: 1

Type: WARNING
Impact: Upgrade

JPS-06040: Cannot migrate property {0} of role {1}. Reason {2}.
Cause: Cannot migrate property {0} for role {1}. Reason {2}.
Action: Check the log files and retry migrating.

Level: 1

Type: WARNING
Impact: Upgrade

JPS-06041: The switch or keyword " {0} " is not applicable to " {1} = {2} ".
Cause: One or more optional switches or keywords were invalid.
Action: Refer to the command documentation for the correct usage.

Level: 1

Type: ERROR
Impact: Requests/Responses
JPS-06042: Invalid scope for migration.
   Cause: Value of scope keyword was invalid.
   Action: Enter only one of the defined values/alias of scope as a value for the keyword scope.

   Level: 1
   Type: ERROR
   Impact: Requests/Responses

JPS-06043: The source application is undefined but required to migrate application-specific policies.
   Cause: Optional keyword srcApp was not defined.
   Action: Specify, in the parameter srcApp, the value of the application whose policies are to be migrated.

   Level: 1
   Type: ERROR
   Impact: Requests/Responses

JPS-06044: Cannot create the temporary file {0}.
   Cause: Could not write the XML file.
   Action: Check permissions or disk space in the java.io.tmpdir directory.

   Level: 1
   Type: ERROR
   Impact: Programmatic

JPS-06045: Cannot parse the file {0}.
   Cause: Could not parse the XML file.
   Action: Check that the file is present in the java.io.tmpdir directory, and that it contains well-formed XML.

   Level: 1
   Type: ERROR
   Impact: Programmatic

JPS-06046: Cannot delete the file {0}.
   Cause: The temp file could not be deleted.
   Action: Check that the file is not being accessed by other applications.

   Level: 1
   Type: ERROR
   Impact: Programmatic

JPS-06047: Cannot migrate user credentials of user {0}.
   Cause: The source identity store was configured not to give cleartext password.
   Action: Configure the source identity store to obfuscate password.

   Level: 1
   Type: WARNING
Impact: Configuration

JPS-06048: Null values passed in for username or application stripes.
Cause: The user name or the application stripe was null.
Action: The user name must not be null. The list of application names must be null if only global policies are to be extracted.

Level: 1
Type: WARNING
Impact: Programmatic

JPS-06049: Application list is empty. Only global policies will be extracted.
Cause: The list of applications was empty.
Action: Only global policies are collected.

Level: 1
Type: NOTIFICATION
Impact: Programmatic

JPS-06050: file {0} was not found
Cause: The xml file was not found.
Action: Check if the file is present in the java.io.tmpdir directory.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-06051: Processing of privilege roles is supported only when migrating an XML Policy store to an LDAP Policy Store.
Cause: Processing of privilege roles was supported only when migrating an XML policy store to an LDAP policy store.
Action: Make sure that the source store is XML-based and the destination store is LDAP-based.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06052: Error while processing a PermissionSet grant.
Cause: Error encountered while processing permissionSet grant.
Action: Check log files for details.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06053: Processing privilege roles failed. Cause {0}
Cause: The processing of privilege roles failed.
Action: Check log files for details.

Level: 1
Type: ERROR
Impact: Upgrade

JPS-06054: Error in creating resourceTypes in destination store. Cause {0}
Cause: Error encountered while creating resourceTypes in destination store.
Action: Check log files for details.
Level: 1

Type: ERROR
Impact: Upgrade

JPS-06055: Location of the ldif file containing resourceType definitions cannot be null.
Cause: Location of the LDIF file containing resourceType definitions was null or not found.
Action: Provide the absolute path for the resource file.
Level: 1

Type: ERROR
Impact: Upgrade

JPS-06056: Error while reading resource type file {0}.
Cause: Error encountered while reading the resource type file {0}.
Action: Ensure that the file exists and that it has the expected format.
Level: 1

Type: ERROR
Impact: Upgrade

JPS-06057: Resource type name or matcher class cannot be null.
Cause: Resource type name or matcher class was null.
Action: Provide a valid name and matcher class for the resource type.
Level: 1

Type: ERROR
Impact: Upgrade

JPS-06058: Permission class {0} with more than one matching resource type found.
Cause: Permission class had more than one matching resource type.
Action: Ensure that the a permission class has just one matching resource type.
Level: 1

Type: ERROR
Impact: Upgrade

JPS-06059: A grant entry containing {0} as one of principals has multiple principal entries. This entry cannot be processed.
Cause: A grant for a privilege role had multiple principals.
Action: Ensure that the privilege role grant has a single principal.
Level: 1
**Type:** WARNING  
**Impact:** Upgrade

**JPS-06060: The resource type definition file is missing.**  
**Cause:** The resource type definition file was not found.  
**Action:** Provide the absolute path location for the resource definition file in LDIF format when using the option procPrivOption.

**Level:** 1  
**Type:** ERROR  
**Impact:** Upgrade

**JPS-06061: The switch or keyword " {0} " is not defined for " {1} = {2} ".**  
**Cause:** One or more optional switches or keywords were invalid.  
**Action:** Refer to the command documentation for the correct usage.

**Level:** 1  
**Type:** ERROR  
**Impact:** Requests/Responses

**JPS-06062: Application role {0} corresponding to a member application role not defined.**  
**Cause:** Application role not defined.  
**Action:** Check logs for details.

**Level:** 1  
**Type:** ERROR  
**Impact:** Upgrade

**JPS-06063: No Matching resource type definition found for permission class {0}.**  
**Cause:** Permission class representing resource granted to a privileged role does not have corresponding resource type definition.  
**Action:** Make sure a permission class has one matching resource type.

**Level:** 1  
**Type:** ERROR  
**Impact:** Upgrade

**JPS-06064: Error getting the application role {0} from the source policy store**  
**Cause:** The application role was either not present or defined multiple times.  
**Action:** Check the source policy store and make sure that the application role is uniquely defined.

**Level:** 1  
**Type:** ERROR  
**Impact:** Upgrade

  Type: ERROR
  Impact: Upgrade

JPS-06075: Unsupported resource type file format. Use either an ldif file or a jazn-data with only resource type definitions.
  Cause: Unsupported resource type file format.
  Action: Use either an ldif file or a jazn-data with only resource type definitions.
  Level: 1
  Type: ERROR
  Impact: Upgrade

JPS-06076: A Resource Type referred by {} is expected to have a matching class {} but has {}.
  Cause: A Resource Type referred by a Permission is expected to have the same matching class as defined in the Permission
  Action: Make sure a permission class has one matching resource type with the same class name.
  Level: 1
  Type: ERROR
  Impact: Upgrade

JPS-06077: A Resource Type referred by {} is not defined.
  Cause: A Resource Type referred by a Permission is not defined.
  Action: Make sure a permission class has one matching resource type.
  Level: 1
Type: ERROR
Impact: Upgrade
JPS-06078: Cannot migrate keystore/stripe {0}/{1}. Reason {2}.
  Cause: Cannot migrate the keystore in this stripe.
  Action: Check the keystore and stripe in the source keystore service.
  Level: 1
Type: WARNING
Impact: Upgrade
JPS-06079: Cannot determine the stripe to be migrated.
  Cause: The keystore service has more than one stripes and the stripe to be
  migrated was not defined.
  Action: Specify the stripe to be migrated.
  Level: 1
Type: WARNING
Impact: Upgrade
JPS-06080: The source keystore service contains no keystore within the given
  application stripe.
  Cause: The requested keystore was not found in the keystore service.
  Action: Ensure that the keystore service has the requested keystore.
  Level: 1
Type: ERROR
Impact: Requests/Responses
JPS-06082: Cannot initialize the source keystore service.
  Cause: The configuration for the keystore service was invalid.
  Action: Verify that the keystore service configuration is correct and try again.
  Level: 1
Type: ERROR
Impact: Upgrade
JPS-06083: Cannot initialize the destination keystore service.
  Cause: The configuration for the keystore service was invalid.
  Action: Verify that the keystore service configuration is correct and try again.
  Level: 1
Type: ERROR
Impact: Upgrade
JPS-06084: Cannot clean the destination keystore service. Reason {0}.
  Cause: A codebase grant was found without the required permissions.
  Action: Set the right permissions to the codebase grant.
  Level: 1
Type: WARNING
Impact: Upgrade

JPS-06085: Resource types not defined for the application \(0\).

Cause: Resource Types not found for the application \(0\).

Action: Define the resource types for the application \(0\).

Level: 1

Type: ERROR
Impact: Upgrade

JPS-06086: Cannot upgrade policies for application \(0\).

Cause: Exception during policy upgradation.

Action: Check the Causing exception and fix the error.

Level: 1

JPS-06090: Duplicate app-role \(0\) present in source.

Cause: Duplicate app-roles are present in source.

Action: See error message.

Level: 1

Type: WARNING
Impact: Upgrade
JPS-06091: Duplicate member {0} present in an app-role in source.
  Cause: Duplicate members are present in an app-role in source.
  Action: See error message.
  Level: 1
  Type: WARNING
  Impact: Upgrade

JPS-06092: Can not overwrite global policy.
  Cause: Can not overwrite global policy.
  Action: Do not set overwrite to true
  Level: 1
  Type: ERROR
  Impact: Upgrade

JPS-06100: Policy Store version {0} and Oracle Platform Security Services Version {1} are not compatible.
  Cause: The policy store version and the version of Oracle Platform Security Services does not match
  Action: Upgrade your binaries or your policy store.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-06101: Cannot initialize the source auditstore service.
  Cause: The configuration for the audit store was invalid.
  Action: Verify that the audit store configuration is correct and try again.
  Level: 1
  Type: ERROR
  Impact: Upgrade

JPS-06102: Cannot initialize the destination auditstore service.
  Cause: The configuration for the audit store was invalid.
  Action: Verify that the audit store configuration is correct and try again.
  Level: 1
  Type: ERROR
  Impact: Upgrade

JPS-06103: Default Admin Role {0} not found in the policy domain {1} in the destination policy store
  Cause: The destination policy store may not conform to leates version and need to be upgraded
  Action: See error message.
  Level: 1
  Type: WARNING
Impact: Security

JPS-06104: Default Admin Role {0} not found in the application {1} in the destination policy store
Cause: The destination policy store may not conform to latest version and need to be upgraded
Action: See error message.
Level: 1
Type: WARNING
Impact: Security

JPS-06105: Default system Admin Role {0} not found in the destination policy store
Cause: The destination policy store may not conform to latest version and need to be upgraded
Action: See error message.
Level: 1
Type: WARNING
Impact: Security

JPS-06106: Instantiation of bootstrap credential store specified in file {0} failed. Reason {1}
Cause: The configuration provided is not valid.
Action: Provide a valid configuration file which has configuration for bootstrap credential.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-06107: Instantiation of credential store at path {0} failed. Reason: {1}
Cause: An underlying exception prevented initialization of credentials file.
Action: Check the cause of the exception and fix it.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-06108: Import/Export of keys failed. Reason: {0}
Cause: An underlying exception prevented exporting/importing of key.
Action: Check the cause of the exception and fix it.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-06109: Cannot read key from key file in Directory {0}. Reason {1}.
Cause: An underlying exception prevented reading of key.
Action: Check the cause of the exception and fix it.
Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-06110: Key file Directory {0} does not have write permissions.**
Cause: Key file directory not writable.
Action: Change the permissions of the directory.

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-06111: Key file Directory {0} does not have read permissions.**
Cause: Key file directory is not readable.
Action: Change the permissions of the directory.

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-06112: Key file Directory {0} does not exist.**
Cause: The path specified either donnot exist or is not a directory.
Action: Provide a valid directory.

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-06113: Configuration file {0} is not valid. It is either not present or does not have read permissions.**
Cause: The file is either not present or is not readable.
Action: Provide a valid file.

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-06114: Key is not present in the key file in Directory {0}.**
Cause: Export might have not completed successfully.
Action: Provide key file that has key in it.

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-06115: Empty DB username information. Please make sure to provide the correct jdbcUser info.**
Cause: Empty DB username information.
Action: Please make sure to provide the correct jdbcUser info.
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-06116: Empty DB password information. Please make sure to provide the correct jdbcPassword info.
Cause: Empty DB password information.
Action: Please make sure to provide the correct jdbcPassword info.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-06117: Empty JDBC host and port information. Please make sure to provide the correct jdbcUrl info.
Cause: Empty DB host and port information.
Action: Please make sure to provide the correct jdbcUrl info.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-06118: Empty JDBC Driver information. Please make sure to provide the correct jdbcDriver info.
Cause: Empty JDBC Driver information.
Action: Please make sure to provide the correct jdbcDriver info.

Level: 1
Type: ERROR
Impact: Requests/Responses

Cause: No import was performed or import was not sucessfull.
Action: import the key(s) again.

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-06120: Policystore is already upgraded, so it will not be upgraded again.
Cause: Policystore is already upgraded.
Action: Policystore will not be upgraded again.

Level: 1
Type: WARNING
Impact: Upgrade

JPS-06121: Keystore is already upgraded, so it will not be upgraded again.
Cause: Keystore is already upgraded.
Action: Keystore will not be upgraded again.
Level: 1

JPS-06501: Keystore {0} in stripe {1} already exists  
Cause: Keystore with the given name already existed.  
Action: Specify a unique keystore name.

Level: 1  
Type: WARNING  
Impact: Configuration  

JPS-06502: Failed to read keystore. Reason {0}  
Cause: Could not read the keystore.  
Action: Verify the keystore location and that sufficient permissions are in place.

Level: 1  
Type: WARNING  
Impact: Configuration  

JPS-06503: Failed to write keystore. Reason {0}  
Cause: Could not read the keystore.  
Action: Verify the keystore location, that sufficient permissions are in place and that sufficient disk space is available.
Level: 1
Type: WARNING
Impact: Configuration

JPS-06504: Failed to perform cryptographic operation
Cause: The java provider did not support this cryptographic operation.
Action: Verify that a provider that supports this algorithm/padding/key is configured.

Level: 1
Type: WARNING
Impact: Configuration

JPS-06505: Failed to generate certificate request
Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-06506: Key generation algorithm not supported
Cause: An unsupported key-pair generation algorithm was used.
Action: Specify a supported key-pair generation algorithm.

Level: 1
Type: WARNING
Impact: Configuration

JPS-06507: Root CA import failed.
Cause: The root CA certificate and/or key file was malformed.
Action: Verify that the root CA certificate and/or key files is valid.

Level: 1
Type: WARNING
Impact: Configuration

JPS-06508: Failed to generate CA signed certificate.
Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-06509: The keystore has been moved or deleted.
Cause: The keystore did not exist at this location.
Action: Verify that the location of keystore is correct.

Level: 1
Type: WARNING
Impact: Configuration

JPS-06510: The keystore location property is not configured, or the configured value {0} is invalid.
Cause: The keystore location was not specified.
Action: Check the value of the location attribute.

Level: 1
Type: ERROR
Impact: Configuration

JPS-06511: Cannot create keystore at {0}.
Cause: Could not create the keystore.
Action: Verify the store location, that sufficient permissions are in place, and that sufficient disk space is available.

Level: 1
Type: ERROR
Impact: Configuration

JPS-06513: Failed to save keystore. Reason :
Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-06514: Opening of file based keystore failed. Reason :
Cause: Keystore could not be opened
Action: Contact system administrator

Level: 1
Type: WARNING
Impact: Compliance

JPS-06515: Refreshing of file based keystore failed. Reason {0}
Cause: Refresh of keystore failed
Action: Contact system administrator

Level: 1
Type: WARNING
Impact: Compliance

JPS-06516: Failed to get credential store. Reason {0}
Cause: Could not get credential store.
Action: Verify credential store is correctly configured and initialized.

Level: 1
Type: WARNING
Impact: Compliance
JPS-06517: Failed to create the keystore \{0\} in stripe \{1\}.
  Cause:
  Action:
  Level: 1
Type: NOTIFICATION
Impact: Compliance
JPS-06518: Keystore \{0\} in stripe \{1\} does not exist.
  Cause:  Could not perform this operation since the keystore did not exist.
  Action:  Specify an existing keystore name for this operation.
  Level: 1
Type: WARNING
Impact: Configuration
JPS-06519: Failed to get/set credential with map \{0\} and key \{1\} in bootstrap credstore. Reason \{2\}
  Cause:  Credential store was not available or permissions were not in place.
  Action:  Verify credential store is correctly configured and permissions are granted.
  Level: 1
Type: WARNING
Impact: Configuration
JPS-06520: Failed to encode/decode certificate or public key.
  Cause:
  Action:
  Level: 1
Type: NOTIFICATION
Impact: Compliance
JPS-06521: Invalid admin password, operation not permitted
  Cause:  Invalid admin password was specified.
  Action:  Specify the correct admin password to perform this operation.
  Level: 1
Type: WARNING
Impact: Configuration
JPS-06522: Failed to roll over keystore master key.
  Cause:
  Action:
  Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-06523: Failed to reset keystore administrator password.
Cause:
Action:
Level: 1

Type: NOTIFICATION
Impact: Compliance

JPS-06524: Failed to read certificates from keystore.

Type: WARNING
Impact: Compliance

JPS-06638: KeyStore Entry required were not given.
   Cause: KeyStore Entry required were not given.
   Action: Provide KeyStore Entry as input.
   Level: 1

Type: WARNING
Impact: Configuration

JPS-06639: The following aliases were encountered in the keystore: {0}
   Cause: 
   Action: 
   Level: 1

Type: NOTIFICATION
Impact: Compliance

JPS-06640: Empty alias specified for importing wallet keystore, so skipping import
   Cause: Key aliases of wallet keystore to import should not be empty string.
   Action: Ensure that key aliases of wallet keystore to import are not empty string.
   Level: 1

Type: WARNING
Impact: Configuration

JPS-06641: Invalid keySize format : {0}
   Cause: Cannot set key entry for non-existent stripe and keystore
   Action: This operation is not supported
   Level: 1

Type: WARNING
Impact: Compliance

JPS-06642: Can not determine the JAVA/JRE home, so could not find the cacerts file.
   Cause: Neither environment variable JAVA_HOME nor system property java.home is specified.
   Action: Ensure that either environment variable JAVA_HOME or system property java.home is specified.
   Level: 1

Type: WARNING
Impact: Compliance

JPS-06643: JDK cacerts file {0} in use.
   Cause: 
   Action: 
   Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-06644: Failed to import JDK cacerts to system/publiccacerts.
Cause: Importing JDK CA cert failed.
Action: check log for more details.

Level: 1
Type: WARNING
Impact: Compliance

JPS-06645: JDK cacerts [0] does not exist.
Cause: JDK cacerts file [0] does not exist.
Action: Check the location of JDK cacerts files.

Level: 1
Type: WARNING
Impact: Compliance

JPS-06646: Private or Secret key found in Trust Store
Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Compliance

JPS-06647: Aggregation of two trust stores failed
Cause: There is a private or secret key entry in the truststore
Action: Remove the private or secret key entries from the truststore

Level: 1
Type: WARNING
Impact: Compliance

JPS-07000: Provide a valid jps configuration file.
Cause: The jps configuration file was invalid.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-07001: Provide a valid application name.
Cause: Application ID was invalid.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security
JPS-07002: Provide a valid jazn-data file.
  Cause: The jazn-data file was invalid.
  Action: Refer to the log files for details and correct the error.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-07003: Provide a valid folder name.
  Cause: The patch delta folder was invalid.
  Action: Provide a valid folder for generating patch delta files.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-07004: ApplicationPolicy object is null/empty.
  Cause: ApplicationPolicy object was null
  Action: Make sure to create a not null ApplicationPolicy object
  Level: 1
  Type: ERROR
  Impact: Security

JPS-07005: The "{0}" jazn data file does not exists.
  Cause: Jazn data file does not exists.
  Action: Make sure to provide an existing jazn-data file.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-07006: "{0}" Not a folder. Please provide a valid folder.
  Cause: Not a folder.
  Action: Make sure to provide a valid folder.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-07007: "{0}" folder does not exists
  Cause: The folder does not exists.
  Action: Make sure to provide an existing folder.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-07008: The {0} jps configuration file does not exist.
  Cause: The jps configuration file does not exists.
Action: Make sure to provide an existing jps configuration file.
Level: 1
Type: ERROR
Impact: Security

JPS-07009: The "{0}" folder for generating patch delta files does not exist.
Cause: The folder to generate the patch delta files does not exists.
Action: Make sure to provide an existing folder.
Level: 1
Type: ERROR
Impact: Security

JPS-07010: The AppRole "{0}" cannot be created. Cause {1}.
Cause: The approle could not be created.
Action: Refer to the log files for details and correct the error.
Level: 1
Type: WARNING
Impact: Security

JPS-07011: The AppRole object is null while persisting to Addition Safe Changes.
Cause: The required parameter was null.
Action: Ensure to provide a valid AppRole Object.
Level: 1
Type: ERROR
Impact: Security

JPS-07012: The ResourceType object is null while persisting to Addition Safe Changes.
Cause: The required parameter was null.
Action: Ensure to provide a valid ResourceType Object.
Level: 1
Type: ERROR
Impact: Security

JPS-07013: The AppRole list is null/empty while persisting to Addition Safe Changes.
Cause: The required parameter was null.
Action: Ensure to provide a valid AppRole List.
Level: 1
Type: ERROR
Impact: Security

JPS-07014: The Resource object is null while persisting to Addition Safe Changes.
Cause: The required parameter was null.
JPS-07015: The PermissionSet object is null while persisting to Addition Safe Changes.
Cause: The required parameter was null.
Action: Ensure to provide a valid PermissionSet object.

Level: 1
Type: ERROR
Impact: Security

JPS-07016: The Association object is null while persisting to Addition Safe Changes.
Cause: The required parameter was null.
Action: Ensure to provide a valid Association object.

Level: 1
Type: ERROR
Impact: Security

JPS-07017: Internal Error.
Cause: That was an internal error.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: ERROR
Impact: Security

JPS-07018: Application Role: "[0]" cannot be added. Reason {1}.
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

Level: 1
Type: WARNING
Impact: Security

JPS-07019: Permission Set: "[0]" cannot be added. Reason {1}.
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

Level: 1
Type: WARNING
Impact: Security

JPS-07020: Resource: "[0]" cannot be added. Reason {1}.
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

Level: 1
Type: WARNING
Impact: Security

JPS-07021: Resource Type "[0]" cannot be added. Reason [1].
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

Level: 1
Type: WARNING
Impact: Security

JPS-07022: Member: name "[0]" ,class "[1]" cannot be granted an application role: "[2]". Reason [3].
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

Level: 1
Type: WARNING
Impact: Security

JPS-07023: Resource Actions: name "[0]", actions "[1]" cannot be added in permission set: "[2]". Reason [3].
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

Level: 1
Type: WARNING
Impact: Security

JPS-07024: Permission: "[0]" cannot be granted to grantee "[1]". Reason [2].
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

Level: 1
Type: WARNING
Impact: Security

JPS-07025: Permission set: "[0]" cannot be granted to grantee "[1]". Reason [2].
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

Level: 1
Type: WARNING
Impact: Security

JPS-07026: Application Role: "[0]" cannot be modified. Reason [1].
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

Level: 1
Type: WARNING
Impact: Security

JPS-07027: Permission Set: "[0]" cannot be modified. Reason {1}.
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

Level: 1
Type: WARNING
Impact: Security

JPS-07028: Resource: "[0]" cannot be modified. Reason {1}.
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

Level: 1
Type: WARNING
Impact: Security

JPS-07029: Resource Type: "[0]" cannot be modified. Reason {1}.
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

Level: 1
Type: WARNING
Impact: Security

JPS-07030: Application Role: "[0]" cannot be deleted. Reason {1}.
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

Level: 1
Type: WARNING
Impact: Security

JPS-07031: Permission Set: "[0]" cannot be deleted. Reason {1}.
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

Level: 1
Type: WARNING
Impact: Security

JPS-07032: Resource: "[0]" cannot be deleted. Reason {1}.
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.
Level: 1  
Type: WARNING  
Impact: Security  

JPS-07033: Resource Type: "[0]" cannot be deleted. Reason {1}  
Cause: Policy store reported an error.  
Action: Check the Reason and fix the problem.

Level: 1  
Type: WARNING  
Impact: Security

JPS-07034: Member: name "[0]", class "[1]" cannot be revoked from application role: "[2]". reason [3].  
Cause: Policy store reported an error.  
Action: Check the Reason and fix the problem.

Level: 1  
Type: WARNING  
Impact: Security

JPS-07035: Resource Actions: name "[0]", actions "[1]" cannot be deleted from permission set: "[2]". Reason [3].  
Cause: Policy store reported an error.  
Action: Check the Reason and fix the problem.

Level: 1  
Type: WARNING  
Impact: Security

JPS-07036: Permission: "{0}" cannot be revoked from grantee: "{1}". Reason [2].  
Cause: Policy store reported an error.  
Action: Check the Reason and fix the problem.

Level: 1  
Type: WARNING  
Impact: Security

JPS-07037: Permission set: "{0}" cannot be revoked from grantee: "{1}". Reason [2].  
Cause: Policy store reported an error.  
Action: Check the Reason and fix the problem.

Level: 1  
Type: WARNING  
Impact: Security

JPS-07038: Additions cannot be read. Reason [0].  
Cause: Policy store reported an error.  
Action: Check the Reason and fix the problem.
Level: 1
Type: WARNING
Impact: Security
JPS-07039: Deletions cannot be read. Reason {0}.
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

Level: 1
Type: WARNING
Impact: Security
JPS-07040: Modifications cannot be read. Reason {0}.
Cause: Policy store reported an error.
Action: Check the Reason and fix the problem.

JPS-07143: Application roles deletion (skipped, not applicable).
  Cause: Deletion of application roles (skipped, not applicable)
  Action: No actions are required.
  Level: 1
  Type: NOTIFICATION
  Impact: Security

JPS-07144: Role categories deletion (skipped, not applicable).
  Cause: Deletion of role categories (skipped, not applicable)
  Action: No actions are required.
  Level: 1
  Type: NOTIFICATION
  Impact: Security

JPS-07145: Permission set entries deletion (skipped, not applicable).
  Cause: Deletion of permission sets (skipped, not applicable)
  Action: No actions are required.
  Level: 1
  Type: NOTIFICATION
  Impact: Security

JPS-07146: Resource entries deletion (skipped, not applicable).
  Cause: Deletion of resources (skipped, not applicable)
  Action: No actions are required.
  Level: 1
  Type: NOTIFICATION
  Impact: Security

JPS-07147: Resource type entries deletion (skipped, not applicable).
Cause: Deletion of resource types (skipped, not applicable)
Action: No actions are required.
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07148: Deletions not applicable when the silent flag is on.
Cause: Deletions not applicable when the silent flag is enabled
Action: No actions are required.
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07150: You can set only one of the two flags - {0} or {1} but not both.
Cause: Dual flags have been set. This is not permitted
Action: Set only one of the two flags - {0} or {1}
Level: 1
Type: ERROR
Impact: Security

JPS-07151: role member {0} of application role: {1} not found.
Cause: role member {0} of application role: {1} not found
Action: Add back role member: {0} or run patching analysis again
Level: 1
Type: ERROR
Impact: Security

JPS-07152: Name collisions have been identified. The patch process halted.
Eliminate the collisions by renaming or removing artifacts in production store.
Please find artifacts which have name collision between production store and patch version in file {0}.
Cause: Name collisions exist.
Action: Eliminate the name collisions by renaming or removing the policy artifacts in production store.
Level: 1
Type: ERROR
Impact: Security

JPS-07156: {0} Policy rule entries were added.
Cause: {0} Policy rule entries added.
Action: No actions are required.
Level: 1
Type: NOTIFICATION
Impact: Security
JPS-07157: {0} Policy entries were added.
 Cause: {0} Policy entries added.
 Action: No actions are required.

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07158: {0} Policy to permission set entries added.
 Cause: {0} Policy to permission set entries added.
 Action: No actions are required.

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07159: {0} Policy to policy rule entries were added.
 Cause: {0} Policy to policy rule entries added.
 Action: No actions are required.

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07160: {0} Policy to grantee entries added.
 Cause: {0} Policy to grantee entries added.
 Action: No actions are required.

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07161: {0} Policies entries were modified.
 Cause: {0} Policies entries modified.
 Action: No actions are required.

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07162: {0} Policy rules entries were modified.
 Cause: {0} Policy rules entries modified.
 Action: No actions are required.

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07163: {0} Policy rules were deleted from policies.
 Cause: Deleted {0} policy rules from policies.
Action: No actions are required.
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07164: {0} Principals were deleted from policy.
  Cause: Deleted {0} principals from policy.
  Action: No actions are required.
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07165: {0} Permission Sets were deleted from policy.
  Cause: Deleted {0} Permission Set from policy.
  Action: No actions are required.
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07166: {0} Policy entries were deleted.
  Cause: {0} Policy entries deleted.
  Action: No actions are required.
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07167: {0} Policy rule entries were deleted.
  Cause: {0} Policy rule entries deleted.
  Action: No actions are required.
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07168: Policy rule entry is null.
  Cause: {0} Policy rule entry is null.
  Action: No actions are required.
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07169: Delta between patch jazn-data and production policystore was written to report in {0}.
  Cause: Delta between patch jazn-data and production policystore was written to report in {0}.
**Action:** No actions are required.

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Security

**JPS-07170:** Delta between patch jazn-data and production policystore was calculated in {0}.

**Cause:** Delta between patch jazn-data and production policystore was calculated in {0}.

**Action:** No actions are required.

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Security

**JPS-07171:** Privilege changes of user or group report between baseline jazn-data and production policystore was created in {0}.

**Cause:** User or group’s privilege changes report between baseline jazn-data and production policystore was created in {0}.

**Action:** No actions are required.

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Security

**JPS-07172:** Delta between production and baseline jazn-data was validated in {0}.

**Cause:** Policy customization between production and baseline jazn-data was validated in {0}.

**Action:** No actions are required.

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Security

**JPS-07173:** Enterprise role privilege changes between production and baseline jazn-data was validated in {0}.

**Cause:** Enterprise user or role privilege changes between production and baseline jazn-data was validated in {0}.

**Action:** No actions are required.

**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Security

**JPS-07174:** Enterprise user or role privilege validation failed for record: {0}.

**Cause:** Enterprise user or role privilege validation failed for record

**Action:** Check the usergroup-privilege-validate-result file for more details

**Level:** 1  
**Type:** WARNING
Impact: Security

JPS-07175: Policy change validation failed for record: {0}.
  Cause: Policy change validation failed for record
  Action: Check the policy-validate-result file for more details
  Level: 1
  Type: WARNING
  Impact: Security

JPS-07176: Patch jazn data file {0} will be ignored since this is forceTag mod.
  Cause: Patch jazn data file {0} will be ignored since this is forceTag mod.
  Action: No action
  Level: 1
  Type: WARNING
  Impact: Security

JPS-07177: Patch application policy name {0} will be ignored since this is forceTag mod.
  Cause: Patch application policy name {0} will be ignored since this is forceTag mod.
  Action: No action
  Level: 1
  Type: WARNING
  Impact: Security

JPS-07178: Patch delta folder {0} will be ignored since this is forceTag mod.
  Cause: Patch delta folder {0} will be ignored since this is forceTag mod.
  Action: No action
  Level: 1
  Type: WARNING
  Impact: Security

JPS-07179: Tagging {0} {1} completed in {2}.
  Cause: Tagging {0} {1} completed in {2}.
  Action: No action
  Level: 1
  Type: NOTIFICATION
  Impact: Security

JPS-07500: Trust protocol {0} is not supported.
  Cause: Requested trust protocol is not supported
  Action: Provide correct trust protocol
  Level: 1
  Type: ERROR
Impact: Security

JPS-07501: Token context is invalid.
Cause: Token context object is empty or does not contain required parameters
Action: Check token context object contains required parameter
Level: 1
Type: ERROR
Impact: Security

JPS-07502: Trust Service token provider \{0\} is not found.
Cause: Token provider not configured in the jps-config.xml file
Action: Check jps-config.xml file and verify that requested token provider is correctly configured
Level: 1
Type: ERROR
Impact: Security

JPS-07503: Trust Service token provider class name \{0\}.
Cause: Token provider class loading
Action: No action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07504: Trust Service Keystore initialization failed.
Cause: Keystore is missing or not configured correctly
Action: Check the keystore and ensure that necessary certificates and keys are present
Level: 1
Type: ERROR
Impact: Security

JPS-07505: Trust service provider protocol \{0\}
Cause: Trust Service provider protocol information
Action: No action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07506: Token context creation failed.
Cause: Incorrect protocol or associated provider configuration.
Action: Check protocol and associated provider configuration
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07507: Token issue operation
Cause: Trust service token issue operation.
Action: No action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07508: Token issue operation failed.
Cause: Trust service token issue operation failed.
Action: Check provider configuration
Level: 1
Type: ERROR
Impact: Security

JPS-07509: Invalid token operation
Cause: Invalid Trust Service token operation.
Action: Check invoked operation name
Level: 1
Type: ERROR
Impact: Security

JPS-07510: Token validate operation.
Cause: Trust Service validate token operation.
Action: No action required
Level: 1
Type: ERROR
Impact: Security

JPS-07511: Validate operation failed.
Cause: Trust service token validate operation failed.
Action: Check provider configuration
Level: 1
Type: ERROR
Impact: Security

JPS-07512: Missing token issuer identity.
Cause: Token issuer identity missing.
Action: Provide token issuer identity
Level: 1
Type: ERROR
Impact: Security

JPS-07513: Invalid subject confirmation method.
Cause: Invalid subject confirmation method.
Action: Provide correct subject confirmation method

Level: 1
Type: ERROR
Impact: Security

JPS-07514: Token audience restriction condition check failed.
Cause: Invalid token audience condition.
Action: Check the audience condition

Level: 1
Type: ERROR
Impact: Security

JPS-07515: Token signature validation failed.
Cause: Invalid token signature.
Action: Check token integrity and verify signature using correct certificate

Level: 1
Type: ERROR
Impact: Security

JPS-07516: Invalid token.
Cause: Invalid token.
Action: Check token integrity.

Level: 1
Type: ERROR
Impact: Security

JPS-07517: Input token is not an instance of GenericToken class.
Cause: Input token is not an instance of GenericToken class.
Action: Check the token object class

Level: 1
Type: ERROR
Impact: Security

JPS-07518: Input token is not an instance of UsernameToken class
Cause: Input token is not an instance of UsernameToken class.
Action: Check the token object class

Level: 1
Type: ERROR
Impact: Security

JPS-07519: Setting subject conformation method failed.
Cause: Invalid token object.
Action: Check the token object
Level: 1
Type: ERROR
Impact: Security

JPS-07520: Token signing failed.
Cause: Token signing key is unavailable.
Action: Check the keystore and verify that signing key is present

Level: 1
Type: ERROR
Impact: Security

JPS-07521: Token signature is not available.
Cause: Unsigned token.
Action: No action required.

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07522: Token is not valid yet {0}
Cause: Token is not valid yet.
Action: Check the token validity start date.

Level: 1
Type: ERROR
Impact: Security

JPS-07523: Token has expired {0}
Cause: Token has expired.
Action: Check the token validity end date.

Level: 1
Type: ERROR
Impact: Security

JPS-07524: Certificate is unavailable {0}
Cause: Certificate is not available.
Action: Check the keystore and ensure that the certificate is present.

Level: 1
Type: ERROR
Impact: Security

JPS-07525: Private key is unavailable
Cause: Private key is not available.
Action: Check the keystore and ensure that the private key is present.

Level: 1
Type: ERROR
Impact: Security

JPS-07526: Initializing provider
Cause: Provider is initializing.
Action: None

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07527: Shutting down provider
Cause: Provider is shutting down.
Action: None

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07528: Received unknown token type {0}
Cause: Received token type is unknown.
Action: Check the provided token.

Level: 1
Type: WARNING
Impact: Security

JPS-07529: Received unknown token class {0}
Cause: Token class is unknown.
Action: Check the token class.

Level: 1
Type: WARNING
Impact: Security

JPS-07530: Invalid token type or token not found
Cause: Invalid token authentication type specified.
Action: Check the token authentication type.

Level: 1
Type: WARNING
Impact: Security

JPS-07531: Input token is not an instance of {0}
Cause: Specified instance is not correct.
Action: Check the instance type validity.

Level: 1
Type: WARNING
Impact: Security

JPS-07532: Instance of {0} is invalid
Cause: Specified instance is invalid.
Action: Check the specified instance and ensure that it is correct
Level: 1
Type: WARNING
Impact: Security

JPS-07533: Received empty token byte array
Cause: Given token is empty.
Action: Check the token content and ensure that it is not empty.
Level: 1
Type: ERROR
Impact: Security

JPS-07534: Trust service configuration is not valid
Cause: Invalid configuration parameters.
Action: Check the configuration parameters.
Level: 1
Type: WARNING
Impact: Security

JPS-07535: Using {0} Trust service configuration
Cause: Configuration type used by Trust Service
Action: None
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07536: Token credential missing
Cause: Token signing or validation credential missing.
Action: Provide correct credential.
Level: 1
Type: ERROR
Impact: Security

JPS-07537: Token signature missing
Cause: Token signature missing.
Action: Check the token for integrity.
Level: 1
Type: ERROR
Impact: Security

JPS-07538: The input token is not specified
Cause: Input token not provided.
Action: Check if the token has been provided.
Level: 1
Type: ERROR
Impact: Security

JPS-07539: Token signing method is not specified
Cause: Token signing algorithm parameter missing.
Action: Check the token signing algorithm parameter.

Level: 1
Type: ERROR
Impact: Security

JPS-07540: Token signing method is invalid
Cause: Token signing algorithm parameter invalid
Action: Check the specified token signing algorithm.

Level: 1
Type: ERROR
Impact: Security

JPS-07541: Token signing private key is not specified
Cause: Token signing private key missing.
Action: Check the token signing private key parameter.

Level: 1
Type: ERROR
Impact: Security

JPS-07542: Token signing certificate is not specified
Cause: Token signing certificate missing.
Action: Check the token signing certificate parameter.

Level: 1
Type: ERROR
Impact: Security

JPS-07543: Token signing credential is not specified
Cause: Token signing credential missing.
Action: Check the token signing credential parameter.

Level: 1
Type: ERROR
Impact: Security

JPS-07544: The specified token type is invalid
Cause: The token type is not supported.
Action: Check the token type parameter.
Impact: Security

JPS-07545: Invalid TokenContext class
Cause: Internal Error. The correct TokenContext class is not created.
Action: Provide the correct TokenProvider class in trust configurations.
Level: 1
Type: ERROR
Impact: Security

JPS-07546: Token cannot be issued for virtual or anonymous user
Cause: Trust token cannot be issued for anonymous or virtual users
Action: Ensure usage of Trust service is limited to users present in configured identity store.
Level: 1
Type: ERROR
Impact: Security

JPS-07600: Application policy for stripe name {0} not found. Nothing to undeploy
Cause: No associated application policies
Action: Check application policy setup or contact system administrator
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07601: Complete staging offline deployment for application {0} in {1}
Cause: Complete staging offline deployment for application {0} in {1}
Action: No action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-07602: Removal of application policy failed. Reason: {0}.
Cause: Exception in removing application policy
Action: Check application policy setup or contact system administrator
Level: 1
Type: WARNING
Impact: Security

JPS-07603: Cannot purge changelog. Reason {0}.
Cause: Purge changelog failed.
Action: Check policystore configuration.
Level: 1
Type: ERROR
Impact: Security
JPS-07604: Wrong policy combining algorithm name [0] is used.
   Cause: wrong policy combining algorithm name was used
   Action: Check combining algorithm name being used
   Level: 1
   Type: WARNING
   Impact: Security

JPS-07605: Unsupported policy combining algorithm name [0] is used.
   Cause: Unsupported policy combining algorithm name was used
   Action: Check combining algorithm name being used
   Level: 1
   Type: WARNING
   Impact: Security

JPS-07606: Cannot clean applications. Reason [0].
   Cause: Clean applications failed.
   Action: Refer to the log files for details and correct the error.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-07607: [0] is used in source, but it is not supported by destination policy store.
   Cause: Source contains policy artifacts that is not supported by destination policy store
   Action: Make sure source only contain policy artifacts which are compatible with destination policy store
   Level: 1
   Type: WARNING
   Impact: Security

JPS-07608: ERROR:not allowed to modify seed policy store [0].
   Cause: ERROR: not allowed to modify seed policy store [0].
   Action: Refer to the log files for details and correct the error.
   Level: 1
   Type: WARNING
   Impact: Security

JPS-08000: Subject object [0] is not supported.
   Cause: Specified Object type is not supported by the provider for Subject.
   Action: Check the document for supported object types.
   Level: 1
   Type: ERROR
   Impact: Security
JPS-08001: Action object {0} is not supported.
    Cause: Specified Object type is not supported by the provider for Action.
    Action: Check the document for supported object types.

Level: 1
Type: ERROR
Impact: Security

JPS-08002: Resource object {0} is not supported.
    Cause: Specified Object type is not supported by the provider for Resource.
    Action: Check the document for supported object types.

Level: 1
Type: ERROR
Impact: Security

JPS-08003: Environment object {0} is not supported.
    Cause: Specified Object type is not supported by the provider for Environment.
    Action: Check the document for supported object types.

Level: 1
Type: ERROR
Impact: Security

JPS-08004: Invalid resource string: {0}.
    Cause: The resource string is invalid.
    Action: Check the document for the resource string format.

Level: 1
Type: ERROR
Impact: Security

JPS-08005: Subject cannot be null.
    Cause: The subject is null.
    Action: Use a valid subject.

Level: 1
Type: ERROR
Impact: Security

JPS-08006: Action cannot be null.
    Cause: The action is null.
    Action: Use a valid action.

Level: 1
Type: ERROR
Impact: Security

JPS-08007: Resource cannot be null.
    Cause: The resource is null.
Action: Use a valid resource.
Level: 1
Type: ERROR
Impact: Security

JPS-08008: Action list cannot be null or empty.
Cause: The action list is null or empty.
Action: Use a valid action list.
Level: 1
Type: ERROR
Impact: Security

JPS-08009: Resource list cannot be null or empty.
Cause: The resource list is null or empty.
Action: Use a valid resource list.
Level: 1
Type: ERROR
Impact: Security

JPS-08010: The size of action list and resource list is different.
Cause: The size of action list and resource list is different.
Action: The size of action list should be identical to the size of resource list.
Level: 1
Type: ERROR
Impact: Security

JPS-08011: Subject object {0} is not a valid subject on platform {1}.
Cause: The subject object is not a valid subject on current platform.
Action: Use a valid subject.
Level: 1
Type: ERROR
Impact: Security

JPS-08012: Scope cannot be null or empty.
Cause: Scope is null or empty.
Action: Use a valid scope.
Level: 1
Type: ERROR
Impact: Security

JPS-08013: Query Type cannot be null.
Cause: Query Type is null.
Action: Use a valid Query Type.
Level: 1
Type: ERROR
Impact: Security

JPS-08014: Invalid scope string: \{0\}.
Cause: The scope string is invalid.
Action: Check the document for the scope string format.

Level: 1
Type: ERROR
Impact: Security

JPS-08015: Invalid search scope string: \{0\}.
Cause: The search scope in scope string is invalid.
Action: Check the document for the scope string format.

Level: 1
Type: ERROR
Impact: Security

JPS-08016: An error has occurred while processing the PepResponse result.
Cause: An error has occurred while processing the PepResponse results.
Action: Check the policy setup and client code.

Level: 1
Type: ERROR
Impact: Security

JPS-08017: Invalid resource string: \{0\}. Please provide a fully qualified resource string.
Cause: Fully qualified resource string is required.
Action: Please specify application ID, resource type and resource name.

Level: 1
Type: ERROR
Impact: Security

JPS-08018: The configured policy provider \{0\} does not implement AzPolicy interface.
Cause: The configured policy provider does not implement AzPolicy interface.
Action: You must configure policy provider that implements AzPolicy interface, e.g. by calling Policy.setPolicy().

Level: 1
Type: ERROR
Impact: Security

JPS-08019: Requested operation is not supported.
Cause: Requested operation is not supported.
Action: Do not invoke unsupported operation.
Level: 1
Type: ERROR
Impact: Security

JPS-08020: The authorization service instance is invalid.
Cause: The authorization service instance is invalid.
Action: Check the service instance and ensure that it is a supported authorization service instance.

Level: 1
Type: ERROR
Impact: Security

JPS-08021: The input configuration parameter is invalid.
Cause: The input configuration parameter is invalid.
Action: Check the configuration parameter validity.

Level: 1
Type: ERROR
Impact: Security

JPS-08022: Incorrect authorization service instance type.
Cause: Incorrect authorization service instance type.
Action: Check the authorization service instance type.

Level: 1
Type: ERROR
Impact: Security

JPS-08023: The environment parameter is missing.
Cause: The environment parameter is missing.
Action: Check the environment parameter.

Level: 1
Type: ERROR
Impact: Security

JPS-08024: Policy context parameter is missing.
Cause: Policy context parameter is missing.
Action: Check the policy context parameter.

Level: 1
Type: ERROR
Impact: Security

JPS-08025: Session context parameter is missing.
Cause: Session context parameter is missing.
Action: Check the session parameter.

Level: 1
Type: ERROR
Impact: Security
JPS-08026: Database connection parameter is missing.
  Cause: Database connection parameter is missing or not a right type.
  Action: Check the database connection parameter.
  Level: 1

Type: ERROR
Impact: Security
JPS-08027: Security predicate parameter is missing.
  Cause: Security predicate parameter is missing.
  Action: Check the security predicate parameter.
  Level: 1

Type: ERROR
Impact: Security
JPS-08028: Cannot find appName attribute in resource collection.
  Cause: Can't find appName attribute in resource collection.
  Action: Add appName attribute to resource collection.
  Level: 1

Type: ERROR
Impact: Security
JPS-08029: Privilege parameter is missing or not a right type
  Cause: Privilege parameter is missing or not a right type.
  Action: Check the privilege parameter.
  Level: 1

Type: ERROR
Impact: Security
JPS-08030: DB object parameter is missing or not a right type.
  Cause: DB object parameter is missing or not a right type.
  Action: Check the DB object parameter.
  Level: 1

Type: ERROR
Impact: Security
JPS-08031: Client env parameter is not a right type.
  Cause: Client env parameter is not a right type.
  Action: Check the client env parameter.
  Level: 1
JPS-08032: Client env parameter has unsupported value.
  Cause: Client env parameter has unsupported value.
  Action: Check the client env parameter.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-08033: Check privilege mode parameter has unsupported value.
  Cause: Check privilege mode parameter has unsupported value.
  Action: Check the Check privilege parameter.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-08034: Value of parameter {0} should be type {1}, but has a wrong type {2}.
  Cause: Invalid parameter type
  Action: Check the parameter.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-08035: Type of RAS parameter value is not supported.
  Cause: Type of RAS parameter value is not supported.
  Action: Do not use unsupported type for RAS parameter value.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-08036: Invalid data type in Subject collection, it only accepts RuntimeAttribute.
  Cause: Invalid data type in Subject collection, it only accepts RuntimeAttribute.
  Action: Use RuntimeAttribute in Subject collection.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-08037: Invalid data type in Action collection, it only accepts RuntimeAttribute.
  Cause: Invalid data type in Action collection, it only accepts RuntimeAttribute.
  Action: Use RuntimeAttribute in Action collection.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-08038: Invalid data type in Resource collection, it only accepts RuntimeAttribute.
Cause: Invalid data type in Resource collection, it only accepts RuntimeAttribute.
Action: Use RuntimeAttribute in Resource collection.
Level: 1
Type: ERROR
Impact: Security

JPS-08500: Component audit definition {0} already exists.
Cause: Component audit definition {0} already exists.
Action: Check given component type.
Level: 1
Type: WARNING
Impact: Security

JPS-08501: Failed to create component audit definition {0}. Reason: {1}.
Cause: Failed to create component audit definition {0}. Reason: {1}.
Action: See error message.
Level: 1
Type: WARNING
Impact: Security

JPS-08502: Failed to search database mapping table for component {0}. Reason: {1}.
Cause: Failed to search database mapping table for component {0}. Reason: {1}.
Action: See error message.
Level: 1
Type: WARNING
Impact: Security

JPS-08503: Cannot search audit definition for component {0}. Reason: {1}.
Cause: Cannot search audit definition for component {0}. Reason: {1}.
Action: See error message.
Level: 1
Type: WARNING
Impact: Security

JPS-08504: Failed to search generic attribute groups. Reason: {0}.
Cause: Failed to search generic attribute groups. Reason: {0}.
Action: See error message.
Level: 1
Type: WARNING
Impact: Security

JPS-08505: Failed to create database mapping table for component {0}. Reason: {1}.
Cause: Failed to create database mapping table for component {0}. Reason: {1}.
Action: See error message.
Level: 1
Type: WARNING
Impact: Security

JPS-08506: Failed to create filter config for component {0}. Reason: {1}.
Cause: Failed to create filter config for component {0}. Reason: {1}.
Action: See error message.

Level: 1
Type: WARNING
Impact: Security

JPS-08507: Component audit definition {0} does not exist.
Cause: Component audit definition {0} does not exist.
Action: Check given component type.

Level: 1
Type: WARNING
Impact: Security

JPS-08508: Failed to search filter config for component {0}. Reason: {1}.
Cause: Failed to search filter config for component {0}. Reason: {1}.
Action: See error message.

Level: 1
Type: WARNING
Impact: Security

JPS-08509: Failed to update filter config for component {0}. Reason: {1}.
Cause: Failed to update filter config for component {0}. Reason: {1}.
Action: See error message.

Level: 1
Type: WARNING
Impact: Security

JPS-08510: The expected audit store DN {0} was missing.
Cause: The expected audit store DN {0} was missing.
Action: Configure this DN during the bootstrap process.

Level: 1
Type: WARNING
Impact: Security

JPS-08511: Audit store was not fully initialized until data source is available.
Cause: Audit store was not fully initialized until data source is available.
Action: Wait and retry later.

Level: 1
Type: WARNING
Impact: Security

JPS-08512: Failed to retrieve value. Reason: {0}.
  Cause: Failed to retrieve value. Reason: {0}.
  Action: See error message.
  Level: 1
  Type: WARNING
Impact: Security

JPS-08513: Failed to search component types. Reason: {0}.
  Cause: Failed to search component types. Reason: {0}.
  Action: See error message.
  Level: 1
  Type: WARNING
Impact: Security

JPS-08514: Failed to search system XLF. Reason: {0}.
  Cause: Failed to search system XLF. Reason: {0}.
  Action: See error message.
  Level: 1
  Type: WARNING
Impact: Security

JPS-08515: Failed to search XLF for component {0}. Reason: {1}.
  Cause: Failed to search XLF for component {0}. Reason: {1}.
  Action: See error message.
  Level: 1
  Type: WARNING
Impact: Security

JPS-08516: Failed to search system definition. Reason: {0}.
  Cause: Failed to search system definition. Reason: {0}.
  Action: See error message.
  Level: 1
  Type: WARNING
Impact: Security

JPS-08517: System audit definition already exists.
  Cause: System audit definition already exists.
  Action: See error message.
  Level: 1
  Type: WARNING
Impact: Security

JPS-08518: Failed to create system audit definition. Reason: {0}.
Cause: Failed to create system audit definition. Reason: {0}.
Action: See error message.
Level: 1
Type: WARNING
Impact: Security

JPS-08519: Error in creating filter tree. Reason: {0}.
Cause: Error in creating filter tree. Reason: {0}.
Action: See error message.
Level: 1
Type: WARNING
Impact: Security

JPS-08520: Audit definition {0} is invalid.
Cause: Audit definition {0} is invalid.
Action: See error message.
Level: 1
Type: WARNING
Impact: Security

JPS-08521: Attribute mapping table {0} for component type {1} is invalid.
Cause: Attribute mapping table {0} for component type {1} is invalid.
Action: See error message.
Level: 1
Type: WARNING
Impact: Security

JPS-08522: Filter config {0} for component type {1} is invalid.
Cause: Filter config {0} for component type {1} is invalid.
Action: See error message.
Level: 1
Type: WARNING
Impact: Security

JPS-08523: Component type value {0} is invalid.
Cause: Component type value {0} is invalid.
Action: See error message.
Level: 1
Type: WARNING
Impact: Security

JPS-08524: System definition {0} is invalid.
Cause: System definition {0} is invalid.
Action: See error message.
Level: 1
Type: WARNING
Impact: Security
**JPS-08525: Audit definition for component type {0} not found.**
**Cause:** Audit definition for component type {0} not found.
**Action:** See error message.

Level: 1
Type: NOTIFICATION
Impact: Security
**JPS-08526: XLF for component type {0} not found.**
**Cause:** XLF for component type {0} not found.
**Action:** See error message.

Level: 1
Type: NOTIFICATION
Impact: Security
**JPS-08527: Attribute mapping table for component type {0} not found.**
**Cause:** Attribute mapping table for component type {0} not found.
**Action:** See error message.

Level: 1
Type: NOTIFICATION
Impact: Security
**JPS-08528: Filter config for component type {0} not found.**
**Cause:** Filter config for component type {0} not found.
**Action:** See error message.

Level: 1
Type: NOTIFICATION
Impact: Security
**JPS-08529: Generic attribute groups not found.**
**Cause:** Generic attribute groups not found.
**Action:** See error message.

Level: 1
Type: NOTIFICATION
Impact: Security
**JPS-08530: Failed to search audit definition in audit store. Reason: {0}.**
**Cause:** Failed to search audit definition in audit store. Reason: {0}.
**Action:** Ensure that the audit store configuration for audit service are correct in jps-config.xml.

Level: 1
Type: WARNING
Impact: Configuration

**JPS-08531: Failed to create audit metadata in audit store. Reason: {0}**.
Cause: Failed to create audit metadata in audit store. Reason: {0}.
Action: Ensure that the audit store configuration for audit service are correct in jps-config.xml.

Level: 1
Type: WARNING
Impact: Configuration

**JPS-08532: Audit definition "{0}" in destination store does not match the one in source store.**
Cause: Audit definition "{0}" in destination store does not match the one in source store.
Action: See error message.

Level: 1
Type: WARNING
Impact: Configuration

**JPS-08533: Component XLF for audit definition "{0}" in destination store does not match the one in source store.**
Cause: Component XLF for audit definition "{0}" in destination store does not match the one in source store.
Action: See error message.

Level: 1
Type: WARNING
Impact: Configuration

**JPS-08534: Generic attribute groups in destination store do not match those in source store.**
Cause: Generic attribute groups in destination store does not match the one in source store.
Action: See error message.

Level: 1
Type: WARNING
Impact: Configuration

**JPS-08535: Attribute group "{0}" in destination store does not match the one in source store.**
Cause: Attribute group "{0}" in destination store does not match the one in source store.
Action: See error message.

Level: 1
Type: WARNING
Impact: Configuration
JPS-08536: Audit filter config for audit definition "[0]" in destination store does not match the one in source store.

Cause: Audit filter config for audit definition "[0]" in destination store does not match the one in source store.

Action: See error message.

Level: 1
Type: WARNING
Impact: Configuration

JPS-08537: Attribute mapping table for audit definition "[0]" in destination store does not match the one in source store.

Cause: Attribute mapping table for audit definition "[0]" in destination store does not match the one in source store.

Action: See error message.

Level: 1
Type: WARNING
Impact: Configuration

JPS-08538: Event definitions for audit definition "[0]" in destination store does not match the one in source store.

Cause: Event definitions for audit definition "[0]" in destination store does not match the one in source store.

Action: See error message.

Level: 1
Type: WARNING
Impact: Configuration

JPS-08539: Event category "[0]" in destination store does not match the one in source store.

Cause: Event category "[0]" in destination store does not match the one in source store.

Action: See error message.

Level: 1
Type: WARNING
Impact: Configuration

JPS-08540: Level list for audit definition "[0]" in destination store does not match the one in source store.

Cause: Level list for audit definition "[0]" in destination store does not match the one in source store.

Action: See error message.

Level: 1
Type: WARNING
Impact: Configuration
JPS-08541: Filter preset definition list for audit definition "[0]" in destination store does not match the one in source store.

Causes:
- Filter preset definition list for audit definition "[0]" in destination store does not match the one in source store.

Actions:
- See error message.

Levels:
- 1

Types:
- WARNING

Impacts:
- Configuration

JPS-08542: Attribute "[0]" in attribute group "[1]" in the destination store does not match the one in source store.

Causes:
- Attribute "[0]" in attribute group "[1]" in the destination store does not match the one in source store.

Actions:
- See error message.

Levels:
- 1

Types:
- WARNING

Impacts:
- Configuration

JPS-08543: Custom filter preset definition in filter config of audit definition "[0]" in the destination store does not match the one in source store.

Causes:
- Custom filter preset definition in filter config of audit definition "[0]" in the destination store does not match the one in source store.

Actions:
- See error message.

Levels:
- 1

Types:
- WARNING

Impacts:
- Configuration

JPS-08544: Failed to remove component definition "[0]". Reason: [1].

Causes:
- Failed to remove component definition "[0]". Reason: [1].

Actions:
- See error message.

Levels:
- 1

Types:
- WARNING

Impacts:
- Security

JPS-08545: Failed to update component definition "[0]". Reason: [1].

Causes:
- Failed to update component definition "[0]". Reason: [1].

Actions:
- See error message.

Levels:
- 1

Types:
- WARNING

Impacts:
- Security

JPS-08546: Filter preset definition "[0]" in filter config of audit definition "[1]" in the destination store does not match the one in source store.

Causes:
- Filter preset definition "[0]" in filter config of audit definition "[1]" in the destination store does not match the one in source store.

Actions:
- See error message.
Level: 1
Type: WARNING
Impact: Configuration

JPS-08547: Filter category "[0]" of filter preset definition "[1]" in filter config of audit definition "[2]" in the destination store does not match the one in source store.
Cause: Filter category "[0]" of filter preset definition "[1]" in filter config of audit definition "[2]" in the destination store does not match the one in source store.
Action: See error message.

Level: 1
Type: WARNING
Impact: Configuration

JPS-08548: Cannot register to audit service for component "[0]".
Cause: Cannot register component definition "[0]" to audit service. Reason [1].
Action: See error message.

Level: 1
Type: WARNING
Impact: Security

JPS-08549: Audit registration service not available.
Cause: Audit registration service not available.
Action: See error message.

Level: 1
Type: WARNING
Impact: Security

JPS-08550: Audit loader startup failed. Cause: "[0]".
Cause: Audit loader startup failed.
Action: See error message.

Level: 1
Type: WARNING
Impact: Security

JPS-08551: Failed to upgrade audit event definition due to incompatible data mapping. Component type: "[0]".
Cause: Failed to upgrade audit event definition due to incompatible data mapping. Component type: "[0]".
Action: See error message.

Level: 1
Type: WARNING
Impact: Security

JPS-08552: Upgrade audit event definition with incompatible data mapping. Component type: "[0]".
**Cause:** Upgrade audit event definition with incompatible data mapping. Component type: "[0]".

**Action:** See error message.

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Security

JPS-08553: Failed to load opss_audit_registration.xml. Reason "[0]".

**Cause:** Failed to load opss_audit_registration.xml, Reason "[0]".

**Action:** See error message.

**Level:** 1

**Type:** WARNING

**Impact:** Security

JPS-08554: Failed to register Component type "[0]" due to malformed version number in event definition.

**Cause:** Failed to register Component type "[0]" due to malformed version number in event definition.

**Action:** See error message.

**Level:** 1

**Type:** WARNING

**Impact:** Security

JPS-08555: During provisioning operations, subscriptions will not be accepted

**Cause:**

**Action:**

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Security

JPS-08556: Component type value null is invalid.

**Cause:** Component type value null is invalid.

**Action:** Use the appropriate componentType while doing registration of component to AuditStore

**Level:** 1

**Type:** ERROR

**Impact:** Security

JPS-08557: Component events definition file is invalid. Reason - "[0]".

**Cause:** Component events definition file is invalid. Reason - "[0]".

**Action:** Correct the events definition file based on reason

**Level:** 1

**Type:** ERROR

**Impact:** Security
JPS-08558: Failed to rollback audit registration failure for component "]0]", Reason "[1]".
    
Cause: Failed to rollback audit registration failure for component "]0]", Reason "[1]".
    
Action: See error message.
    
Level: 1
    
Type: WARNING
    
Impact: Security
    
JPS-08559: No matching system event definition for EventRef "]0]", regarded as a custom Event.
    
Cause: No matching system event definition for EventRef "]0]", regarded as a custom Event.
    
Action: See error message.
    
Level: 1
    
Type: WARNING
    
Impact: Security
    
JPS-09000: Resource type [0] already in use for [1].
    
Cause: Resource type was already in use.
    
Action: Use a different resource type name.
    
Level: 1
    
Type: WARNING
    
Impact: Security
    
JPS-09001: Resource matching class name is missing. A subtype must not have its own matching algorithm.
    
Cause: Resource matching class name was missing.
    
Action: A subtype must not have its own matching algorithm.
    
Level: 1
    
Type: WARNING
    
Impact: Security
    
JPS-09002: The parameter [0] of type [1] does not exist.
    
Cause: This parameter did not exist.
    
Action: See the log files for more details.
    
Level: 1
    
Type: WARNING
    
Impact: Security
    
JPS-09003: For the parameter [0] more than expected values found for the Application name:[1], Policy Domain:[2], Query Parameter:[3], Actual results: [4]
    
Cause: More then expected values for given parameter found.
    
Action: See the log files for more details.
    
Level: 1
Type: WARNING
Impact: Security
JPS-09004: For type {0} the modification is not allowed for {1}.
   Cause: Modify operation was not allowed.
   Action: See the log files for more details.
   Level: 1
Type: WARNING
Impact: Security
JPS-09005: For the parameter {0} the given value {1} is invalid.
   Cause: The value for the given parameter was invalid.
   Action: Provide the valid value for the given parameter.
   Level: 1
Type: WARNING
Impact: Security
JPS-09006: Resource {0} already in use for {1}.
   Cause: Resource was already in use.
   Action: Use a different resource name.
   Level: 1
Type: WARNING
Impact: Security
JPS-09007: RoleCategory {0} cannot be deleted
   Cause: The role category is referenced by one or more application roles.
   Action: Modify the application role(s) definition that reference this role category
   by removing the role category for the application role.
   Level: 1
Type: WARNING
Impact: Security
JPS-09008: Application policy for application {0} does not exist.
   Cause: Application policy did not exist.
   Action: The application policy must exist. Check the policy store.
   Level: 1
Type: WARNING
Impact: Security
JPS-09009: Only limited set of properties are supported for resource action search.
   See the documentation for more details.
   Cause: The property user to search resource action was invalid.
   Action: Only limited set of properties are supported for resource action search.
   See the documentation for more details.
   Level: 1
Type: WARNING
Impact: Security

JPS-09010: Cannot create permission set {0} with a non existent resource type {1}.
  Cause: Permission set could not be created without resource type.
  Action: Resource type must be pre-defined to create the permission set.
  Level: 1

Type: WARNING
Impact: Security

JPS-09011: Cannot create permission set {0} with a non existent resource {1}.
  Cause: Permission set could not be created without resource.
  Action: Resource must be pre-defined to create the permission set.
  Level: 1

Type: WARNING
Impact: Security

JPS-09012: Search value cannot be null. It can be null only if MATCHER is ANY.
  Cause: Search value was null. It could be null only if MATCHER is ANY.
  Action: Verify the search value for the given query.
  Level: 1

Type: WARNING
Impact: Security

JPS-09013: This application roles {0} does not belong to this application {1}.
  Cause: This application role did not belong to this application.
  Action: Ensure this application role belongs to this application.
  Level: 1

Type: WARNING
Impact: Security

JPS-09014: The application role {0} cannot have null name or unique name for the application {1}.
  Cause: The name or unique name of this application role was null or invalid.
  Action: Ensure the name or unique name of this application role is valid.
  Level: 1

Type: WARNING
Impact: Security

JPS-09015: Application role does not exist in current application.
  Cause: Application role was not found in current application.
  Action: Ensure the application role belongs to this application.
  Level: 1

Type: WARNING
Impact: Security

JPS-09016: Unknown policy store service type {0}.
Cause: Unknown policy store service type {0}.
Action: Correct the policy store configuration.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09017: Policy entry {0} cannot be found.
Cause: Policy entry {0} cannot be found.
Action: Correct the policy entry.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09018: Policy object {0} cannot be found.
Cause: Policy object {0} cannot be found.
Action: Correct the policy object.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09019: {0} could not be cached.
Cause: {0} could not be cached.
Action: Ensure the Resource has valid actions.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09020: Principal entry class "{0}", name "{1}" cannot be created.
Cause: Principal entry class "{0}", name "{1}" cannot be created.
Action: Ensure that the principal entry class is correct and entry value is valid.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09021: Permission entry class "{0}", target "{1}", action "{2}" cannot be created.
Cause: Permission entry class "{0}", target "{1}", action "{2}" cannot be created.
Action: Ensure that the permission entry class is correct and entry value is valid.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09022: Resource entry type "{0}", resource "{1}" cannot be created.
Cause: Resource entry type "[0]", resource "[1]" cannot be created.
Action: Ensure that the resource entry class is correct and entry value is valid.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09023: Resource type entry name "[0]", matcher class "[1]", provider "[2]" cannot be created.
Cause: Resource type entry name "[0]", matcher class "[1]", provider "[2]" cannot be created.
Action: Ensure that the resource type entry class is correct and entry value is valid.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09024: Resource action entry type "[0]", name "[1]" cannot be created.
Cause: Resource action entry type "[0]", name "[1]" cannot be created.
Action: Ensure that the resource action entry class is correct and entry value is valid.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09025: Permission set entry (name: "[0]", actions: "[1]") cannot be created.
Cause: Permissionset entry name "[0]", actions "[1]" cannot be created.
Action: Ensure that the permissionset entry class is correct and entry value is valid.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09026: Role category entry name "[0]" cannot be created.
Cause: Role category entry name "[0]" cannot be created.
Action: Ensure that the role category entry class is correct and entry value is valid.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09027: Grantee DN was missing for principal [0].
Cause: Grantee DN was missing for principal [0].
Action: Check principal value.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09028: Failed to get permission for principal \{0\}. Reason: \{1\}.
Cause: Failed to get permission for principal \{0\}. Reason: \{1\}.
Action: Check principal value.

Level: 1
Type: ERROR
Impact: Configuration

JPS-09029: Total Time to getPermissions in the Application \{0\} with \{1\} number of Grantees is: \{2\} ms.
Cause: Total Time to getPermissions in the Application \{0\} with \{1\} number of Grantees is: \{2\} ms.
Action: Check log for details.

Level: 1
Type: NOTIFICATION
Impact: Configuration

JPS-09030: Code signer data \{0\} cannot be migrated due to limitation in the destination policy store.
Cause: Code signer data \{0\} cannot be migrated due to limitation in the destination policy store.
Action: Check log for details.

Level: 1
Type: WARNING
Impact: Configuration

JPS-09031: Failed to read java policies for Application: \{0\}. Reason: \{1\}.
Cause: Failed to read java policies for Application: \{0\}. Reason: \{1\}.
Action: Check log for details.

Level: 1
Type: WARNING
Impact: Configuration

JPS-09032: Only one of permission array \{0\} and permission entry list \{1\} can be null or non-null.
Cause: Only one of permission array \{0\} and permission entry list \{1\} can be null/non-null.
Action: Ensure one of permission array or permission entry list values is null or non-null.

Level: 1
Type: ERROR
Impact: Configuration

JPS-09033: No grantee found for grantee entry \{0\}.
Cause: No grantee found for grantee entry \{0\}.
Action: Ensure the grantee exist in the policy store.

Level: 1
Type: ERROR
Impact: Configuration

JPS-09034: Modification on single-value attribute {0} but contains multiple attribute values.
Cause: Modification on single-value attribute {0} but contains multiple attribute values.
Action: Check modification details.

Level: 1
Type: ERROR
Impact: Configuration

JPS-09035: Failed to create DN for {0}. Reason: {1}.
Cause: Failed to create DN for {0}. Reason: {1}.
Action: Check DN name.

Level: 1
Type: ERROR
Impact: Configuration

JPS-09036: Failed to read JACC policy {0}. Reason: {0}.
Cause: Failed to read JACC policy {0}. Reason: {0}.
Action: Check LDAP configuration to resolve this error.

Level: 1
Type: ERROR
Impact: Configuration

JPS-09037: No application DN found for name {0} under farm {1}.
Cause: No application DN found for name {0} under farm {1}.
Action: Check DN name.

Level: 1
Type: ERROR
Impact: Configuration

JPS-09038: Resource type {0} does not exist for resource {1}.
Cause: This resource type does not exist.
Action: Provide a valid resource type.

Level: 1
Type: WARNING
Impact: Security

JPS-09041: Expression component provided for RuleExpressionEntry must not be null.
**Cause:** Expression component provided for RuleExpressionEntry must not be null.
**Action:** Check value of ExpressionComponent.
**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

**JPS-09042: Invalid expression component provided to RuleExpressionEntry.**
**Cause:** Invalid expression component provided to RuleExpressionEntry.
**Action:** Check value of ExpressionComponent.
**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

**JPS-09043: Function entry for an expression must not be null.**
**Cause:** Function entry for an expression must not be null.
**Action:** Check value of FunctionEntry.
**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

**JPS-09044: Expression component of type {0} not supported.**
**Cause:** Expression component of type {0} not supported.
**Action:** Check value of ExpressionComponent.
**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

**JPS-09045: Minimum number of input parameters must be less than or equal to maximum number of input parameters**
**Cause:** Minimum number of input parameters must be less than or equal to maximum number of input parameters
**Action:** Check parameters to constructor of VarArgsInfo.
**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

**JPS-09046: The Matcher {0} in the search query is invalid**
**Cause:** The matcher in the search query is invalid
**Action:** Provide a valid Search Matcher in the query.
**Level:** 1
**Type:** ERROR
**Impact:** Programmatic
JPS-09047: The Property {0} in the search query is invalid
  Cause: The search property in the query is invalid
  Action: Provide a valid Search property in the query.

  Level: 1
  Type: ERROR
  Impact: Programmatic

JPS-09048: The search value is invalid
  Cause: The search value in the query is invalid
  Action: Provide a valid Search value in the query.

  Level: 1
  Type: ERROR
  Impact: Programmatic

JPS-09049: Null value provided for {0}
  Cause: Invalid value provided to DataType object.
  Action: Provide a non-null value

  Level: 1
  Type: WARNING
  Impact: Programmatic

JPS-09050: Host name {0} is invalid for DNS name
  Cause: Invalid value provided as DNS host.
  Action: Provide a valid value

  Level: 1
  Type: WARNING
  Impact: Programmatic

JPS-09051: Invalid data. Lower DNS port {0} is greater than higher port {1}.
  Cause: Lower port is greater than upper range.
  Action: Provide a valid value

  Level: 1
  Type: WARNING
  Impact: Programmatic

JPS-09052: Unknown format, can not parse valid date from string {0}.
  Cause: Unknown format for date string.
  Action: Provide a valid value

  Level: 1
  Type: WARNING
  Impact: Programmatic

JPS-09053: Invalid string {0} for fractional seconds.
  Cause: Invalid string for fractional seconds.
Action: Provide a valid value
Level: 1
Type: WARNING
Impact: Programmatic

JPS-09054: Invalid string {0} for hour offset.
Cause: Invalid string for hour offset.
Action: Provide a valid value
Level: 1
Type: WARNING
Impact: Programmatic

JPS-09055: Invalid string {0} for minute offset.
Cause: Invalid string for minute offset.
Action: Provide a valid value
Level: 1
Type: WARNING
Impact: Programmatic

JPS-09056: Negative value {0} not allowed.
Cause: Negative value not allowed.
Action: Provide a valid value
Level: 1
Type: WARNING
Impact: Programmatic

JPS-09057: Invalid string {0} for dayTimeDuration. Cannot parse.
Cause: Invalid string format for dayTimeDuration
Action: Provide a valid value
Level: 1
Type: WARNING
Impact: Programmatic

JPS-09058: Invalid string {0} for RFC822 name.
Cause: RFC822Name cannot end with @.
Action: Provide a valid value
Level: 1
Type: WARNING
Impact: Programmatic

JPS-09059: Invalid string {0} for RFC822 domain.
Cause: Invalid RFC822 domain name.
Action: Provide a valid value
Level: 1
Type: WARNING
Impact: Programmatic
Level: 1
Type: WARNING
Impact: Programmatic

**JPS-09060: Invalid string \{0\} for yearMonthDuration.**
Cause: Invalid string format for yearMonthDuration
Action: Provide a valid value

Level: 1
Type: WARNING
Impact: Programmatic

**JPS-09061: Invalid string \{0\} for OpssTime, must be a number.**
Cause: Invalid string for time field, must be a number.
Action: Provide a valid value

Level: 1
Type: WARNING
Impact: Programmatic

**JPS-09062: Invalid value \{0\}, must be between lower range \{1\} and upper range \{2\}.**
Cause: Value provided for data type not in required range.
Action: Provide a valid value

Level: 1
Type: WARNING
Impact: Programmatic

**JPS-09063: Invalid inputted Hex Binary value \{0\}.**
Cause: Invalid value provided for OpssHexBinary data type.
Action: Provide a valid value

Level: 1
Type: WARNING
Impact: Programmatic

**JPS-09064: Invalid extension manager, cannot be used to find constraint attributes and functions.**
Cause: Internal error: invalid extension manager cannot be used to find constraint attributes or functions.
Action: Provide correct function.

Level: 1
Type: ERROR
Impact: Programmatic

**JPS-09400: Attribute key cannot be null.**
Cause: Attribute key was null.
Action: Provide a valid attribute key.
Level: 1
Type: WARNING
Impact: Requests/Responses

JPS-09401: Name of attribute key cannot be null.
Cause: Name of attribute key was null.
Action: Provide a valid name of attribute key.

Level: 1
Type: WARNING
Impact: Requests/Responses

JPS-09402: Attribute service instance not found in the default context.
Cause: Attribute service instance not found in the default JpsContext.
Action: Configure an attribute service instance in the default JpsContext.

Level: 1
Type: WARNING
Impact: Configuration

JPS-09500: Template name is not initialized, please follow the document for method execution order
Cause: Template name is not initialized.
Action: Ensure that execution order is followed as per document

Level: 1
Type: WARNING
Impact: Requests/Responses

JPS-09501: Either template name or target store or target key or credential object is passed as NULL, {0} is not inserted
Cause: Either template name or target store or target key or credential object is passed as NULL, corresponding credential/key object is not inserted
Action: Ensure that all the parameters are passed to insert credential/key object

Level: 1
Type: WARNING
Impact: Requests/Responses

JPS-09502: Error occurred when initializing security artifacts. Reason {0}
Cause: Security Artifact initialization failed
Action: Check the logs

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-09503: Error occurred when cleaning the environment, please clean it manually
Cause: Error occurred while cleaning the environment
Action: Please clean it manually
Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-09504: Error occurred when processing credentials for template {0}. Reason {1}
Cause: Failed while processing credentials
Action: Check the logs

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-09505: Error occurred when processing keys for template {0}. Reason {1}
Cause: Failed while processing keys
Action: Check the logs

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-09506: Error occurred when committing changes, calling abort method to clean up the environment
Cause: Failed while committing changes
Action: Please check the logs

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-09507: No templates are processed, please call processXXX() methods
Cause: No templates are processed, please call processXXX() methods
Action: Please call processXXX() methods before calling end() method

Level: 1
Type: WARNING
Impact: Requests/Responses

JPS-09508: No artifacts found for template {0}
Cause: No templates specified in component-security-info.xml file
Action: Please add new template in component-security-info.xml file

Level: 1
Type: WARNING
Impact: Requests/Responses

JPS-09509: No processing mode specified for template {0}
Cause: No processing mode specified for a template
Action: Please add processing mode for a template in component-security-info.xml file
Level: 1
Type: WARNING
Impact: Requests/Responses

**JPS-09510: No credentials found for template [0]**
- **Cause:** No credentials are available to seed into OPSS security store for template [0]
- **Action:** Please check the logs or corresponding credential data file in template

Level: 1
Type: WARNING
Impact: Requests/Responses

**JPS-09511: Not able to instantiate credential store object for credential store [0]**
- **Cause:** Scratch directory credential store initialization failed
- **Action:** Please check the logs

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-09512: Not able to instantiate key store service object for key stores [0]**
- **Cause:** Scratch directory key store initialization failed
- **Action:** Please check the logs

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-09513: Not able to get the handle for bootstrap cwallet.sso [0]**
- **Cause:** Not able to get the handle for bootstrap wallet
- **Action:** Please check the logs

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-09514: Credential already exist for map [0] and key [1]**
- **Cause:** Credentials already exist in the Opss CredentialStore Implementation
- **Action:** Pass credentials with unique map and key name

Level: 1
Type: ERROR
Impact: Requests/Responses

**JPS-09515: CIE CredentialsInfo object should not be null**
- **Cause:** Passed CIE CredentialStoreInfo object is NULL
- **Action:** Please pass valid CIE credential object

Level: 1
Type: ERROR
Impact: Requests/Responses

JPS-09516: CIE KeystoreInfo object should not be null
Cause: Passed CIE KeystoresInfo object is NULL
Action: Please pass valid CIE key store object
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-09517: CIE PrivateKeyInfo object should not be null
Cause: Passed CIE PrivateKeyInfo object is NULL
Action: Please pass valid CIE private key object
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-09518: Alias '{0}' already exist in key store {1}
Cause: Alias already exist in the Opss key store Implementation
Action: Please key object with unique alias
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-09519: Error occurred when processing audit data for template {0}. Reason {1}
Cause: Failed while processing audit data
Action: Check the logs
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-09520: Error occurred when processing authorization data for template {0}. Reason {1}
Cause: Failed while processing authorization data
Action: Check the logs
Level: 1

Type: ERROR
Impact: Requests/Responses

JPS-09521: More than one application stripe {0} found in authorization data file {1}
Cause: More than one application stripe in authorization data file
Action: Ensure that the authorization file does not have more than one application stripe
Level: 1
Type: ERROR  
Impact: Requests/Responses

**JPS-09522: Authorization data file {0} is not present.**  
Cause: No authorization data file found.  
Action: Verify if the file is present

Level: 1

Type: ERROR  
Impact: Requests/Responses

**JPS-09523: No keys found for template {0}**  
Cause: No keys are available to seed into OPSS security store for template {0}  
Action: Please check the logs or corresponding keystore data file in template

Level: 1

Type: WARNING  
Impact: Requests/Responses

**JPS-09524: More than one component types found in audit store data file {0} for template {1}**.  
Cause: More than one component types in audit store data file  
Action: Ensure that the audit store file does not have more than one component type

Level: 1

Type: ERROR  
Impact: Requests/Responses

**JPS-09600: File {0} is cannot be found. Check if the specified file is expected in the specified location.**  
Cause: File {0} cannot be found.  
Action: Check if the specified file exists and accessible in the specified location.

Level: 1

Type: WARNING  
Impact: Configuration

**JPS-09601: The value "{0}" is invalid for {1}**.  
Cause: An invalid value was provided for this configuration.  
Action: Provide the correct value.

Level: 1

Type: ERROR  
Impact: Configuration

**JPS-09602: Fail to find default JPS Context in {0}.**  
Cause: Fail to find default JPS Context in the jps-config.xml.  
Action: Check content of jps-config.xml.

Level: 1
**JPS-09603: SecurityContext.getSharedSecretStore and getSharedSecretStorePassword return inconsistent values.**
*Cause:* SecurityContext.getSharedSecretStore and getSharedSecretStorePassword return inconsistent values.
*Action:* Both shared secret store name and password are required for configuring a domain with shared database security store.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**JPS-09604: JDBC Information \{0\} is missing for configuring security store to database.**
*Cause:* JDBC Information is missing for configuring security store to database.  
*Action:* Check if all required jdbc information is supplied.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**JPS-09605: Fail to find JPS Context with id \{0\} in \{1\}.**
*Cause:* Fail to find the specific JPS Context in the jps-config.xml.  
*Action:* Check content of jps-config.xml.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**JPS-09606: Error encountered while importing encryption key in shared database security store.**
*Cause:* Error encountered while seeding encryption key in shared database security store.  
*Action:* Check if encryption key is exported and imported properly.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**JPS-09607: OpssSecurityConfiguration is in invalid state.**
*Cause:* OpssSecurityConfiguration is in invalid state, it has not been initialized properly  
*Action:* If creating expanded domain, check if database is up and all the required datasource information are provided.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration
JPS-09608: OpssSecurityConfiguration is in invalid state, start method is not invoked prior to other methods.
Cause: OpssSecurityConfiguration is in invalid state - start() method is not invoked by CIE prior to other methods
Action: Check if CIE is invoking OpssSecurityConfiguration in proper order.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09609: Failed to initialize OPSS security context based on SecurityContext object from CIE.
Cause: Failed to initialize OPSS security context based on SecurityContext object passed from CIE.
Action: Check the logs.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09610: Error during updating audit loader repositoryType. Exception {0}
Cause: Failed to update audit loader repository type to DB.
Action: Check the logs.
Level: 1
Type: WARNING
Impact: Configuration

JPS-09611: Error updating audit loader credential in bootstrap wallet. Exception {0}
Cause: Failed to add audit loader credentials to bootstrap wallet
Action: Check the logs.
Level: 1
Type: WARNING
Impact: Configuration

JPS-09612: JDBC password for {0} is missing for configuring security store to database.
Cause: JDBC password is missing for configuring security store to database.
Action: Check if jdbc password is supplied.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09613: JDBC username for {0} is missing for configuring security store to database.
Cause: JDBC username is missing for configuring security store to database.
Action: Check if jdbc username is supplied.
Level: 1
Type: ERROR
Impact: Configuration

JPS-09614: The supplied password for property {0} is invalid.
Causes: The supplied password for property {0} is invalid.
Action: Please provide valid password.
Level: 1

Type: ERROR
Impact: Configuration

JPS-09615: Update jps configuration file(s) failed for service {0}. Exception {1}
Causes: Update jps configuration file(s) failed for service {0}.
Action: Check log file for errors.
Level: 1

Type: ERROR
Impact: Configuration

JPS-09616: The schema {0} is already in use for security store(s). Please create a new schema.
Causes: The schema {0} is already in use for security store(s).
Action: Please create a new schema.
Level: 1

Type: ERROR
Impact: Configuration

JPS-09617: Failed to create a domain with shared security store because no security store was found in the database schema {0}.
Causes: Failed to create a domain with shared security store because no security store was found in the database schema {0}.
Action: Please check if a security store is configured properly for the database schema.
Level: 1

Type: ERROR
Impact: Configuration

JPS-09618: Data migration failed for configurator {0}
Causes: Failed to migrate data for configurator {0}.
Action: Please check the logs and check if a security store is configured properly for the database schema.
Level: 1

Type: ERROR
Impact: Configuration

JPS-09619: Jps test service failed for configurator
Causes: Jps test service failed for configurator.
Action: Please check the logs and check if a security store is configured properly for the database schema.

Level: 1
Type: ERROR
Impact: Configuration

JPS-09620: Failed to rollback data.
Cause: Failed to rollback data.
Action: Please check the logs

Level: 1
Type: ERROR
Impact: Configuration

JPS-09621: No entry found for artifact type {0} in component-security-info.xml file of template {1}.
Cause: Artifact is not registered in component-security-info.xml file of template, but artifact data is present as part of template.
Action: Please register missing artifact in component-security-info.xml file

Level: 1
Type: WARNING
Impact: Requests/Responses

JPS-09622: Error during configuring DB security store. Exception {0}.
Cause: Error occurred during configuring DB security store.
Action: Check the logs

Level: 1
Type: ERROR
Impact: Configuration

JPS-09623: Error during updating JPS configuration in shared DB security store. Exception {0}.
Cause: Error updating JPS configuration in shared DB security store.
Action: Check the logs

Level: 1
Type: ERROR
Impact: Configuration

JPS-09624: JDBC database name for {0} is missing for configuring security store to database.
Cause: JDBC database name is missing for configuring security store to database.
Action: Check if jdbc database is supplied.

Level: 1
Type: ERROR
Impact: Configuration
JPS-09625: Jps test service completed for configurator.
  Cause: Jps test service completed for configurator.
  Action: No action required.
  Level: 1
  Type: NOTIFICATION
  Impact: Configuration

JPS-09626: Rolling back of data for configurator is completed.
  Cause: Rolling back of data for configurator is completed.
  Action: No action required
  Level: 1
  Type: NOTIFICATION
  Impact: Configuration

JPS-09627: Trying to rollback data for configurator.
  Cause: Trying to rollback data for configurator.
  Action: No action required
  Level: 1
  Type: NOTIFICATION
  Impact: Configuration

JPS-09630: Failed to seed MDS credential to bootstrap cwallet file with specified key/map [0].
  Cause: Failed to seed MDS credential to bootstrap cwallet file.
  Action: Check the logs
  Level: 1
  Type: ERROR
  Impact: Configuration

JPS-09631: Failed to create tenant config profile [0] in MDS.
  Cause: Failed to create tenant config profiles in MDS.
  Action: Check the logs
  Level: 1
  Type: ERROR
  Impact: Configuration

JPS-09632: More than one config-security-file.xml are round in templates.
  Cause: More than one config-security-file.xml in templates are found.
  Action: Check the logs
  Level: 1
  Type: ERROR
  Impact: Configuration
JPS-09633: Start to provisioning partition [0] with OPSS resource group. Parameters: [1].
Causes: Start to provisioning a partition with OPSS resource group.
Action: No action required

Level: 1
Type: NOTIFICATION
Impact: Configuration

JPS-09634: Rollback partition provisioning.
Causes: Rollback partition provisioning.
Action: No action required

Level: 1
Type: NOTIFICATION
Impact: Configuration

JPS-09635: Partition provisioning with OPSS resource group is completed.
Cause: Successfully provisioning a partition with OPSS resource group.
Action: No action required

Level: 1
Type: NOTIFICATION
Impact: Configuration

JPS-10000: There was an internal error in the policy store.
Cause: The operation is not allowed for multivalued attribute.
Action: The operation is not allowed for multivalued attribute. Supply a valid operation

Level: 1
Type: WARNING
Impact: Security

JPS-10001: Exception happened while decoding value: [0].
Cause: The encoding format is not correct.
Action: Check encoding format of String value.

Level: 1
Type: WARNING
Impact: Security

JPS-10002: Container is not ready. Reason: [0].
Cause: Container is not ready.
Action: Wait for container to start up successfully.

Level: 1
Type: NOTIFICATION
Impact: Security
JPS-10003: Null search value is not allowed, unless the matcher is ANY.
  Cause: Query value is null but the matcher is not ANY.
  Action: Do not use null query value if the matcher is not ANY.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10004: The search value {0} is invalid.
  Cause: Query value is invalid.
  Action: Use an valid query value.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10005: Access denied. {0}
  Cause: Access to policy store is denied.
  Action: Do not perform such operation on policy store.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10050: The application {0} cannot be found at runtime due to {1}.
  Cause: Corresponding runtime application does not exist.
  Action: Check if policy is properly distributed.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-10051: Policy object "{(0)}" already exists in application policy "{(1)}".
  Cause: Policy object with same name exists in this application policy.
  Action: Try a different name.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-10052: The list of runtime events is NULL.
  Cause: The list of runtime events is NULL
  Action: Please contact the security administrator.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-10053: The runtime events is NULL.
  Cause: The runtime event is NULL
  Level: 1
  Type: ERROR
  Impact: Security
Action: Please contact the security administrator.

Level: 1
Type: ERROR
Impact: Security

JPS-10100: The policy domain "[0]" does not exist.
Causes: The policy domain does not exist
Action: Check the policy domain name.

Level: 1
Type: WARNING
Impact: Security

JPS-10102: The policy domain "[0]" already exists.
Causes: The policy domain exists
Action: Create a policy domain with a different name.

Level: 1
Type: WARNING
Impact: Security

JPS-10151: Application role {0} does not exist
Causes: The application role does not exist.
Action: Provide correct application role.

Level: 1
Type: WARNING
Impact: Security

JPS-10152: Application Role {0} is used.
Causes: Application Role is used.
Action: Remove the objects which use this application role.

Level: 1
Type: WARNING
Impact: Security

JPS-10153: Application role {0} does not belong to current application.
Causes: Application role does not belong to current application policy.
Action: Modify the application role with application role manager from correct application policy.

Level: 1
Type: WARNING
Impact: Security

JPS-10154: Class {0} is not supported.
Causes: The principal class specified is not supported.
Action: Provide correct principal class.
Level: 1
Type: WARNING
Impact: Security

JPS-10155: The application role attribute {0} is not supported for app role search.
Cause: The application role attribute specified is not supported.
Action: Provide supported attribute.

Level: 1
Type: WARNING
Impact: Security

JPS-10156: Error occurred while fetching the application role {0}.
Cause: The internal error occurred while fetching the application role.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: WARNING
Impact: Security

JPS-10157: More than one results found for given Application role:{0}, Application name {1}, query:{2} and Actual result: {3}.
Cause: More than one results found for application name.
Action: Refer to the log files for details and correct the error.

Level: 1
Type: WARNING
Impact: Security

JPS-10158: Invalid parameter.
Cause: Invalid parameter value.
Action: Please check the values are of required type.

Level: 1
Type: WARNING
Impact: Security

JPS-10159: Application Role {0} has an invalid unique name
Cause: Application role has an invalid unique name
Action: See the log files for more details.

Level: 1
Type: WARNING
Impact: Security

JPS-10160: The Application role {0} does not belong to application. The application role dn {1} and unique name {2} are not matching.
Cause: The Application role does not belong to application context.
Action: See the log files for more details.
Level: 1
Type: WARNING
Impact: Security

JPS-10161: Internal error- More than one grantee entries found.
  Cause: Internal error- More than one grantee entries found.
  Action: See the log files for more details.

Level: 1
Type: WARNING
Impact: Security

JPS-10162: Grantee DN was missing
  Cause: Grantee DN was missing
  Action: See the log files for more details.

Level: 1
Type: WARNING
Impact: Security

JPS-10163: Internal error while revoking the permissions. Number of permissions to revoke (or delete) {0} : though only {1} permission(s) would be revoked (or deleted) if this operation were to proceed
  Cause: Internal error while revoking the permissions.
  Action: See the log files for more details.

Level: 1
Type: WARNING
Impact: Security

JPS-10164: Only one of permission list and permission entry list can be null/non-null.
  Cause: Only one of permission list and permission entry list can be null/non-null
  Action: See the log files for more details.

Level: 1
Type: WARNING
Impact: Security

JPS-10165: MATCHER.ANY not allowed for this kind of search operation
  Cause: MATCHER.ANY not allowed for this kind of search operation
  Action: Search is not allowed for the MATCHER.ANY

Level: 1
Type: WARNING
Impact: Security

JPS-10166: Error occurred during performing the operation {0}.
  Cause: Error occurred during performing the operation.
  Action: See the log files for more details.
Level: 1
Type: WARNING
Impact: Security

JPS-10167: Obligation does not exist for the policy domain {0}.
Caution: Obligation does not exist for the policy domain {0}.
Action: See the log files for more details.

Level: 1
Type: WARNING
Impact: Security

JPS-10168: Error occurred while preparing the principal in {0} method of {1} class : {2}. In standalone mode, weblogic specific jars should not be in classpath. Please check the classpath and try again.
Caution: Fail to resolve principal.
Action: Check classpath which may contain weblogic specific jars.

Level: 1
Type: ERROR
Impact: Security

JPS-10169: Default SystemAdminRole should be granted to at least one principal.
Caution: Revoking last member of default admin role SystemAdmin
Action: Keep at least one member of default admin role SystemAdmin

Level: 1
Type: WARNING
Impact: Security

JPS-10200: Administration role {0} already exists
Caution: Cannot have two administration roles with the same name.
Action: Provide a new name to the administration role.

Level: 1
Type: WARNING
Impact: Security

JPS-10201: Administration role {0} does not exist
Caution: Administration role is not found.
Action: Check the administration role name.

Level: 1
Type: WARNING
Impact: Security

JPS-10202: Administration role {0} is used
Caution: Administration role is used.
Action: Remove administration role members first.
JPS-10203: Administration role {0} does not belong to current context
   Cause: Administration role does not belong to current context.
   Action: Use it in correct context.

JPS-10204: Cannot create admin role with default name {0}
   Cause: Cannot create admin role with reserved name.
   Action: Use another name for admin role.

JPS-10205: Cannot delete default admin role {0}
   Cause: Cannot delete default admin role.
   Action: Check the admin role name for deletion.

JPS-10206: Cannot grant {0}, {1} to admin role because its super admin role has no such privilege
   Cause: Cannot grant privileges to admin role whose super role has not.
   Action: Check the admin resource action to grant.

JPS-10207: Admin resource {0} is not for this scope {1}
   Cause: This admin resource is not for this scope
   Action: Check the admin resource to grant.

JPS-10208: Cannot change rights of default admin role {0}
   Cause: Cannot change rights of default admin role for a scope
   Action: Check the admin role name.

Level: 1
Type: WARNING
Impact: Security
Type: WARNING
Impact: Security
JPS-10209: The value for the SEARCHPROPERTY.PRINCIPAL does implement the java.security.Principal interface. It is of type "(0)".
Cause: The search by value is not an instance of java.security.Principal
Action: Supply an object of type java.security.Principal
Level: 1

Type: WARNING
Impact: Security
JPS-10210: The value for the SEARCHPROPERTY.PRINCIPAL_NAME is not of type java.lang.String. It is of type "(0)".
Cause: The search by value is not an instance of java.lang.String
Action: Supply an object of type java.lang.String
Level: 1

Type: WARNING
Impact: Security
JPS-10211: Administration role cannot have more than one grantee for parameter Application:(0), policy Domain:(1), Query Parameter:(2), Actual results:(3).
Cause: The admin role cannot have more than one grantee entry.
Action: Check only one grantee entry available to admin role.
Level: 1

Type: WARNING
Impact: Security
JPS-10250: Resource type reference should not be null.
Cause: The parameter resource type reference is null.
Action: Use a valid object.
Level: 1

Type: WARNING
Impact: Security
JPS-10251: The resource type reference is invalid.
Cause: The current resource type reference is invalid.
Action: Use a valid resource type reference.
Level: 1

Type: WARNING
Impact: Security
JPS-10252: The resource type "(0)" already exists.
Cause: The resource type has existed.
Action: Make sure the resource type does not exist.
Level: 1
**Type:** WARNING  
**Impact:** Security

**JPS-10253:** The super resource type {0} does not exist.
- **Cause:** The resource type is referring an invalid super resource type.
- **Action:** Make sure the super resource type exist.
  
  **Level:** 1

**Type:** WARNING  
**Impact:** Security

**JPS-10254:** The resource type {0} should not have its own matcher since it has super type.
- **Cause:** The resource type has both its own matching algorithm and super type.
- **Action:** Remove matching algorithm if the resource type should have super type. Otherwise, remove super type.
  
  **Level:** 1

**Type:** WARNING  
**Impact:** Security

**JPS-10255:** Resource type search context should not be null.
- **Cause:** The resource type context could not be gotten.
- **Action:** Make sure the application policy is available.
  
  **Level:** 1

**Type:** WARNING  
**Impact:** Security

**JPS-10256:** Could not get an available data manager.
- **Cause:** The data manager is invalid.
- **Action:** Make sure policy store and related configuration are correct.
  
  **Level:** 1

**Type:** WARNING  
**Impact:** Security

**JPS-10257:** The modification operator {0} is invalid.
- **Cause:** The operator in ModificationItem is invalid.
- **Action:** Make sure the operation is one of DirContext.ADD_ATTRIBUTE, DirContext.REPLACE_ATTRIBUTE and DirContext.REMOVE_ATTRIBUTE.
  
  **Level:** 1

**Type:** WARNING  
**Impact:** Security

**JPS-10258:** The property name {0} is unknown.

- **Action:** Make sure the attribute ID is a valid one.
  
  **Level:** 1
Type: WARNING
Impact: Security

JPS-10259: The name of resource type could not be modified.
Cause: Resource type name could not be modified.
Action: Do not put resource type name in ModificationItem.

Level: 1

Type: WARNING
Impact: Security

JPS-10260: The super type of resource type could not be modified.
Cause: The super type of resource type could not be modified.
Action: Do not put super type in ModificationItem.

Level: 1

Type: WARNING
Impact: Security

JPS-10261: The matching algorithm of resource type could not be modified.
Cause: The matching algorithm of resource type could not be modified.
Action: Do not put matching algorithm in ModificationItem.

Level: 1

Type: WARNING
Impact: Security

JPS-10262: The action delimiter of resource type could not be modified.
Cause: The action delimiter of resource type could not be modified.
Action: Do not put action delimiter in ModificationItem.

Level: 1

Type: WARNING
Impact: Security

JPS-10263: The operation REPLACE_ATTRIBUTE could not be used to the allowed actions of resource type.
Cause: The operation REPLACE_ATTRIBUTE could not be used to the allowed actions of resource type.
Action: Use REMOVE_ATTRIBUTE and ADD_ATTRIBUTE in ModificationItem.

Level: 1

Type: WARNING
Impact: Security

JPS-10264: The property {0} of resource type is single, could not have more than one value.
Cause: The property could not have more than one value.
Action: First remove the existing value before adding new one.

Level: 1
Type: WARNING
Impact: Security
JPS-10265: Could not add or replace the property \{0\} since there is no value provided.
    Cause: There is no value provided when trying to add or replace an property.
    Action: Provide the new value.
Level: 1
Type: WARNING
Impact: Security
JPS-10266: The value data type of property \{0\} should be String.
    Cause: The value data type of property is not String.
    Action: Use a String object as value.
Level: 1
Type: WARNING
Impact: Security
JPS-10267: The resource type \{0\} does not exist.
    Cause: The resource type does not exist.
    Action: Make sure the resource type exist.
Level: 1
Type: WARNING
Impact: Security
JPS-10268: The resource type \{0\} is in use, could not be deleted.
    Cause: The resource type could not be deleted without cascade since it is in use.
    Action: Cascade delete it or first remove all referring objects.
Level: 1
Type: WARNING
Impact: Security
JPS-10269: The operation REPLACE_ATTRIBUTE could not be used to the resource type attribute
    Cause: The operation REPLACE_ATTRIBUTE could not be used to the resource type attribute
    Action: Use REMOVE_ATTRIBUTE and ADD_ATTRIBUTE in ModificationItem.
Level: 1
Type: WARNING
Impact: Security
JPS-10270: The resource type attribute \{0\} is used in policy(-ies) and can not be deleted.
    Cause: The resource type attribute being deleted was used in one or more policies and could not be deleted.
    Action: Before deleting the resource attribute, make sure it is not used.
Level: 1
Type: WARNING
Impact: Security

JPS-10271: The resource matcher class of resource type {0} could not be modified to {1}.
Cause: The resource type matcher class was changed while modifying.
Action: Keep matcher class unchanged.

Level: 1
Type: WARNING
Impact: Security

JPS-10272: Permission Class not found in the classpath: {0}
Cause: The permission class was not found in the class path.
Action: Make sure that the permission class is part of the class path for the program.

Level: 1
Type: WARNING
Impact: Security

JPS-10273: Permission class expected to be either oracle.security.jps.ResourcePermission or extending oracle.security.jps.AbstractTypedPermission but found {0} Resource Type: {1} is sharing permission class with Resource Type: {2}
Cause: The Permission class is not either ResourcePermission or Abstracted Permission
Action: The Permission class for the resource type must be a Resource permission

Level: 1
Type: WARNING
Impact: Security

JPS-10274: Permission should be associated with a Resource Type. Permission Name: {0}
Cause: The permission should have a resource type associated with it
Action: Make sure that the permission has a resource type associated with it

Level: 1
Type: WARNING
Impact: Security

JPS-10275: Resource Type Matcher Class and Permissions do not match. {0} and {1} do not match
Cause: Resource Type Matcher Class and Permissions do not match.
Action: Make sure that the Matcher Class and Permissions match.

Level: 1
Type: WARNING
Impact: Security

JPS-10276: Cannot determine the Resource Type from the permission {0}

Cause: Cannot determine the Resource Type from the permission.

Action: Make sure that there is a resource type associated with the permission class

Level: 1
Type: WARNING
Impact: Security

JPS-10277: Allowed attributes can not be modified.

Cause: Allowed attributes can not be modified.

Action: Make sure not modifying allowed attributes

Level: 1
Type: WARNING
Impact: Security

JPS-10278: Requested modification to the resource type {0} is not allowed.

Cause: Requested modification to the resource type is not allowed.

Action: Make sure not to make certain type of changes to the resource type when it is used by resources

Level: 1
Type: WARNING
Impact: Security

JPS-10279: The custom resource matcher class of resource type {0} could not be modified to {1}.

Cause: The custom resource matcher class was changed while modifying the resource type.

Action: Keep custom resource matcher class unchanged.

Level: 1
Type: WARNING
Impact: Security

JPS-10280: The resource attribute {0} does not exist in the resource type {1}.

Cause: The resource attribute does not exist in the resource type.

Action: Check all the valid resource attributes in the resource type.

Level: 1
Type: WARNING
Impact: Security

JPS-10400: Resource reference should not be null.

Cause: The parameter resource reference is null.

Action: Use a valid object.

Level: 1
Type: WARNING  
Impact: Security  
JPS-10401: The resource reference is invalid.  
  Cause: The current resource reference is invalid.  
  Action: Use a valid resource reference.  
  Level: 1  
Type: WARNING  
Impact: Security  
JPS-10402: The resource \{0\} does not exist.  
  Cause: The resource does not exist.  
  Action: Make sure the resource exist.  
  Level: 1  
Type: WARNING  
Impact: Security  
JPS-10403: Could not get an available data manager.  
  Cause: The data manager is invalid.  
  Action: Make sure policy store and related configuration are correct.  
  Level: 1  
Type: WARNING  
Impact: Security  
JPS-10404: The resource type \{0\} does not exist.  
  Cause: The resource type does not exist.  
  Action: Make sure the resource type exist.  
  Level: 1  
Type: WARNING  
Impact: Security  
JPS-10405: The resource \"[0]\" with type \"[1]\" already exists in current application policy.  
  Cause: The resource to be created has existed.  
  Action: Make sure the resource does not exist.  
  Level: 1  
Type: WARNING  
Impact: Security  
JPS-10406: The modification operator \{0\} is invalid.  
  Cause: The operator in ModificationItem is invalid.  
  Action: Make sure the operation is one of DirContext.ADD_ATTRIBUTE, DirContext.REPLACE_ATTRIBUTE and DirContext.REMOVE_ATTRIBUTE.  
  Level: 1
Type: WARNING
Impact: Security

JPS-10407: The property name {0} is unknown.
Cause: The attribute ID in ModificationItem is undefined.
Action: Make sure the attribute ID is a valid one.
Level: 1

Type: WARNING
Impact: Security

JPS-10408: The name and type of resource could not be modified.
Cause: The name and type of resource could not be modified.
Action: Do not put resource name and type in ModificationItem.
Level: 1

Type: WARNING
Impact: Security

JPS-10409: The property {0} of resource is single, could not have more than one value.
Cause: The property could not have more than one value.
Action: First remove the existing value before adding new one.
Level: 1

Type: WARNING
Impact: Security

JPS-10410: Could not add or replace the property {0} since there is no value provided.
Cause: There is no value provided when trying to add or replace an property.
Action: Provide the new value.
Level: 1

Type: WARNING
Impact: Security

JPS-10411: The resource {0} is in use, could not be deleted.
Cause: The resource could not be deleted without cascade since it is in use.
Action: Cascade delete it or first remove all referring objects.
Level: 1

Type: WARNING
Impact: Security

JPS-10412: The resource attribute {0} already exists in the current entry.
Cause: The resource attribute could not be added since it already exists.
Action: Remove duplicate resource attributes.
Level: 1
Type: WARNING
Impact: Security

JPS-10413: The resource action {0} already exists in the current entry.
Cause: The resource action could not be added since it already exists.
Action: Remove duplicate resource actions
Level: 1

Type: WARNING
Impact: Security

JPS-10414: The resource attribute {0} could not be deleted since it does not exist.
Cause: The resource attribute could not be deleted since it does not exist.
Action: Check if the resource attribute exists.
Level: 1

Type: WARNING
Impact: Security

JPS-10415: The resource action {0} could not be deleted since it does not exist.
Cause: The resource action could not be deleted since it does not exist.
Action: Check if the resource action exists
Level: 1

Type: WARNING
Impact: Security

JPS-10416: Resource {0} does not belong to the context.
Cause: The resource does not belong to current context
Action: Pass in correct resource.
Level: 1

Type: WARNING
Impact: Security

JPS-10417: Resource query across different resource type is not allowed.
Cause: Resource query across different resource type is not allowed
Action: Pass in correct query parameter.
Level: 1

Type: WARNING
Impact: Security

JPS-10418: Cannot delete a resource that has one more child resources.
Cause: Can not delete a resource that has one or more child resources
Action: Delete all child resources and then try again.
Level: 1

Type: WARNING
Impact: Security
JPS-10419: Resource hierarchy type change is not allowed.
  Cause: Resource hierarchy type change is not allowed.
  Action: Check the resource hierarchy type
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10420: Resource name must begin with the resource name delimiter.
  Cause: Resource name must begin with the resource name delimiter
  Action: Add resource name delimiter in the beginning of the resource name.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10421: The given all action value already exists.
  Cause: The given all action value already exists
  Action: Check the input all action value and check for duplicate values.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10422: The resource attribute \{0\} is used in policy(-ies) and can not be deleted.
  Cause: The resource attribute is used in policy(-ies) and can not be deleted.
  Action: Before deleting the resource attribute, make sure it is not used.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10423: The action \{0\} is used by the \{1\} and can not be deleted.
  Cause: The action is used by the permissionSet/permission and can not be deleted.
  Action: Check if the action is used in any PermissionSet/Permission before deleting.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10424: The resourceType \{0\} of hierarchy type is invalid as its parent is null.
  Cause: The heirarchical resourceType's parent is null.
  Action: Make sure to provide a valid name for the heirarchical resourceType
  Level: 1
  Type: ERROR
  Impact: Security
JPS-10425: The resource attribute \{0\} already contains the value \{1\}.
Cause: The resource attribute already contains this value.
Action: Remove duplicate resource attributes values.

Level: 1
Type: WARNING
Impact: Security

JPS-10426: Cannot set all actions keyword for resource type with non-null matcher class.
Cause: All actions keyword cannot be set to resource type with matcher class
Action: Do not set all actions keyword for a resource type with a matcher class.

Level: 1
Type: WARNING
Impact: Security

JPS-10427: The resource name expression "\{0\}" is not a valid Java regular expression.
Cause: Regular expression provided for resource name expression is invalid.
Action: Check that the resource name expression is a valid Java regular expression.

Level: 1
Type: WARNING
Impact: Security

JPS-10428: The resource \{0\} of type \{1\} does not exist.
Cause: The resource of the resource type does not exist.
Action: Make sure the resource of the resource type exists.

Level: 1
Type: WARNING
Impact: Security

JPS-10429: The value data type of property \{0\} should be String and not \{1\}.
Cause: The value data type of property is not String.
Action: Use a String object as value.

Level: 1
Type: WARNING
Impact: Security

JPS-10430: The Resource name \{0\} has an invalid format
Cause: Too many delimiters in the resource name
Action: Limit the number of delimiters in the beginning and middle of resource name to one.

Level: 1
Type: WARNING
Impact: Security
JPS-10431: Wrong isSingle property for the attribute {0}; expected {1}, but {2}.
Cause: Wrong isSingle property of resource attribute
Action: Ensure isSingle property of the attribute in resource is the same as the definition in resource type
Level: 1
Type: WARNING
Impact: Security

JPS-10432: Wrong DataType property for the attribute {0}; expected {1}, but {2}.
Cause: Wrong DataType property of resource attribute
Action: Ensure DataType property of the attribute on resource is the same as the definition in resource type
Level: 1
Type: WARNING
Impact: Security

JPS-10451: Permission set {0} does not belong to the context.
Cause: The permission set does not belong to current context
Action: Pass in correct permission set.
Level: 1
Type: WARNING
Impact: Security

JPS-10452: Permission set {0} has ResourceActionsEntry with null ResourceEntry and null ResourceNameExpression.
Cause: Both ResourceEntry and Resource name expression of ResourceActionsEntry is null
Level: 1
Type: WARNING
Impact: Security

JPS-10454: No resources or actions have been identified by the permission set.
Cause: No resources or actions have been identified by the permission set.
Action: Ensure that the permission set is created with valid resource actions.
Level: 1
Type: WARNING
Impact: Security

JPS-10455: Resource is not protected by a Java Permission.
Cause: Resource is not protected by a Java Permission.
Action: Ensure that the permission set is created with valid resource object.
Level: 1
Type: WARNING
Impact: Security

**JPS-10456: **ResourceExpression and ResourceAction cannot be specified at the same time.

**Cause:** ResourceExpression and ResourceAction cannot be specified at the same time.

**Action:** PermissionSet ResourceAction should contain either Resource expression or ResoruceEntry.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10457: **Not able to perform operation due to invalid parameter. Cause: "[0]".

**Cause:** Not able to perform operation due to invalid parameter. Cause: [0].

**Action:** Ensure that the operation is called with valid parameters.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10458: **ResourceExpression and ResourceAction cannot be null at the same time.

**Cause:** ResourceExpression and ResourceAction cannot be null at the same time.

**Action:** PermissionSet ResourceAction should contain either Resource expression or ResoruceEntry.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10459: **The modified permission set {0} contains resources of multiple resource types. It is not permitted as there is policy(-ies) that references that permission set and uses resource attributes.

**Cause:** The modified permission set contained resources of multiple resource types. It was not permitted if there was a policy that referenced that permission set and used resource attributes.

**Action:** Fix the permission set or modify the policy(-ies).

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10460: **The permission set search query {0} is not supported

**Cause:** The permission set search query is not supported.

**Action:** Use supported query scenario.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10463: **Requested actions: "[0]" are not a subset of valid actions: "[1]" for the given resource: "[2]" and type: "[3]".
Cause: Invalid resource actions for the given resource.

Action: Ensure that the actions in the resource-actions are a valid subset of the actions defined by the resource type.

Level: 1
Type: WARNING
Impact: Security

JPS-10464: Error occurred while getting the permission set entry for permission set search query {0}.

Cause: Error occurred while getting the permission set entry for permission set search query.

Action: See the log files for more details.

Level: 1
Type: WARNING
Impact: Security

JPS-10465: Permission set {0} has ResourceActionsEntry with null expression in ResourceNameExpression.

Cause: Expression in ResourceNameExpression of ResourceActionsEntry is null

Level: 1
Type: WARNING
Impact: Security

JPS-10466: Resource {0} has no Resource Actions, but Resource Type {1} has resource actions.

Cause: Empty resource actions for the given Resource, but Resource type has actions.

Action: Ensure that the actions in the resource-actions are not null or empty since the resource type has actions.

Level: 1
Type: WARNING
Impact: Security

JPS-10467: Permission set {0} has ResourceActionsEntry with null expression in ResourceNameExpression.

Cause: Expression in ResourceNameExpression of ResourceActionsEntry is null

Level: 1
Type: WARNING
Impact: Security

JPS-10468: Duplicate permission " {0} " in policy store.

Cause: Duplicate permission in policy store.
Action: Check the policy store and ensure that there is no duplicate permission.

Level: 1
Type: WARNING
Impact: Security

JPS-10469: Cannot remove all the ResourceActionsEntries in PermissionSet.
Cause: Try to remove all the ResourceActionsEntries in existing PermissionSet.
Action: Check the updated resource actions, make sure PermissionSet does not have up empty resource actions.

Level: 1
Type: WARNING
Impact: Security

JPS-10470: The resource type name "(0)", does not match the resourceType in the encoded target name: "(1)". Permission class is "(2)"
Cause: Invalid resource type in permission target.
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10471: Resource type is missing in the target name: "(0)", for permission: "(1)"
Cause: Resource type missing in permission target.
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10472: Target "(0)" is missing the prefix "=resourceName=". Unable to determine the resource name for permission: "(1)"
Cause: Target name missing in permission target.
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10473: The target name "(0)" is invalid. Should start with "(1)"
Cause: Target name encoding is not correct.
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10474: The parameter: "(0)", value: "(1)" cannot be null
Cause: Permission target is null.
JPS-10475: The permission actions: "\{0\}" are not a subset of valid actions defined in resource type: "\{1\}"

**Cause:** Permission actions do not match with valid resource type actions.

**Action:** Refer to the log files for details.

---

JPS-10500: The target policy, \{0\}, does not exist.

**Cause:** The policy object does not exist.

**Action:** Check if the target policy exists.

---

JPS-10501: Policy query contains unrecognizable information.

**Cause:** Policy query contains unrecognizable information.

**Action:** Check the policy query object.

---

JPS-10502: Policy rule information is missing.

**Cause:** Policy rule information is missing.

**Action:** Check if policy rule information exists in policy repository.

---

JPS-10503: Obligation information is missing.

**Cause:** Obligation information is missing.

**Action:** Check if obligation information exists in policy repository.

---

JPS-10504: Permission set information is missing.

**Cause:** Permission set information is missing.

**Action:** Check if permission set information exists in policy repository.
Level: 1
Type: WARNING
Impact: Security

**JPS-10505: Grantee information is missing.**

*Cause:* Grantee information is missing.

*Action:* Check if grantee information exists in policy repository.

Level: 1
Type: WARNING
Impact: Security

**JPS-10506: The policy rule, {0}, does not exist.**

*Cause:* The policy rule does not exist.

*Action:* Check the policy rule name passed in.

Level: 1
Type: WARNING
Impact: Security

**JPS-10507: The condition string is in wrong format, {0}.**

*Cause:* Condition string is in wrong format.

*Action:* Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

**JPS-10508: Policy condition contains an unknown function, {0}.**

*Cause:* Policy condition contains an unknown function.

*Action:* Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

**JPS-10509: Policy condition parsing error.**

*Cause:* Policy condition parsing error.

*Action:* Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

**JPS-10510: The expression, {0}, is unknown.**

*Cause:* The policy expression is unknown.

*Action:* Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10511: The data type, {0}, is unknown.
 Cause: The data type is unknown
 Action: Check condition string in policy repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10512: A ResourceActionsEntry should contain either resource entry or resource name expression.
 Cause: The ResourceActionsEntry object does not contain resource information.
 Action: Check ResourceActionsEntry passed in.

Level: 1
Type: WARNING
Impact: Security

JPS-10513: The search value type {0} is not supported for {1}.
 Cause: Query criteria type does not support.
 Action: Pass in a correct query value.

Level: 1
Type: WARNING
Impact: Security

JPS-10514: Cannot add PermissionSet to PolicyEntry if it has ResourceType.
 Cause: Resource type is already defined in PolicyEntry.
 Action: Clear resource type of PolicyEntry before adding PermissionSetEntry.

Level: 1
Type: WARNING
Impact: Security

JPS-10515: Cannot set ResourceType to PolicyEntry if it has PermissionSet.
 Cause: Permission Set is already defined in PolicyEntry.
 Action: Clear Permission Set of PolicyEntry before setting Resource Type.

Level: 1
Type: WARNING
Impact: Security

JPS-10516: Cannot add Rule if there is rule already in PolicyEntry
 Cause: Add rule to policy when the policy already has rule.
 Action: Delete existing rule before adding new rule to policy.

Level: 1
Type: WARNING
Impact: Security
JPS-10517: Delete rule not existing in PolicyEntry
Cause: rule does not belong to the PolicyEntry.
Action: Check the rule before deleting rule from PolicyEntry.

Level: 1
Type: WARNING
Impact: Security

JPS-10518: Delete permission set not existing in PolicyEntry
Cause: permission set does not belong to the PolicyEntry.
Action: Check the permission set before deleting permission set from PolicyEntry.

Level: 1
Type: WARNING
Impact: Security

JPS-10519: Delete obligation not existing in PolicyEntry
Cause: obligation does not belong to the PolicyEntry.
Action: Check the obligation before deleting obligation from PolicyEntry.

Level: 1
Type: WARNING
Impact: Security

JPS-10520: Delete Principal not existing in PolicyEntry
Cause: principal does not belong to the PolicyEntry.
Action: Check the principal before deleting principal from PolicyEntry.

Level: 1
Type: WARNING
Impact: Security

JPS-10521: The obligation {0} already exists.
Cause: The obligation already exists in the policy entry.
Action: Check ObligationEntry passed in.

Level: 1
Type: WARNING
Impact: Security

JPS-10522: The parameters passed in is invalid, we expect {0}, but {1} is passed in.
Cause: The parameter passed in the function is not valid.
Action: Pass in correct parameters.

Level: 1
Type: WARNING
Impact: Security

JPS-10523: The function return type is invalid, we expect OpssBoolean, but {0} is passed in.
Cause: The return type of the function is not valid.
Action: Pass in a function with OpssBoolean return type.

Level: 1
Type: WARNING
Impact: Security

JPS-10524: The query with search property {0}, comparator type {1} and matcher {2} is not supported.
Cause: Such query is not supported.
Action: Pass in a supported query value.

Level: 1
Type: WARNING
Impact: Security

JPS-10525: The attribute assignment {0} could not be added since it already exists.
Cause: The attribute assignment could not be added since it already exists.
Action: Remove duplicate attribute assignments.

Level: 1
Type: WARNING
Impact: Security

JPS-10526: The permission set {0} could not be added since it already exists.
Cause: The permission set could not be added since it already exists.
Action: Remove duplicate permission sets.

Level: 1
Type: WARNING
Impact: Security

JPS-10527: The principal {0} could not be added since it already exists.
Cause: The principal could not be added since it already exists.
Action: Remove duplicate principals.

Level: 1
Type: WARNING
Impact: Security

JPS-10528: The Policy {0} referenced multiple resource types and resource attribute is used in policy condition or obligation.
Cause: Policies that used resource attributes in their conditions or obligations could not reference one or more permission sets that contain resources of multiple types.
Action: Split the policy to reference only one resource type in each policy.

Level: 1
Type: WARNING
Impact: Security
JPS-10529: The resource attribute \{0\} used in policy condition or obligation is invalid resource attribute of type \{1\}.

**Cause:** The resource attribute used in policy condition was invalid for the referenced resource type

**Action:** Fix the policy condition to use only valid attributes for the given resource type.

**Level:** 1

**Type:** WARNING

**Impact:** Security

JPS-10530: Cannot create a policy \{0\} with AdminRole(s) \{1\}.

**Cause:** Cannot create a policy with AdminRoleEntry(s).

**Action:** Remove the AdminRole principals from the principal list.

**Level:** 1

**Type:** WARNING

**Impact:** Security

JPS-10531: Cannot grant permission to AdminRole(s) \{0\}.

**Cause:** Cannot grant permission to AdminRoleEntry(s).

**Action:** Remove the AdminRole principals from the principal list.

**Level:** 1

**Type:** WARNING

**Impact:** Security

JPS-10532: Cannot grant AdminRole \{0\} to another AdminRole \{1\}.

**Cause:** Cannot grant AdminRole to another AdminRole.

**Action:** Change to grant AdminRole to either enterprise role or user.

**Level:** 1

**Type:** WARNING

**Impact:** Security

JPS-10533: Cannot revoke AdminRole \{0\} from another AdminRole \{1\}.

**Cause:** Cannot revoke AdminRole from another AdminRole.

**Action:** Change to revoke AdminRole from either enterprise role or user.

**Level:** 1

**Type:** WARNING

**Impact:** Security

JPS-10534: Cannot grant AdminRole \{0\} to an AppRole \{1\}.

**Cause:** Cannot grant AdminRole to an AppRole.

**Action:** Change to grant AdminRole to either enterprise role or user.

**Level:** 1

**Type:** WARNING

**Impact:** Security
JPS-10535: Cannot revoke AdminRole [0] from an AppRole [1].
  Cause: Cannot revoke AdminRole from an AppRole.
  Action: Change to revoke AdminRole from either enterprise role or user.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10536: AdminRole [0] cannot be managed outside of the AdminManager.
  Cause: AdminRole cannot be managed outside of AdminManager.
  Action: Use AdminManager for all AdminRole related administrative tasks.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10537: Cannot modify grant permission to AdminRole(s) [0].
  Cause: Cannot modify grant permission to AdminRoleEntry(s).
  Action: Remove the AdminRole principals from the principal list.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10538: Cannot revoke permission from AdminRole(s) [0].
  Cause: Cannot revoke permission from AdminRoleEntry(s).
  Action: Remove the AdminRole principals from the principal list.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10539: Basic policy cannot have [0] information.
  Cause: Basic policy cannot have [0] information.
  Action: Remove the information from basic policy.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10540: Basic policy cannot have ResourceActionsEntry without ResourceEntry.
  Cause: Basic policy cannot have ResourceActionsEntry without ResourceEntry.
  Action: Use ResourceActionsEntry with ResourceEntry for basic policy.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10541: Basic policy cannot use Resource [0] without Resource Matcher Class.
  Cause: Basic policy cannot use Resource [0] without Resource Matcher Class.
**Action:** Use Resource with Resource Matcher Class for basic policy.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10542: Default TransformerFactory cannot be located.**  
**Cause:** The TransformerFactory cannot be loaded  
**Action:** Check the environment

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10543: Failed to retrieve Transformer.**  
**Cause:** The TransformerFactory cannot generate a Transformer.  
**Action:** Check the environment

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10544: The policy "{0}" already exists.**  
**Cause:** The role policy object exists.  
**Action:** Create a role policy with a different name.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10545: The application role "{0}" already exists.**  
**Cause:** The application role could not be added since it already exists.  
**Action:** Remove duplicate application role.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10546: The resource "{0}, {1}" could not be added since it already exists.**  
**Cause:** The resource could not be added since it already exists.  
**Action:** Remove duplicate resource.

**Level:** 1  
**Type:** WARNING  
**Impact:** Security

**JPS-10547: The resource name expression "{0}, {1}" could not be added since it already exists.**  
**Cause:** The resource name expression could not be added since it already exists.  
**Action:** Remove duplicate resource name expression.
Level: 1
Type: WARNING
Impact: Security

JPS-10548: The policy rule {0} already exists.
Cause: The policy rule already exists.
Action: Create policy rule with different name.

Level: 1
Type: WARNING
Impact: Security

JPS-10549: The policy rule {0} is in use, could not be deleted.
Cause: The policy rule could not be deleted without cascade since it is in use.
Action: Cascade delete it or first remove all referring objects.

Level: 1
Type: WARNING
Impact: Security

JPS-10550: Attribute "{0}" already exists
Cause: Cannot have two attributes with the same name.
Action: Provide a new name to the attribute.

Level: 1
Type: WARNING
Impact: Security

JPS-10551: Attribute {0} does not exist
Cause: Attribute not found.
Action: Check the attribute name.

Level: 1
Type: WARNING
Impact: Security

JPS-10552: Attribute {0} is used.
Cause: Attribute is already used.
Action: Remove the objects which use this attribute.

Level: 1
Type: WARNING
Impact: Security

JPS-10553: Attribute {0} does not belong to current application.
Cause: Attribute does not belong to current application policy.
Action: Modify the attribute with extension manager from correct application policy.

Level: 1
Type: WARNING
Impact: Security

JPS-10554: The name of Attribute in policy repository is missing
Cause: Attribute in policy store has no name.
Action: Check the underline policy repository.
Level: 1

Type: WARNING
Impact: Security

JPS-10555: The type of Attribute in policy repository is missing
Cause: Attribute in policy store has no type.
Action: Check the underline policy repository.
Level: 1

Type: WARNING
Impact: Security

JPS-10556: The category of Attribute in policy repository is missing
Cause: Attribute in policy store has no category.
Action: Check the underline policy repository.
Level: 1

Type: WARNING
Impact: Security

JPS-10557: Cannot overwrite a built-in attribute, {0}.
Cause: Try to overwrite a built-in attribute.
Action: Do not overwrite a built-in function.
Level: 1

Type: WARNING
Impact: Security

JPS-10558: Cannot modify a built-in attribute, {0}.
Cause: Try to modify a built-in attribute.
Action: Do not modify a built-in attribute.
Level: 1

Type: WARNING
Impact: Security

JPS-10559: Cannot delete a built-in attribute, {0}.
Cause: Try to delete a built-in attribute.
Action: Do not delete a built-in attribute.
Level: 1

Type: WARNING
Impact: Security
JPS-10581: Cannot overwrite a built-in function, \{0\}.
  Cause: Try to overwrite a built-in function.
  Action: Do not overwrite a built-in function.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10582: The function does not exist, \{0\}.
  Cause: The function does not exist.
  Action: Check the function name passed in.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10583: The function is in use, \{0\}.
  Cause: The function is in use.
  Action: Cannot delete a function in use.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10584: The function is used in some policies, your changes on return type may lead to unpredictable issues.
  Cause: The function is in use.
  Action: Cannot change return type of a function in use.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10585: The function is used in some policies, your changes on parameter types may lead to unpredictable issues.
  Cause: The function is in use.
  Action: Cannot change parameter types of a function in use.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10586: Cannot modify a built-in function, \{0\}.
  Cause: Try to modify a built-in function.
  Action: Do not modify a built-in function.

  Level: 1
  Type: WARNING
  Impact: Security
JPS-10587: Cannot delete a built-in function, {0}.
  Cause: Try to delete a built-in function.
  Action: Do not delete a built-in function.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10588: The function "{0}" already exists.
  Cause: The function exists.
  Action: Create a function with a different name.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10589: Cascade delete is not supported.
  Cause: Cascade delete not supported.
  Action: Set the cascade delete parameter to false.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10590: Cannot find the function entry for function name {0}.
  Cause: Cannot find the function entry for function name.
  Action: Check function entry in policy repository.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10591: Cannot find the expression type for expression {0}.
  Cause: Cannot find the expression type for the expression.
  Action: Check expression in policy repository.

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10592: Operation {1} is not allowed for multi valued attribute {0}
  Cause: The category of Attribute is Invalid.
  Action: The category of Attribute is Invalid. Supply a valid Attribute category

  Level: 1
  Type: WARNING
  Impact: Security

JPS-10600: Failed to initialize PD instance.
  Cause: Failed to initialize PD instance.
Action: Refer to the base exception in logs to resolve the issue.

Level: 1
Type: WARNING
Impact: Security

JPS-10601: Failed to initialize PolicyDistributionManager instance.
Cause: Failed to initialize PolicyDistributionManager instance.
Action: Refer to the base exception in logs to resolve the issue.

Level: 1
Type: WARNING
Impact: Security

JPS-10602: PD has not been initialized.
Cause: PD has not been initialized.
Action: Check if OPSS policy store provider has been initialized successfully.

Level: 1
Type: WARNING
Impact: Security

JPS-10603: FAILURE: Retry [0] failed after [1] times retries due to following exception [2].
Cause: PD operation failed to retry.
Action: Check connectivity to backend repository.

Level: 1
Type: WARNING
Impact: Security

JPS-10604: The operation is not allowed for non-controlled mode application [0].
Cause: Can not distribute policy for non-controlled policy distribution mode application
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10605: Failed to distribute policy for catch exception.
Cause: Distribute policy failed for catch exception
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10606: Failed to distribute policy to PDP [0] for catch exception [1].
Cause: Failed to distribute policy to pdp for catch exception
JPS-10607: Invalid cache key \{0\} in \{1\} cache.
   Cause: Invalid cache key
   Action: Refer to the log files for details.

JPS-10608: Failed to copy files from active directory \{0\} to update directory \{1\}.
   Cause: Failed to copy cache file from active directory to update directory
   Action: Refer to the log files for details.

JPS-10609: Failed to write state.chk file.
   Cause: Failed to write state.chk file
   Action: Refer to the log files for details.

JPS-10610: Failed to update local cache since distributed payload for application \{0\} is empty.
   Cause: Failed to update local cache since distributed payload is empty
   Action: Refer to the log files for details.

JPS-10611: Invalid distribution state \{0\} in step \{1\}.
   Cause: Invalid distribution state
   Action: Refer to the log files for details.

JPS-10612: Local cache file verification failed, so redistribute all binding applications
   Cause: Failed to verify local cache file, so need to redistribution all binding applications
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

**JPS-10613: Failed to parse PD port number, do not start PD registration web service.**
Cause: Failed to parse PD port number, do not start PD registration web service.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

**JPS-10614: Failed to start PD registration web service for catch exception.**
Cause: Failed to start PD registration web service for catch exception.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

**JPS-10615: Catch exception.**
Cause: Catch interrupt exception in start registration service thread.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

**JPS-10616: Failed to find local host name, do not start PD registration web service.**
Cause: Failed to find local host name, do not start PD registration web service.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

**JPS-10617: Failed to start PD push policy web service for catch exception.**
Cause: Failed to start PD registration web service for catch exception.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

**JPS-10618: Invalid SSL configuration.**
Cause: Invalid SSL configuration, please check log for details
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10619: Failed to initialize cipher {0} for local cache encryption/decryption.
Cause: Failed to initialize cipher for local cache encryption/decryption.
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10620: Exception reported in registration thread.
Cause: Catch interrupt exception in start registration service thread.
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10621: PD Lock not found
Cause: PD Lock node not found.
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10622: Invalid PD Lock update time {0}.
Cause: Invalid PD Lock update time stamp.
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10623: PD is running in another Admin, please distribute policy after the process finished.
Cause: PD is running in another Admin, please distribute policy after the process finished.
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10624: Failed to connect primary server, try secondary server.
Cause: Failed to connect primary server, try secondary server.
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10625: Failed to read from the local cache. The cache will be removed. Reason: [0]
Cause: Failed to read from the local cache. The cache will be removed.
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10626: Encryption/Decryption of the local cache file using the algorithm [0] is not supported.
Cause: The specified algorithm for local cache encryption/decryption is not supported.
Action: Please check PDP service configuration in jps-config.xml file.

Level: 1
Type: ERROR
Impact: Security

JPS-10627: The key length used to initialize cipher [0] is not valid. Expected key length is [1] bits, but raw key length is [2] bits.
Cause: The key length used to initialize cipher is not valid.
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10628: Retry [0] for the [1] times.
Cause: Retry [0] for the [1] times.
Action: No actions are required

Level: 1
Type: NOTIFICATION
Impact: Security

Action: No actions are required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10630: The default DB policy store is missing for mixed mode.
Cause: The default DB policy store is missing for mixed mode.
Action: Configure one DB policy store instance.

Level: 1
Type: ERROR
Impact: Security

JPS-10631: Failed to distribute policy to Real Application Security Database, target RAS database {0}, exception {1}.
Causes: Failed to distribute policy to Real Application Security Database
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10632: Failed to obtain the datasource for Real Application Security Database, target RAS database {0}, exception {1}.
Cause: Failed to obtain the datasource for Real Application Security Database
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10633: Failed to fetch the information from the intermediate table, target RAS database {0}, exception {1}.
Cause: Failed to fetch the information from the intermediate table
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10634: Failed to prepare data for distributing policy to Real Application Security Database, application name {0}, exception {1}.
Cause: Failed to prepare data for distributing policy to Real Application Security Database
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10635: Failed to update the intermediate table in the policy store database, target RAS database {0}, exception {1}.
Cause: Failed to update the intermediate table in the policy store database
Action: Refer to the log files for details.

Level: 1
Type: ERROR
Impact: Security

JPS-10636: Incorrect Real Application Security PDP address format.
Cause: Incorrect Real Application Security PDP address format
Action: Refer to the log files for details. The correct format should start with "ras:"
Level: 1
Type: ERROR
Impact: Security

JPS-10700: The value of attribute {0} should be unique
Cause: The unique attribute has duplicated values.
Action: Keep attribute value unique.
Level: 1
Type: WARNING
Impact: Security

JPS-10701: Data Source lookup failure. It is safe to ignore the warning during WebSphere server starts up. If you still get the warning after WebSphere server starts up, check your configuration.
Cause: Websphere data source lookup failure.
Action: Safe to ignore during WebSphere starts up.
Level: 1
Type: ERROR
Impact: Security

JPS-10702: The datasource {0} is not found.
Cause: Given datasource jndi name is not found.
Action: Check datasource jndi name.
Level: 1
Type: ERROR
Impact: Security

JPS-10750: Application Policy unique name: "{0}" is invalid
Cause: The application policy unique name is invalid
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10751: The version number of Application policy : "{0}" is invalid
Cause: The application policy version number is invalid
Action: Refer to the log files for details.
Level: 1
Type: ERROR
Impact: Security

JPS-10752: The policy entry unique name: "[0]" is invalid
  Cause: The policy entry unique name is invalid
  Action: Refer to the log files for details.
  Level: 1
  Type: ERROR
  Impact: Security

JPS-10800: The role policy object "[0]" does not exist.
  Cause: The role policy object does not exist.
  Action: Check if the target role policy exists.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10801: The role policy object "[0]" already exists.
  Cause: The policy object exists.
  Action: Create a policy with a different name.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10802: Application role hierarchy cannot participate in a role mapping policy.
  Cause: One or more principals in the role mapping policy are of type: ApplicationRole or AnonymousRole or AuthenticatedRole or and AdminRole.
  Action: Identify the principal type in the incoming principals, and ensure only a user or group principal type is supplied.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10803: At least one of the Resource(s)/Resource Name Expression(s) used in Role Policy are permission based. This is not allowed.
  Cause: At least one of the Resource(s)/Resource Name Expression(s) used in Role Policy are permission based. This is not allowed.
  Action: Ensure that resource(s)/resource name expression(s) are not permission based.
  Level: 1
  Type: WARNING
  Impact: Security

JPS-10804: The advice [0] already exists.
  Cause: The advice already exists in the policy entry.
  Action: Check AdviceEntry passed in.
Level: 1
Type: WARNING
Impact: Security

JPS-10850: The SM Config Tool is used to configure the Security Modules for Oracle Entitlements Server. Here are the various options that it will accept:
- `smType <java, wls, ws, rmi, was, jboss>`
- `smConfigId <config id of sm is always required>`
- `serverLocation <in case of was, wls, jboss, this is the location of the server>`
- `pdServer OES Admin Server hostName`
- `pdPort SSL Port for OES Admin Server`
- `pdClientPort SSL Port for WLS SM client`
- `serverNodeName - server node name of websphere`
- `serverName - server instance name of websphere`
- `serverUserName - user name of application server`
- `serverPassword - password of application server`
- `prpFileName - path for the prp file used.`

Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

JPS-10925: function: urn:oasis:names:tc:xacml:1.0:function:date-is-in The function returns true if the LHS (left-hand side) matches one of the values in RHS (right-hand side); LHS should be single-valued. RHS can be single or multi-valued.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

JPS-10926: function: urn:oasis:names:tc:xacml:1.0:function:time-is-in The function returns true if the LHS (left-hand side) matches one of the values in RHS (right-hand side); LHS should be single-valued. RHS can be single or multi-valued.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

JPS-10927: function: urn:oasis:names:tc:xacml:1.0:function:integer-greater-than The function returns true if the value of LHS is greater than RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10928: function:
urn:oasis:names:tc:xacml:1.0:function:integer-greater-than-or-equal The function returns true if the value of LHS is greater than or equals to RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10929: function: urn:oasis:names:tc:xacml:1.0:function:integer-less-than The function returns true if the value of LHS is less than RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10930: function: urn:oasis:names:tc:xacml:1.0:function:integer-less-than-or-equal The function returns true if the value of LHS is less than or equals to RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10931: function: urn:oasis:names:tc:xacml:1.0:function:time-greater-than The function returns true if the value of LHS is greater than RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10932: function:
urn:oasis:names:tc:xacml:1.0:function:time-greater-than-or-equal The function
returns true if the value of LHS is greater than or equals to RHS. Both LHS and RHS should be single value.

**Cause:** built-in attribute/function display name and description  
**Action:** Prompt message, no action required  
**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Security

**JPS-10933:** function: urn:oasis:names:tc:xacml:1.0:function:time-less-than  
The function returns true if the value of LHS is less than RHS. Both LHS and RHS should be single value.

**Cause:** built-in attribute/function display name and description  
**Action:** Prompt message, no action required  
**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Security

**JPS-10934:** function: urn:oasis:names:tc:xacml:1.0:function:time-less-than-or-equal  
The function returns true if the value of LHS is less than or equals to RHS. Both LHS and RHS should be single value.

**Cause:** built-in attribute/function display name and description  
**Action:** Prompt message, no action required  
**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Security

**JPS-10935:** function: urn:oasis:names:tc:xacml:1.0:function:date-greater-than  
The function returns true if the value of LHS is greater than RHS. Both LHS and RHS should be single value.

**Cause:** built-in attribute/function display name and description  
**Action:** Prompt message, no action required  
**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Security

**JPS-10936:** function: urn:oasis:names:tc:xacml:1.0:function:date-greater-than-or-equal  
The function returns true if the value of LHS is greater than or equals to RHS. Both LHS and RHS should be single value.

**Cause:** built-in attribute/function display name and description  
**Action:** Prompt message, no action required  
**Level:** 1  
**Type:** NOTIFICATION  
**Impact:** Security
JPS-10937: function: urn:oasis:names:tc:xacml:1.0:function:date-less-than The function returns true if the value of LHS is less than RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10938: function: urn:oasis:names:tc:xacml:1.0:function:date-less-than-or-equal The function returns true if the value of LHS is less than or equals to RHS. Both LHS and RHS should be single value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10939: function: urn:oasis:names:tc:xacml:1.0:function:string-regexp-match The LHS should be a single-value string type attribute/value. The RHS should be a single value string which complies with Java Regular Expression.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10940: function: urn:oasis:names:tc:xacml:1.0:function:or The function stands for an OR operation between two single-value boolean expressions/values.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10941: function: urn:oasis:names:tc:xacml:1.0:function:and The function stands for an AND operation between two single-value boolean expressions/values.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10943: function: valid_for_mseconds The function accepts a single integer value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10944: function: valid_for_seconds The function accepts a single integer value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10945: function: valid_for_minutes The function accepts a single integer value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10946: function: valid_for_hours The function accepts a single integer value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10947: function: valid_until_time The function accepts a single time value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10948: function: valid_until_date The function accepts a single date value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required
Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10949: function: sys_defined The function accepts a single string value.
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10950: current_gmt_time
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

Level: 1
Type: NOTIFICATION
Impact: Security

JPS-10951: current_gmt_date
Cause: built-in attribute/function display name and description
Action: Prompt message, no action required

Level: 1

Type: ERROR
Impact: Security

JPS-12000: No such Configuration Profile "[0]" exists in the system.
Cause: The specified configuration profile is not registered with configuration service.
Action: Check the name, or try listing the registered profiles.

Level: 1
Type: ERROR
Impact: Configuration

JPS-12001: Cannot create ContextConfiguration, A JPS Context with name "[0]" already exists in the system.
Cause: A jpsContext with the specified contextId exists in the system.
Action: Use another unique contextId.

Level: 1
Type: ERROR
Impact: Configuration

JPS-12002: Could not Construct the ConfigurationManagementService:
Configuration Context Descriptor NOT FOUND in jps-config.xml or specifies an invalid Configuration serviceInstance descriptor.
Cause: A jpsContext by the name "ConfigContext" that references a Configuration Service Instance Descriptor is missing from jps-config.xml.
Action: Check the MultiTenancy Enablement steps and/or scripts.

Level: 1
Type: ERROR
Impact: Configuration

JPS-12003: Could not Construct ConfigurationManagementService from its Descriptor in jps-config.xml, due to empty/missing configuration data in the Descriptor.
Cause: The configuration jpsContext does seem to contain a <serviceInstanceRef> pointing to the ConfigurationManagementService instance descriptor.
Action: Check the MultiTenancy Enablement steps and/or scripts.

Level: 1
Type: ERROR
Impact: Configuration

JPS-12004: No such JpsContext "[0]" exists in jps-config.xml.
Cause: A jpsContext with the specified contextId does not exists in the system.
Action: Check jps-config.xml of the domain.
JPS-12005: A ContextConfiguration with "[0]" "[1]" already exists in the system.
   Cause: A ContextConfiguration with the specified name already exists.
   Action: Use another unique name.

JPS-12006: No Registered ContextConfiguration with "[0]" "[1]" exists in the system.
   Cause: The specified configuration profile is not registered with configuration service.
   Action: Check the name, or try listing the registered profiles.

JPS-12007: Cannot delete ContextConfiguration "[0]" in "[1]" state.
   Cause: A ContextConfiguration in ACTIVE state cannot be deleted.
   Action: DeActivate the context and then try deleting it.

JPS-12008: Cannot DeActivate ContextConfiguration "[0]" as it is in state "[1]".
   Cause: A ContextConfiguration ACTIVE state (only) can be DeActivated. DeActivation from other states is illegal.
   Action: Make sure the context configuration is ACTIVE and then try deactivating it.

JPS-12009: Cannot Activate ContextConfiguration "[0]" as it is in state "[1]".
   Cause: A ContextConfiguration must be in COMPLETE or INACTIVE state for Activation to succeed.
   Action: Check to make sure the state of the Context is COMPLETE or INACTIVE.

JPS-12010: Cannot Update ContextConfiguration "[0]" as it is in state "[1]".
**Cause:** A ContextConfiguration must be in CREATED or INACTIVE state before it can be UPDATED.

**Action:** Check to make sure the state of the Context is CREATED or INACTIVE. A configuration in COMPLETE or ACTIVE states cannot be updated

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**JPS-12011:** OPSS Runtime Cannot fetch Configuration for context "{0}". The context does not exist or is not in ACTIVE state.

**Cause:** OPSS Runtime failed to fetch the Configuration for the context. Either the context does not exist or is not in ACTIVE state. The Runtime can only view ContextConfigurations in ACTIVE state

**Action:** Check to make sure the Context exists and is in ACTIVE state.

Type: ERROR
Impact: Configuration

JPS-12015: Property JPS_CONFIG_PATH not set for use by PersistenceManager.
Cause: Internal Error/Bug: The Configuration Management Service is expected to set a property JPS.CONFIGSERVICE.PATH for use by the PersistenceManager.
Action: Report Bug on Oracle OPSS with relevant logs.

Level: 1
Type: ERROR
Impact: Process

JPS-12016: Internal Error: Unable to locate ContextConfiguration named "[0]" in the Configuration Profile "[1]".
Cause: Internal Error/Bug: The Configuration Service is in a state where it thinks the specified contextId should exist under the specified profileId, but the persisted information in the store does not match the expectation.
Action: Report Bug on Oracle OPSS with relevant logs.

Level: 1
Type: ERROR
Impact: Process

JPS-12017: Invalid Customization expression, specified XPath "[0]" does not evaluate to a "[1]".
Cause: The XPath expression specified in Customization spec does not point to the intended element in the Configuration Profile document.
Action: Check the XPath expression against the structure of the configuration Profile being referenced.

Level: 1
Type: ERROR
Impact: Data

JPS-12018: Invalid Location Override Customization in Global Scope. Location Customization can be specified for ServiceInstances only.
Cause: The Location Override in Customization spec is only applicable to a serviceInstance attribute and cannot be applied to an element in Global Scope.
Action: Check the XPath expression.

Level: 1
Type: ERROR
Impact: Data

JPS-12019: Cannot apply "[0]" overrides on element of type "[1]", expected an element of type "[2]", check the Element XPath specified in the customization.
Cause: The XPath expression specified in Customization spec does not point to the intended element in the Configuration Profile document.
Action: Check the XPath expression against the structure of the configuration Profile being referenced.

Level: 1
Type: ERROR
Impact: Data

JPS-12020: Cannot modify values of existing ExtendedProperty elements during customization.
Cause: Cannot modify values of existing ExtendedProperty elements during customization.
Action: This is an Unsupported Customization spec, change the customization instructions supplied to the Configuration Management Service.

Level: 1
Type: WARNING
Impact: Data

JPS-12021: Cannot create ContextConfiguration "{0}", No such profile "{1}" exists in the system.
Cause: Cannot create ContextConfiguration as the referenced Configuration Profile does not seem to exist.
Action: Check the name of the specified profile.

Level: 1
Type: ERROR
Impact: Data

JPS-12022: MetaDataObject "{0}" not found. Ensure ContextConfiguration "{1}" exists or first create it.
Cause: The PersistenceManager is unable to find the MetaDataObject corresponding to the specified contextId.
Action: Check the name of the context or make sure it is registered with the Configuration Service.

Level: 1
Type: ERROR
Impact: Configuration

JPS-12023: Mutable MetadataObject "{0}" cannot be obtained from MetadataStore specified since there are pending writes to other MetadataStores. Do flushChanges/cancelChanges on MDSSession to proceed.
Cause: Internal Error/Bug : The persistence manager is in a state where it is trying to perform multiple updates to the profile document concurrently.
Action: Report a Bug on Oracle OPSS with relevant logs.

Level: 1
Type: ERROR
Impact: Process

JPS-12024: A profile with name "{0}" already exists.
Cause: A configuration profile with the given name already exists.
Action: Try using a unique profileId.

Level: 1
Type: ERROR
Impact: Data

JPS-12025: Cannot Delete Profile "{0}". Named ContextConfigurations exist under the profile.
Cause: A configuration profile which has named ContextConfiguration's referencing it cannot be deleted.
Action: Try deleting the ContextConfiguration's before attempting to delete the profile.
Level: 1
Type: ERROR
Impact: Data

JPS-12026: No such ContextConfiguration "{0}" exists in the system.
Cause: The specified ContextConfiguration is not registered with the Configuration Service.
Action: Check the name or try listing the registered ContextConfigurations.
Level: 1
Type: ERROR
Impact: Data

JPS-12027: Required PasswordCredential at Map = "{0}". Key = "{1}" was not found in Specified Bootstrap CredentialStore.
Cause: A required PasswordCredential does not exist at the specified map, and key in the supplied bootstrap credential store.
Action: Check the bootstrap credential store.
Level: 1
Type: ERROR
Impact: Configuration

JPS-12028: Malformed jps-config.xml : stale service instance reference "{0}" from JpsContext.
Cause: The PersistenceManager found a STALE <serviceInstanceRef> that does not exist in the jps-config.xml.
Action: Check the jps-config.xml of the Profile or the Out-of-the-Box jps-config.xml as appropriate.
Level: 1
Type: ERROR
Impact: Configuration

JPS-12029: Cannot set Name for ContextConfiguration "{0}" in state "{1}", deactivate it first.
Cause: Cannot set contextName for a ContextConfiguration in ACTIVE.
Action: DeActivate it first and then set a Name for it.
Level: 1
Type: ERROR
Impact: Data
JPS-12030: Cannot setContextName, ConfigurationContext "{0}" is already Named "{1}", unset the Name first.
Cause: A ContextConfiguration that is already has a Name cannot be Named again.
Action: Unset the current Name first and then set a new Name for it.
Level: 1
Type: ERROR
Impact: Data

JPS-12031: Cannot unset Name for ContextConfiguration "{0}" in state "{1}", deactivate it first.
Cause: Cannot unset the contextName for a ContextConfiguration in ACTIVE state.
Action: DeActivate the Context first and then unset the contextName.
Level: 1
Type: ERROR
Impact: Data

JPS-12032: Error in initializing JAXBContext.
Cause: Internal Error: JAXB context initialization in PersistenceManager Failed.
Action: Report a Bug on Oracle OPSS with relevant logs.
Level: 1
Type: ERROR
Impact: Data

JPS-12033: Invalid profile jps-config.xml document, does not contain a required element "{0}".
Cause: Internal Error: the profile document does not contain a mandatory element.
Action: Check the jps-config.xml that was used as a Configuration Profile.
Level: 1
Type: ERROR
Impact: Configuration

JPS-12034: MDSPersistenceManager Cannot handle Persistence of Element "{0}".
Cause: Unsupported operation : The persistence manager configured with the Configuration Service does not handle persistence of the specified element.
Action: Report a Bug on Oracle OPSS with relevant logs.
Level: 1
Type: ERROR
Impact: Configuration

JPS-12035: Cannot setContextName for ConfigurationContext "{0}" to Name "{1}", as the Name is already assigned to "{2}".
Cause: Names used for ContextConfiguration must be unique, an attempt is being made to set the same Name for more than one ContextConfiguration.
Action: Use a different unique Name.
Level: 1
Type: ERROR
Impact: Data

JPS-12036: ContextConfiguration "{0}" does not have any name set for it, Naming a ContextConfiguration is mandatory before its configuration STATE can be set to COMPLETE.
Cause: An attempt is being made to set the STATE of an Un-Named ContextConfiguraton to COMPLETE.
Action: Use the setContextName(contextId) method to set a Name.
Level: 1
Type: ERROR
Impact: Data

JPS-12037: Service configuration update done for Configurator.
Cause: Service configuration update done for Configurator.
Action: No action required.
Level: 1
Type: NOTIFICATION
Impact: Data

JPS-12038: Failed to check if audit is enabled.
Cause: Configuration management events logging was not enabled.
Action: Check the audit configuration to ensure auditing enabled.
Level: 1
Type: WARNING
Impact: Configuration

JPS-12039: Failed to log audit record.
Cause: Configuration management audit event logging failed.
Action: Contact the administrator.
Level: 1
Type: WARNING
Impact: Configuration

JPS-12040: Missing Property set props.db.1.
Cause: No Property Set props.db.1 in jps-config.xml
Action: Check the jps-config.xml.
Level: 1
Type: ERROR
Impact: Configuration
JPS-12100: The expiry time should be in format {0}
  Cause: Invalid input
  Action: Correct the input.

  Level: 1
  Type: WARNING
  Impact: Configuration

JPS-12101: The filter value is {0} invalid
  Cause: Invalid input
  Action: Correct the input.

  Level: 1
  Type: WARNING
  Impact: Configuration

JPS-12102: One of the attributes {0} is undefined
  Cause: Invalid input
  Action: Correct the input.

  Level: 1
  Type: WARNING
  Impact: Configuration

JPS-12103: Parameter {0} is missing
  Cause: Missing Parameter
  Action: Correct the input.

  Level: 1
  Type: WARNING
  Impact: Configuration

JPS-12104: Alias {0} did not exist or point to a key
  Cause: Alias did not exist or point to a key
  Action: Correct the input Alias.

  Level: 1
  Type: WARNING
  Impact: Configuration

JPS-12105: Tenant with id {0} does not exist.
  Cause: Tenant does not exist
  Action: Correct the tenant id.

  Level: 1
  Type: WARNING
  Impact: Configuration

JPS-12106: The param {0} is invalid - null or empty.
  Cause: Tenant config parameter passed to the API is invalid
Action: Make sure all parameters are valid
Level: 1
Type: WARNING
Impact: Configuration

JPS-12107: The param {0} was supplied a restricted value {1}.
Cause: Tenant config parameter value passed to the API is restricted
Action: Make sure no restricted values are used
Level: 1
Type: WARNING
Impact: Configuration

JPS-20000: GlobalPolicy can not be created by MAPI methods.
Cause: GlobalPolicy can not be created by MAPI methods.
Action: Set up policy store using reassociation or upgrading
Level: 1
Type: WARNING
Impact: Programmatic

JPS-20001: GlobalPolicy can not be deleted by MAPI methods.
Cause: GlobalPolicy can not be deleted by MAPI methods.
Action: GlobalPolicy is a built-in stripe, can not be deleted
Level: 1
Type: WARNING
Impact: Programmatic

JPS-20002: GlobalPolicy can not be returned from the method.
Cause: GlobalPolicy can not be returned from the method.
Action: Gets GlobalPolicy from the method getGlobalPolicy
Level: 1
Type: WARNING
Impact: Programmatic

JPS-20003: Cannot add global role to application role
Cause: Attempted to add a global role {0} to members of an application role or grant a global role {0} to an application role
Action: Do not add a global role to members of an application role and do not grant a global role to an application role.
Level: 1
Type: WARNING
Impact: Security

JPS-20004: Principals can not contain global role.
Cause: Principals contain global role {0}
Action: Remove global role from principals.

Level: 1
Type: WARNING
Impact: Security

JPS-20005: Cannot delete global role "(0)".
Cause: Global role "(0)" is referenced in a Policy defined in an Application.
Action: Make sure the global role is not referenced in any application policy, then remove it.

Level: 1
Type: WARNING
Impact: Security

JPS-20006: Authorization policy is not supported in global policy.
Cause: Authorization policy is not supported in global policy.
Action: Do not create authorization policies in global policy.

Level: 1
Type: WARNING
Impact: Security

JPS-20007: Permission grant is not supported in global policy.
Cause: Permission grant is not supported in global policy.
Action: Do not grant permissions in global policy.

Level: 1
Type: WARNING
Impact: Security

JPS-20008: (0) : {1} in global policy which are referenced in application have been changed but not distributed
Cause: (0) : {1} in global policy which are referenced in application have been changed but not distributed.
Action: Distribute global policy firstly

Level: 1
Type: WARNING
Impact: Security

JPS-20010: Attribute name (0) already exist in {1}.
Cause: Attribute name (0) already exist in {1}
Action: Choose another name

Level: 1
Type: WARNING
Impact: Security

JPS-20011: Function name (0) already exist in {1}.
Cause: Function name (0) already exist in {1}
**Action:** Choose another name

**Level:** 1

**Type:** WARNING

**Impact:** Programmatic

**JPS-20012:** Global attribute \{0\} is used in application \{1\}.

**Cause:** Global attribute \{0\} is used in application policy \{1\}

**Action:** Make sure the global attribute is not used in any applications including global policy

**Level:** 1

**Type:** WARNING

**Impact:** Programmatic

**JPS-20013:** Global function \{0\} is used in application \{1\}.

**Cause:** Global function \{0\} is used in application policy \{1\}

**Action:** Make sure the global function is not used in any applications including global policy

**Level:** 1

**Type:** WARNING

**Impact:** Programmatic

**JPS-20014:** Policy domain is not supported in global policy

**Cause:** Policy domain is not supported in global policy.

**Action:** Do not use policy domain in global policy

**Level:** 1

**Type:** WARNING

**Impact:** Security

**JPS-20020:** Resource type name \{0\} already exists in application \{1\}.

**Cause:** Resource type name \{0\} already exists in application \{1\}

**Action:** Choose another name

**Level:** 1

**Type:** WARNING

**Impact:** Programmatic

**JPS-20021:** Global resource type \{0\} is used in application \{1\}.

**Cause:** Resource type \{0\} is used in application \{1\}

**Action:** Make sure global resource type is not used in any application

**Level:** 1

**Type:** WARNING

**Impact:** Programmatic

**JPS-20022:** Global policy can not be unbound from SM

**Cause:** Global policy can not be unbound from SM
Action: Do not unbind global policy from SM
Level: 1
Type: WARNING
Impact: Programmatic

**JPS-20050: Combining algorithm {0} not found.**
Cause: Combining algorithm not found.
Action: Make sure the used combining algorithm exists.
Level: 1
Type: WARNING
Impact: Programmatic

**JPS-20051: Exception in converting execution frequency {0}, message is {1}**
Cause: Exception in converting value of algorithm execution frequency.
Action: Make sure the execution frequency is valid.
Level: 1
Type: WARNING
Impact: Programmatic

**JPS-20052: Exception in converting algorithm usage {0}, message is {1}**
Cause: Exception in converting value of algorithm usage.
Action: Make sure the usage is valid.
Level: 1
Type: WARNING
Impact: Programmatic

**JPS-20053: A combining algorithm must be provided if policy is using more than one rule.**
Cause: Policy uses multiple rules, but no combining algorithm provided.
Action: Provide a combining algorithm.
Level: 1
Type: ERROR
Impact: Programmatic

**JPS-20054: A acl match type must be provided if policy is a RAS one.**
Cause: RAS policy has no acl match type to be provided.
Action: Provide a ACL Match Type.
Level: 1
Type: ERROR
Impact: Programmatic

**JPS-20055: A list of RAS policy rule must be provided if policy is a RAS one.**
Cause: RAS policy has no policy rule to be provided.
Action: Provide policy rule(s).
Level: 1  
Type: ERROR  
Impact: Programmatic  

JPS-20056: A list of RAS resource must be provided if policy is a RAS one.  
Cause: RAS policy has no resource to be provided.  
Action: Provide resource(s).  

Level: 1  
Type: ERROR  
Impact: Programmatic  

JPS-20060: Number of input parameters to the function and provided value types for them are not of same size.  
Cause: Number of input parameters to the function and provided value types for them are not of same size.  
Action: Parameter value types, if provided, must be provided for all input parameters  

Level: 1  
Type: ERROR  
Impact: Programmatic  

JPS-20061: Value collection added to expression is null.  
Cause: Value collection added to expression is null.  
Action: Provide a non-null collection of values to expression.  

Level: 1  
Type: ERROR  
Impact: Programmatic  

JPS-20062: Value collection passed to input parameter when a single object is expected.  
Cause: Value collection passed to input parameter when a single object is expected.  
Action: Provide a single object as input parameter.  

Level: 1  
Type: ERROR  
Impact: Programmatic  

JPS-20063: Wrong type of collection passed as input parameter; expected type is {0}, provided {1}.  
Cause: Wrong type of collection passed as input parameter; expected type is {0}, provided {1}.  
Action: Provide correct type of collection as function input parameter.  

Level: 1  
Type: ERROR  
Impact: Programmatic
JPS-20064: Function {0} is unknown.
  Cause: Function {0} is unknown.
  Action: Provide correct function.

  Level: 1
  Type: ERROR
  Impact: Programmatic

JPS-20070: In mixed mode, PDP configuration id could not be null
  Cause: PDP configuration id is missing.
  Action: Specify the PDP configuration id

  Level: 1
  Type: WARNING
  Impact: Programmatic

JPS-20100: Rules {0} for policy {1} is in use by other policies. It will not be deleted.
  Cause: Rule {0} of policy {1} is shared by other policies.
  Action: Provide correct Rule.

  Level: 1
  Type: ERROR
  Impact: Security

JPS-20101: Policy {0} is referred by one or more policy sets. It can not be deleted if cascading is set to false.
  Cause: Policy {0} is referred by other policy sets.
  Action: Either use cascading delete or remove references from policy sets.

  Level: 1
  Type: ERROR
  Impact: Security

JPS-20102: Rule {0} used in policy is not sharable. The policy will not be created or updated.
  Cause: Rule {0} used in policy is not sharable.
  Action: Provide correct Rule.

  Level: 1
  Type: ERROR
  Impact: Security

JPS-20103: Policy can not have both private rules and sharable rules.
  Cause: Policy can not have both private rules and sharable rules.
  Action: Provide correct Rule.

  Level: 1
  Type: ERROR
  Impact: Security
JPS-20104: Exclusive rule \{0\} cannot be deleted explicitly.
Cause: Exclusive rule \{0\} cannot be deleted explicitly.
Action: Delete the referred policy.
Level: 1
Type: ERROR
Impact: Security

JPS-20105: The permission \{0\} has no target name.
Cause: Permission has no target name.
Action: Make sure the usage is valid. If not revoke the permission.
Level: 1
Type: WARNING
Impact: Programmatic

JPS-20200: Adding attributes to data security resource type \{0\} is not allowed.
Cause: Attributes present in Data Security Resource Type.
Action: Remove Attributes present in Data Security Resource Type.
Level: 1
Type: WARNING
Impact: Security

JPS-20201: Adding matcher class to data security resource type \{0\} is not allowed.
Cause: Matcher Class present in Data Security Resource Type.
Action: Remove Matcher Class present in Data Security Resource Type.
Level: 1
Type: WARNING
Impact: Security

JPS-20202: Hierarchical data security resource type \{0\} is not allowed.
Cause: Data Security Resource Type is Hierarchical.
Action: Change Data Security Resource Type to Flat. It cannot be Hierarchical.
Level: 1
Type: WARNING
Impact: Security

JPS-20203: Adding both actions and action collection references to data security resource type \{0\} is not allowed.
Cause: Both Actions and Action Collection References are added to Data Security Resource Type.
Action: Add either Actions or Action Collection References to Data Security Resource Type.
Level: 1
Type: WARNING
Impact: Security
JPS-20204: Adding null data security information object to data security resource type {0} is not allowed.

Cause: Null data security information object found for data security resource type.

Action: Add data security information object to data security resource type.

Level: 1
Type: WARNING
Impact: Security

JPS-20205: Data source name is required for a data security resource type {0}.

Cause: Data security information object found for data security resource type has no data source name.

Action: Provide valid data source name for data security information object for data security resource type.

Level: 1
Type: WARNING
Impact: Security

JPS-20206: Invalid value for data source type of data security resource type {0}.

Cause: Data security information object found for data security resource type has invalid data source type.

Action: Data Security information object found for data security resource type has invalid data source type.

Level: 1
Type: WARNING
Impact: Security

JPS-20207: Constraint required for data security resource type {0} as data source type is virtual.

Cause: Virtual data source type requires data source constraint to be present.

Action: Provide valid data source constraint for virtual data source.

Level: 1
Type: WARNING
Impact: Security

JPS-20208: Actions List cannot contain actions that are inherited by default for resource type {0}.

Cause: Actions list in resource type contains default inherited data security actions.

Action: Remove default data security actions from data security resource type.

Level: 1
Type: WARNING
Impact: Security

JPS-20209: Duplicate column definition (same column names) not allowed in data source of resource type {0}.
Cause: Duplicate column definition (same names) in secured data source in resource type.

Action: Remove duplicate column definition from secured data source.

Level: 1

Type: WARNING

Impact: Security

JPS-20210: Action collection reference name \{1\} referred in resource type \{0\} not found in policy store.

Cause: Action collection reference in resource type not found in the policy store.

Action: Either create action collection in store or remove the reference from resource type.

Level: 1

Type: WARNING

Impact: Security

JPS-20220: Data Security Resource Type should be present for Data Security Resource \{0\}.

Cause: No RAS resource type present for RAS resource OR is not of type RAS resource type.

Action: Add RAS resource type for RAS resource.

Level: 1

Type: WARNING

Impact: Security

JPS-20221: For data security resource \{0\} SQL predicate or XML expression is required.

Cause: Both SQL predicate and XML expression missing in data security resource.

Action: Add either SQL Predicate or XML expression to data security resource.

Level: 1

Type: WARNING

Impact: Security

JPS-20240: Multiple rules not allowed for triton policy \{0\}.

Cause: Multiple rules in triton data security policy.

Action: Add only one rule to triton data security policy.

Level: 1

Type: WARNING

Impact: Security

JPS-20241: Data security policy \{0\} has invalid type \{1\} and category \{2\}.

Cause: Invalid policy category and type combination.

Action: Provide valid policy category and type combination.

Level: 1
Type: WARNING
Impact: Security
JPS-20242: RAS policy only takes resources with same resource type.
  Cause: RAS Policy have resources with different resource types.
  Action: Provide resources just with same resource type for RAS policy.
  Level: 1
Type: WARNING
Impact: Security
JPS-20243: For RASParameterValue, only EXACT matcher is supported.
  Cause: Search RAS Policy by RASParameterValue ONLY support MATCHER.EXACT.
  Action: Use MATCHER.EXACT for search by RASParameterValue.
  Level: 1
Type: WARNING
Impact: Security
JPS-20244: For RASParameterValue, only EQUALITY comparator is supported.
  Cause: Search RAS Policy by RASParameterValue ONLY support COMPARATOR.EQUALITY.
  Action: Use COMPARATOR.EQUALITY for search by RASParameterValue.
  Level: 1
Type: WARNING
Impact: Security
JPS-20260: RAS Resource type name referred in RAS policy set {0} is Null.
  Cause: RAS resource type reference in RAS policy set is Null.
  Action: Either create given resource type in store beforehand or use an existing one.
  Level: 1
Type: WARNING
Impact: Security
JPS-20261: Data security policy set {0} has invalid type {1} and category {2}.
  Cause: Invalid policy set category and type combination.
  Action: Provide valid policy set category and type combination.
  Level: 1
Type: WARNING
Impact: Security
JPS-20262: Policy set {0} is an ACL protecting an Attribute Collection and cannot be deleted.
  Cause: Attempt to delete ACL that is protecting an Attribute Collection.
  Action: Check that the ACL is not protecting any Attribute Collection.
Level: 1
Type: WARNING
Impact: Security

JPS-20263: RAS Policy set only takes policies whose ras resources are of same ras resource type.
Cause: RAS policy set only takes policies whose ras resources are of same ras resource type.
Action: Use ras policies with same ras resource type for ras policy set.

Level: 1
Type: WARNING
Impact: Security

JPS-20264: The length of RAS [0] name plus the length of RAS application name cannot exceed 29.
Cause: The length of RAS artifact name plus the length of ras application name exceeds 29.
Action: Shorten the RAS artifact name

Level: 1
Type: WARNING
Impact: Security

JPS-20265: The name of RAS [0] is allowed to consist of only alphanumeric characters and the special characters $, _, and #, and MUST begin with a letter.
Cause: The RAS artifact name is allowed to consist of only alphanumeric characters and the special characters $, _, and #, and MUST begin with a letter.
Action: Change the RAS artifact name

Level: 1
Type: WARNING
Impact: Security

JPS-20300: The action or implied action "[0]" already exists in action collection "[1]" or its parent(s).
Cause: Duplicate action or implied action found in action collection or one of its parents.
Action: Verify the action and implied action lists of this action collection and its parents.

Level: 1
Type: WARNING
Impact: Security

JPS-20301: The action collection "[0]" is already referenced in action collection "[1]" or its parent(s).
Cause: Duplicate action collection reference found in action collection or one of its parents.
Action: Verify the action collection reference lists of this action collection and its parents.
Level: 1
Type: WARNING
Impact: Security

**JPS-20302: The action collection "{0}" already exists in application policy "{1}".**

*Cause:* Action collection already exists in the application.

*Action:* Verify the action collection in the application or try modify operation.

Level: 1
Type: WARNING
Impact: Security

**JPS-20303: The action collection "{0}" was not found in application policy "{1}".**

*Cause:* Action collection not found in application.

*Action:* Verify the action collection is present in the application.

Level: 1
Type: WARNING
Impact: Security

**JPS-20304: The action collection "{0}" is in use by another policy object.**

*Cause:* Action collection is in use by another policy object.

*Action:* Verify the usages of the action collection.

Level: 1
Type: WARNING
Impact: Security

**JPS-20305: Create, modify & delete operations are not permitted on built-in action collection "{0}".**

*Cause:* The action collection being deleted, created or modified is built-in in the database.

*Action:* Use a different name for the action collection.

Level: 1
Type: WARNING
Impact: Security

**JPS-20306: Action {0} referred in implied action {1} is not defined in action collection {2} or any of its parents.**

*Cause:* The mapping specified for given implied action is not found in action collection or its parents.

*Action:* Check the implied actions mappings.

Level: 1
Type: WARNING
Impact: Security

**JPS-20307: The action or implied action "{0}" already exists in implied action "{1}".**

*Cause:* The mapping specified for given implied action contains duplicate actions.
Action: Check the implied actions mappings.

Level: 1
Type: WARNING
Impact: Security

JPS-20308: The implied action "[0]" refers to itself.
Cause: The mapping specified for given implied action contains reference to itself.
Action: Check the implied actions mappings.

Level: 1
Type: WARNING
Impact: Security

JPS-20320: "[0]" is not a RAS target database.
Cause: The SM is not a RAS target database.
Action: make sure the name corresponds to a RAS target database

Level: 1
Type: WARNING
Impact: Security

JPS-20321: "[0]" is not a RAS application.
Cause: The application is not a RAS application.
Action: make sure the name corresponds to a RAS application

Level: 1
Type: WARNING
Impact: Security

JPS-20322: "[0]" is not found or it is not a RAS target database.
Cause: RAS target database not found
Action: make sure the name corresponds to a RAS target database

Level: 1
Type: WARNING
Impact: Security

JPS-20350: All of handlerSchemaName, handlerPackageName and handlerFunctionName must be present or must be null in an attribute collection.
Cause: Atleast one of schema name, package name or function name of handler function is null.
Action: Verify the schema name, package name and function name of handler function.

Level: 1
Type: WARNING
Impact: Security

JPS-20351: The attribute "[0]" already exists in attribute collection "[1]".
Cause: Duplicate attribute found in attribute collection.
Action: Verify the attribute list of this attribute collection and its parents.

Level: 1
Type: WARNING
Impact: Security

JPS-20352: Attributes in attribute collection must be of category DYNAMIC.
Cause: Category of added attribute was wrong.
Action: Verify the added attribute is of category DYNAMIC.

Level: 1
Type: WARNING
Impact: Security

JPS-20353: The attribute collection "[0]" already exists in application policy "[1]."
Cause: Attribute collection already exists in the application.
Action: Verify the attribute collection in the application or try modify operation.

Level: 1
Type: WARNING
Impact: Security

JPS-20354: The attribute collection "[0]" was not found in application policy "[1]."
Cause: Attribute collection not found in application.
Action: Verify the attribute collection is present in the application.

Level: 1
Type: WARNING
Impact: Security

JPS-20355: Attributes in attribute collection must be single-valued.
Cause: Multi-valued attributes not supported.
Action: Verify the added attribute(s) are all single-valued.

Level: 1
Type: WARNING
Impact: Security

JPS-20356: The ACE(Policy Rule) "[0]" is not present in the application.
Cause: ACE(policy rule) protecting Attribute collection not found in application.
Action: Verify the ACE(Policy Rule) is present in the application.

Level: 1
Type: WARNING
Impact: Security

JPS-20357: The attributes in an attribute collection "[0]" is null or empty.
Cause: RASAttribute list is null or empty
Action: Make sure RASAttribute list is not null or empty.
Level: 1  
Type: WARNING  
Impact: Security  

JPS-20400: The definition for attribute "{0}" exists in the application policy with wrong category. Expected: {1}, Found: {2}  
Cause: Attribute definition exists in application with different category than expected.  
Action: Verify the attribute definition in the application.

Level: 1  
Type: WARNING  
Impact: Security  

JPS-20401: The definition for attribute "{0}" exists in the application policy with wrong type. Expected: {1}, Found: {2}  
Cause: Attribute definition exists in application with different type than expected.  
Action: Verify the attribute definition in the application.

Level: 1  
Type: WARNING  
Impact: Security  

JPS-20403: Attribute designator functionality is not supported for this schema version.  
Cause: Attribute designator functionality is not supported for this schema version.  
Action: Don't use designator functionality or upgrade to newer version.

Level: 1  
Type: ERROR  
Impact: Security  

JPS-20411: Invalid match function. Match function for a constraint must take two input parameters, provided function requires {0} input parameters.  
Cause: Match function for constraint does not take 2 input parameters.  
Action: Provide a correct match function for constraint.

Level: 1  
Type: WARNING  
Impact: Security  

JPS-20412: Invalid match function. Both input parameters to a match function must be of same data type; provided function takes input parameters of type {0} and {1}.  
Cause: Match function for constraint musts take two input parameters of same data type.  
Action: Provide a correct match function for constraint.

Level: 1  
Type: WARNING
Impact: Security

JPS-20413: Invalid match function. First parameter for a match function must be a single value.
Cause: Match function for a constraint cannot take bag or set of values.
Action: Provide a correct match function for constraint.
Level: 1
Type: WARNING
Impact: Security

JPS-20414: Mismatch of attribute category in constraint. Expected {0}, actual {1}.
Cause: Category of attribute provided to the constraint must either be dynamic or match the constraint type.
Action: Provide attribute with correct category type to the constraint.
Level: 1
Type: WARNING
Impact: Security

JPS-20415: The data type {0} of attribute "{1}" does not match data type {2} of function second parameter passed to AttributeValueAssertion.
Cause: Attribute data type and expected function parameter data type are different.
Action: Verify the data type of attribute entry passed to AttributeValueAssertion.
Level: 1
Type: WARNING
Impact: Security

JPS-20416: Data type of value and expected input parameter type of function provided for attribute value assertion does not match. Expected type {0}, provided {1}.
Cause: Data type of value and expected input parameter type of function provided for attribute value assertion does not match.
Action: Provide value with correct data type to the constraint.
Level: 1
Type: WARNING
Impact: Security

JPS-20417: Constraints are only supported for TargetEntry and SimpleTargetEntry
Cause: Constraints are supported only for TargetEntry and SimpleTargetEntry.
Action: If a constraint must be used, add it using a TargetEntry or SimpleTargetEntry.
Level: 1
Type: WARNING
Impact: Security

JPS-20420: Function Element is not supported as return type of a function.
Cause: Function Element is not supported as return type of a function.
Action: Provide some other return type.
Level: 1
Type: WARNING
Impact: Security

JPS-20421: Data type for a Function Element input parameter must be OpssString.
Cause: Data type for a Function Element input parameter must be OpssString.
Action: Provide correct data type.
Level: 1
Type: WARNING
Impact: Security

JPS-20422: Function Element not supported for this version of policystore.
Cause: Function element not supported for this schema version.
Action: Don't use function element or upgrade.
Level: 1
Type: WARNING
Impact: Security

JPS-20423: AttributeAssignment can not be defined using a Function Element.
Cause: Attribute assignment cannot be defined using a function element.
Action: Don't use function element.
Level: 1
Type: WARNING
Impact: Security

JPS-20500: Quoted name for {0}, must be terminated by double-quote (").
Cause: Quoted id for triton entity needs to be terminated with double-quote("").
Action: Verify the id provided.
Level: 1
Type: WARNING
Impact: Security

JPS-20501: Length of {0} name must be between 1 and 30 characters (excluding the quotes ("), in case of quoted identifier), but was {1}
Cause: Id for triton entity has invalid length.
Action: Verify the id provided.
Level: 1
Type: WARNING
Impact: Security
JPS-20502: Quoted name for {0} contains invalid character "[1]" at position [2].
Quoted names must not contain null character(\0) or double-quote("") within the
name
Cause: Quoted id for triton entity has invalid character.
Action: Verify the id provided.
Level: 1
Type: WARNING
Impact: Security

JPS-20503: Unquoted name for {0} contains invalid character "[1]" at position [2].
Unquoted names must begin with an alphabet. They may contain a letter, digit,
underscore(_), dollar($), hash(#), or dot(.) symbols at other positions.
Cause: Unquoted id for triton entity has invalid character.
Action: Verify the id provided.
Level: 1
Type: WARNING
Impact: Security

JPS-20504: The name "{0}" is an implicit object name in the database and cannot be
used as a name for {1}.
Cause: Id provided for triton entity is an implicit object name in the database.
Action: Verify the id provided.
Level: 1
Type: WARNING
Impact: Security

JPS-20505: The value "{0}" is of an unsupported type.
Cause: Parameter value is using an invalid type.
Action: Verify the parameter value provided.
Level: 1
Type: WARNING
Impact: Security

JPS-20521: A simple target must have at least one resource action entry or
permission set reference.
Cause: A simple target must have at least one resource action entry or permission
set reference.
Action: Provide resource actions or permission sets.
Level: 1
Type: WARNING
Impact: Security

JPS-20600: MetaData-Provisioned is true, but no meta data found in policy object
{0}.
Cause: MetaData-Provisioned is true, but no meta data found in policy object {0}.
Action: Check the policy store, make sure it is in a consistent state.
Level: 1
Type: ERROR
Impact: Programmatic

JPS-20601: Provided version "{0}" is invalid. Only alphabetic characters, digits, underscores, and dots are allowed.
Cause: Provided version {0} is invalid. Only alphabetic characters, digits, underscores, and dots are allowed.
Action: Provide a valid version.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-20602: Provided meta data {0} is invalid. Reason: {1}
Cause: Provided meta data {0} is invalid. Reason: {1}.
Action: Provide a valid meta data.

Level: 1
Type: ERROR
Impact: Programmatic

JPS-90600: Security Module with the configuration id {0} already exists.
Cause: Security Module with the configuration id {0} already exists.
Action: Provide a unique configuration id.

Level: 1
Type: WARNING
Impact: Security

JPS-90601: Failed to create Security Module with the configuration id {0}, with error {1}
Cause: Failed to create Security Module with the configuration id {0}, with error {1}
Action: Check error message for further details.

Level: 1
Type: WARNING
Impact: Security

JPS-90602: Security Module with the configuration id {0} not found.
Cause: Security Module with the configuration id {0} not found.
Action: Make sure the configuration id is valid.

Level: 1
Type: WARNING
Impact: Security

JPS-90603: AuditService is improperly configured.
Cause: Audit Service is not initializable.
Action: Configure an audit server for audit trails
Level: 1
Type: WARNING
Impact: Security

JPS-90604: Security Module with the configuration id {0} successfully created.
Cause: Security Module with the configuration id {0} successfully created.
Action: Audit message, no action required
Level: 1
Type: TRACE
Impact: Security

JPS-90605: Security Module with the configuration id {0} successfully modified.
Cause: Security Module with the configuration id {0} successfully modified.
Action: Audit message, no action required
Level: 1
Type: TRACE
Impact: Security

JPS-90606: Security Module with the configuration id {0} successfully deleted.
Cause: Security Module with the configuration id {0} successfully deleted.
Action: Audit message, no action required
Level: 1
Type: TRACE
Impact: Security

JPS-90607: Security Module with the configuration id {0} successfully retrieved.
Cause: Security Module with the configuration id {0} successfully retrieved.
Action: Audit message, no action required
Level: 1
Type: TRACE
Impact: Security

JPS-90608: Failed to modify Security Module with the configuration id {0}, with error {1}
Cause: Failed to modify PIP with the configuration id {0}, with error {1}
Action: Check error message for further details.
Level: 1
Type: WARNING
Impact: Security

JPS-90620: PIP with the configuration id {0} already exists.
Cause: PIP with the configuration id/name {0} already exists.
Action: Provide a unique configuration id/name.
JPS-90621: Failed to create PIP with the configuration id {0}, with error {1}
  Cause: Failed to create PIP with the configuration id {0}, with error {1}
  Action: Check error message for further details.

JPS-90622: PIP with the configuration id {0} not found.
  Cause: PIP with the configuration id/name {0} not found.
  Action: Make sure the configuration id/name is valid.

JPS-90623: PIP with the configuration id {0} successfully created.
  Cause: PIP with the configuration id {0} successfully created.
  Action: Audit message, no action required

JPS-90624: PIP with the configuration id {0} successfully modified.
  Cause: PIP with the configuration id {0} successfully modified.
  Action: Audit message, no action required

JPS-90625: PIP with the configuration id {0} successfully deleted.
  Cause: PIP with the configuration id {0} successfully deleted.
  Action: Audit message, no action required

JPS-90626: PIP with the configuration id {0} successfully retrieved.
  Cause: PIP with the configuration id {0} successfully retrieved.
  Action: Audit message, no action required
Impact: Security

JPS-90627: Failed to modify PIP with the configuration id {0}, with error {1}
Cause: Failed to modify PIP with the configuration id {0}, with error {1}
Action: Check error message for further details.

Level: 1
Type: WARNING
Impact: Security

JPS-90630: Application Policy with the configuration id {0} not found.
Cause: Application with the id {0} not found.
Action: Make sure the Application Policy is valid.

Level: 1
Type: WARNING
Impact: Security

JPS-90631: SM Binding with the configuration id {0} and application name {1} successfully retrieved.
Cause: SM Binding with the configuration id {0} and application name {1} successfully retrieved.
Action: Audit message, no action required

Level: 1
Type: TRACE
Impact: Security

JPS-90632: SM with the configuration id {0} to application bindings retrieved.
Cause: SM with the configuration id {0} to application bindings retrieved.
Action: Audit message, no action required

Level: 1
Type: TRACE
Impact: Security

JPS-90633: SM with the configuration id {0} and application name {1} successfully unbound.
Cause: SM with the configuration id {0} and application name {1} successfully unbound.
Action: Audit message, no action required

Level: 1
Type: TRACE
Impact: Security

JPS-90634: PIP Binding with the configuration id {0} and application name {1} successfully retrieved.
Cause: PIP Binding with the configuration id {0} and application name {1} successfully retrieved.
Action: Audit message, no action required
Level: 1  
Type: TRACE  
Impact: Security  
JPS-90635: PIP with the configuration id {0} to application bindings retrieved.  
Cause: PIP with the configuration id {0} to application bindings retrieved.  
Action: Audit message, no action required  
Level: 1  
Type: TRACE  
Impact: Security  
JPS-90636: PIP with the configuration id {0} and application name {1} successfully unbound.  
Cause: PIP with the configuration id {0} and application name {1} successfully unbound.  
Action: Audit message, no action required  
Level: 1  
Type: TRACE  
Impact: Security  
JPS-90637: Failed to create SM binding with the configuration id {0}, with error {1}  
Cause: Failed to create SM binding with the configuration id {0}, with error {1}  
Action: Check error message for further details.  
Level: 1  
Type: WARNING  
Impact: Security  
JPS-90638: Failed to create PIP binding with the configuration id {0}, with error {1}  
Cause: Failed to create PIP binding with the configuration id {0}, with error {1}  
Action: Check error message for further details.  
Level: 1  
Type: WARNING  
Impact: Security  
JPS-90639: Application {0} already bound to configuration {1}  
Cause: Application {0} already bound to configuration {1}  
Action: No need to bind again  
Level: 1  
Type: WARNING  
Impact: Security  
JPS-90640: Failed to unbind SM configuration  
Cause: Failed to unbind SM with the configuration id {0}, with error {1}  
Action: Check error message for further details.
Level: 1
Type: WARNING
Impact: Security

JPS-90641: Failed to unbind PIP Configuration
Cause: Failed to unbind PIP with the configuration id {0}, with error {1}
Action: Check error message for further details.

Level: 1
Type: WARNING
Impact: Security

JPS-90642: The non-controlled policy distribution mode application {0} can not be bound to SM configuration
Cause: The non-controlled policy distribution mode application can not be bound to SM configuration
Action: Bind controlled policy distribution mode application

Level: 1
Type: ERROR
Impact: Security
MAPVIEWER-00001: No 'xml_request' parameter found in the request.
  **Cause:** The incoming HTTP request did not contain the mandatory parameter named 'xml_request'.
  **Action:** Ensure the HTTP request for MapViewer contains the required parameter.

  **Level:** 1  
  **Type:** ERROR  
  **Impact:** Process

MAPVIEWER-00002: Could not get a free MapMaker. Server is busy?
  **Cause:** MapViewer could not obtain the necessary resource to process an incoming request.
  **Action:** Try increasing the value of the 'number_of_mappers' attribute in the definition of the involved data source.

  **Level:** 1  
  **Type:** ERROR  
  **Impact:** Process

MAPVIEWER-00003: SQL error occurred while generating map.
  **Cause:** MapViewer encountered an error while executing a SQL query.
  **Action:** Check the MapViewer server logs for details about the SQL exception and take appropriate actions.

  **Level:** 1  
  **Type:** ERROR  
  **Impact:** Process

MAPVIEWER-00004: Unable to add a predefined theme.
  **Cause:** MapViewer could not add or load a predefined theme while processing the current map request.
  **Action:** Ensure the predefined theme exists in the database or is accessible via the given data source.

  **Level:** 1  
  **Type:** ERROR  
  **Impact:** Process
MAPVIEWER-00005: Error while compressing raw image data.
   **Cause:** MapViewer could not successfully compress a generated map image into the requested file format.
   **Action:** Check the MapViewer server logs for the actual stack trace and take appropriate actions.
   **Level:** 1
   **Type:** ERROR
   **Impact:** Process

MAPVIEWER-00006: Location for saving map image files not specified.
   **Cause:** MapViewer could not obtain the path information for saving generated map files.
   **Action:** Check the MapViewer configuration file and make sure a path for saving image files is specified or the default path is a valid one.
   **Level:** 1
   **Type:** ERROR
   **Impact:** Process

MAPVIEWER-00007: No map image generated.
   **Cause:** MapViewer did not generate a map image.
   **Action:** Check the MapViewer server logs for details/exceptions and take appropriate actions.
   **Level:** 1
   **Type:** ERROR
   **Impact:** Process

MAPVIEWER-00008: Unable to add a local theme.
   **Cause:** MapViewer could not create a new local theme for the current map request.
   **Action:** Check the MapViewer server logs for details/exceptions and take appropriate actions. Make sure the individual Geo-Features are in proper format.
   **Level:** 1
   **Type:** ERROR
   **Impact:** Process

MAPVIEWER-00009: Unable to add a JDBC theme.
   **Cause:** MapViewer could not create a new JDBC (dynamic) theme for the current map request.
   **Action:** Check the MapViewer server logs for details/exceptions and take appropriate actions. Make sure the data source information is correct, and characters in the user-supplied SQL query are properly escaped for XML.
   **Level:** 1
   **Type:** ERROR
   **Impact:** Process

MAPVIEWER-00010: Error loading MapViewer configuration file.
**Cause:** MapViewer could not properly load its configuration file.

**Action:** Make sure the XML configuration file is in valid and well-formed format.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-00011: Error creating a map data source.**

**Cause:** MapViewer could not create a new data source.

**Action:** Make sure correct database connection information is supplied, including host name, database instance name/sid, listener port, and login user/password. Also make sure the host name or IP address is reachable by the host running the MapViewer server.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-00012: Error obfuscating data source password in the config file.**

**Cause:** MapViewer could not obfuscate the login password for a data source defined in its configuration file.

**Action:** Make sure the password is prefixed with an exclamation point (!).

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-00013: Clear-text passwords in the config file must be prefixed with a '!' (exclamation mark).**

**Cause:** Clear text password in the MapViewer configuration file was not prefixed with '!'.

**Action:** Make sure the database login password for any data source defined in the configuration file is prefixed with an exclamation point (!).

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-00014: Error adding a MARKER style from an image URL.**

**Cause:** MapViewer could not create a dynamic MARKER style that is based on a URL.

**Action:** Make sure the URL of the image is reachable from the host running the MapViewer server. If MapViewer is running behind a firewall, you may need to set up HTTP proxy information in MapViewer's configuration file, or via JVM run-time properties.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-00015: Cannot fetch image from the given URL**
Cause: MapViewer could not fetch and load an image from a given URL.
Action: Make sure the URL of the image is reachable from the host running the MapViewer server. If MapViewer is running behind a firewall, you may need to set up HTTP proxy information in MapViewer's configuration file, or via JVM run-time properties.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00016: Error while attempting to clear a mapping metadata cache.
Cause: MapViewer could not clear the cached mapping metadata (style/theme/basemap definitions) for a given data source from memory.
Action: Make sure a correct data source name is specified. Also check MapViewer server logs for possible exceptions and stack traces.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00017: MapViewer is not ready. Please try again later.
Cause: MapViewer was still starting core services such as the mapping servlet. If this error still occurs 30 seconds after starting MapViewer, it may be stuck trying to connect to one or more database instances.
Action: Check and monitor MapViewer server logs to see which server has not been started yet. Check data source definitions in the configuration file and make sure all the database instances involved are up and running.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00018: Error parsing XML map request.
Cause: MapViewer encountered an error while parsing an XML map request.
Action: Make sure a well formed and valid XML map request is sent to the MapViewer server.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00019: Specified data source does not exist.
Cause: A specified data source did not exist or was not known by this MapViewer server.
Action: Make sure a correct data source name is supplied.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00020: Invalid general purpose or admin XML request.
Cause: The incoming admin or non-map request was invalid or not supported.
Action: Make sure only valid and supported requests are sent to the MapViewer

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00021: No data source specified in the XML request.
Cause: The incoming request did not specify any data source name, and the MapViewer server has no default data source.
Action: Make sure a valid data source is specified as part of the request.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00022: Config file not specified.
Cause: Configuration file name is undefined.
Action: Use a valid configuration file name.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00023: Cannot find or create data source.
Cause: Invalid data source parameters.
Action: Verify the correct parameters for data source.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00024: Query prohibited:
Cause: Invalid query.
Action: This type of query is not allowed for requested operation.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00025: Config file name was not specified.
Cause: Undefined configuration file.
Action: Use a valid configuration file.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00026: Cannot determine parent directory of mapViewerConfig.xml.
Cause: Invalid file path.
**Action:** Verify MapViewer’s configuration file path.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-00027:** Cannot create default images directory:  
**Cause:** Unable to create default directory for storing images.  
**Action:** Verify path or permissions to create directory.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-00028:** Cannot create directory for mapBuilder images, because a file with the same name already exists.  
**Cause:** A file with same name as directory exists.  
**Action:** Verify if file can be removed.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-00029:** Cannot create directory for mapBuilder images.  
**Cause:** Unable to create directory for storing MapBuilder images.  
**Action:** Verify path or permissions to create directory.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-00030:** Error in creating Mappers.  
**Cause:** Unable to create map objects for data source.  
**Action:** Verify data source parameters.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-00032:** Cannot create image directory:  
**Cause:** Unable to create directory for storing images.  
**Action:** Verify path or permissions to create directory.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-00033:** Cannot add custom image renderer.  
**Cause:** Invalid custom image renderer parameters.  
**Action:** Verify custom image renderer parameters definition.
MAPVIEWER-00034: Cannot create the javaDB data directory:
  Cause: Unable to create directory for javaDB.
  Action: Verify path or permissions to create directory.

MAPVIEWER-00035: No jdbc_host in the datasource.
  Cause: Missing data source host parameter.
  Action: Add host parameter to data source definition.

MAPVIEWER-00036: No jdbc_port in the datasource.
  Cause: Missing data source port parameter.
  Action: Add port parameter to data source definition.

MAPVIEWER-00037: No jdbc_sid in the datasource.
  Cause: Missing data source SID parameter.
  Action: Add SID parameter to data source definition.

MAPVIEWER-00038: No jdbc_user in the datasource.
  Cause: Missing data source user name parameter.
  Action: Add user name parameter to data source definition.

MAPVIEWER-00039: No jdbc_password in the datasource.
  Cause: Missing data source password parameter.
  Action: Add password parameter to data source definition.
MAPVIEWER-00040: Non-Spatial data provider must have a class attribute.
  Cause: Missing attribute 'class' for non-spatial provider.
  Action: Add 'class' attribute to non-spatial provider definition.

MAPVIEWER-00041: Could not create log output stream.
  Cause: Unable to create directory output log file.
  Action: Verify path or permissions to create file.

MAPVIEWER-00042: Error in fetching theme names.
  Cause: Query to themes metadata view failed.
  Action: Verify database connection and check log for details.

MAPVIEWER-00046: Non-Spatial data provider must have an id attribute.
  Cause: Missing attribute 'id' for non-spatial provider.
  Action: Add 'id' attribute to non-spatial provider definition.

MAPVIEWER-00047: Failure in registering Non-Spatial data provider:
  Cause: Unable to create an instance of non-spatial provider class.
  Action: Verify 'class' attribute value in non-spatial provider definition.

MAPVIEWER-00048: Spatial data provider must have an id attribute.
  Cause: Missing attribute 'id' for spatial provider.
  Action: Add 'id' attribute to spatial provider definition.

MAPVIEWER-00049: Failed in registering Spatial Data Provider:
Cause: Missing attribute 'id' for spatial provider.
Action: Add 'id' attribute to spatial provider definition.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00050: Cannot create default cache root directory:
Cause: Unable to create default tile cache directory.
Action: Verify path or permissions to create directory.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00051: Exception in creating default cache root directory:
Cause: Exception happened while creating default tile cache directory.
Action: See log for additional details.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00052: Invalid default cache root directory:
Cause: Default tile cache directory may already exits.
Action: Verify tile cache directory name.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00053: Timed out waiting for a free MapMaker.
Cause: Unable to get a free map object to render request.
Action: Increase number of map objects for data source in configuration file.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00054: Cannot connection to the datasource:
Cause: Unable to access data source.
Action: Verify data source connection parameters.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00058: MapRequest is not instantiated.
Cause: Null map request received.
Action: Verify process of sending map request to server.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00059: Oracle MapViewer FAILED to start.
   Cause: MapViewer start process failed.
   Action: See log for additional details.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00063: Request type is not recognized. It must be one of map_request, info_request, non_map_request, or wms_feature_info_request.
   Cause: Invalid request type sent to mapViewer server.
   Action: Verify the request string sent to server.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00064: Error in writing xml response to output stream.
   Cause: Unable to send response back to client.
   Action: See log for additional details.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00065: Cannot stream image data with unknown format.
   Cause: Invalid or undefined map request image format.
   Action: Define a supported image format in map request.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00073: Spatial data provider must have a class attribute.
   Cause: Missing attribute 'class' for spatial provider.
   Action: Add 'class' attribute to spatial provider definition.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00101: XML map request: invalid 'geoFeature' element found.
   Cause: The incoming map request contained an invalid 'geoFeature' element.
   Action: Make sure all the 'geoFeature' elements have valid syntax.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00102: XML map request: invalid 'box' element found.
Cause: The incoming map request contained an invalid 'box' element.
Action: Make sure the 'box' element has valid syntax.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00103: XML map request: 'geoFeature' element must have a geometry defined.
Cause: The incoming map request contained one or more 'geoFeature' elements that do not contain any geometry data.
Action: Make sure all 'geoFeature' elements contain a geometry.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00104: XML map request: invalid geometry definition found.
Cause: A 'geoFeature' element with invalid geometry data was found in the XML map request.
Action: Make sure all 'geoFeature' elements contain a valid geometry.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00105: XML map request: 'geoFeature' does not support postal address.
Cause: A 'geoFeature' element with postal/street address was found in the XML map request.
Action: Currently 'geoFeature' elements could not use street address string to specify the location.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00106: XML map request: invalid JDBC theme definition.
Cause: The incoming map request contained an invalid JDBC theme.
Action: Make sure all JDBC themes have proper syntax.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00107: XML map request: 'center' element does not contain a 'geoFeature' sub-element.
Cause: The 'center' element of the incoming map request did not contain a 'geoFeature' sub-element.
Action: Ensure that the 'center' element has a 'geoFeature' sub-element that specifies a point geometry for the map center.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00108: XML map request: 'center' element must define either a 'size' or 'scale' attribute.
Cause: The 'center' element of the incoming map request did not contain any size or map-scale information.
Action: Ensure that the 'center' element has either a 'size' or 'scale' attribute that defines the map data window.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00109: XML map request: invalid map size or scale value.
Cause: The 'center' element of the incoming map request contained an invalid size or scale value.
Action: Make sure a proper value is specified for the 'size' or 'scale' attribute of the 'center' element in the XML map request.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00110: XML map request: invalid map height/width.
Cause: The incoming map request specified an invalid image width or height value.
Action: Make sure a proper value (positive integer) is specified for both the width and height attributes of the root 'map_request' element.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00111: XML map request: invalid theme (min/max) scale range.
Cause: Some theme(s) in the incoming map request contained an invalid min/max scale range specification.
Action: Make sure proper value scale ranges are set for all themes in the map request.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00112: XML map request: invalid WMS theme specified.
Cause: The incoming map request contained an invalid WMS theme.
Action: Make sure all WMS themes are properly defined in the XML map request.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00113: Permission denied for this operation.
Cause: The requested operation was not permitted by the MapViewer server.
Action: Make sure your operation is permitted by MapViewer. For example, the server may disallow JDBC themes in the map request, or disable direct INFO requests. You will need either to avoid performing these operations or to modify MapViewer configuration to allow these operations.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00114: Invalid type for dynamic binding parameter.
Cause: The incoming map request supplied invalid value(s) for a theme's binding variable.
Action: Make sure values for your theme's binding parameters are all of correct type.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00115: list_predefined_themes: No base map found for map tile layer.
Cause: The 'list_predefined_themes' request specified a map tile layer that is based on a nonexistent base map.
Action: Make sure the base map for the specified map tile layer exists in the database view.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-00116: list_predefined_themes: Map tile layer not found.
Cause: The 'list_predefined_themes' request specified a map tile layer that is not found.
Action: Make sure the specified map tile layer exists in the database view.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01000: No themes to render.
Cause: The Map request had no base map or themes defined.
Action: Add a base map that contains a list of themes or define individual themes on your request.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01001: Cannot load base map.
Cause: A database error may have happened while reading the base map definition from the USER_SDO_MAPS view, or the requested base map was not defined.
Action: Make sure the base map exists in the database; also check the MapViewer log for database errors and additional details.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01002: Cannot load theme.
Cause: A database error may have happened while reading the theme definition from the USER_SDO_THEMES view, or the requested theme was not defined.
Action: Make sure the theme exists in the database; also check the MapViewer log for database errors and additional details.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01003: Cannot load style.
Cause: A database error may have happened while reading the style definition from the USER_SDO_STYLES view. Or the requested style was not defined.
Action: Make sure the style exists in the database; also check the MapViewer log for database errors and additional details.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01004: Bounding Themes returned null MBR. Themes were not rendered.
Cause: Bounding themes may have been used to define the query window for the map request, but it produced no spatial feature. The map request was aborted due to this condition.
Action: Change the bounding theme or themes definition, so the definition defines a select statement that returns one or more features. In Map Builder, this message can happen when previewing base maps with full extent (no center and size defined). Map Builder uses the first theme of the base map as the bounding theme when a full extent is applied. If this first theme returns no features for a full extent request, then you should remove it from the base map list of themes.

Level: 1
Type: ERROR
Impact: Process
MAPVIEWER-01005: No spatial data to render.
  Cause: A full extent request (no center and size defined) returned no features.
  Action: Change the theme or themes definition to select one or more features.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-01006: Invalid style type for Point features.
  Cause: The style type used could not be applied to render point features.
  Action: Do not use AREA or LINE styles to render point features.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-01007: Feature has no geometric representation.
  Cause: The feature geometry was null.
  Action: Check the feature geometry column in the database table.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-01008: Cannot parse xml style string: missing closing "
  Cause: The XML string was not correct and could not be parsed.
  Action: Check for the missing closing character "".
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-01009: Invalid style class specified in xml style string.
  Cause: Attribute class on the xml definition was undefined.
  Action: Assign a valid value to attribute class 
  (COLOR,LINE,TEXT,MARKER,AREA).
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-01010: Style cannot be created from a xml string that does not define 
the style class.
  Cause: Unknown style class type defined.
  Action: Change the attribute class value to a known type 
  (COLOR,LINE,TEXT,MARKER,AREA).
  Level: 1
  Type: ERROR
  Impact: Process
MAPVIEWER-01011: Cannot find a custom image renderer for format:
  Cause: Image theme format was not supported and there was no custom image renderer defined for this format.
  Action: Use a known image format (GIF, JPEG, PNG, TIFF) or implement a custom image renderer for this format.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-01012: Cannot create image to render from the byte array.
  Cause: Image array of bytes may be null or corrupted.
  Action: Check the image data source. If it comes from a database column, verify that the column content is not null. If the image content appears to be correct, then report the error to Oracle.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-01013: Invalid base map definition.
  Cause: The XML string for base map definition could not be parsed.
  Action: Fix the XML string that defines the base map.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-01014: Invalid styling rules definition.
  Cause: The XML string for theme styling rules could not be parsed.
  Action: Fix the XML string that defines the theme styling rules.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-01015: Unable to retrieve theme definition.
  Cause: The theme did not exist in USER_SDO_THEMES view.
  Action: Add a theme definition to user themes view.
  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-01016: Theme with undefined styling rules.
  Cause: The styling rules section of theme XML definition was null.
  Action: Ensure that a theme styling rules section is defined in the theme definition.
  Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01017: Undefined image column attribute in image theme definition.
Cause: The image theme definition did not contain the image column attribute.
Action: Define attribute 'image_column' in the image theme definition.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01018: Undefined image format attribute in image theme definition.
Cause: The image theme definition did not contain the image format attribute.
Action: Define attribute 'image_format' in the image theme definition.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01019: One or more attributes missing in image theme definition.
Cause: Some mandatory attributes were missing from the image theme definition.
Action: Attributes for defined image column ('image_column') and image format ('image_format') must be defined in the image theme definition.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01020: Undefined network name attribute in network theme definition.
Cause: The network theme definition did not contain the network name attribute.
Action: Define the attribute 'network_name' in the network theme definition.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01021: Undefined topology name attribute in topology theme definition.
Cause: The topology theme definition did not contain the topology name attribute.
Action: Define the attribute 'topology_name' in the topology theme definition.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01022: Undefined WFS service URL attribute in WFS theme definition.
Cause: The WFS theme definition did not contain the service URL attribute.
Action: Define the attribute 'service_url' in the WFS theme definition.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01023: Unable to find entry in ALL_SDO_GEOM_METADATA table for theme:
Cause: Theme base table and spatial column have not been registered in the user metadata view (USER_SDO_GEOM_METADATA).
Action: Register the theme base table and spatial column in the user metadata view, by inserting a row in the USER_SDO_GEOM_METADATA view.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01024: Unable to convert query window SRID to theme SRID.
Cause: Conversion of map request query window projection to theme projection has failed. The database procedure sdo_cs.transform was used to convert coordinates from one SRID to another SRID.
Action: Check the log for database errors.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01025: Cannot use ratio scale mode with theme that has unknown SRID.
Cause: A request with a ratio scale was attempted, but the data did not contain a valid Oracle SRID.
Action: Assign a valid SRID to the spatial data.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01026: Unable to get an instance of spatial provider.
Cause: A custom spatial provider was not be defined in MapViewer's configuration file, or the provider class path was not accessible.
Action: Check the spatial provider section in the MapViewer configuration file for the definition of the provider. If it is defined there, check the libary jar file path, and make sure it is part of the classpath definition for the application.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01027: Custom geometry theme must have a spatial data provider defined.
Cause: The custom geometry theme definition did not contain the spatial provider attribute.
Action: Define the attribute 'provider_id' in the custom theme definition.
MAPVIEWER-01028: Custom spatial data provider is null.
  Cause: The custom spatial data provider was not initialized and is null.
  Action: Check if the provider name is defined in the theme definition, and also
  check if the provider class library is defined in the MapViewer configuration file
  and is part of the application classpath.

MAPVIEWER-01029: Undefined geometry column for dynamic geometry theme.
  Cause: A dynamic geometry theme definition did not contain the spatial column
  attribute.
  Action: Define the attribute 'spatial_column' in the dynamic geometry theme
  definition.

MAPVIEWER-01030: A set of four question marks separated by commas is required
  to define a geometry theme with a dynamic SDO_FILTER.
  Cause: A set of questions marks was not used in the SDO_ORDINATE_ARRAY
  for a dynamic geometry theme with a SQL expression that also includes the spatial
  filter operator (SDO_FILTER). These question marks will be replaced with values
  based on the map request center and size.
  Action: Use the following pattern for the ordinate array on the SOD_FILTER
  expression: SDO_ORDINATE_ARRAY(?,?,?,?).

MAPVIEWER-01031: Not enough binding parameters defined.
  Cause: The theme definition contained binding parameters on its query
  expression, but the parameters were not provided inn the map request.
  Action: Pass the theme binding parameters to your theme definition, using the
  methods provided by the JavaScript API (Oracle Maps), or by the Java API; or if
  issuing a direct XML request, define the binding parameters in the theme section.

MAPVIEWER-01032: GeoRaster spatial extent is null.
  Cause: The GeoRaster object contained a null geometry as its spatial extent.
**Action:** Update the GeoRaster spatial extent using the PLSQL procedure sdo_geor.generateSpatialExtent.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-01033: Invalid image stretch low value.**  
**Cause:** The image stretch low value was not numeric and ranging from 0 to 256. The default value 0 is used if the number is out of this range.  
**Action:** Define a numeric value within the specified range.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-01034: Invalid image stretch high value.**  
**Cause:** The image stretch high value was not numeric and ranging from 0 to 256. The default value 100 is used if the number is out of this range.  
**Action:** Define a numeric value within the specified range.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-01035: Invalid brightness value.**  
**Cause:** The image brightness value was not numeric and ranging from 0 to 256. The default value 0 is used if the number is out of this range.  
**Action:** Define a numeric value within the specified range.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-01036: Undefined brightness value for image processing.**  
**Cause:** The image brightness value was not defined, as required when a brightness operation is to be applied on a GeoRaster object.  
**Action:** Define the parameter 'value' for brightness in the theme definition.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-01037: Invalid contrast value.**  
**Cause:** The image contrast value was not numeric and ranging from 0 to 256. The default value 256 is used if the number is out of this range.  
**Action:** Define a numeric value within the specified range.

**Level:** 1  
**Type:** ERROR
Impact: Process

MAPVIEWER-01038: Undefined contrast value for image processing.
Cause: The image contrast value was not defined, as required when a contrast operation is to be applied on a GeoRaster object.
Action: Define the parameter 'value' for contrast in the theme definition.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01039: Invalid threshold value.
Cause: The image threshold value was not numeric and ranging from 0 to 256. The default value 0 is used if the number is out of this range.
Action: Define a numeric value within the specified range.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01040: Invalid low threshold value.
Cause: The image threshold low value was not numeric and ranging from 0 to 256. The default value 0 is used if the number is out of this range.
Action: Define a numeric value within the specified range.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01041: Invalid high threshold value.
Cause: The image threshold high value was not numeric and ranging from 0 to 256. The default value 0 is used if the number is out of this range.
Action: Define a numeric value within the specified range.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01042: Invalid image column type for image theme.
Cause: The image theme data was not stored in a column of type BLOB or ORDIMAGE.
Action: Assign a valid image column in the image theme definition.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01043: Network category is null.
Cause: The network model category information was null in the metadata view.
Action: Check the contents of column 'network_category' in the network metadata view USER_SDO_NETWORK_METADATA.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01044: Network geometry type is null.
Cause: The network model geometry type information was null in the metadata view.
Action: Check the contents of column 'geometry_type' in the network metadata view USER_SDO_NETWORK_METADATA.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01045: Undefined topology column for topology theme.
Cause: The topology theme definition did not contain the spatial column attribute.
Action: Define the attribute 'spatial_column' in the topology theme definition.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01046: WFS theme server URL is null.
Cause: The WFS server URL was not defined.
Action: Check if the WFS theme definition has a value for the attribute 'service_url'.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01047: WMS theme server URL is null.
Cause: The WMS server URL was not been defined.
Action: Check if the WMS theme definition has a value for attribute 'service_url'.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01048: Cannot load WMS map image.
Cause: The image could not be retrieved from the WMS server.
Action: Check if the WMS server URL defined in the theme definition is accessible. Change the timeout value in the theme definition if a timeout has happened.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-01049: X or Y column not found in SQL query.
Cause: The SQL query string in a dynamic JDBC theme did not contain either x or y column.

Action: If your dynamic JDBC theme is using x and y columns to specify the location of a point theme (instead of an SDO_GEOMETRY column), make sure that both the x and y columns are present in the SQL query. Otherwise, check the query itself and make sure a proper SDO_GEOMETRY type column is selected.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02000: There is no database connection loaded.

Cause: Operation could not be performed unless a database connection has been added or loaded.

Action: Use Map Builder interface options to create or to add (load) a connection.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02001: Connection test failed.

Cause: The connection parameters were wrong, the database was down, or the listener was not running.

Action: Check the MapViewer log or console for database errors, and change connection parameters if necessary.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02002: Unable to register data source connection.

Cause: The connection parameters were wrong, the database was down, or the listener was not running.

Action: Check the MapViewer log or console for database errors. If the connection has been already added to Map Builder, check the connections parameters in the Map Builder preferences file (default file is oasmapbuilder.xml), and modify them if needed. Restart Map Builder to load the current preferences file. If it is a new connection being added, change the connection parameters and test the connection before trying to add it.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02050: Unable to save base map definition.

Cause: A database error may have happened while saving the base map in the USER_SDO_MAPS view.

Action: Check the MapViewer log for database error.

Level: 1
Type: ERROR
Error Messages

MAPVIEWER-02051: Unable to save style definition.
Causes: A database error may have happened while saving the style in the USER_SDO_STYLES view.
Action: Check the MapViewer log for database errors.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02052: Unable to save theme definition.
Causes: A database error may have happened while saving the theme in the USER_SDO_THEMES view.
Action: Check the MapViewer log for database errors.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02053: Unable to save tile layer definition.
Causes: A database error may have happened while saving the tile layer in the USER_SDO_CACHED_MAPS view.
Action: Check the MapViewer log for database errors.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02054: Unable to duplicate metadata.
Causes: A database error may have happened while saving a duplicate metadata.
Action: Make sure the new metadata name does not exist on the target database. Check the MapViewer log for database errors.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02055: Unable to delete metadata.
Causes: A database error may have happened while removing metadata from a database view.
Action: Check the MapViewer log for database errors.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02100: Invalid advanced style type.
Causes: The style XML definition contained an invalid or unknown advanced style type.
**Action:** Fix the style XML definition with an external tool, and refresh the connection in Map Builder.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-02101: Unable to build theme definition.**

**Cause:** A database error may have happened while reading theme parameters.

**Action:** Check the MapViewer log for database errors.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-02102: Unable to parse hexadecimal value.**

**Cause:** The string value was not recognized as a valid hexadecimal expression.

**Action:** Use the pattern #xxxxxx to represent the hexadecimal color value. Character # must be first followed by six digits or letters. Each x may be a digit between 0 and 9, or one of the letters "a,b,c,d,e,f".

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-02103: Unable to parse style definition.**

**Cause:** Database-related errors or SQL exceptions may have happened while reading style parameters.

**Action:** Check the MapViewer log for database-related errors or SQL exceptions.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-02104: System will not be able to save this file.**

**Cause:** The file path was not accessible to the system.

**Action:** Define a file name with a valid system path.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-02105: Unable to save HTML file.**

**Cause:** An IO error may have happened while saving file on disk.

**Action:** Check the MapViewer log for error details, and change file name if needed.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process
MAPVIEWER-02200: Invalid raster block size.
Cause: The block size was nor a positive even number and power of two.
Action: Define a value that is positive and a power of two, such as 64 or 128.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02201: Unable to create GeoRaster table.
Cause: Database-related errors or SQL exceptions may have happened while creating a GeoRaster table.
Action: Check the MapViewer log for database-related errors or SQL exceptions.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02202: Unable to create GeoRaster raster data table.
Cause: Database-related errors or SQL exceptions may have happened while creating a GeoRaster raster data table. A raster data table name can not be repeated over cross schemas.
Action: Check the MapViewer log for database-related errors or SQL exceptions.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02203: Unable to insert GeoRaster record.
Cause: Database-related errors or SQL exceptions may have happened while creating a new GeoRaster record.
Action: Check the MapViewer log for database-related errors or SQL exceptions.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02204: Unable to import image file.
Cause: Database-related errors or SQL exceptions may have happened while importing image into a GeoRaster record.
Action: Check the MapViewer log for database-related errors or SQL exceptions.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02205: Unable to georeference GeoRaster object.
Cause: Database-related errors or SQL exceptions may have happened while georeferencing the GeoRaster object.
Action: Check the MapViewer log for database-related errors or SQL exceptions, and change georeferencing parameters if necessary.
Level: 1  
Type: ERROR  
Impact: Process  

MAPVIEWER-02206: Unable to update spatial extent of GeoRaster object.  
Cause: Database-related errors or SQL exceptions may have happened while updating the spatial extent of the GeoRaster object.  
Action: Check the MapViewer log for database-related errors or SQL exceptions.

Level: 1  
Type: ERROR  
Impact: Process  

MAPVIEWER-02207: Unable to generate pyramids for GeoRaster object.  
Cause: Database-related errors or SQL exceptions may have happened while generating pyramids for the GeoRaster object. Map Builder uses resampling mode NN.  
Action: Check the MapViewer log for database-related errors or SQL exceptions.

Level: 1  
Type: ERROR  
Impact: Process  

MAPVIEWER-02208: Unable to retrieve GeoRaster object size.  
Cause: Database-related errors or SQL exceptions may have happened while retrieving the GeoRaster size from the metadata.  
Action: Check the MapViewer log for database-related errors or SQL exceptions.

Level: 1  
Type: ERROR  
Impact: Process  

MAPVIEWER-02209: Unable to save GeoRaster metadata.  
Cause: Database-related errors or SQL exceptions may have happened while registering the GeoRaster spatial extent in the USER_SDO_GEOM_METADATA view.  
Action: Check the MapViewer log for database-related errors or SQL exceptions.

Level: 1  
Type: ERROR  
Impact: Process  

MAPVIEWER-02210: Unable to create spatial indexes for GeoRaster table.  
Cause: Database-related errors or SQL exceptions may have happened while creating spatial indexes on the GeoRaster SPATIALEXTENT attribute.  
Action: Check the MapViewer log for database-related errors or SQL exceptions.

Level: 1  
Type: ERROR  
Impact: Process
MAPVIEWER-02300: Spatial data provider is not registered.

Cause: The list of registered spatial data providers did not contain the provider name.

Action: Check the Map Builder preferences file (default file is oasmapbuilder.xml) to see if it defines the provider parameters. Spatial providers are registered at Map Builder startup if they are defined in the preferences file.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02301: Unable to initialize spatial data provider.

Cause: Initialization parameters were missing or were not accepted by the spatial provider.

Action: Check the spatial provider documentation for information about initialization parameters.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-02302: Unable to create an instance of spatial provider class.

Cause: The library jar file location may not have been accessible to the application.

Action: Check the spatial provider parameters in the preferences file (default file is oasmapbuilder.xml), and modify the jar file location if necessary.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-03001: MapViewer cannot process your map request. Check MapViewer log for details.

Cause: MapViewer could not process a map request sent by your Java application.

Action: Check the MapViewer server logs written when the error occurred. Correct any mistakes accordingly.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-03002: Style does not exist.

Cause: MapViewer could not find the specified mapping metadata or spatial data table.

Action: Make sure the mentioned item (metadata such as style/theme/basemap or spatial data table) exists in the data base.

Level: 1
Type: ERROR
Impact: Process
MAPVIEWER-03003: Cannot add a datasource:
   Cause: MapViewer could not add a new data source per your map request.
   Action: Adding a data source on-the-fly using the Java client API is no longer allowed. Data sources should be defined in the configuration file or added using the admin web page.
   Level: 1
   Type: ERROR
   Impact: Process

MAPVIEWER-03004: cannot list predefined themes from the basemap.
   Cause: MapViewer could not get the list of themes in the specified base map.
   Action: Make sure the base map exists in the database and that it contains predefined themes.
   Level: 1
   Type: ERROR
   Impact: Process

MAPVIEWER-03005: invalid image format specified.
   Cause: The image format (for the map response) specified was invalid or not supported.
   Action: Make sure that only image formats specified in the API are used in your code.
   Level: 1
   Type: ERROR
   Impact: Process

MAPVIEWER-03006: Failed to establish HTTP connection to MapViewer service.
   Cause: The client failed to connect to the MapViewer servlet.
   Action: Make sure the networking configuration settings (such as proxy settings) are correct in the client. Also make sure the correct MapViewer URL is supplied.
   Level: 1
   Type: ERROR
   Impact: Process

MAPVIEWER-03007: Failed to locate image URL in the XML map response.
   Cause: The XML map response from the server did not contain a map image URL.
   Action: Check MapViewer server logs to see if there is any error when processing the map request.
   Level: 1
   Type: ERROR
   Impact: Process

MAPVIEWER-05500: Oracle Maps client internal error.
   Cause: Oracle Maps client encountered an unknown situation.
   Action: See log for additional details.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05501: Map tile layer not found. Check map tile layer name and/or data source name.
Cause: MapViewer server could not find the specified map tile layer.
Action: Make sure the map tile layer and data source do exist and their names are spelled correctly.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05502: Cannot get map tile layer config information.
Cause: The client could not get the map tile layer configuration information from the server.
Action: Make sure the map tile layer and data source do exist and their names are spelled correctly.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05503: FOI ID cannot be null.
Cause: The ID of the newly created FOI was null.
Action: Make sure the FOI ID is not null.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05504: MapViewer server base URL is not defined.
Cause: The MapViewer server base URL was not specified.
Action: Make sure the MapViewer server base URL is properly specified when creating the new MVMapView instance.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05505: Wrong map center point specified. It should be an MVSDoGeometry point.
Cause: The parameter passed as the map center into MVMapView.setCenter() or MVMapView.setCenterAndZoomLevel() was not a valid point MVSDoGeometry object.
Action: Make sure the map center parameter is specified as a valid point type MVSDoGeometry object.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05506: Invalid zoom level.
  Cause: The specified zoom level was invalid.
  Action: Make sure the zoom level value is not null and is within the predefined range.

  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-05507: Map tile layer name cannot be null.
  Cause: The map tile layer name was null.
  Action: Make sure map tile layer name is not null.

  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-05508: FOI Id is already used, please pick a new Id.
  Cause: The ID of the newly created FOI was already used by another FOI.
  Action: Choose a different ID for the new FOI.

  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-05509: Theme-based FOI layer name is used, please pick a new name.
  Cause: The name of the newly created theme-based FOI layer was already used by another theme-based FOI layer.
  Action: Choose a different name for the new theme-based FOI layer.

  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-05510: Cannot find theme-based FOI layer.
  Cause: The client could not find the given theme-based FOI layer.
  Action: Make sure the theme-based FOI layer has already been added to the MVMapView instance.

  Level: 1
  Type: ERROR
  Impact: Process

MAPVIEWER-05511: Error occurred when sending request to MapViewer server.
  Cause: An error occurred when the client sent the request to the MapViewer server.
  Action: Make sure the MapViewer server is running and accessible from the client.
MAPVIEWER-05512: Not enough points have been drawn.

Cause: Not enough points were drawn when calling MVRedline.generate().

Action: Make sure enough points have been drawn before calling MVRedline.generate().

MAPVIEWER-05513: Not a valid line or polygon type MVSdoGeometry.

Cause: getLength() or getArea() was called on a MVSdoGeometry object that is neither a polyline nor a polygon.

Action: Make sure these two methods are called on a polyline or polygon MVSdoGeometry object.

MAPVIEWER-05514: Must have a filtering geometry when in highlight only mode.

Cause: A filtering geometry was not specified for a highlight-only theme-based FOI.

Action: Make sure the filtering geometry is specified.

MAPVIEWER-05516: Synchronized remote call is not supported when using Oracle Maps' non-AJAX remoting.

Cause: An attempt was made to invoke a synchronized remote call when using the Oracle Maps non-AJAX remoting mechanism.

Action: Send an asynchronous remote call instead.

MAPVIEWER-05517: Request string is too long for Oracle Maps' non-AJAX remoting.

Cause: The FOI request exceeded the length limit of the Oracle Maps non-AJAX remoting mechanism.

Action: Force the Oracle Maps client to use browser built-in AJAX remoting mechanism with MapViewer's built-in remoting proxy. Please refer to MVMapView.enableXMLHTTP for more information.
Type: ERROR
Impact: Process

MAPVIEWER-05518: Map tile layer hasn't been successfully added.
Cause: The map tile layer was not successfully added to the MVMapView instance.
Action: Make sure both of the following two conditions are met when adding a map tile layer to the MVMapView instance: 1. The MapViewer base URL is valid. 2. The map tile layer name and data source name are specified correctly.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05519: One or more parameter is missing or invalid.
Cause: One or more parameters in the function call were missing or invalid.
Action: Make sure all required parameters are specified correctly.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05520: Geometry SRID is null.
Cause: The srid attribute of the MVSdoGeometry object was not specified.
Action: Make sure the srid is specified.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05521: Call back function cannot be null when browser's built-in XMLHttpRequest is disabled.
Cause: The callback function was not specified when Oracle Maps’ non-AJAX remoting mechanism was used.
Action: Specify a callback function.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05522: Client side coordinate system conversion not supported.
Cause: The client tried to invoke client-side coordinate system conversion that is not supported.
Action: Verify the possibility of using a server side call to transform coordinate.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-05523: Cannot process response from MapViewer server.
**Error Messages**

**MAPVIEWER-05524: Theme feature highlighting is disabled for this theme.**

**Cause:** The application tried to highlight or de-highlight a theme-based FOI layer that had theme feature highlighting disabled.

**Action:** Call MVThemeBasedFOI.enableHighlight to enable theme feature highlighting.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-05525: Theme has not been added to a MVMapView instance.**

**Cause:** The theme-based FOI layer had not been added to an MVMapView instance when the application invoked certain theme method.

**Action:** Make sure the theme method is invoked after the theme is added to an MVMapView instance.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-06001: FOI width value is wrong.**

**Cause:** MapViewer received an invalid width value for a FOI request.

**Action:** This typically indicates an application coding error. The two most common coding errors that may cause this error are: 1. The JavaScript function MVMapView.display() may have been invoked before the map container DIV object is fully materialized by the browser. 2. The map center X and Y coordinates were not specified as valid numbers. For cause 1, delay the execution of MVMapView.display() until the map container DIV object is fully materialized by the browser. For cause 2, make sure the map center X and Y coordinates are valid numbers.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-06002: FOI height value is wrong.**

**Cause:** MapViewer received an invalid height value for a FOI request.

**Action:** This typically indicates an application coding error. The two most common coding errors that may cause this error are: 1. The JavaScript function MVMapView.display() may have been invoked before the map container DIV object is fully materialized by the browser. 2. The map center X and Y coordinates were not specified as valid numbers. For cause 1, delay the execution of MVMapView.display() until the map container DIV object is fully materialized by
the browser. For cause 2, make sure the map center X and Y coordinates are valid numbers.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-06003: FOI ratX value is wrong.**

**Cause:** MapViewer received an invalid ratX value for a FOI request.

**Action:** This typically indicates an application coding error. The two most common coding errors that may cause this error are: 1. The JavaScript function MVMapView.display() may have been invoked before the map container DIV object is fully materialized by the browser. 2. The map center X and Y coordinates were not specified as valid numbers. For cause 1, delay the execution of MVMapView.display() until the map container DIV object is fully materialized by the browser. For cause 2, make sure the map center X and Y coordinates are valid numbers.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-06004: FOI ratY value is wrong.**

**Cause:** MapViewer received an invalid ratY value for a FOI request.

**Action:** This typically indicates an application coding error. The two most common coding errors that may cause this error are: 1. The JavaScript function MVMapView.display() may have been invoked before the map container DIV object is fully materialized by the browser. 2. The map center X and Y coordinates were not specified as valid numbers. For cause 1, delay the execution of MVMapView.display() until the map container DIV object is fully materialized by the browser. For cause 2, make sure the map center X and Y coordinates are valid numbers.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-06005: FOI bounding box value is wrong.**

**Cause:** MapViewer received an invalid bounding box for a FOI request.

**Action:** Verify FOI request bounding box values. See log for additional details.

**Level:** 1  
**Type:** ERROR  
**Impact:** Process

**MAPVIEWER-06007: Error rendering a FIG.**

**Cause:** MapViewer encountered an error while rendering a feature of interest (FOI) object.

**Action:** Check the MapViewer server-side log files for the actual cause.

**Level:** 1  
**Type:** ERROR
Impact: Process

MAPVIEWER-06008: Error rendering a POI.
Cause: MapViewer encountered an error while rendering a point of interest (POI) image.
Action: Check the MapViewer server-side log files for the actual cause.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06009: Error processing an FOI request.
Cause: MapViewer encountered an error while processing a feature of interest (FOI) request.
Action: Check the MapViewer server-side log files for the actual cause.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06011: Unsupported FOI request type.
Cause: MapViewer encountered an unknown type of feature of interest (FOI) request.
Action: Provide a valid FOI request.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06013: Incorrect FIG 'gtype' number.
Cause: MapViewer encountered an invalid geometry type ('figgtype') in a FIG request.
Action: Verify the possibility of using supported geometry types.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06014: FOI style not found.
Cause: MapViewer could not find the style specified in the FOI request.
Action: Make sure the style specified in your individual FOI or theme-based FOI layer request exists.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06015: Map cache name is missing for bounding FOI theme.
Cause: MapViewer could not find the required map tile layer name in a bounding theme request.
Action: Make sure a map tile layer has been added to your map before issuing a bounding theme request.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06016: JDBC theme based FOI support is disabled for the given data source.
Cause: MapViewer was configured to disable JDBC theme-based FOI on the given data source.
Action: Enable JDBC theme-based FOI support in the data source definition.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06017: Create tile admin task: Map tile layer not found.
Cause: MapViewer could not find the map tile layer specified in a tile admin request.
Action: Make sure the map tile layer does exist and is correctly specified.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06018: Can not read from view USER_SDO_TILE_ADMIN_TASKS.
Cause: MapViewer could not read view USER_SDO_TILE_ADMIN_TASKS from the database connection.
Action: Make sure the SQL script mcsdefinition.sql is executed and the view USER_SDO_TILE_ADMIN_TASKS is created.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06019: Invalid SRS(spatial referencing system). This might be caused by invalid SRID or no database connection being available to retrieve SRS information
Cause: The SRID was not valid or no database connection was available to retrieve SRS information.
Action: Make sure the SRID is valid and MapViewer has a valid database connection (data source).

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06020: Invalid map tile layer name. "." is not allowed in map tile layer names.
Cause: The map tile layer name specified when creating a map tile layer contained '.' (period).
Action: Remove '.' from the map tile layer name.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06021: Map tile layer name is null. Cannot create map tile layer.
Cause: The map tile layer name specified when creating a map tile layer was empty.
Action: Make sure the map tile layer name is not empty.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06022: Cannot load the map source adapter class.
Cause: MapViewer could not load the map source adapter class.
Action: Make sure the path of the adapter class jar file is valid and it does contain the adapter class.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06023: Cannot update database map tile layer configuration.
Cause: MapViewer encountered an error when updating map tile layer configuration stored in the database view USER_SDO_CACHED_MAPS.
Action: Check the MapViewer server-side log files for the actual cause.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06024: Either <internal_map_source> clause or <external_map_source> clause must be defined
Cause: Neither the <internal_map_source> clause nor <external_map_source> clause was defined in the XML tile layer creation request.
Action: Make sure the clauses are properly specified.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06025: Zoom levels definition is missing.
Cause: Zoom levels definition was missing in the XML tile layer creation request.
Action: Make sure the <zoom_levels> element is properly specified.
Level: 1
MAPVIEWER-06026: Coordinate system definition is missing.

Cause: The coordinate system definition was missing in the XML tile layer creation request.

Action: Make sure the <coordinate_system> element is properly specified.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06027: Map source adapter class is null.

Cause: The map source adapter class was not specified when creating an external map tile layer.

Action: Make sure the map source adapter class is specified.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06028: Property name is empty(null) and is ignored.

Cause: The 'name' attribute of the external map source adapter property was empty or null.

Action: Make sure the 'name' attribute of the property is not empty.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06029: Invalid tile image width/height definition

Cause: The tile image width and/or height were null or not valid numbers.

Action: Make sure tile image width and height are valid not null numbers.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06030: Wrong zoom levels definition.

Cause: The zoom levels definition in the XML tile layer creation request was wrong.

Action: Make sure the zoom levels definition is valid.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06031: Cannot parse coordinate definition.

Cause: MapViewer could not parse the coordinate system definition in the XML tile layer creation request.

Action: Make sure the syntax of the XML coordinate system definition is valid.
MAPVIEWER-06032: Data source cannot be null.
   Cause: A data source was not specified.
   Action: Make sure a data source is specified.

MAPVIEWER-06033: Base map cannot be null for an internal map source.
   Cause: A base map was not specified for an internal map tile layer.
   Action: Make sure a base map is specified.

MAPVIEWER-06034: Data source does not exist.
   Cause: MapViewer could not find the specified data source.
   Action: Make sure the data source does exist and its name is spelled correctly.

MAPVIEWER-06035: Base map does not exist.
   Cause: MapViewer could not find the specified base map.
   Action: Make sure the base map source does exist and its name is spelled correctly.

MAPVIEWER-06036: MapTileServer is not ready. Please try again later.
   Cause: The map tile server was still being initialized and was not ready.
   Action: Wait until the tile server is ready.

MAPVIEWER-06037: You must log in as admin user in order to perform this task.
   Cause: The user did not have the admin privilege when trying to perform an admin task.
   Action: Log in as the admin user before submitting the admin task.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06038: Not all scale, tile_width, tile_height definition can be empty.
Cause: None of scale, tile_width, and tile_height parameters was specified for a zoom level.
Action: Make sure at least one of parameters is specified.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06039: No map data unit conversion information is available. Cannot create mesh rules.
Cause: MapViewer could not find map data unit conversion parameters for the given coordinate system.
Action: Use tile_width instead of scale to specify zoom level definition.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06040: Map tile server is being shutdown!
Cause: The map tile server was being shutdown.
Action: Wait until MapViewer is restarted and the map tile server is ready.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06041: Invalid zoom level.
Cause: The zoom level was missing or invalid.
Action: Make sure the zoom level is not null and valid.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06042: MapViewer is not ready.
Cause: MapViewer was still being initialized and was not yet ready.
Action: Wait until MapViewer is ready.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06043: Cannot access map tile layer configuration in database.
Cause: MapViewer encountered error when trying to read the map tile layer configuration from the database.
Action: Check the MapViewer server-side log file for the real cause.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06044: The map tile is not correctly specified in the tile request.
Cause: The tx or ty parameter (or both) of the map tile request was not specified or was invalid.
Action: Make sure the tile tx and ty are properly specified.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06045: Cannot create the directory.
Cause: MapViewer could not create the directory for tile storage.
Action: Make sure MapViewer can write to the file system and that the file system is not full.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06046: Cannot insert map tile layer configuration into database.
Cause: MapViewer could not insert the map tile layer configuration into the database view.
Action: Check the MapViewer server-side log file for the real cause.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06047: Cannot find map tile layer.
Cause: The specified map tile layer did not exist.
Action: Make sure the map tile layer does exist and its name is spelled correctly.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06048: Cannot load adapter jar file into database.
Cause: MapViewer encountered an error when writing the adapter jar file into the database.
Action: Check the MapViewer server-side log file for the real cause.

Level: 1
Type: ERROR
Impact: Process
MAPVIEWER-06049: \texttt{<map\_tile\_server\_admin\_request>} tag is missing from the request.

\textbf{Cause:} The \texttt{<map\_tile\_server\_admin\_request>} tag was missing in the XML tile server admin request.

\textbf{Action:} Make sure this tag is properly specified.

\textbf{Level:} 1
\textbf{Type:} ERROR
\textbf{Impact:} Process

MAPVIEWER-06050: Map tile layer definition is missing in the request.

\textbf{Cause:} \texttt{<map\_tile\_layer>} tag was missing in the XML tile layer creation/redefining request.

\textbf{Action:} Make sure \texttt{<map\_tile\_layer>} tag is properly specified.

\textbf{Level:} 1
\textbf{Type:} ERROR
\textbf{Impact:} Process

MAPVIEWER-06051: Unknown request type.

\textbf{Cause:} The tile admin request type was wrong.

\textbf{Action:} Make sure the tile admin request type is specified correctly.

\textbf{Level:} 1
\textbf{Type:} ERROR
\textbf{Impact:} Process

MAPVIEWER-06052: Error in parsing xml request.

\textbf{Cause:} MapViewer encountered error when parsing the XML tile admin request.

\textbf{Action:} Make sure the XML request is well formatted and free of syntax errors.

\textbf{Level:} 1
\textbf{Type:} ERROR
\textbf{Impact:} Process

MAPVIEWER-06053: Zoom level or scale is not specified or invalid.

\textbf{Cause:} The tile zoom level was not specified in the tile request.

\textbf{Action:} Make sure the tile zoom level is specified.

\textbf{Level:} 1
\textbf{Type:} ERROR
\textbf{Impact:} Process

MAPVIEWER-06054: Tile location definition is missing in the request. Either the tile mesh code or the tile location coordinates\text{\texttt{(tx,ty)}} must be specified.

\textbf{Cause:} The tx or ty parameter (or both) of the map tile request was not specified or was invalid.

\textbf{Action:} Make sure that the tile tx and ty are properly specified.

\textbf{Level:} 1
Type: ERROR
Impact: Process

MAPVIEWER-06055: Map location/size definition is missing in the request. Either the map bounding box(bbox) or the map center(cx,cy) and map size(width,height) must be specified.
Cause: Neither map bounding box nor map center and size was specified.
Action: Make sure either the map bounding box or the map center and size are specified.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06056: Invalid bounding box definition.
Cause: The bounding box definition was invalid.
Action: Make sure the bounding box definition is valid.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-06057: A map tile layer with the same name already exists.
Cause: An already taken name was used to create a new map tile layer.
Action: Choose a different name for the tile layer.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-07000: Data server streaming request validation error.
Cause: Request with invalid parameters or invalid condition.
Action: See log for additional details about the validation error. Possible actions:
Verify if data source is defined. Look 'mds_config' tag in configuration file to check if data source streaming is set to true. For dynamic theme request, verify if data source streaming of dynamic data is allowed. For predefined theme request, verify if streaming of theme data is not disabled.
Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-07001: MapViewer server does not allow streaming access. Contact server administrator to check MapViewer configuration file.
Cause: Map data server configuration is undefined.
Action: Add 'mds_config' tag to MapViewer's configuration file.
Level: 1
Type: ERROR
Impact: Process
MAPVIEWER-07002: Data source does not allow streaming access. Contact server administrator to check MapViewer configuration file.

Cause: Data source is not defined in 'mds_config' tag.

Action: Add data source tag in 'mds_config' and allow themes to be streamed. To allow predefined themes streaming set 'allow_predefined_themes' tag to true. To allow dynamic themes streaming set 'allow_dynamic_themes' tag to true.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-07003: Data source does not allow dynamic client queries.

Cause: Streaming of dynamic theme data is not allowed.

Action: To allow dynamic themes streaming set 'allow_dynamic_themes' tag to true.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-07004: Theme cannot be streamed.

Cause: Streaming of predefined theme data is not allowed.

Action: To allow themes streaming set 'allow_predefined_themes' tag to true.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-07007: Error reading json data file.

Cause: Cannot access JSON data file.

Action: Verify if path to JSON file is correct.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-09001: Map tile layer not found. Check map tile layer name and/or data source name.

Cause: The tile layer name defined is not found.

Action: Make sure the tile layer exists for data source. Look user_sdo_cached_maps view.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-09006: Error occurred when sending request to data server.

Cause: MapViewer server may be down.

Action: See client log for additional details.

Level: 1
Type: ERROR
Impact: Process

MAPVIEWER-09007: Cannot get data from data server.
    Cause: Streaming of theme data may not be allowed.
    Action: Verify settings in 'mds_config' tag of configuration file.

Level: 1
Type: ERROR
Impact: Process
MDS-00001: exception in Metadata Services layer
Cause: An exception occurred in the Metadata Services layer.
Action: Details are usually given in the cause exception. Look for messages describing the cause exception and take the appropriate action.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00002: unexpected internal error
Cause: An unexpected internal error occurred.
Action: Contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-00003: error connecting to the database
Cause: A database connection to the metadata repository could not be established.
Action: Contact the database administrator or system administrator to get the problem resolved.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00005: unable to find XML element or text "[0]"
Cause: The XML element with the given local name or the text node containing the given data could not be located by traversing through the document while applying customizations to a metadata object. The internal in-memory MDocument structure may be corrupted.
Action: Retry the operation. Contact Oracle Support Services if the problem persists.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic
MDS-00008: Attribute ",(0)" is not allowed for element (1) namespace (2) in metadata object (3).
    Cause: An attempt was made to add an attribute to an element that does not conform to the element’s schema definition.
    Action: If the Bean API is being used, then determine if the beans need to be regenerated. Otherwise, inspect the element definition for valid attributes.
    Level: 1
    Type: ERROR
    Impact: Programmatic

MDS-00010: DuplicateRefException. In document (0) there are multiple elements with the same ID (1).
    Cause: Either an element was being added with an ID that already existed within the document, or a pre-existing document had multiple elements with the same ID.
    Action: Change the ID of the elements so that there is no ID duplication.
    Level: 1
    Type: ERROR
    Impact: Programmatic

MDS-00011: unable to create configuration object or MDSInstance due to invalid configuration information: (0)
    Cause: The MDS configuration was invalid.
    Action: Refer to the MDS specification and correct the configuration.
    Level: 1
    Type: ERROR
    Impact: Configuration

MDS-00012: invalid value ",(0)" for attribute (1) (type = "(2)"") in metadata object (3)
    Cause: The value provided for the named attribute was invalid. For example, this error could occur if a named JNDI connection name is incorrect.
    Action: Provide a valid attribute value.
    Level: 1
    Type: ERROR
    Impact: Data

MDS-00013: no metadata found for metadata object ",(0)"
    Cause: MDS was unable to locate the given metadata object.
    Action: Confirm the name and location of the metadata object, its existence in the configured metadata stores, and that it is in an accessible namespace.
    Level: 1
    Type: ERROR
    Impact: Data

MDS-00015: Translation ignored in document ",(0)": element with localRef ",(1)" not found
Cause: A translation could not be applied because the underlying element to be translated was not found.

Action: If the element is expected, check the base document and any customizations to locate it.

Level: 1
Type: ERROR
Impact: Data

MDS-00016: Ignoring customization for instruction type "{0}" in metadata object "{1}" for customization layer "{2}"/{"3"}: not finding element with local reference "{4}"

Cause: A customization was not applied because the underlying element to be customized was not found.

Action: If the element is expected, examine the base document and any customizations to locate the element.

Level: 1
Type: ERROR
Impact: Data

MDS-00017: Customization instruction generated for "{0}" uses local reference(s) : "{1}" which is not upgrade safe.

Cause: The customization instruction contained a local reference that was not deemed safe for an upgrade operation.

Action: Ensure that the local reference used in the customization instruction would be safe during an upgrade operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00018: Fixed customization for instruction type "{0}" in metadata object "{1}" for customization layer "{2}"/{"3"}: not able to find the referenced element with local reference "{4}", inserted the customized element at the best possible location.

Cause: A customization was fixed because the referenced element was not found.

Action: Correct the customized element's position if needed.

Level: 1
Type: ERROR
Impact: Data

MDS-00019: Customization document contains an invalid instruction "{0}".

Cause: A customization document that was being applied contained an unrecognized instruction.

Action: Retry the operation. If necessary, either remove the customization document, or edit it to correct or remove the offending instruction.

Level: 1
Type: ERROR
Impact: Data

MDS-00020: Layer value "[0]" contains an invalid character.
Cause: Using a layer value that has an invalid character.
Action: Layer value should conform to MDS naming standards.

Level: 1
Type: ERROR
Impact: Data

MDS-00029: Invalid namespace: The namespace "[0]" has not been registered with the MetadataManager.
Cause: An attempt was made to access a document in an unknown location or namespace.
Action: Ensure that the namespace reported is registered in the MDS configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00032: cannot parse the input file: [0]
Cause: An exception occurred while parsing the file.
Action: Record the accompanying error and contact the developers of the application.

Level: 1
Type: ERROR
Impact: Data

MDS-00033: cannot load the input file: [0]
Cause: An exception occurred while loading the file.
Action: Record the accompanying error and contact the developers of the application.

Level: 1
Type: ERROR
Impact: Files

MDS-00034: cannot write to the output file: [0]
Cause: An attempt to write to the output file failed.
Action: Record the accompanying error and contact the developers of the application.

Level: 1
Type: ERROR
Impact: Files

MDS-00035: cannot load the class: [0].
Cause: The class file could not be loaded.
Action: Ensure the class is available on the classpath so that it can be loaded by the application.

Level: 1

Type: ERROR

Impact: Configuration

MDS-00036: cannot instantiate the class: {0}
Cause: An exception occurred while instantiating a class.
Action: Record the accompanying error and contact the developers of the application.

Level: 1

Type: ERROR

Impact: Configuration

MDS-00037: cannot access the class: {0}
Cause: An attempt was made to access an inaccessible class file.
Action: Record any accompanying errors and contact the developers of the application.

Level: 1

Type: ERROR

Impact: Configuration

MDS-00039: error while attempting to parse the document {0} using SAX.
Cause: A SAX parsing exception occurred while trying to parse a document.
Action: Record the accompanying error and contact the developers of the application.

Level: 1

Type: ERROR

Impact: Data

MDS-00040: There are no namespaces registered.
Cause: The operation attempted requires at least one registered namespace.
Action: Correct the MDS configuration to include the required namespace schemas.

Level: 1

Type: ERROR

Impact: Configuration

MDS-00041: invalid classpath entry "[0]"
Cause: An entry on the application’s classpath did not exist or was invalid.
Action: Correct the application’s classpath to remove the invalid entry.

Level: 1

Type: ERROR

Impact: Configuration
MDS-00042: Classpath "[0]" does not contain any valid directories or jar files.
Cause: The application’s classpath contained no valid entries.
Action: Correct the application’s classpath.
Level: 1
Type: ERROR
Impact: Configuration

MDS-00043: A name pattern mapping for path [0] already exists.
Cause: The MDS configuration had duplicate namespace mappings.
Action: The MDS configuration must be corrected to remove the duplicate namespace mappings.
Level: 1
Type: ERROR
Impact: Configuration

MDS-00044: Metadata for MetadataObject with name [0] already exists in the configured store.
Cause: An attempt was made to create a new Metadata Object. However an object with the same MDSReference already existed.
Action: The name or location of one of the objects must be changed.
Level: 1
Type: ERROR
Impact: Configuration

MDS-00047: Use the flushChanges method on the MDSSession to commit the changes.
Cause: Commit was disabled in the PTransaction that was being used.
Action: Use the flushChanges method on the MDSSession to commit the changes.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00054: The file to be loaded [0] does not exist.
Cause: An attempt was made to load a persistent document using a URL but the underlying document was not found in the store.
Action: Check that the document name is correct and that the store is correctly configured.
Level: 1
Type: ERROR
Impact: Configuration

MDS-00058: Invalid Metadata Path: Metadata Path cannot be null.
Cause: The path used to create a FileMetadataStore was empty. It must point to a directory.
Action: Correct the metadata store definition in the application configuration to specify a metadata path.
Level: 1
Type: ERROR
Impact: Configuration

MDS-00068: Element with local name = {0}, namespace = {1} is not expected under Parent Element = {2} in document location = {3}
Cause: While parsing a document, a request was made to locate a type definition whose usage is either not defined or is not expected for the parent element within the schema definition.
_action: Check the xml source and any customizations to be applied and ensure that the element with the given namespace is defined and in the correct location as specified by the schema definition.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00084: Parameter {0} is invalid.
Cause: The supplied parameter was not of the expected type.
Action: Ensure the parameter is of the expected type.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00085: Parameter {0} is missing.
Cause: The named parameter was not supplied.
Action: Ensure that the named parameter is supplied. If transferring documents ensure a parameter file name is supplied.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00089: Parameter {0} must have a value.
Cause: A required parameter was null.
Action: Ensure that the indicated parameter is not null when the method is called.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00090: Error in JNDI lookup operation on MDSInstance name {0}, JNDI name {1}; object found {2} is an instance of class {3} classloader {4}, expected an instance of class {5} classloader {6}.
Cause: An object of an unexpected type was found, and it was bound to the JNDI context as the MDSInstance.
Action: Make sure no user-written code is binding anything to the same JNDI name. If the error occurs again try restarting the application. If the error still occurs, contact Oracle Support Services.
Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-00091: Unable to customize {0}, empty or null value for tip customization layer {1}
Cause: The customization layer configured as the tip, has a null or empty value.
Action: Ensure that a valid value is supplied for the tip customization layer.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00092: DuplicateNodeException. The same bean instance {0} already exists in document {1}.
Cause: An element was being added that already exists as the same bean instance within the document.
Action: Either create a new bean instance or remove the duplicate before attempting to insert in the document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00093: List of values provided for customization layer {0} was empty or null.
Cause: The list of customization layer values was either empty or null.
Action: Ensure that a valid list of layer values for the customization layer is provided.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00094: List of CustLayerUsage objects provided was empty or null.
Cause: The list of CustLayerUsage objects was either empty or null.
Action: Ensure that a valid list of CustLayerUsage objects is provided.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00095: The support to transfer customization documents based on the CustConfig and excluding customization documents of specific customization layers is not yet available.
Cause: CustOption is created to transfer customization documents based on the CustConfig and to exclude customization documents of specific customization layers which is not yet supported in MDS Transfer.
Action: Ensure CustOption is not created to use CustConfig and to exclude customization documents of specific customization layers.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00111: The value of the property {0} for the component {1} must be set to the default value.
Cause: The indicated component property did not have a default value.
Action: Ensure the component property is given a default value.

Level: 1
Type: ERROR
Impact: Data

MDS-00153: invalid value for indicator
Cause: The production of merged XML failed.
Action: Verify the validity of XML documents and any schemas. If necessary forward these on to Oracle Support Services with the exception message and stack trace.

Level: 1
Type: INCIDENT_ERROR
Impact: Data

MDS-00154: The ContentHandler {0} does not implement org.xml.sax.ext.LexicalHandler.
Cause: MergedXML was passed a ContentHandler that does not implement org.xml.sax.ext.LexicalHandler.
Action: Use a ContentHandler that implements org.xml.sax.ext.LexicalHandler.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00155: unable to create a JSP file for document {0}
Cause: Oracle MDS was unable to create a JSP source document.
Action: Examine the MDS base document, as well as any customizations and translations. If necessary, forward these to Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Files

MDS-00156: unable to create a JSP output directory {0}
Cause: MDS-JSP integration failed because a problem was encountered while creating a directory.
Action: Verify that you have permission to create this directory.

Level: 1
Type: ERROR
Impact: Files

MDS-00157: unable to write to JSP file {0}
Cause: MDS-JSP integration failed because a problem was encountered while trying to write to a file.
Action: Verify that you have permission to create this file.
Level: 1
Type: ERROR
Impact: Files

MDS-00158: invalid directory: {0}
Cause: MDS-JSP integration failed. An attempt was made to write to an invalid directory.
Action: Verify the value of the invalid directory.
Level: 1
Type: ERROR
Impact: Files

MDS-00159: Invalid value "[0]" for {1} attribute (type = "[2]") in document {3}.
Cause: An attempt was made to read or write an invalid attribute value.
Action: Double-check the value and attribute type.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00160: no local name has been specified for a resource
Cause: An attempt was made to create a resource without giving it a name.
Action: Verify that the resource that was created is given a local name.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00161: no local name has been specified
Cause: An attempt was made to create a resource without giving it a local name.
Action: Verify that the resource that was created is given a local name.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00162: invalid attribute value
Cause: An attempt was made to give to an invalid value to an attribute.
Action: Verify that the attribute has a valid value.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00163: property value missing from element
Cause: An element was missing a property value.
Action: Ensure that each parameter used to create the element has a property value.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00164: There is a concurrent "{1}" operation on the document "{0}".
Cause: The document on which modification was being attempted had been updated by another user after it was retrieved.
Action: Retrieve the document again.
Level: 1
Type: ERROR
Impact: Data

MDS-00165: metadata Object "{0}" has changed
Cause: The creation, updating, or renaming of a metadata object failed due to conflicting changes made by another user.
Action: Retrieve the document containing the metadata object again.
Level: 1
Type: ERROR
Impact: Data

MDS-00166: unable to locate the unique identifier, {0}:{1}, that has been configured for the element {2}
Cause: The element that required a unique identifier was created without one.
Action: Add a unique identifier attribute to the element.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00167: Invalid local name for mapping ""{0}"" - an empty string is not allowed.
Cause: A local name was given a null or empty value.
Action: Supply a valid local name.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00168: MDS object {0} is being used after it or its MDSInstance or PManager has been released.
Cause: An MDS object was used after it or its MDSInstance or PManager had been released.
Action: Create a new MDSInstance and re-create the MDS object.
Level: 1
Type: ERROR
Impact: Session

MDS-00169: The MDS instance is not ready for use because metadata deployment is in progress (status is "[0]"). Deployment messages so far are: "[1]".
Cause: The MDS instance cannot be used until metadata deployment has finished.
Action: Try again later after metadata deployment has completed.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-00170: The MDS instance is not usable because metadata deployment failed with status "[0]".
Cause: Metadata deployment failed with the given status.
Action: Please fix the error and redeploy the application's metadata using the importMAR operation on MDS Application Runtime MBean. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1

Type: ERROR
Impact: Configuration

MDS-00171: Document "[0]" already has unsaved updates on another instance of this metadata object in this session.
Cause: An attempt was made to update metadata using more than one instance of the same metadata object at the same time in the same session.
Action: Save the changes on the metadata object that already has updates before attempting to update it via another metadata object, or make further modifications on the metadata object on which updates have already been made.
Level: 1

Type: ERROR
Impact: Data

MDS-00172: The value "{0}" of local unique attribute {1} on the {2} element that is being inserted or updated in document {3}, is already used by a sibling element.
Cause: An attempt was made to have two local unique attributes with the same value on elements that share the same parent.
Action: Use a different value for the local unique attribute on the element that is being inserted or updated.
Level: 1

Type: ERROR
Impact: Data

MDS-00173: Attribute {0} of element {1} in document {2} has a null value.
Cause: The value of the named attribute was null.
Action: Provide a non-null value for the attribute or remove the attribute.
Level: 1
Type: ERROR
Impact: Data

MDS-00174: A tenant scoped MDSInstance \{0\} is being requested with a null TenantId.
Cause: A tenant scoped MDSInstance was requested passing null for TenantId.
Action: Supply a non null TenantId or request an unscoped MDSInstance.

Level: 1
Type: ERROR
Impact: Session

MDS-00176: The operation on MDSInstance \{0\} cannot be performed as it is not tenant scoped.
Cause: The operation performed on the MDSInstance was invalid with a TenantId because it was not a tenant scoped MDSInstance.
Action: Perform the operation on an MDSInstance initialized for multitenant operation.

Level: 1
Type: ERROR
Impact: Session

MDS-00177: The operation on resource \{0\} cannot be performed as it is not configured to be owned by the current tenant scope.
Cause: The operation performed was illegal as the resource being created, updated or deleted has global scope and the current scope is tenant or the resource has tenant scope and the current tenant is global.
Action: Check that the configuration of the namespaces and CustomizationClasses is correct and that the correct customization class list is being used.

Level: 1
Type: ERROR
Impact: Session

MDS-00178: Multitenant MDSInstance \{0\} cannot be returned as a non-multitenant MDSInstance was requested with the current persistence configuration.
Cause: The configuration at the time the MDSInstance was requested did not match with the configuration when it was originally created.
Action: Request an MDSInstance appropriate to the configuration.

Level: 1
Type: ERROR
Impact: Session

MDS-00179: The requested MDSInstance \{0\} cannot be returned for TenantId \{1\} as it was originally created with multitenant enabled = \{2\}.
Cause: The configuration at the time the MDSInstance was requested did not match with the configuration when it was originally created.
**Action:** Request an MDSInstance appropriate to the original configuration.

**Level:** 1  
**Type:** ERROR  
**Impact:** Session

MDS-00180: Only a single tenant cache configuration is allowed.  
**Cause:** The number of TenantCacheConfigs was not 1.  
**Action:** Pass a single tenant cache configuration object. Although the constructor for the TenantCacheConfigs class takes an array this is reserved for future use.

**Level:** 1  
**Type:** ERROR  
**Impact:** Session

MDS-00181: Only a single tenant document cache configuration is allowed.  
**Cause:** The number of TenantDocumentCacheConfigs was not 1.  
**Action:** Pass a single tenant document cache configuration object. Although the constructor for the TenantDocumentCacheConfigs class takes an array this is reserved for future use.

**Level:** 1  
**Type:** ERROR  
**Impact:** Session

MDS-00182: Tenant cache configuration information cannot be requested for the global tenant.  
**Cause:** Tenant cache configuration information was being requested for the global tenant.  
**Action:** Do not request the tenant cache configuration for the global tenant - use getCacheConfig directly from MDSConfig

**Level:** 1  
**Type:** ERROR  
**Impact:** Session

MDS-00183: Tenant document cache configuration information cannot be requested for the global tenant.  
**Cause:** Multitenant document cache information was being requested for the global tenant.  
**Action:** Do not request the tenant document cache configuration for the global tenant - use getDocumentCacheConfig from NamespaceConfig

**Level:** 1  
**Type:** ERROR  
**Impact:** Session

MDS-00184: The relationship from {0} to {1} is invalid because the latter is configured as a global resource and cannot be referenced from a tenant resource because the corresponding relationship is defined with cascade delete enabled.
**Cause:** Relationships with cascade delete enabled were spanning tenant boundaries.

**Action:** Reconfigure the relationship with cascade delete disabled or ensure the parent reference is within the same tenant scope.

**Level:** 1

**Type:** ERROR

**Impact:** Session

**MDS-00185:** The relationship from [0] to [1] is invalid because the latter is configured as a global resource and cannot be referenced from a tenant resource because the corresponding relationship is defined with enforced integrity.

**Cause:** Relationships with defined referential integrity were spanning tenant boundaries.

**Action:** Reconfigure the relationship without referential integrity or ensure the parent reference is within the same tenant scope.

**Level:** 1

**Type:** ERROR

**Impact:** Session

**MDS-00186:** A [0] element is already present in the parent [1] element in document [2], but with the QNameLUID identification mechanism only one is allowed.

**Cause:** An attempt was made to have two or more elements with same QName under same parent while QNameLUID identification mechanism is used.

**Action:** Remove duplicate instances of elements with same QName

**Level:** 1

**Type:** ERROR

**Impact:** Data

**MDS-00187:** The existing [0] element in the parent [1] element in document [2] is automatically removed, and new customized [0] element of "[3]/"[4]" customization layer is inserted since with the QNameLUID identification mechanism, only one is allowed.

**Cause:** An attempt was made to have two or more elements with same QName under same parent while QNameLUID identification mechanism is used.

**Action:** Removed duplicate instances of elements with same QName

**Level:** 1

**Type:** ERROR

**Impact:** Data

**MDS-00188:** The relationship from [0] to [1] is invalid because the latter is configured as a tenant resource and cannot be referenced from a global resource.

**Cause:** An attempt was made to reference a tenant resource from a global resource.

**Action:** Ensure all references from global resources are also global.

**Level:** 1

**Type:** ERROR
MDS-00189: The existing {0} element with unique id {1} in the parent {2} element in document {3} is automatically removed, and new customized {0} element with unique id {1} of "(4)="/"(5)" customization layer is inserted since {0} element is type-annotated to overwrite duplicates.

Cause: An attempt was made to have two or more elements with same QName under same parent having the same unique ID value while overwriteDuplicate mechanism is used.

Action: Removed duplicate instances of elements with same QName having the same unique ID value

Level: 1
Type: ERROR
Impact: Session

MDS-00190: A call to {0} on the current MDSSession does not specify the correct transaction key

Cause: The current MDS Session was created using a transaction key and the subsequent operation was either being attempted passing no key or a different one from that originally used.

Action: If the MDS Session is created using a transaction key, then use the MDSSession API's that take a transaction key and use the same key.

Level: 1
Type: ERROR
Impact: Data

MDS-00191: An exception occurred in PChangeListener {0}

Cause: The MetadataStoreCommunicator was attempting to notify the listener when an exception occurred.

Action: Check the HandlePChanges method of the listener.

Level: 1
Type: ERROR
Impact: Session

MDS-00192: Validation of {0} caused a NullPointerException: check there is an MDS bean object set on the MDS bean MO

Cause: This error most typically occurs when a Bean MO has been created but no bean object has been set on it.

Action: Check that an MDS bean is set on this MO. Failing that, examine the stack for clues for alternative causes.

Level: 1
Type: ERROR
Impact: Data

MDS-00193: Document with the MDSReference {0} contains an ID attribute with an invalid value: {1}

Cause: The value of the ID attribute is invalid according to the schema definition.

Action: Ensure that the ID conforms to the schema definition.
Level: 1
Type: WARNING
Impact: Data

MDS-00194: Auditing is disabled for component {0}.
Cause: There was an error registering the audit event definition(s) for the component.
Action: Ensure that the audit event definitions for the component are valid and that the audit service is functional.

Level: 1
Type: NOTIFICATION
Impact: Configuration

MDS-00195: The custom audit event of type "{0}" that was associated with "{1}" is not audited because the MDS object was unmodified since the last time the changes in the MDSSession were committed.
Cause: MDS object associated with the event was unmodified since the last time the changes in the MDSSession were committed. A custom audit event is discarded if the associated MDSObject is not modified.
Action: No action required.

Level: 1
Type: WARNING
Impact: Programmatic

MDS-00196: The MDSSession referenced by the audit component "{0}" is invalid.
Cause: The MDS audit support instance is being used even after the MDSSession that was used to created it is no longer referenced.
Action: Fetch the audit support instance from the MDSSession and retry the operation.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00197: An internal error occurred when processing MetadataObject {0} with document {1}.
Cause: An error occurred in the LayeredCache processing.
Action: Check for log messages. If the problem persists, clear the MDS cache and contact Oracle Support Services.

Level: 1
Type: WARNING
Impact: Session

MDS-00198: The requested object is deleted in the current PTransaction
Cause: The requested document was deleted in an earlier part of the PTransaction and not replaced.
Action: Review whether the document needed to be deleted or replace with a new version.
Level: 1
Type: ERROR
Impact: Data

MDS-00199: The requested object is deleted in the current MDSSession
Cause: The requested document was deleted in an earlier part of the MDSSession and not replaced.
Action: Review whether the document needed to be deleted or replace with a new version.

Level: 1
Type: ERROR
Impact: Data

MDS-00200: Reference not found in Document
Cause: Unable to locate the reference within the named Metadata Object.
Action: Check that the reference is correct.

Level: 1
Type: ERROR
Impact: Data

MDS-00201: PDocument not found in MetadataStore: {0}
Cause: The requested persistence document was not found in the given MetadataStore.
Action: Check that the requested name is correct and that the store is mapped to the namespace correctly.

Level: 1
Type: ERROR
Impact: Data

MDS-00202: The Document was not found on the classpath
Cause: The requested document was not found on the classpath.
Action: Check that the document is available on the classpath as a resource.

Level: 1
Type: ERROR
Impact: Data

MDS-00203: An error occurred while attempting to process Element "[0]" from customization document [1] because the change conflicts with information in the base document or changes made by a prior customization
Cause: An error occurred during parsing of a customization - see cause.
Action: Check for any conflicts between the customization and recent changes to the base document or other customizations being applied.

Level: 1
Type: ERROR
Impact: Data
MDS-00204: Remove customization fails on element with local reference "{0}" in document "{1}"

Cause: An attempt to remove a customization from an element has failed.

Action: Reproduce the customization document without the desired customization.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00205: Unexpected error in ChangeEventParseEngine

Cause: An error in the ChangeEventParseEngine.

Action: Check for log messages. If the problem persists, contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00206: Unexpected error while collecting ElementTipCustInfo for a customized element

Cause: An error occurred while gathering ElementTipCustInfo for a customized element.

Action: Check for log messages. If the problem persists, contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00207: Cached Object {0} was removed from the MDS cache by thread {1} while being read. Retrying the read.

Cause: An object being accessed by MDS was removed from the cache before it could be used to return the requested data.

Action: The notification can occur if there are concurrent updates to objects cached by MDS. If the notification persists review the MDS cache configuration.

Level: 1
Type: NOTIFICATION
Impact: Session

MDS-00208: Root node deleted but not replaced.

Cause: The root node of an XML document was deleted, but no replacement node was inserted.

Action: Insert a replacement root node after deleting the root node.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00209: Exception adding logging data: "{0}".
Cause: An exception was raised in the MDS diagnostic log processing.
Action: Examine logs for the full exception stack and underlying cause.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00210: The TenantId supplied {0} does not match the current tenant context: {1}.
Cause: A TenantId was supplied to MDS that does not match the TenantId provided by the context.
Action: Remove the TenantId from the deprecated API or correct the TenantId supplied.

Level: 1
Type: ERROR
Impact: Session

MDS-00211: Action is not allowed on a tenant-specific MetadataStoreCommunicator.
Cause: An attempt was made to invoke a method that is not allowed on a non-global tenant
Action: This change has to be made in a global tenant context.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00212: Unable to execute a task in the DOMAIN partition in application {0} because the application in the DOMAIN partition is not currently in RUNNING state, or this is a Java SE application that has not initialized MDS in the DOMAIN context.
Cause: A task runner was required but unable to be found.
Action: Ensure that the MDS application lifecycle listener is configured, or that MDS is initialized in the global tenant context before running in any other tenant context.

Level: 1
Type: ERROR
Impact: Session

MDS-00213: It was not possible to lock the cached RootNode with root key {0}.
Cause: An error occurred in the LayeredCache processing due to cache contention on a specific object.
Action: Check for log messages. If the problem persists, clear the MDS cache and contact Oracle Support Services.

Level: 1
Type: WARNING
Impact: Session
MDS-00214: Error encountered while processing root node replacement customization instruction in tip customization layer document.

Cause: The customization instructions in tip customization document might be corrupted.

Action: Check for log messages. If the problem persists, contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00215: TenantId is not supported. Please use equivalent ServiceId api.

Cause: An attempt was made to invoke MDS deprecated APIs with TenantId.

Action: Replace TenantId based API with ServiceId based API.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00216: Notification Manager for MDSInstance {0} was unable to get an application scoped executor for dispatching events in the application context - using a global executor instead.

Cause: An attempt was made to get an application scoped executor outside of an application.

Action: Check if the request should be running within the scope of an application.

Level: 1
Type: WARNING
Impact: Session

MDS-00217: Notification Manager for MDSInstance {0} was unable to get an application scoped contextual proxy for dispatching global events in the tenant context - using a global contextual proxy instead.

Cause: An attempt was made to get an application scoped contextual proxy outside of an application.

Action: Check if the request should be running within the scope of an application.

Level: 1
Type: WARNING
Impact: Session

MDS-00218: Cannot create ServiceId with null Service UUID.

Cause: An attempt was made to create an MDS ServiceId with a null value.

Action: Check lifecycle-config.xml and ensure that each 'service' element contains an 'id' attribute defined with a UUID value.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00219: Invalid resource passed to MDSFaceletsHelper: {0}.
Cause: An invalid resource was passed to MDSFaceletsHelper.
Action: Check exception message. Consider enabling oracle.mds.jrf logging for additional diagnostics.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00220: Document {0} to be loaded does not exist for label {1}.
Cause: An attempt was made to load a persistent document using a URL but the underlying document was not found in the DB MetadataStore.
Action: Check that the document name is correct and that the DB MetadataStore and Label are correctly configured.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00221: Specified label {0} does not exist in {1} store.
Cause: The specified label did not exist in the metadata store.
Action: Verify that the label name is correct and that the label exists in the metadata store, and then retry the operation.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00222: Invalid value "{0}" for {1} attribute (type = "{2}").
Cause: An attempt was made to read or write an invalid attribute value.
Action: Double-check the value and attribute type.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00223: Unable to retrieve pinned Customization Class value from Unified Sandbox For CustomizationClass : {0} with Name {1}.
Cause: An attempt was made to read a customization value with AutoMergeOverrideValue.PINNED, but no value was retrieved from the Unified Sandbox.
Action: Ensure Unified Sandbox is able to return a pinned value for this Customization Class.

Level: 1
Type: ERROR
Impact: Runtime

MDS-00224: Customization of {0} Location: {1} is not permitted due to a package level restriction in the cust-restriction-library-config element of the mds-library-config.xml at jar/zip level.
Cause: A jar level restriction on customization has been specified for objects in this package in the cust-restriction-library-config element of the mds-library-config.xml file.

Action: Check if customization of this object should be allowed and correct the entries in cust-restriction-library-config at the jar/zip level.

Level: 1
Type: ERROR
Impact: Runtime

MDS-00225: Updating immutable StreamedObject "[0]" is not allowed.

Cause: The StreamedObject being updated was immutable.

Action: Ensure that the StreamedObject to be updated is mutable.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00226: Unable to determine the MDSContext while processing cached MDS content : [0]

Cause: An attempt was made to access an MDSContext but an MDSContext is not presently available to this thread.

Action: Check for logged diagnostic messages, clear the MDS cache and if the problem persists contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Runtime

MDS-00500: No metadata store is configured to save the document [0].

Cause: An attempt was made to save a document, when no writable store was configured.

Action: Provide a writable metadata store to save the document.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00501: Document [0] cannot be deleted because no metadata store is configured.

Cause: An attempt to delete a document failed because there was no writable store configured.

Action: To delete the document, provide a writable metadata store.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00503: The metadata path "[0]" does not contain any valid directories.

Cause: Either the metadata path was empty or directories on the metadata path did not exist.
Action: Ensure that the metadata path is not empty and that the directories on the metadata path exist.

Level: 1
Type: ERROR
Impact: Data

MDS-00504: failure to create document {0} because metadata store "[1]" is read-only
Cause: An attempt to create a document on a read-only metadata store failed.
Action: To create the document, provide a writable metadata store.

Level: 1
Type: ERROR
Impact: Data

MDS-00505: failure to save document {0} because metadata store "[1]" is read-only
Cause: An attempt to save a document to a read-only metadata store failed.
Action: To save the document, provide a writable metadata store.

Level: 1
Type: ERROR
Impact: Data

MDS-00506: failure to get child resources of package {0} because package does not exist in metadata store
Cause: Child resources for the package were not found because specified package did not exist in the metadata store.
Action: Verify that the package exists in the metadata store, and then retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00507: failure to delete document {0} because metadata store "[1]" is read-only
Cause: An attempt to delete a document from a read-only metadata store failed.
Action: To delete the document, provide a writable metadata store and retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00508: There is no content to be read for {0}.
Cause: An attempt was made to read empty metadata.
Action: Verify that the metadata has valid content, and then retry the operation.

Level: 1
Type: ERROR
Impact: Data
MDS-00509: failure to delete document {0} with file {1}
  Cause: An error occurred while the document was being deleted.
  Action: Verify that the document exists and then retry the operation, or provide a
document that exists in the store.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-00510: failure to read document {0} because it is not found in the metadata path "[1]"
  Cause: The document to be read was not found.
  Action: Verify that the metadata path is correct and that the document exists in
the metadata path.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-00511: failure to create document {0} at file {1}
  Cause: An error occurred while creating the document in the file store.
  Action: Retry the operation. Also, refer to the error messages that describe the
cause exception in the application logs for more information on the actual reason
for failure.

  Level: 1
  Type: ERROR
  Impact: Files

MDS-00512: failure to create document {0} because file {1} already exists
  Cause: An attempt was made to create a file that already existed in the metadata store.
  Action: Provide a different name for the file to be created, or delete the existing
file first, and then retry the operation.

  Level: 1
  Type: ERROR
  Impact: Files

MDS-00513: failure to create package {0} because directory {1} already exists
  Cause: An attempt to create a package failed because a directory by the same
name already existed.
  Action: Provide a different name for the package to be created and retry the
operation.

  Level: 1
  Type: ERROR
  Impact: Files

MDS-00514: failure to save document {0} to file {1}
  Cause: An error occurred while saving the document to a file.
**Action:** Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

**Level:** 1  
**Type:** ERROR  
**Impact:** Files

**MDS-00515: failure to create document {0} in the metadata repository**

**Cause:** An error occurred while the document was being created in the metadata repository.

**Action:** Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**MDS-00516: failure to create document {0} because it already exists in the metadata repository**

**Cause:** An error occurred while the document was being created in the metadata repository because the document already existed.

**Action:** Provide a different name or delete the existing document first, and then retry the operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**MDS-00517: failure to create package {0} because it already exists in the metadata repository**

**Cause:** An error occurred while the package was being created in the metadata repository because the package already existed.

**Action:** Provide a different package name or delete the existing package first, and then retry the operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**MDS-00518: failure to create package {0} in the metadata repository**

**Cause:** An error occurred while the package was being created in the metadata repository.

**Action:** Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data
MDS-00519: failure to delete document \{0\} from the metadata repository
  Cause: An error occurred while the document was being deleted from the metadata repository.
  Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-00520: failure to read document \{0\} because it is not in the metadata repository
  Cause: The document was not read because it did not exist in the metadata repository.
  Action: Verify that the document name is correct and that it exists in the metadata repository, and then retry the operation.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-00521: error while reading document \{0\} from metadata repository
  Cause: An error occurred while the document was being read from the metadata repository.
  Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-00522: failure to save document \{0\} to the metadata repository
  Cause: An error occurred while the document was being saved to the metadata repository.
  Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-00526: failure to generate SAX parsing events for document \{0\}
  Cause: An error occurred while parsing the XML document.
  Action: Verify that the XML document is well-formed. Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

  Level: 1
  Type: ERROR
Impact: Programmatic

MDS-00531: failure to write to "(0)" because output to "(1):" protocol is not supported
Cause: An attempt to write modified metadata to a URL failed because the protocol is not supported.
Action: Retry writing modified metadata to a supported protocol.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00533: Exception: {3} Attribute "(0)" with an invalid MDS reference "(1)" in document "(2)" is not stored as a typed dependency in the database repository.
Cause: An error occurred while adding a typed dependency from the specified attribute.
Action: Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Data

MDS-00534: Exception: {3} Sub-object {0} in document {2} has invalid value "(1)" for unique identifier; typed dependencies from this sub-object are not stored in the database repository.
Cause: An error occurred because the component had an invalid ID.
Action: Provide the correct ID value for the application metadata. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00535: cannot change TypeManager associated with a PManager after it is initialized
Cause: An attempt was made to associate TypeManager with PManager after it was initialized.
Action: Contact Oracle Support Services.
Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-00536: cannot change FileTypeManager associated with a PManager after it is initialized
Cause: An attempt was made to associate FileTypeManager with PManager after it was initialized.
Action: Contact Oracle Support Services.
Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-00537: unable to rename `{0}` to `{1}`

Cause: An error occurred during a rename operation.

Action: Retry the rename operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Data

MDS-00538: failure to rename document `{0}` because metadata store "`{1}`" is read-only

Cause: An error occurred during rename operation because the metadata store was configured as read-only.

Action: To rename a document, provide a store that can be written to, that is not read-only.

Level: 1
Type: ERROR
Impact: Data

MDS-00539: A document can be renamed only within its source store. The new name `{1}` in this rename operation does not map to the same store as the old name `{0}`.

Cause: An error occurred during a rename operation. An invalid new name for the rename operation caused the renamed document to be stored in another metadata store.

Action: Provide a new, valid document name that maps to the same metadata store that contains the original document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00541: SAX events cannot be generated for non-XML document `{0}`.

Cause: An attempt was made to generate SAX events for non-XML documents.

Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00547: The read operation is not supported for packages from Web content from the servlet context.

Cause: A read operation was attempted for packages from Web content, which is not supported.

Action: The read operation is not supported, therefore no action is required.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00550: Updates across multiple stores are not allowed in the same transaction.
Cause: An attempt was made to perform updates across multiple stores in the same transaction.
Action: Verify that the document is being saved to the same store on which it exists.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-00551: failure to delete package {0} because it is not empty
Cause: An attempt was made to delete a package that was not empty.
Action: Delete the contents of the package to be deleted first, and then retry the operation.
Level: 1

Type: ERROR
Impact: Data

MDS-00552: failure to delete package {0} with directory {1}
Cause: An error occurred while deleting the directory for the package.
Action: Ensure no files from the directory are opened in other applications and retry the operation. Also, refer to the error messages in the application logs for more information on the actual reason for failure.
Level: 1

Type: ERROR
Impact: Files

MDS-00554: Package {0} cannot be found in the specified store.
Cause: The requested operation was not completed because the package name that was supplied was invalid.
Action: Provide a valid package name and retry the operation.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-00555: The partitionName {0} is invalid.
Cause: The requested operation was not completed because the partition name that was supplied was invalid.
Action: Provide a valid partition name and retry the operation.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-00557: Resource {0} is already locked or is being modified.
**Cause:** An attempt was made to modify a document that was already being modified by another user.

**Action:** Retry modifying the document after the lock is released by the other users. Also, refer to the error messages in the application logs for more information on the actual reason for failure.

**Level:** 1  
**Type:** ERROR  
**Impact:** Session

**MDS-00558: The partitionName \{0\} is not available.**

**Cause:** No partition with that name existed.

**Action:** Provide a partition name that exists.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**MDS-00559: A partition with name \{0\} already exists.**

**Cause:** The name provided for creating a new partition was already in use by another partition.

**Action:** Provide a different name for the new partition.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**MDS-00560: The MDS repository is incompatible with the archive. The repository version is \{0\} whereas archive version is \{1\}.**

**Cause:** The MDS repository was not compatible with the archive provided.

**Action:** Upgrade the target MDS repository or use a compatible archive for the operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Upgrade

**MDS-00561: The create operation is not supported for metadata stores of type "\{0\}".**

**Cause:** An attempt was made to create a new document or package in a read-only metadata store.

**Action:** Reconfigure the application to use a writable metadata store.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-00562: The delete operation is not supported for metadata stores of type "\{0\}".**

**Cause:** An attempt was made to delete a document from a read-only metadata store.

**Action:** Reconfigure the application to use a writable metadata store.
Level: 1  
Type: ERROR  
Impact: Configuration  

MDS-00563: The save operation is not supported for metadata stores of type "{0}".
Cause: An attempt was made to save a document to a read-only metadata store.
Action: Reconfigure the application to use a writable metadata store.

Level: 1  
Type: ERROR  
Impact: Configuration  

MDS-00564: GUID feature is not supported for metadata stores of type "{0}".
Cause: An attempt was made to get a document by GUID from a metadata store that does not support GUIDs.
Action: Reconfigure the application to use a metadata store that supports GUIDs, such as DBMetadataStore.

Level: 1  
Type: ERROR  
Impact: Configuration  

MDS-00565: The rename operation is not supported for metadata stores of type "{0}".
Cause: An attempt was made to rename a document or package in a read-only store.
Action: Reconfigure the application to use a writable metadata store.

Level: 1  
Type: ERROR  
Impact: Configuration  

MDS-00566: The DOM content is NULL for {0}.
Cause: DOM document content provided was null.
Action: Provide valid DOM content and retry the operation.

Level: 1  
Type: ERROR  
Impact: Data  

MDS-00567: The metadata changes for document "{0}" cannot be written in the underlying store because read-only mode is enabled in the configuration.
Cause: An attempt to change metadata was made while changes were disabled for maintenance operations.
Action: Reconfigure the application to not specify read-only mode in the configuration and use a writable metadata store to persist metadata changes.

Level: 1  
Type: ERROR  
Impact: Configuration  

MDS-00568: MetadataStore initialization failure because "{0}" is invalid
Cause: The URL store mapping was invalid.
Action: Provide a valid URL store mapping.
Level: 1
Type: ERROR
Impact: Files

MDS-00569: unable to read document {0} from "[1]"
Cause: There was an error reading the document from the configured metadata store.
Action: Retry the operation. If the problem persists, verify that the document exists in the configured metadata store.
Level: 1
Type: ERROR
Impact: Data

MDS-00570: The name or content exceeds the MDS repository schema size for {0}.
Cause: The metadata name or the content exceeded the schema size.
Action: Reduce the length of the metadata name or content, and then retry the operation. Refer to the documentation for the allowed sizes for names and content.
Level: 1
Type: ERROR
Impact: Data

MDS-00571: The bean content is NULL for {0}.
Cause: The bean content was null.
Action: Provide valid bean content, and then retry the operation.
Level: 1
Type: ERROR
Impact: Data

MDS-00572: failure to get the ConnectionManager because the DBContext is null
Cause: The DBContext value is null. Also, using any MetadataStore, PManager, or MDSInstance that has already been released might lead to this error.
Action: Do not use any metadata store, PManager, or MDSInstance that is already released.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00573: The metadata store is already associated with a PManager.
Cause: The PConfig provided for creating the PManager or MDSInstance was already used by another PManager or MDSInstance.
Action: Provide a new PConfig when creating the PManager or MDSInstance.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-00574: The document {0} does not exist in the configured metadata store.
Cause: The document being locked did not exist in the configured metadata store.
Action: Ensure that the document to be locked exists, and that the name of the document is correct.

Level: 1
Type: ERROR
Impact: Data

MDS-00575: failure to acquire write lock for {0}
Cause: An attempt to acquire a write lock for a document failed.
Action: Refer to the cause exception message in application logs for details on the actual cause of the failure.

Level: 1
Type: ERROR
Impact: Data

MDS-00576: failure to process {0} because metadata store "(1)" is read-only
Cause: An attempt was made to modify metadata in a read-only metadata store.
Action: Provide a writable metadata store to allow modification of the document.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00577: Could not acquire read/write lock for {0} within the default waiting time interval
Cause: Read/Write lock could not be obtained for a file within the waiting time interval.
Action: Try the operation again after some time.

Level: 1
Type: ERROR
Impact: Files

MDS-00578: Failed to process document {0} due to a critical error writing to the repository
Cause: A critical error occurred while the metadata document was being written to the repository.
Action: Contact the application administrator with cause exception message details to resolve the repository error.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00579: The document {0} does not have version {1} in the repository.
Cause: Specified version does not exist for the document.
Action: Provide an existing version for the document.

Level: 1
Type: ERROR
Impact: Data

MDS-00580: operation failed for {0} because no metadata-store was defined in the configuration for metadata-store-usage {0}.
Cause: incomplete configuration, no metadata-store was defined for the metadata-store-usage
Action: Define the metadataStore for the empty metadata-store-usage.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00581: error deleting partition {0} in file repository {1}
Cause: The directory represented by the file repository or partition is read only.
Action: Verify that the metadata path to the repository and partition exist and are writable.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00582: The MetadataStore {0} is writable but does override getMetadataStoreCommunicator() method.
Cause: Configuration used a MetadataStore that was writable but not supporting MetadataStoreCommunicator interface.
Action: Override getMetadataStoreCommunicator() in the MetadataStore class to return an appropriate MetadataStoreCommunicator instance.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00583: Could not release read/write lock for {0} because the lock was not found.
Cause: Read/Write lock could not be released because it was already removed from the lock cache.
Action: Contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Files

MDS-00584: The MDS repository's database platform is different that of the archive. The repository's database platform is {1} whereas the archive's platform is {0}.
Cause: The MDS repository platform was not compatible with the archive provided.
Action: Use a platform compatible archive for the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00585: Failure to create deployment lineage because metadata store "(0)" is read-only
Cause: An attempt was made to create deployment lineage in a read-only metadata store. Deployment lineage in repository represents Application name and MAR module name.
Action: Configure a metadata store that supports deployment management, typically a DBMetadataStore.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00586: ArchiveMetadataStore is restricted to be used with MDS Transfer operation only. Reading or writing files in ArchiveMetadataStore is not supported outside of transfer.
Cause: An attempt was made to read or write files in ArchiveMetadataStore outside of transfer.
Action: ArchiveMetadataStore is not supported outside of transfer. Either use this ArchiveMetadataStore for MDS transfer operation or use some other MetadataStore to store your files.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00588: Cannot replace the original archive file {0} with the final archive file {1} because the final archive file could not be renamed to {0}.
Cause: The final archive file could not be renamed to the original archive file name.
Action: Look at the cause exception for more details and take corresponding actions.

Level: 1
Type: ERROR
Impact: Data

MDS-00589: Error occurred while creating the final archive file {0}.
Cause: Some exception occurred while creating the final archive.
Action: Look at the cause exception for more details and take corresponding actions.

Level: 1
Type: ERROR
Impact: Data
MDS-00590: Error occurred while opening or closing the input/output stream for archive file {0}.
Cause: Some exception occurred while opening or closing the input/output stream for archive file.
Action: Look at the cause exception for more details and take corresponding actions.
Level: 1
Type: ERROR
Impact: Data

MDS-00591: "{0}" operation is not supported in ArchiveMetadataStore.
Cause: An unsupported operation has been attempted in ArchiveMetadataStore.
Action: Look at the ArchiveMetadataStore javadoc for supported operations.
Level: 1
Type: ERROR
Impact: Data

MDS-00592: Error occurred while initializing FileMetadataStore connection for the temporary directory.
Cause: An error occurred while initializing the FileMetadataStore connection for the temporary directory.
Action: Look at the cause exception for more details and take corresponding actions.
Level: 1
Type: ERROR
Impact: Data

MDS-00593: Unable to read the file {0} from archive {1}.
Cause: Some I/O Exception occurred while reading the given file from archive.
Action: Look at the cause exception for more details and take corresponding actions.
Level: 1
Type: ERROR
Impact: Data

MDS-00594: Unable to write the file {0} to archive {1}.
Cause: Some I/O Exception occurred while writing the given file to archive.
Action: Look at the cause exception for more details and take corresponding actions.
Level: 1
Type: ERROR
Impact: Data

MDS-00595: The parent directory {0} given in archive file path does not exist. Cannot create ArchiveMetadataStore for the archive file {1}.
Cause: The parent directory mentioned in archive file path does not exist.
Action: Provide valid parent directory in archive file path to create ArchiveMetadataStore.

Level: 1
Type: ERROR
Impact: Data

MDS-00596: Failure to read document {0} because it is not found in "(1)"
Cause: The document to be read was not found.
Action: Verify that the document exists in the ArchiveMetadataStore before reading the document.

Level: 1
Type: ERROR
Impact: Data

MDS-00597: Failure to open the archive file {0}. Cannot create ArchiveMetadataStore for the archive file {0}.
Cause: Could not open the given archive file.
Action: Try creating ArchiveMetadata store with a valid archive file.

Level: 1
Type: ERROR
Impact: Data

MDS-00598: Cannot create an intermediary archive during export to the archive file {0}.
Cause: Either the intermediary archive file could not be created in the default temporary-file directory or an I/O error occurred.
Action: Look at the cause exception for more details and take action accordingly.

Level: 1
Type: ERROR
Impact: Data

MDS-00599: Cannot obtain a connection to the Archive Metadata Store for archive file {0}.
Cause: There was a problem obtaining a connection to the Archive Metadata Store.
Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-00601: The XLIFF document has invalid target language {0}.
Cause: The target language specified was either null or empty.
Action: Specify a valid target language and retry the operation.
Level: 1
Type: ERROR
Impact: Data

MDS-00703: The name {0} is not a valid name under package {1} because {2} resource not considered child of the package.
    
    Cause: A specified child resource was not a child of the package.
    
    Action: Specify a valid child resource name, and then retry the operation.

Level: 1
Type: ERROR
Impact: Data

MDS-00704: invalid value {0} for property {1} on component {2}
    
    Cause: An invalid property value was provided.
    
    Action: Provide a valid property value and retry.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00771: A component with {0} "{1}" already exists.
    
    Cause: The specified component already existed.
    
    Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Data

MDS-00907: unable to save document "{0}" because either a document or package of the same name already exists
    
    Cause: A document or package with the same name already existed in the repository, perhaps because it was just created by another user.
    
    Action: Retry the operation. If necessary, choose another name for the object being saved.

Level: 1
Type: ERROR
Impact: Data

MDS-00908: unable to create package "{0}" because a document or package of the same name already exists
    
    Cause: A document or package with the same name already existed in the repository, perhaps because it was just created by another user.
    
    Action: Retry the operation. If necessary choose another name for the object being saved.

Level: 1
Type: ERROR
Impact: Data

MDS-00910: unable to save the document because of corrupt MDS database sequences or other internal errors.
Caused: The database sequence used for generating the unique document ID was corrupt or some other internal errors caused violation of unique constraints.
Action: Retry the operation after deploying metadata to another MDS database repository partition. If that still fails, contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Data

MDS-00911: Document with name "{0}" and version {1} [Low CN={2}, High CN={3}] does not exist in the repository.
Caused: The document was not found in the MDS repository.
Action: Specify a correct name for the document and retry the operation. Check if the document is deleted by another user.

Level: 1
Type: ERROR
Impact: Data

MDS-00912: MDS repository is incompatible with the middle tier. Repository version "{0}" is older than minimum repository version "{1}" required.
Caused: The MDS repository was older than minimum version required by the middle tier.
Action: Upgrade the MDS repository to the required version.

Level: 1
Type: ERROR
Impact: Upgrade

MDS-00913: MDS repository is incompatible with the middle tier. MDS version ",{0}" is older than minimum MDS version ",{1}".
Caused: The MDS version was older than the minimum required version for using the MDS repository.
Action: Upgrade the MDS library to the required version.

Level: 1
Type: ERROR
Impact: Upgrade

MDS-00914: unable to save document "{0}" because either an already deleted document or package with conflicting name or type already exists
Caused: A document or package with the same name or a parent package of incorrect type already existed in the repository as a deleted version.
Action: Delete the conflicting resource from repository or check if the new resource is invalid. If necessary, choose another name for the object being saved.

Level: 1
Type: ERROR
MDS-00915: MDS repository is incompatible with the middle tier for dumping or restoring metadata.

**Cause:** The MDS repository was older than minimum version required by the middle tier to dump or restore metadata.

**Action:** Retry the operation after upgrading the MDS repository to newer version or use compatible middle tier to perform the operation.

**Level:** 1

**Type:** ERROR

**Impact:** Upgrade

MDS-00916: MetadataStore configured for {0} does not support deployment management.

**Cause:** The metadata store configured for the resource did not support deployment management.

**Action:** Deployment management is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-00918: Connection details for the MDS repository are incomplete. The values for "{0}" are invalid

**Cause:** The MDS repository connection details were invalid or missing.

**Action:** Specify correct values for the MDS repository details in the configuration and retry the operation.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-00919: Internal error: The database context for this repository appears to be corrupt.

**Cause:** The database context was invalid.

**Action:** Verify that the repository details are correct in the configuration.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-00922: The ConnectionManager "{0}" cannot be instantiated.

**Cause:** There was an error instantiating the ConnectionManager class.

**Action:** Contact Oracle Support Services.

**Level:** 1

**Type:** INCIDENT_ERROR

**Impact:** Configuration
MDS-00923: Unable to create sandbox "[0]"

Cause: An error occurred during creation of sandbox.
Action: Look in the error message log for the exact reason for the failure.

Level: 1
Type: ERROR
Impact: Data

Cause: An internal MDS document (one in package mdssys) was found with an invalid name, or an attempt was made to create a name object with such an invalid name.
Action: Avoid using package or document names containing path element "mdssys" which is reserved for internal MDS use. If necessary, remove such invalid documents from the metadata store.

Level: 1
Type: ERROR
Impact: Data

MDS-00929: unable to look up name "[0]" in JNDI context

Cause: The implementation class to use for initial context was not found.
Action: Verify that environment properties are configured using system properties or application resources files.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00930: The JNDI location details for the registered datasource are incomplete.

Cause: JNDI location details were found to be incomplete.
Action: Provide complete JNDI location information in the configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-00931: The database version is {0}.{1}, but MDS requires at least {2}.{3}.

Cause: The database version is older than the minimum database version required for hosting MDS repository.
Action: Upgrade the database to the minimum required version. Contact the database administrator for assistance.

Level: 1
Type: ERROR
Impact: Upgrade

MDS-00932: unknown database vendor {0}

Cause: The database vendor could not be identified.
Action: Verify that the MDS repository is hosted on supported database vendors.
Level: 1  
Type: ERROR  
Impact: Installation

**MDS-00933: cannot create data source using URL "[0]"**

**Cause:** An error occurred while creating the data source using the specified URL.

**Action:** Verify that the URL specified is correct and retry the operation.

Level: 1  
Type: ERROR  
Impact: Configuration

**MDS-00934: XDB is not supported on database platform [0].**

**Cause:** An attempt was made to store XML metadata in a non-XDB database.

**Action:** Verify that the correct MDS repository is being used.

Level: 1  
Type: ERROR  
Impact: Programmatic

**MDS-00935: Unable to complete operation even after maximum connection retries ([0]).**

**Cause:** An error occurred while performing operation.

**Action:** Ensure that the database is running. Retry the operation later.

Level: 1  
Type: ERROR  
Impact: High Availability

**MDS-00936: Fast Connection Failover is not supported on the underlying database connection ([0]).**

**Cause:** The underlying database connection did not support fast connection failover, and retry-connection was set to true in either the config file, or programmatically.

**Action:** Either stop and then restart the database connection and configure it to allow fast connection failover, or do not attempt to set retry-connection to true.

Level: 1  
Type: ERROR  
Impact: High Availability

**MDS-00937: A local transaction operation like commit or rollback cannot be used in a global transaction on connection "[0]".**

**Cause:** The database connection was configured for global transactions, but MDS was not configured to support global transactions.

**Action:** Reconfigure the database connection to use local transactions. Change "tx-level" attribute on the MDS datasource to "local".

Level: 1  
Type: ERROR
MDS-00938: Unable to get an ADF library class loader

**Cause:** MDS expects to retrieve a resource from an ADF library, but is unable to obtain an ADF library classloader.

**Action:** Consider whether the resource should be repackaged in an ADF library rather than an ordinary jar.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-01059: document with the name {0} missing in the source metadata store

**Cause:** The document to be transferred did not exist in the source metadata store.

**Action:** Verify that the document name is correct, and that it exists in the source metadata store.

**Level:** 1

**Type:** ERROR

**Impact:** Data

MDS-01061: Listener {0} cannot be instantiated.

**Cause:** The listener class did not exist.

**Action:** Verify that the name of the listener class is correct. Ensure that the class is available on the class path.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-01104: finding no documents for processing that match the pattern provided

**Cause:** No documents were found on the source metadata store that matched the pattern provided, or that matched the document name.

**Action:** Provide another pattern or document name, or provide another metadata store in which to look for the documents.

**Level:** 1

**Type:** ERROR

**Impact:** Data

MDS-01105: invalid label {0}

**Cause:** The label specified for the source metadata store did not exist.

**Action:** Verify that the label name is correct, or provide a label that exists in the source metadata store.

**Level:** 1

**Type:** ERROR

**Impact:** Data

MDS-01106: The TransferTypeRestriction {0} cannot be associated with given TransferType {1}. 

**Cause:**

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:**
**Cause:** The given TransferTypeRestriction cannot be associated with the specified TransferType.

**Action:** Ensure that given TransferTypeRestriction is valid for the specified TransferType.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**MDS-01107: Post transfer label cannot be created in target store.**

**Cause:** Post transfer label cannot be created in the target store. Examine the cause exception messages to find the root cause of it.

**Action:** Examine any accompanying messages to decide if further action is required.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**MDS-01108: TransferType cannot be null for ExtendedTransferType.**

**Cause:** TransferType provided to create ExtendedTransferType was null.

**Action:** Provide valid TransferType to create ExtendedTransferType.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**MDS-01109: The target archive configured in ArchiveMetadataStore already exists. Cannot export the documents into an existing archive file.**

**Cause:** The target archive already exists. Exporting the documents into an existing archive is not allowed.

**Action:** Export the documents into a non existing archive file.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**MDS-01110: Sandbox export operation allowed only from a database metadata store to an archive metadata store.**

**Cause:** Either source metadata store is not a database or the target metadata store is not an archive in sandbox export operation.

**Action:** Configure source metadata store to be a database and target metadata store to be an archive in sandbox export operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01111: Sandbox import operation allowed only from Archive Metadata Store to a Database Metadata store.**
Cause: Either source metadata store is not an archive metadata store or the target metadata store is not a database in sandbox import operation.

Action: Configure source metadata store to be an archive metadata store and target metadata store to be a database in sandbox import operation.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01112: Transfer unit list in a Sandbox export/import operation should have at least one transfer unit.

Cause: Transfer unit list in Sandbox export/import operation empty.

Action: Ensure that there is at least one transfer unit to be transferred in sandbox export/import operation.

Level: 1
Type: ERROR
Impact: Data

MDS-01113: Sandbox metadata file required for import to a new sandbox operation.

Cause: Sandbox metadata file missing in source Archive metadata store in import to a new sandbox operation.

Action: Import to a new sandbox only from an archive store whose contents were exported from a sandbox and contain sandbox metadata document.

Level: 1
Type: ERROR
Impact: Data

MDS-01114: Sandbox with same name as the one imported in a sandbox import operation exists on the target metadata store.

Cause: Sandbox with same name already exists on the target metadata store and the flag to force creation of sandbox is not set to true.

Action: Pass true for forceSBCreation to TransferParams.createForSandboxImport() or destroy sandbox already existing with same name on the target metadata store in sandbox import operation.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01115: Source sandbox in a sandbox export operation does not contain metadata.

Cause: Source sandbox in export operation was not created with metadata.

Action: Export from a Sandbox that was created with metadata.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01116: Existing target sandbox in import operation does not contain metadata.
Cause: Target sandbox in an import into an existing sandbox operation was not created with metadata.
Action: Import into an existing sandbox that was created with metadata.

Level: 1  
Type: ERROR  
Impact: Programmatic

MDS-01117: Sandbox archive imported into an existing sandbox.
Cause: The archive imported into an existing sandbox contains sandbox metadata.
Action: Import only regular archives (that do not contain sandbox metadata) into an existing sandbox.

Level: 1  
Type: ERROR  
Impact: Programmatic

MDS-01118: Sandbox export operation not supported because the source MDS database repository is of older version that does not support this feature.
Cause: Sandbox metadata is needed to transfer documents from sandbox. Source store being used does not support storing metadata for sandbox.
Action: Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later.

Level: 1  
Type: ERROR  
Impact: Configuration

MDS-01119: Sandbox import operation not supported because the target MDS database repository is of older version that does not support this feature.
Cause: Sandbox metadata is needed to transfer documents from sandbox. But target store being used does not support storing metadata for sandbox.
Action: Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later.

Level: 1  
Type: ERROR  
Impact: Configuration

MDS-01120: Sandbox transfer unit list creation not supported because the source MDS database repository is of older version that does not support this feature.
Cause: Sandbox metadata is needed to transfer documents from sandbox. Source store being used does not support storing metadata for sandbox.
Action: Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later.

Level: 1  
Type: ERROR  
Impact: Configuration
MDS-01121: Document "mds-transfer-config.xml" cannot be read by MDSTransfer.

Cause: The /meta-inf/mds-transfer-config.xml document cannot be read from source store. Refer to cause exception for more information on the actual reason for failure.

Action: Look for messages that describe the cause exception, and then take the appropriate action.

Level: 1
Type: ERROR
Impact: Data

MDS-01122: Metadata Object Name ":[0]" specified in the mds-transfer-config.xml to preserve user updated documents in target repository is not a valid metadata object name.

Cause: Metadata object name specified in /meta-inf/mds-transfer-config.xml to preserve user updated documents in target repository is not a valid metadata object name.

Action: Make sure the document name specified in mds-transfer-config.xml is a valid metadata object name but not a special document name.

Level: 1
Type: ERROR
Impact: Data

MDS-01123: The metadata path ":[0]" specified in the mds-transfer-config.xml to preserve user updated documents in target repository is not a valid metadata path.

Cause: The metadata path specified in /meta-inf/mds-transfer-config.xml to preserve the user updated documents in target repository is not a valid metadata path.

Action: Make sure the metadata path specified in mds-transfer-config.xml is a valid metadata path.

Level: 1
Type: ERROR
Impact: Data

MDS-01150: Reference is null or empty.

Cause: A reference value was null or empty.

Action: Use a valid reference value that is not empty or null.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01151: Id/LocationPath reference is null or missing.

Cause: An Id/LocationPath reference value was null or empty.

Action: Use a valid Id/LocationPath reference value that is not empty or null.

Level: 1
Type: ERROR
**Impact:** Programmatic

**MDS-01153:** invalid LocationPath expression "(0)"

**Cause:** The LocationPath expression was invalid.

**Action:** Use a valid LocationPath format. The LocationPath expression should follow the format "/text()" or "/text()[x]", where 'x' is the index of "text block".

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01154:** invalid LocationPath expression "(0)"

**Cause:** The node index in the LocationPath expression was invalid.

**Action:** Change the node index in the LocationPath expression to a number greater than or equal to 1.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01158:** Expecting a base document. Reference "(0)" is a special document.

**Cause:** A base document was expected, but the reference was a special document.

**Action:** Use a valid base document.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01159:** Expecting absolute document reference. Reference "(0)" has local element reference portion.

**Cause:** The supplied reference was not the expected type.

**Action:** Ensure the reference is of the expected type.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01160:** Expecting absolute document reference. Reference "(0)" is a relative reference to the document.

**Cause:** The supplied reference was not the expected type.

**Action:** Ensure the reference is of the expected type.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01161:** Reference "(0)" has an invalid character "(1)".

**Cause:** The supplied reference did not follow the MDS naming standard.

**Action:** Use valid characters for the reference.

**Level:** 1
Type: ERROR
Impact: Programmatic

MDS-01162: Reference "{0}" has an invalid XML attribute character.
Cause: The supplied reference did not follow the MDS naming standard.
Action: Use valid characters for the reference.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-01163: invalid reference "{0}"
Cause: The supplied reference did not follow the MDS naming standard.
Action: Ensure that the reference follows the MDS naming standard.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-01164: invalid reference "{0}" for a translation document
Cause: The supplied reference did not have the expected document extension (.xlf).
Action: Use the correct extension, .xlf, for the translation document.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-01165: invalid reference "{0}" for a customization document
Cause: The supplied reference did not have the expected document extension (.xml).
Action: Use the correct extension, .xml, for the customization document.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-01166: invalid reference "{0}" for a metadata extension document
Cause: The supplied reference did not have the expected document extension (.rdf).
Action: Use the correct extension, .rdf, for the metadata extension document.
Level: 1

Type: ERROR
Impact: Programmatic

MDS-01167: There is no namespace declaration for the prefix "{1}" used in LocationPath expression "{0}".
Cause: The LocationPath expression was incomplete.
Action: Use a valid LocationPath format.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01168: Partition name "(0)" starts or ends with character "(1)". Partition name cannot contain leading or trailing spaces, ".", "."
Cause: The supplied partition name contained leading or trailing spaces, ".", ".".
Action: Ensure that the partition name follows the MDS naming standard for partitions.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01169: Partition name "(0)" has an invalid character "(1)".
Cause: The supplied partition name did not follow the MDS naming standard.
Action: Use valid characters for the partition name.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01170: Partition name is null or empty.
Cause: Partition name value was null or empty.
Action: Use a valid partition name that is not empty or null.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01171: The ID prefix generated by concatenating the layer name "(0)" and layer value "(1)" is not a valid MDS ID.
Cause: The ID prefix generated by concatenating the layer name with layer value did not follow the MDS ID naming standard.
Action: Ensure that the ID prefix generated by concatenating the layer name with layer value follows the MDS ID naming standard.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01200: This operation is not supported.
Cause: An MDS query operation was attempted, but this particular operation is not supported.
Action: Note the stack backtrace and context of the operation, and contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic
MDS-01201: An invalid parameter cannot be used when constructing a query condition.
Cause: An invalid parameter was passed to the class ConditionFactory.
Action: Note the stack backtrace and context of the operation, and contact Oracle Support Services.
Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-01205: A SQL error is occurring when performing the query: "{0}" with binds {1}.
Cause: An MDS query on a database store led to a SQL error.
Action: Note the stack backtrace and context of the operation, including the reported SQL query and error, and contact Oracle Support Services.
Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-01206: The array size for the query must be greater than zero.
Cause: An MDS query specified a fetch unit size that was not positive.
Action: Note the stack backtrace and context of the operation and contact Oracle Support Services.
Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-01207: The namespace mapping for the prefix "{0}" specified in the location path, is missing.
Cause: During XPath evaluation, the namespace prefix was used, but the prefix was not mapped to a namespace.
Action: Note the stack backtrace and context of the operation and contact Oracle Support Services.
Level: 1
Type: INCIDENT_ERROR
Impact: Configuration

MDS-01208: MDS query condition produces more than {0} characters of SQL where clause.
Cause: An MDS query condition was so large that it would produce a very large SQL statement.
Action: Note the stack backtrace and context of the operation, and contact Oracle Support Services.
Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic
MDS-01209: The exclusion CustLayerFilter for layer {0} cannot contain another exclusion CustLayerFilter.
   **Cause:** An exclusion CustLayerFilter is nested in another exclusion CustLayerFilter.
   **Action:** Do not include an exclusion CustLayerFilter inside another exclusion CustLayerFilter.

   **Level:** 1
   **Type:** ERROR
   **Impact:** Programmatic

MDS-01250: The file path "{0}" does not exist.
   **Cause:** An invalid path was provided.
   **Action:** Retry the operation with a valid file path.

   **Level:** 1
   **Type:** ERROR
   **Impact:** Files

MDS-01251: The parameter file {0} has no namespace on the document element.
   **Cause:** A namespace was missing from the parameter file provided.
   **Action:** Provide a parameter file with valid namespace information.

   **Level:** 1
   **Type:** ERROR
   **Impact:** Data

MDS-01252: The parameter file {0} must have either {1} or {2} definition.
   **Cause:** No source stores or target stores information were provided in the parameter file.
   **Action:** Check the parameter file to have source and target store information and retry.

   **Level:** 1
   **Type:** ERROR
   **Impact:** Data

MDS-01253: The parameter file {0} must not have both {1} and {2} definitions.
   **Cause:** An attempt was made to transfer from source directory to target directory. Both source and target as directories is not supported.
   **Action:** Provide correct source and target definition. Either source or target should be a metadata store.

   **Level:** 1
   **Type:** ERROR
   **Impact:** Data

MDS-01254: The parameter file {0} contains same store definition for sourceStore and targetStore.
   **Cause:** An attempt was made to transfer from and to the same store. The definition for sourceStore cannot be the same as the definition for targetStore.
**Action:** Provide correct source and target information. Change either source or target store definition.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-01255: The property {0} has not been supplied.  
**Cause:** The required property was missing from the parameter file.  
**Action:** Check the parameter file and supply the required property. Refer to the MDS documentation for the correct syntax. A sample parameter file is also part of documentation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-01258: The value {0} for property {1} is invalid.  
**Cause:** An invalid property value was provided in the parameter file.  
**Action:** Provide a valid property value. Refer to the MDS documentation for the correct syntax. A sample parameter file is also part of documentation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-01259: The metadata store "{0}" cannot be instantiated.  
**Cause:** An error occurred during the instantiation of the class for the metadata store.  
**Action:** Verify that correct values are provided in the parameter file. Refer to the error messages in application logs that describe the cause exception for more information on the actual reason for failure.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-01260: failure to process command-line arguments  
**Cause:** Invalid command-line parameters were provided.  
**Action:** Provide valid command-line parameters, and retry the operation. Refer to the MDS documentation for syntax of the tool parameters, or run the tool without parameters in order to get the Help message.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-01262: failure of transfer operation on a read-only target metadata store  
**Cause:** The target metadata store used for transfer was read-only, for example a classpath store.  
**Action:** Provide a writable target metadata store.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01263: operation failure on the resource {0} because source metadata store is read-only
Cause: An attempt was made to delete, create, update or get a mutable metadata object from a read-only source metadata store.
Action: Provide a writable source metadata store.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01264: The given element must contain either "customization" or "translation" configuration.
Cause: A customization or a translation configuration was missing for an element.
Action: Examine the transfer parameter file for valid MDS configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01265: Invalid parameter file {0}. Reason: <{1}:{2}> {3}
Cause: Parameter file provided was not valid.
Action: Provide a valid parameter file. Refer to the MDS documentation for the correct syntax. A sample parameter file is also part of documentation. Refer to sample parameter for correct syntax.

Level: 1
Type: ERROR
Impact: Files

MDS-01266: The associated customization document is missing for a given customization class {0} for the given document name {1}.
Cause: The associated customization document for the given customization class did not exist.
Action: If the associated customization document was to be transferred, verify that it exists. Otherwise, no action is required.

Level: 1
Type: ERROR
Impact: Data

MDS-01267: The associated translation document is not found for a given locale {0} for the given document name {1}.
Cause: Associated translation document did not exist for the given locale.
Action: If the associated translation document was expected to be transferred, verify if it exists, otherwise, no action required.

Level: 1
Type: ERROR
Impact: Data

MDS-01268: The associated extended metadata document for the given document name {0} is missing.
Cause: No associated extended metadata document for the given document name existed.
Action: If the document was to be transferred, verify that the document exists. Otherwise, no action is required.
Level: 1
Type: ERROR
Impact: Data

MDS-01270: Opening and closing parentheses do not match.
Cause: Either an opening or closing parentheses was missing.
Action: Check and correct the namespace mappings provided. Each opening parentheses should have an equivalent closing parentheses and vice versa.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01271: Cannot get the dependency registry
Cause: An error occurred while getting the dependency registry.
Action: Retry the operation. If the problem persists, look for messages that describe the cause exception for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01272: unable to read mds-webapp-config.xml file
Cause: The mds-webapp-config.xml file was invalid.
Action: Confirm that the mds-webapp-config.xml file for the application is well formed, and valid.
Level: 1
Type: ERROR
Impact: Files

MDS-01273: The operation on the resource {0} failed because source metadata store mapped to the namespace {1} is read only.
Cause: An attempt was made to delete, create, update or get a mutable metadata object from a readonly source metadata store.
Action: Provide a writable source metadata store.
Level: 1
Type: ERROR
Impact: Configuration
MDS-01301: Element "[1]", namespace "[0]" is not a valid child under parent "[3]", namespace "[2]".
   Cause: An attempt was made to add, insert or replace a child element of the wrong type.
   Action: Check the schema definition and ensure that the child element is the correct type.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01302: failure to load schema file "[0]"
   Cause: An exception occurred in the XMLIF layer during processing of the schema definitions.
   Action: Look for messages that describe the cause exception, and then take the appropriate action.
   Level: 1
   Type: ERROR
   Impact: Data

MDS-01303: failure to register grammar from schema file "[0]"
   Cause: An exception occurred in the XMLIF layer during addition of schema definitions.
   Action: Look for messages that describe the cause exception, and then take the appropriate action.
   Level: 1
   Type: ERROR
   Impact: Data

MDS-01305: failure to locate schema file "[0]".
   Cause: The schema definition file was not found.
   Action: Verify that the schema file name is correct, and that it is in the correct location.
   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-01306: Grammar from a Web application can be added only once.
   Cause: There were multiple method calls to add grammar from a web application.
   Action: Verify that a grammar definition has already been added for the given MDSInstance and ServletContext. If it has then remove the calls to add it multiple times.
   Level: 1
   Type: ERROR
   Impact: Configuration

MDS-01307: no schema files for processing
Cause: No schema files were found against which beans can be generated.
Action: Pass an existing schema file to the bean generator.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01308: Event "{0}" is not supported.
Cause: An attempt was made to use event types that are not supported for the
selected content model.
Action: Use only the event types that are allowed for the selected content model.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01309: ContentModelPipeline is empty.
Cause: The contentModelPipeline contained an empty or null builder list.
Action: A list of one or more valid builders must be available in the
ContentModelPipeline.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01310: Invalid ContentModelPipeline. Missing {0}.
Cause: The expected builder was not available in builder list of the
ContentModelPipeline.
Action: Valid builders must be supplied to the ContentModelPipeline.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01311: The DOM tree does not support the DOM event model.
Cause: This DOM Document did not implement EventTarget interface.
Action: Verify whether the Oracle XML Developer's Kit is used.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01312: Change-list transaction state is invalid.
Cause: The current change-list transaction state is invalid for the customization
operation performed.
Action: Ensure Change-list to be in valid transaction state to perform the
necessary customization operation.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01313: The argument for document cannot be null.
  Cause: The argument for DocumentName was null.
  Action: Provide a valid DocumentName.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-01314: TypeAnnotationProvider cannot be null.
  Cause: The argument for TypeAnnotationProvider was null.
  Action: Provide a valid TypeAnnotationProvider.

  Level: 1
  Type: ERROR
  Impact: Data

MDS-01316: Support for XPath is not implemented yet.
  Cause: Support for XPath has not been implemented yet.
  Action: Provide a valid Configurable ID.

  Level: 1
  Type: ERROR
  Impact: Configuration

MDS-01319: JAXP support is not available. Falling back to using Oracle XML Developer's Kit for parsing the document {0}.
  Cause: JAXP support was not available.
  Action: None.

  Level: 1
  Type: ERROR
  Impact: Configuration

MDS-01320: Modifying the prefix declaration for [0] from "[1]" to "[2]" in document [3] through customizations is not supported.
  Cause: An attempt was made to change an existing prefix declaration.
  Action: Avoid attempts to change existing prefix declarations.

  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-01321: Node type should be one of ImmutableModelNode.ELEMENT or ImmutableModelNode.TEXT or ImmutableModelNode.CDATA.
  Cause: The node was not of the type ImmutableModelNode.ELEMENT or ImmutableModelNode.TEXT or ImmutableModelNode.CDATA.
  Action: Ensure the node type is one of the following types:
  ImmutableModelNode.ELEMENT or ImmutableModelNode.TEXT or ImmutableModelNode.CDATA.
Level: 1
Type: ERROR
Impact: Data
MDS-01322: Value "{0}" does not satisfy "{1}" type.
Cause: The data type conversion failed.
Action: Verify that the expected XSD built-in simple data type and the passed-in string value are convertible.

Level: 1
Type: ERROR
Impact: Data
MDS-01323: Value "{0}" has an incorrect number of characters for a base64Binary.
Cause: The value did not represent a valid Base64Binary.
Action: Verify that the input value is valid.

Level: 1
Type: ERROR
Impact: Data
MDS-01324: Unknown XML schema built-in type "{0}"
Cause: An attempt was made to use an unknown XML schema built-in type.
Action: Use only valid XML schema built-in types.

Level: 1
Type: ERROR
Impact: Data
MDS-01325: unable to load type definition "{0}"
Cause: Could not load this type definition because the specified location did not exist.
Action: Ensure that the specified location for the type definition exists.

Level: 1
Type: ERROR
Impact: Configuration
MDS-01326: Loading of type definition from element "{0}" is not supported.
Cause: An attempt was made to load a type definition from the specified element that is not supported in the MDS configuration.
Action: Examine the schema definition to ensure that the entry specified in type definition is correct.

Level: 1
Type: ERROR
Impact: Configuration
MDS-01327: unable to load data from "{0}" into {1}
Cause: An error occurred while loading the content of this configuration element.
Action: Examine the schema definition to ensure that the content of this configuration element is correct.

Level: 1
Type: ERROR
Impact: Configuration

**MDS-01328: unable to load element "0" into 1**

*Cause:* An error occurred while loading this configuration element.
*Action:* Examine the schema definition to ensure this configuration element is correctly specified in the MDS configuration.

Level: 1
Type: ERROR
Impact: Configuration

**MDS-01329: unable to load element "0"**

*Cause:* An error occurred while loading this configuration element.
*Action:* Examine the schema definition to ensure this configuration element is correctly specified in the MDS configuration.

Level: 1
Type: ERROR
Impact: Configuration

**MDS-01330: unable to load MDS configuration document**

*Cause:* An I/O or parsing error occurred while loading the MDS configuration document.
*Action:* Verify that the URL is correct, and ensure that the document contains valid MDS configuration information.

Level: 1
Type: ERROR
Impact: Files

**MDS-01331: unable to load MDS configuration document "0"**

*Cause:* An error occurred in loading the content of MDS configuration document.
*Action:* Verify that the URL is correct, and ensure that the document contains valid MDS configuration information.

Level: 1
Type: ERROR
Impact: Files

**MDS-01332: Class 0 is not a subclass or implementation of 1.**

*Cause:* The class specified in the configuration information did not extend the required class, or implement the required interface.
*Action:* Ensure that the class specified in the configuration information extends the correct class, or implements the correct interface.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01333: missing element "{0}"
Cause: This element was missing from the MDS configuration information.
Action: Ensure that the element is specified in the configuration information.
Level: 1

Type: ERROR
Impact: Configuration

MDS-01334: missing element "{0}" in document "{1}"
Cause: This element was missing from the MDS configuration information.
Action: Ensure that this element is specified in the configuration document.
Level: 1

Type: ERROR
Impact: Configuration

MDS-01335: namespace "{0}" mapped to metadata-store-usage "{1}" but its definition was not found in MDS configuration.
Cause: Metadata-store-usage element that was referenced by a namespace not found in MDS configuration.
Action: Ensure that this element is specified in MDS configuration.
Level: 1

Type: ERROR
Impact: Configuration

MDS-01336: No XML element is provided to create {0}.
Cause: A null XML element was passed to the constructor of this configuration object.
Action: Ensure that a valid XML element is provided to create a new instance of this configuration.
Level: 1

Type: ERROR
Impact: Configuration

MDS-01337: No URL is provided to create {0}.
Cause: A null URL was passed to the constructor of this configuration object.
Action: Ensure that a valid URL is provided to create a new instance of this configuration.
Level: 1

Type: ERROR
Impact: Configuration

MDS-01340: More than one metadata store can be resolved for the namespace "{0}".
Cause: There were multiple namespace to metadata store mappings in the persistence configuration that satisfied the request for the metadata store of a given namespace.
Action: Correct the namespace mapping in persistence configuration to ensure that the namespace is mapped to only one metadata store.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01341: Namespace mapping for "[0]" is overridden by namespace mapping for "[1]"; and they conflict.
Cause: A conflicting mapping to this namespace has already been defined in the persistence configuration.
Action: Correct persistence configuration to ensure that there is no conflicting mapping to this namespace.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01342: No metadata store is mapped to the namespace "[0]".
Cause: No namespace mapping could be found in the persistence configuration for the specified namespace.
Action: Ensure that a correct namespace is passed into the method concerned, or alter the application configuration to define the specified namespace.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01343: There is a duplicate file extension mapping for "[0]".
Cause: A mapping to this file extension has already been defined in the file type configuration.
Action: Remove the duplicate file extension mapping from the file type configuration.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01344: cannot create [0] due to null parameter
Cause: A null parameter was passed to the constructor of this configuration object.
Action: Ensure that a valid parameter is provided to create a new instance of this configuration.
Level: 1
Type: ERROR
Impact: Configuration
MDS-01346: The given namespace path "(0)" is not a valid path.

Cause: An invalid path was provided to create a namespace.

Action: Ensure that a valid path is provided to create a namespace.

Level: 1

Type: ERROR

Impact: Configuration

MDS-01347: Base restriction is supported only for classpath store or servlet context store: namespace "(0)" mapped to "(1)".

Cause: The base restriction was specified for a metadata store other than the classpath metadata store and servlet context store.

Action: Correct the namespace mapping in the configuration to ensure that the base restriction is specified only for the classpath store or servlet context store.

Level: 1

Type: ERROR

Impact: Configuration

MDS-01348: unable to save configuration document to "(0)"

Cause: An I/O error occurred while writing the configuration to a file.

Action: Check the file system and ensure that the file location is writable.

Level: 1

Type: ERROR

Impact: Files

MDS-01349: unable to read existing configuration document "(0)" to be updated

Cause: An I/O or parsing error occurred while reading the configuration file.

Action: Ensure that the configuration file does exist and has valid contents.

Level: 1

Type: ERROR

Impact: Files

MDS-01350: Adding namespace "(0)" mapped to "(1)" conflicts with existing namespace "(2)" mapped to "(3)".

Cause: An attempt was made to add a new namespace that conflicted with an existing namespace because it mapped to a different repository.

Action: Ensure that the new namespace does not map to a different repository if the new namespace is a super-namespace or sub-namespace of existing namespaces.

Level: 1

Type: ERROR

Impact: Configuration

MDS-01351: Adding namespace "(0)" with "(1)" restriction conflicts with existing namespace "(2)" with "(3)" restriction.

Cause: An attempt was made to add a new namespace that conflicted with an existing namespace in the namespace restriction.
Action: Ensure that the new namespace does not conflict with existing namespaces in the namespace restriction if the new namespace is a super-namespace or sub-namespace of existing namespaces.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01352: Customization configuration with granular mapping "[0]" is unsupported; only the slash, "/", is allowed.

Cause: An attempt was made to add an invalid namespace mapping of the customization configuration. Only one namespace to customization class list mapping is currently allowed, and that namespace has to be a slash (/).

Action: Ensure that only the slash (/) is specified in the namespace mapping of the customization configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01353: unable to retrieve customization layer values from "[0]"

Cause: An I/O or parsing error occurred while reading the specified file to retrieve customization layer values.

Action: Ensure that the file does exist and has valid contents.

Level: 1
Type: ERROR
Impact: Files

MDS-01355: Both TypeConfig parameters contain Grammar Providers. Only one Grammar Provider is allowed.

Cause: A Grammar Provider was specified in multiple type configuration sources.

Action: Ensure that only one Grammar Provider is specified in the type Configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01356: Both TypeConfig parameters contain Metadata Providers. Only one Metadata Provider is allowed.

Cause: A Metadata Provider was specified in multiple type configuration sources.

Action: Ensure that only one Metadata Provider is specified in the type Configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01357: MDS configuration is not compatible with JAXB 1.0.
Cause: JAXB 1.0 jar file (xml.jar) was found on the classpath before any JAXB 2.0 jar files.
Action: Ensure that JAXB 2.0 jar files appear on the classpath before JAXB 1.0 jar file (xml.jar).
Level: 1
Type: ERROR
Impact: Configuration

MDS-01358: Invalid MDS configuration. Configuring multiple metadata stores as the default repository for customizations.
Cause: Multiple metadata stores were configured as the default repository for customizations in the MDS configuration.
Action: Ensure that only a single metadata store is configured as the default repository for customizations.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01359: The namespace used (http://xmlns.oracle.com/mds/config_10_1_3_001) in the configuration document is deprecated. Update the configuration document to use "http://xmlns.oracle.com/mds/config" as the namespace.
Cause: The namespace used (http://xmlns.oracle.com/mds/config_10_1_3_001) in the configuration document is deprecated.
Action: Update the configuration document to use "http://xmlns.oracle.com/mds/config" as the namespace.
Level: 1
Type: WARNING
Impact: Configuration

MDS-01360: Invalid MDS configuration. The attribute file-type-extension on the file-type element is missing for file type configuration.
Cause: The attribute file-type-extension was not specified on the file-type element for file type configuration.
Action: Ensure that a valid file-type-extension attribute is specified for every file-type element.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01361: cannot add XSD grammar
Cause: An attempt was made to add XSD grammar made by passing in a SchemaGrammarProvider.
Action: Ensure that the grammar provider is obtained using oracle.jdeveloper.webapp.runtime.WebAppDesignContext.
Level: 1
Type: ERROR
Impact: Configuration

**MDS-01362: Failed to auto-purge MDS repository: "[0]".**

**Cause:** MetadataStore was scheduled for auto-purge after the MDSInstance was released

**Action:** Try later and contact support if persists.

**Level:** 1

**Type:** WARNING

**Impact:** Other

**MDS-01363: Failed to lookup datasource with JNDI name "[0]" configured for the DBMetadataStore, defaulting to use ClassPathMetadataStore.**

**Cause:** Application was configured with DBMetadataStore using JNDI datasource and JNDI lookup failed when running outside application server.

**Action:** No action required if defaulting to ClasspathMetadataStore is acceptable. Otherwise, use appropriate configuration such as FileMetadataStore.

**Level:** 1

**Type:** WARNING

**Impact:** Configuration

**MDS-01364: Namespace mapping for "[0]" is overlapping with namespace mapping for "[1]"; the first mapping is redundant.**

**Cause:** Redundant Namespace mappings defined in the persistence configuration.

**Action:** Correct persistence configuration to ensure that there is no overlapping redundant mappings.

**Level:** 1

**Type:** WARNING

**Impact:** Configuration

**MDS-01365: Multiple metadata stores found with deploy-target attribute set to true, only one allowed per configuration.**

**Cause:** Multiple metadata stores were configured as the deployment target.

**Action:** Ensure that only a single metadata store is configured for deployment.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01366: Cannot find a metadata store with deploy-target attribute set to true**

**Cause:** A single metadata store must be configured as a deploy target. None was found.

**Action:** Ensure that a single metadata store is configured for deployment.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01367: Failed to create [0]. Invalid MDS configuration specified in: "[1]"**
Cause: Declarative MDS configuration is invalid.
Action: Specify correct mds configuration information and try creating the configuration again.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01368: Variable "[(0)]" used in configuration document is not defined either as system property or as environment variable.
Cause: This variable was not defined.
Action: Ensure that this variable is defined before loading the configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01369: Variable declaration in "[(0)]" in configuration document is incorrect.
Cause: Variable did not either start with "[$"] or it did not end with "]".
Action: Ensure that the configuration variable is correctly declared in the form ${var}.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01370: MetadataStore configuration for metadata-store-usage "[(0)]" is invalid.
Cause: MetadataStore class or some of its properties were not valid.
Action: Ensure that the MetadataStore class exists and all required properties are valid. See message of the cause exception for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01371: ADF security is not configured in "[(0)]", password cannot be securely processed.
Cause: ADF security configuration was not found in the config file.
Action: Set the password using JDeveloper to ensure required configuration is generated.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01373: unable to retrieve password.
Cause: unable to retrieve the password due to exception in security layer.
Action: See message of the cause exception for more information on the actual reason for failure.
MDS-01374: unable to save password.
   Cause: unable to save the password due to exception in security layer.
   Action: See message of the cause exception for more information on the actual reason for failure.

MDS-01375: No password defined for DBMetadataStore in configuration file or in the wallet file.
   Cause: DBMetadataStore uses JDBC based configuration but no password specified.
   Action: Set the password for the DBMetadataStore using JDeveloper.

MDS-01376: Unable to get database connection from data source "[1]" configured with JNDI name "[0]".
   Cause: Failed to retrieve a database connection from the data source either because the data source is not configured correctly or the database details are not correct.
   Action: Test the data source to check if it is correctly configured and if the database can be accessed. See message of the cause exception for more information on the actual reason for failure.

MDS-01377: Unable to get database connection from data source configured with JNDI name "[0]".
   Cause: Failed to retrieve a database connection from the data source either because the data source is not configured correctly or the database details are not correct.
   Action: Test the data source to check if it is correctly configured and if the database can be accessed. See message of the cause exception for more information on the actual reason for failure.

MDS-01378: metadata-store-usage attribute should not be set on namespace "[0]" defined in mds-config.xml.
Cause: metadata-store-usage attribute was set on the specified namespace in mds-component-config, but this namespace is always assumed to map to deploy-target metadata store.

Action: Ensure that the metadata-store-usage attribute is removed on specified namespace in mds-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01379: Tenant scope "[0]" is not valid for namespace "[1]" with namespace restriction "[2]".

Cause: Tenant scope configured for the namespace is not supported with the configured namespace restriction.

Action: Resolve the conflict between tenant scope and namespace-restriction in the application configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01380: Tenant scoped base metadata in package "[0]" can not have global customization layer "[1]".

Cause: Tenant scope GLOBAL on the specified customization layer conflicts with tenant scope TENANT on the base namespace.

Action: Resolve the conflicts between the tenant scope on the base namespace and that on the customization layer.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01381: Customization layer "[0]" has been configured more than once with the same tenant scope.

Cause: Duplicate configuration for the same customization layer was found.

Action: Remove the duplicate customization layer configuration from adf-config.xml of the application or component config (mds-config.xml) on classpath.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01382: Customization layer "[0]" has been configured more than once with conflicting tenant scopes.

Cause: Conflicting tenant scope configurations was found for the same customization layer.

Action: Remove the incorrect customization layer configuration from adf-config.xml of the application or component config (mds-config.xml) on classpath.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01383: Sandbox name should be provided for registering a sandbox change listener.
Cause: No sandbox name was provided for registering the sandbox change listener.
Action: Provide a valid sandbox name when registering the sandbox change listener.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01384: Sandbox change listener is not found when registering the lifecycle listener for sandbox {0}.
Cause: The SendboxChangeListener being registered was null.
Action: Provide a valid sandbox change listener when registering the lifecycle listener for the sandbox.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01385: Tenant scope "{(0)}" as base tenant scope is not valid for namespace "{(1)}".
Cause: The specified tenant scope type could not be configured as base tenant scope for the namespace.
Action: Use the correct base tenant scope parameter to create the namespace.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01386: Multitenant application can not be configured with metadata store "{(0)}" that does not support multitenancy.
Cause: A metadata store that does not support multitenancy was configured for a multitenant enabled application.
Action: Configure a metadata store such as DBMetadataStore that supports multitenancy.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01387: Tenant with id "{(0)}" is not allowed to change the autopurge settings; only the global admin can change this configuration.
Cause: A tenant cannot change the autopurge configuration.
Action: Only a global admin can change the autopurge configuration.
Level: 1
Type: ERROR
MDS-01388: Unable to set cache size to {0} KiloBytes.

**Cause:** The cache size requested was invalid either because it was negative or it was too large for the Java Object Cache.

**Action:** Check that the specified size is >0 and within the limit for the cache implementation.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-01389: ContentType can not be specified for Streamed documents.

**Cause:** Conflicting settings between ContentType and isStreamed were found in ContentConfig.

**Action:** Change ContentOptions to use either ContentType or isStreamed.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

MDS-01390: An audit event name for component "{0}" is not specified.

**Cause:** An audit event was defined, but a name for the event was not specified.

**Action:** Give the audit event a valid name.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-01391: "{0}" is not a valid audit event name.

**Cause:** An invalid audit event name was found. An audit event name should start with a letter and contain only letters and digits.

**Action:** Specify a valid name for the audit event.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-01392: Conflicting definitions were found for the audit event with name "{0}" and audit-component "{1}".

**Cause:** Conflicting audit event definitions were found in audit-component element.

**Action:** Remove or modify one of the conflicting audit events.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-01393: Multiple audit events named "{0}" are defined for component "{1}".

**Cause:** Duplicate audit events were found in audit-component element.

**Action:** Remove or modify one of the duplicate audit events.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01394: The repository-name property element is not specified for a metadata-store element that does not have the class-name property.

Cause: The repository-name property element was not specified for a metadata-store element. It is required when the class-name property is not specified on the metadata-store element to support look up of the repository details.

Action: Specify the repository name in a child property element of the metadata-store element or specify the class-name property for the metadata-store element in the configuration file.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01395: Unable to look up the details of the specified repository {0} for the metadata-store configuration.

Cause: The specified repository was not registered in the domain or the repository was not configured properly.

Action: Ensure that the specified repository for the metadata-store is configured and registered properly in the domain.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01396: metadata-store-usage attribute is not set on namespace "{(0)}" defined in mds-config.xml.

Cause: metadata-store-usage attribute was missing on the specified namespace in mds-component-config.

Action: Ensure that the metadata-store-usage attribute is set on the specified namespace in mds-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01397: Multiple audit events with display name "{(0)}" are defined for component "{(1)}".

Cause: More than one audit event was found with the same display name in audit-component element.

Action: Ensure that the display names are unique for all audit events of a component.

Level: 1
Type: ERROR
Impact: Configuration
MDS-01398: Namespace "[0]" is mapped to both metadata store "[1]" and metadata store "[2]."
Cause: There were multiple metadata stores mapped to a given namespace in the persistence configuration.
Action: Correct the namespace mapping in persistence configuration to ensure that the namespace is mapped to only one metadata store.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01399: A DBMetadataStore store is being registered with a PManager with multitenant enabled set to [1] but an equal store is already registered with a PManager with multitenant enabled set to [0].
Cause: The DBMetadataStore store being registered cannot be used for both multitenant and non multitenant operations at the same time.
Action: Ensure that the same physical store is not used for both multitenant and non multitenant operations.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01400: Read-only extended metadata resource "[0]" is not writable.
Cause: An attempt was made to update a read-only extended metadata resource.
Action: Ensure that the metadata object is mutable before getting the extended metadata.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01401: Updating a node in one document "[1]" using a node from a different document "[0]" is not allowed.
Cause: The node being added or inserted was from a different metadata object. They must be from the same base document.
Action: Ensure that the node being inserted is from the correct metadata object.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01402: Updating immutable MetadataObject "[0]" is not allowed.
Cause: The MetadataObject being updated was immutable.
Action: Ensure that the MetadataObject to be updated is mutable.
Level: 1
Type: ERROR
Impact: Programmatic
MDS-01403: Updating a mutable MEElement in MetadataObject "{0}" using an immutable MEElement: "{1}" is not allowed.
   Cause: An attempt was made to update a mutable MEElement using an immutable MEElement.
   Action: Verify that the child MEElement being used for the update is mutable.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01404: Customization to replace root node of {0} is not allowed.
   Cause: An attempt was made to replace the root node as part of a customization.
   Action: Replace the root node in the base document, or modify the existing root node instead.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01450: missing GUID
   Cause: The application removed an object's GUID while editing its XML metadata content.
   Action: Fix the application so it does not tamper with MDS GUIDs.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01451: GUIDs do not match.
   Cause: The application altered an object's GUID while editing its XML metadata content.
   Action: Fix the application so it does not tamper with MDS GUIDs.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01452: GUID is null.
   Cause: An attempt was made to retrieve a metadata object or document by GUID, but the given GUID was null.
   Action: Fix the application so it passes a valid GUID to the method in question.
   Level: 1
   Type: ERROR
   Impact: Programmatic

MDS-01455: multiple GUIDs on metadata object {0}
   Cause: The application set multiple GUID values while editing an object's XML metadata content.
   Action: Fix the application so it does not tamper with MDS GUIDs.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01456: invalid GUID on metadata object {0}
Cause: The application set an object’s GUID to an invalid value while editing its XML metadata content.
Action: Fix the application so it does not tamper with MDS GUIDs.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01457: GUID feature not available
Cause: The application attempted to retrieve an object by GUID from a metadata store that does not yet support this.
Action: Fix the application so it does not attempt this, or configure the application to use a different type of metadata store.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01458: GUID must not be present.
Cause: The application set an object’s GUID value while editing its XML metadata content.
Action: Fix the application so it does not tamper with MDS GUIDs.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01460: GUIDs on DOM Document do not match.
Cause: The application set an object’s GUID to a different value while editing its XML metadata content.
Action: Fix the application so it does not tamper with MDS GUIDs.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01461: unable to create document {0} in the metadata repository; a document with the same name or GUID already exists
Cause: An attempt was made to import or create a document with a name or GUID that is already used by an existing document.
Action: Delete the document in the MDS repository prior to import or creation.

Level: 1
Type: ERROR
Impact: Data
MDS-01462: GUID feature is not supported in the classpath store.  
Cause: The application attempted to retrieve an object by GUID from the classpath metadata store that does not support this.  
Action: Fix the application so it does not attempt retrieval by GUID, or configure the application to use a different type of metadata store.  
Level: 1  
Type: ERROR  
Impact: Programmatic

MDS-01464: unable to save GUIDRegister [0]  
Cause: The GUID register (GUID index files) could not be written.  
Action: Verify that the application has write permission for the given file, and that the disk is not full.  
Level: 1  
Type: ERROR  
Impact: Files

MDS-01465: unable to remove node [0] from the GUIDRegister  
Cause: The given node was not removed from the GUID register, possibly because it was not found.  
Action: Delete the GUID register files, restart the application and try the operation again. If that fails, contact Oracle Support Services.  
Level: 1  
Type: INCIDENT_ERROR  
Impact: Data

MDS-01466: unable to create GUIDRegister directory [0]  
Cause: The owning directories for the GUID register (GUID index files) were not created.  
Action: Verify that you have permission to create the parent directories for the given file name.  
Level: 1  
Type: ERROR  
Impact: Files

MDS-01468: A different GUID is already registered for document [0].  
Cause: The GUID register has become corrupted.  
Action: Delete the GUID register files and restart the application (the files will then be re-created).  
Level: 1  
Type: ERROR  
Impact: Data

MDS-01469: unable to remove old GUIDRegister store path [0]  
Cause: Old GUID register files were not deleted.  
Action: Verify that you have permission to delete these files.
Level: 1
Type: ERROR
Impact: Files

MDS-01470: more than one GUID is registered for document [0]
Cause: The GUID register has become corrupted.
Action: Delete the GUID register files and restart the application (the files will then be re-created).

Level: 1
Type: ERROR
Impact: Data

MDS-01471: more than one document is registered for GUID [0]
Cause: The GUID register has become corrupted.
Action: Delete the GUID register files and restart the application (the files will then be re-created).

Level: 1
Type: ERROR
Impact: Data

MDS-01472: GUID is missing in file [0]
Cause: No GUID was found in the given file but the metadata object type definition indicated there should be one.
Action: Re-create the metadata object or correct its type definition not to require a GUID.

Level: 1
Type: ERROR
Impact: Data

MDS-01500: The MDSObject [0] is an XML document and cannot be loaded using StreamedObject API.
Cause: An attempt was made to load an XML document via StreamedObject API.
Action: Retry the operation using MetadataObject API or use a non-XML document.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01501: The MDSObject [0] is not an XML document and cannot be loaded from MetadataObject API.
Cause: An attempt was made to load a streamed object (non-XML document) using MetadataObject API.
Action: Retry the operation using StreamedObject API or use a document containing valid XML.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01502: The MDSObject "(0)" is an XML document and cannot be saved using StreamedObject API.

Cause: An attempt was made to save an XML document using StreamedObject API.

Action: Retry the operation using MetadataObject API.

Level: 1

Type: ERROR

Impact: Programmatic

MDS-01503: The content of StreamedObject {0} cannot be read.

Cause: An attempt to read the StreamedObject content failed.

Action: Look at the error message and exception stack in the application logs to determine the reason for the failure.

Level: 1

Type: ERROR

Impact: Data

MDS-01504: The document {0} is either registered as a streamed file type or is a non-XML file extension and cannot be created using MetadataObject API.

Cause: An attempt was made to create an MDSObject named with a streamed object (non-XML) extension using MetadataObject API.

Action: Retry the operation using StreamedObject API.

Level: 1

Type: ERROR

Impact: Programmatic

MDS-01600: The Dependency Analyzer requires a DependencyFilter.

Cause: Either no filter was supplied, or the filter supplied was null.

Action: Supply a non-null filter.

Level: 1

Type: ERROR

Impact: Programmatic

MDS-01601: The relationship role name {0} is a duplicate.

Cause: A role name defined in a relationship had already been used.

Action: Ensure that the toParentRole and toChildRole in a relationship have not already been used by another relationship.

Level: 1

Type: ERROR

Impact: Programmatic

MDS-01602: cannot locate the element type {0} in namespace {1} defined for the relationship

Cause: The element type did not exist in the given namespace.
Action: Ensure that the element type exists in the given namespace.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01604: The relationship from {0} to {1} is invalid because the latter is not a valid MDS reference.
Cause: An invalid MDS reference was specified as the parent.
Action: Ensure the parent reference is a valid MDS reference.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01605: The relationship from {0} to {1} is invalid because the latter does not exist.
Cause: No parent element was found matching the MDS reference supplied.
Action: Ensure that the parent reference in the relationship points to an existing element.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01606: The relationship from {0} to {1} is invalid because the latter is of incorrect type.
Cause: The child element referenced a parent of the wrong type.
Action: Ensure that the parent type matches the one stipulated in the relationship definition.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01607: The relationship from {0} to {1} is invalid because type information is not available for the latter.
Cause: No type definition could be found for the parent.
Action: Ensure that the parent type information is available.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01608: The relationship from {0} to {1} is invalid because the latter maps to a different store.
Cause: The parent and child objects in the relationship have been mapped to different stores.
Action: Ensure that the parent maps to the same store as the child object.
Level: 1
Type: ERROR
Impact: Configuration

MDS-01609: The document {0} contains relationships that do not conform to the relationship definition.
Cause: Constraints in this document's relationship definitions were violated.
Action: Ensure that the relationships conform to the constraints in the relationship definition.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01610: Some of the changes in the MDS session are not valid.
Cause: A change was made in the MDS session that was not valid.
Action: Check the changes made and ensure each of them is valid.
Level: 1
Type: ERROR
Impact: Data

MDS-01611: not saving changes in MDS session because some changes are not valid
Cause: A change made in the MDS session was not valid.
Action: Check all the changes made and ensure that all changes are valid.
Level: 1
Type: ERROR
Impact: Data

MDS-01612: The object {0} cannot be deleted because it is referenced by {1}.
Cause: An attempt was made to delete an element that was being referenced by a child object.
Action: Remove the child reference to this object so the object can be deleted.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01613: The object {0} cannot be deleted because of relationship integrity constraints.
Cause: An attempt was made to delete an object that was still being referenced.
Action: Remove the child references to the metadataObject so that it can be deleted.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01614: Rename is not allowed because integrity checking is not turned on in the object {1} in MetadataObject {0}.
Cause: Integrity checking was switched off so it was not possible to check whether the rename would have broken any relationship integrity constraints.

Action: Ensure that integrity checking is turned on.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01615: failure to rename {0} because there is no reference attribute in MetadataObject {1}, element {2}

Cause: A child object could not reference the renamed object as its current reference was invalid.

Action: Confirm that all the references in the child object are valid.

Level: 1
Type: ERROR
Impact: Data

MDS-01620: The untyped dependency with the following registration details cannot be inserted: {0}, {1}, {2}, {3}.

Cause: The dependency could not be registered in the database repository due to a SQL exception.

Action: Correct the cause of the SQL exception and retry the untyped dependency registration.

Level: 1
Type: ERROR
Impact: Data

MDS-01621: The untyped dependency information for {0} could not be removed.

Cause: An attempt to remove untyped dependency information failed either because the document was invalid or there was a SQL exception.

Action: Verify that the document and its dependencies are valid, or correct the cause of any SQL exceptions.

Level: 1
Type: ERROR
Impact: Data

MDS-01622: There is no analyzer to unregister.

Cause: No analyzers were supplied to be unregistered.

Action: Supply the DependencyAnalyzer to be unregistered.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01630: invalid operation in a customized context on an element that could participate in a relationship: {0}

Cause: Within a customized context there was an attempt to insert an element without first deleting it as part of a composite move.
**Action:** Within the customized context, do not attempt inserts on elements without first deleting them as part of a composite move.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01631:** In a customized context, an element that could participate in a relationship as a child cannot be modified. The reference is {0} on {1}.

**Cause:** Within a customized context, an attribute being customized could have been a parent reference within a relationship.

**Action:** Do not attempt to modify or remove an attribute that could be a parent reference within a relationship.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01633:** In a customized context, an element that could participate in a relationship cannot be deleted: {0}.

**Cause:** Within a customized context an attempt was made to delete an element that could participate in a relationship.

**Action:** Do not attempt to delete an entity while in a customized context.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01634:** In {0}, a {1} element that participates in a relationship lacks a configurable ID.

**Cause:** An operation was attempted on a participant in a relationship that lacked a configurable ID.

**Action:** Add a configurable ID to the element on which it is missing. If necessary, refer to the element's schema definition to identify the configurable ID attribute.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01635:** Skipping the relationship validation for {0} in the metadata object {1} because the element contains an invalid MDS reference.

**Cause:** Validation of the object's relationships was not performed because the element contained an invalid MDS reference.

**Action:** Correct the MDS references in the MetadataObject specified.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01700:** MElementBeanImpl._setSimpleChild cannot be called on a non-simpleType element: name={0}, namespace={1}
**Cause:** An attempt was made to set a bean element to a simple type, but the definition in the schema was not a simple type. The generated beans may not have matched the registered schema.

**Action:** Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01701:** Cannot set the value on an element that is not based on a simpleType: name={0}, namespace={1}  
**Cause:** An attempt was made to set an element to a simple type, but the definition in the schema was not a simple type.  
**Action:** Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01702:** The method getBean() is not valid for metadata object {0} - it is allowed on only bean metadata objects.  
**Cause:** An attempt was made to access the metadata object using the bean API but the metadata object was not a bean metadata object. The schema for the root element may not have been registered with MDS, or the beans were not available on the classpath.  
**Action:** Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01703:** error unmarshalling bean element: name={0}, namespace={1} in metadata object {2} - no object factory can be found or jaxb.properties cannot be found  
**Cause:** An element was found in the metadata object that did not have a corresponding bean class. The schema for the element may not have been registered with MDS, or the beans were not available on the classpath.  
**Action:** Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration
MDS-01705: error unmarshalling bean element: name={0}, namespace={1} in metadata object {2} - object factory class {3} does not have the expected unmarshal() method

**Cause:** The bean object factory found for the element did not appear to have been generated by the MDS bean generation tool.

**Action:** Regenerate the beans from the schema definitions and ensure that the correct versions are on the classpath. Check that the schemas are registered with the MDS instance.

**Level:** 1

**Type:** ERROR

**Impact:** Data

MDS-01706: error unmarshalling bean element: name={0}, namespace={1} in metadata object {2} - object factory class {3} failure in unmarshal() method

**Cause:** An unexpected exception occurred while creating a bean object for the element.

**Action:** Contact the developers of the application, providing the cause exception.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

MDS-01707: Error generating relationship method {0} for relationship defined on attribute {1}: incorrect parentType definition

**Cause:** There was an error in the relationship definition.

**Action:** Check the parentType definition on the relationship

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

MDS-01708: No schema definition found in namespace "{0}" for element of type "{1}". (2) will not be retrievable as an MDS Bean MO.

**Cause:** The schema for the generated MDS bean is not found.

**Action:** Add the schema for this namespace and element type to the type definitions for the MDSInstance.

**Level:** 1

**Type:** WARNING

**Impact:** Configuration

MDS-01800: Sandbox is not supported for {0} configured on {1}.

**Cause:** An underlying metadata store did not support the sandbox feature.

**Action:** Provide a metadata store that supports sandbox feature.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

MDS-01801: Document name {0} should not refer to the raw sandbox resource name.
Cause: A resource name pointed directly to a resource in the sandbox component.
Action: Provide a logical document name to resolve the issue.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01802: A sandbox by name {0} already exists in the {1} store.
Cause: A sandbox with the same name already existed in the store.
Action: Use a different name or destroy the existing sandbox before reusing the same name.

Level: 1
Type: ERROR
Impact: Configuration

MDS-01803: Sandbox Persistence manager cannot be constructed using an instance of SandboxPManager.
Cause: An attempt was made to construct an instance of sandbox persistence manager using an instance of SandboxPManager.
Action: Contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-01804: Sandbox {0} configured with {1} namespace, {2} store and {3} label from mainline is not compatible with {4} label created on {5} namespace.
Cause: A label was used that is different from the mainline label associated with the sandbox.
Action: Use a label that is compatible with the sandbox and retry the operation.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01805: Sandbox {0} missing in {1}.
Cause: The specified sandbox was not found in the underlying metadata store.
Action: Provide the name of an existing sandbox, or create a new sandbox if necessary.

Level: 1
Type: ERROR
Impact: Data

MDS-01806: failure to remove {0} from {1}, because it is not a valid document in the sandbox
Cause: The specified document to be removed was not found in the sandbox.
Action: Verify that the document exists in the sandbox.

Level: 1
Type: ERROR
Impact: Data

MDS-01807: failure to delete sandbox {0}
Cause: An error occurred while deleting the sandbox.
Action: Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01808: SandboxUsage with the sandbox name set to {0} does not return any namespaces.
Cause: No namespaces were found on the SandboxUsage.
Action: Configure the SandboxUsage with namespaces that are associated with the sandbox.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01809: failure to list sandboxes matching {0}
Cause: An error occurred while listing or querying the sandboxes.
Action: Look for error messages to determine the actual cause of the failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01810: failure to refresh sandboxes to target label {0}
Cause: Target label is older than the current source label.
Action: Specify a target label which is later than current label.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01811: failure to list sandboxes matching customization for {0}, layer: {1}, value: {2}
Cause: An error occurred while listing or querying the sandboxes.
Action: Look for error messages to determine the actual cause of the failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01812: sandbox name {0} exceeds the maximum limit of {1} characters
Cause: Sandbox name is more than the supported size.
Action: Use a shorter sandbox name.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-01813: sandbox metadata for {0} cannot be saved because it is being updated by another user.
Cause: More than one user is updating the sandbox metadata at the same time.
Action: Get the sandbox metadata again and retry saving after making the changes.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01814: sandbox metadata for {0} cannot be changed because it is read only.
Cause: Sandbox metadata is read only and cannot be updated
Action: To update get an instance of sandbox and then get the sandbox metadata from the instance

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01815: store configured for sandbox {0} does not support sandbox metadata.
Cause: Sandbox metadata is not supported on the repository.
Action: Sandbox metadata is supported in MDS repository version 11.1.1.4.0 (11gR1 PS3 patchset) onwards. Upgrade the repository to this version or later to use this feature.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01816: {0} is not a valid name for a sandbox.
Cause: The specified sandbox name is either an MDS reserved package part name or contains invalid characters.
Action: Ensure that the specified sandbox name is neither an MDS reserved package part name nor does it contain invalid characters as per the MDS Resource name specification.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-01817: sandbox {0} is either active or published to mainline. The undo/finalize operation cannot continue.
Cause: The sandbox is either applied or is in the active state.
Action: Check that the sandbox is in the intermediary state

Level: 1
Type: ERROR
**Impact:** Programmatic

**MDS-01818:** sandbox \{0\} is either being refreshed or applied and is in intermediary state. No further updates except sandbox finalize/undo operation are allowed.

**Cause:** The sandbox is in intermediary state and no further updates can be done to the sandbox.

**Action:** The only allowed operations in the intermediary state are: finalize and undo.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01819:** Lock on sandbox \{0\} cannot be taken. A concurrent management operation may be in progress.

**Cause:** A management operation on the sandbox is in progress and has locked the sandbox.

**Action:** Retry the operation after a while.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01820:** Metadata for sandbox \{0\} is not available. The sandbox management operation cannot proceed without sandbox metadata.

**Cause:** Sandbox was created without metadata.

**Action:** Use the management APIs that are available for sandboxes without metadata.

**Level:** 1

**Type:** ERROR

**Impact:** Programmatic

**MDS-01821:** Lifecycle change notifications for the sandbox \{0\} cannot be sent out because the change type is not defined.

**Cause:** The sandbox lifecycle change does not have a valid change type.

**Action:** Contact Oracle Support Services.

**Level:** 1

**Type:** WARNING

**Impact:** Other

**MDS-01900:** None of the configured metadata stores support versioning.

**Cause:** The underlying metadata store did not support versioning.

**Action:** Configure a metadata store that supports versioning, and retry the operation.

**Level:** 1

**Type:** ERROR

**Impact:** Configuration

**MDS-01901:** specifying multiple labels for a namespace not allowed
**Cause:** Multiple labels were provided for a namespace that pointed to a metadata store.

**Action:** Provide a single label to map to a namespace and retry the operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01902: Label or namespace is invalid.**

**Cause:** Either the namespace or the label was invalid.

**Action:** Verify that the namespace and the label are correct, and retry the operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**MDS-01903: Specified label \(0\) does not exist for \(1\) namespace.**

**Cause:** The specified label did not exist in the metadata store mapped to the namespace.

**Action:** Verify that the label name is correct and that the label exists, and then retry the operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01906: A label with same name \(0\) already exists.**

**Cause:** An attempt was made to create a label that already existed.

**Action:** Create a label with a different name, and then retry the operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**MDS-01907: The label \(1\) is already configured for the store \"\(0\)\", so the same store cannot be configured with another label \"\(2\)\".**

**Cause:** An attempt was made to map a label for a store when a label-to-store mapping already existed for that store.

**Action:** De-associate the existing label mapped to the store first, and then retry the operation.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-01908: failure to delete versions of the document \(0\)**

**Cause:** An error had occurred while versions were being deleted.

**Action:** Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
MDS-01909: No namespaces are specified for creating label [0].
   Cause: No namespace information was found for creating a label.
   Action: Provide a namespace for creating a label, and retry the operation.

MDS-01910: The namespace [0] is already registered with the label [1], so the super/sub namespace [2] cannot be assigned with the label [3].
   Cause: An attempt was made to associate multiple labels with a namespace, or an attempt was made to associate multiple namespaces with a single label.
   Action: Associate a single label with a single namespace, and retry the operation.

MDS-01911: failure of the metadata purge operation for the requested repository partition
   Cause: An error occurred during a purge operation.
   Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

MDS-01912: MetadataStore configured for [0] does not support versioning.
   Cause: The metadata store configured for the resource did not support versioning.
   Action: Configure a metadata store that supports versioning or verify that the resource name is correct.

MDS-01913: A deployment lineage with same application name "[0]" and deployment module name "[1]" already exists.
   Cause: An attempt was made to create a lineage that already existed.
   Action: Create a lineage with a different application or MAR name, and then retry the operation.
MDS-01914: The application name and deployment module name cannot be null to create DeploymentInfo.

**Cause:** An attempt was made to create DeploymentInfo with null values.

**Action:** Make sure that the values for application name and deployment module name are non-null.

**Level:** 1

**Type:** ERROR

Impact: Programmatic

MDS-02001: Absolute path as metadata-path for the file metadata-store configuration is not supported for SaaS deployment.

**Cause:** Configuring an absolute directory in SaaS Multitenant application will violate metadata isolation across tenants.

**Action:** Ensure that relative path specified as metadata-path for the file metadata-store.

**Level:** 1

**Type:** ERROR

Impact: Configuration

MDS-02002: RelativeToLocation for the file metadata-store configuration is not supported for SaaS deployment.

**Cause:** Configuring an absolute directory in SaaS Multitenant application will violate metadata isolation across tenants.

**Action:** Ensure that relative path is specified as metadata-path for the Metadata Store and RelativeToLocation is null

**Level:** 1

**Type:** ERROR

Impact: Configuration

MDS-02003: Package name {0} in cust-restriction-config in {1} is invalid.

**Cause:** An invalid package name was encountered whilst loading the component configuration.

**Action:** Ensure that a valid package name is specified

**Level:** 1

**Type:** ERROR

Impact: Configuration

MDS-02024: Setting or modifying the unique (or locally unique) identifier "[0]" of an existing element with localRef "[1]" through customizations is not supported.

**Cause:** An attempt was made to customize unique (or locally unique) identifier.

**Action:** Remove any customization that is attempting to modify the unique (or locally unique) identifier of an XML element.

**Level:** 1

**Type:** ERROR
Impact: Programmatic

MDS-02025: The requested change is incompatible with changes already pending on the MDS session.

Cause: An attempt was made to perform a change operation on the MDS session which would update the same MetadataObject part as another change operation that has been done. For example, if you change a customization of a metadata object then attempt to delete all of its customizations, the latter operation will fail because it conflicts with the former. You must save the former change first before doing the second.

Action: Save the changes that have already been made on the session (by calling flushChanges), then retry the failed operation.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02100: Illegal permission target: "{0}" - must begin with {1}.

Cause: An attempt was made to create an MDS permission class with an incorrect syntax.

Action: Permission classes are usually created internally by MDS but may be created by the application directly. Contact the developers of the application to confirm that this is not an application error and if not contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-02101: Illegal permission action: "{0}" - unknown action.

Cause: An attempt was made to create an MDS permission class with an incorrect syntax.

Action: Permission classes are usually created internally by MDS but may be created by the application directly. Contact the developers of the application to confirm that this is not an application error and if not contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-02102: Illegal permission action: "{0}" - customize action takes 0 or 2 parameters.

Cause: An attempt was made to create an MDS permission class with an incorrect syntax.

Action: Permission classes are usually created internally by MDS but may be created by the application directly. Contact the developers of the application to confirm that this is not an application error and if not contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-02201: type validation failure for the metadata object "(0)"
Cause: The content of the metadata object was not valid against the registered XSDs.
Action: Ensure that the metadata object content is valid with respect to the registered XSDs.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02202: Content of the metadata object "(0)" is not valid.
Cause: The content was not valid either with respect to the registered XSDs or with the registered relationships.
Action: Check the content of the metadata object and correct the content as necessary to make it valid.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02203: type validation error for the metadata object "(0)" at the node "(1)": [2]
Cause: A validation error occurred at the specified node.
Action: Check the content at the specified node for compliance with registered XSDs and relationships.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02204: type validation warning for the metadata object "(0)" at the node "(1)": [2]
Cause: A validation warning occurred at the specified node.
Action: Check the content at the specified node for compliance with registered XSDs.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02301: The rename unit is invalid because either "(0)" or "(1)" is reused in the rename plan.
Cause: The resource name provided in the rename plan was used more than once.
Action: Provide distinct names for source and target names while renaming.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02302: subobjects "(1)" not found in metadata object "(0)"

33-94  Error Messages
Cause: The specified subobjects were not found in the metadata object.
Action: Look in the error message log for details.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02303: The given rename plan syntax is invalid
Cause: The rename plan syntax specified was invalid.
Action: Look in the error message log for details.

Level: 1
Type: ERROR
Impact: Configuration

MDS-02304: RenameOperation failed for StreamedObject "[0]" because subobjects were specified for this streamed object.
Cause: Streamed objects do not support subobjects.
Action: Remove the RenameObject that contains reference to the streamed object and subobject references from the RenamPlan.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02401: The operation [0] on the [1] node is not allowed.
Cause: An attempt was made to customize a node that was not customizable.
Action: If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: the XML schema definition, standalone XML file or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-02402: The type definition for [1] does not allow customization of [0].
Cause: An attempt was made to customize a node that was not customizable.
Action: If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: the XML schema definition, standalone XML file, tag library definition file, or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

Level: 1
Type: ERROR
Impact: Configuration

MDS-02404: The subelement [1] in the MDX document does not allow customization of [0].
**Cause:** An attempt was made to customize a node that was not customizable.

**Action:** Check the customization restriction information which can be located in the schema definition, standalone xml file or an extended metadata file. Also check the customization policy for the MDSSession in use and the customization configuration.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-02405:** The attribute \{2\} in element \{1\} in the MDX document does not allow customization of \{0\}.

**Cause:** An attempt was made to customize a node that was not customizable.

**Action:** If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: the XML schema definition, standalone XML file or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-02406:** Customization of \{0\} is not allowed because it is not explicitly allowed by any type definition nor any extended metadata entry.

**Cause:** An attempt was made to customize a node that was not customizable.

**Action:** If the attempted customization is valid, the customization restrictions need to be modified to provide this ability. The customization restrictions can be defined in: the XML schema definition, standalone XML file or an extended metadata file. Also check the customization policy for the MDS session in use and the customization configuration.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-02407:** Customization of \{0\} is not allowed because the local reference was not found in the document.

**Cause:** An enquiry about the customizability of a node supplied a local reference that wasn’t found in the document.

**Action:** Ensure that the local reference applies to the document.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

**MDS-02408:** The operation \{0\} on the \{1\} node is not allowed because the metadata object reference was not found in the change event.

**Cause:** A document change is not allowed because the metadata object reference was null.

**Action:** Ensure that the change document exists.
Level: 1  
Type: ERROR  
Impact: Programmatic  

MDS-02500: Cannot find a valid MDSSession object for accessing the MDS document using ORAMDS URL  
Cause: A valid MDSSession object was not set before accessing the document using the "oramds:///" protocol.  
Action: Use the MDSURLHelper.setMDSSession() method to set a valid MDSSession object before accessing MDS documents using the oramds protocol.

Level: 1  
Type: ERROR  
Impact: Programmatic  

MDS-02501: cannot load the ORAMDS URL "[0]" because MDS session could not be created or resolved  
Cause: An error occurred while creating or resolving an MDS session object.  
Action: Look for messages describing the cause exception in the error message log for more information on the actual reason for failure.

Level: 1  
Type: ERROR  
Impact: Programmatic  

MDS-02600: configuration migration failure because the configuration document contains more than one mds-config element  
Cause: The given configuration document contained more than one mds-config element.  
Action: Correct the configuration document to contain a single mds-config element.

Level: 1  
Type: ERROR  
Impact: Programmatic  

MDS-02601: configuration migration failure because it contains more than one persistence-config element  
Cause: The configuration document contained more than one persistence-config element.  
Action: Correct the configuration document to contain a valid persistence-config element.

Level: 1  
Type: ERROR  
Impact: Programmatic  

MDS-02602: configuration migration failure because it contains more than one metadata-stores element  
Cause: The configuration document contained more than one metadata-stores element
**Action:** Correct the configuration document to be a valid 10.1.3 configuration document.

**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

**MDS-02603:** configuration migration failure because it contains an invalid metadata-store element

**Cause:** The configuration document contained an invalid metadata-store element.

**Action:** Correct the configuration document to be a valid 10.1.3 configuration document.

**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

**MDS-02700:** The resource "[0]" cannot be updated by tenant "[1]".

**Cause:** The given resource could not be updated by the current tenant because it was not available in current tenant’s scope.

**Action:** Verify that the resource is being updated in the same scope of the tenant who updates the resource.

**Level:** 1
**Type:** ERROR
**Impact:** Programmatic

**MDS-02702:** Tenant scoped PManager instance cannot be created for tenant [0] because given PManager instance does not have multitenancy enabled.

**Cause:** The PManager instance used here did not have multitenancy enabled but an attempt was made to create tenant scoped PManager instance.

**Action:** Verify that the PManager instance being passed has multitenancy support enabled.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

**MDS-02703:** Tenant scoped PManager cannot be created for tenant "null".

**Cause:** The PManager instance used here had multitenancy support enabled but an attempt was made to create tenant scoped PManager instance with "null" tenant.

**Action:** Create scoped PManager instance for valid tenant id.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

**MDS-02704:** Cannot create tenant scoped PManager instance using another tenant scoped PManager instance.
Cause: An attempt was made to create tenant scoped PManager using another scoped PManager instance.
Action: Create a tenant scoped PManager using an unscoped PManager instance.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02705: Cannot create PContext using an unscoped PManager instance.
Cause: Creating PContext using an unscoped PManager instance was not allowed.
Action: Use PManager instance that is scoped for a tenant to create PContext.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02706: Cannot create PTransaction using an unscoped PManager instance.
Cause: Creating PTransaction using an unscoped PManager instance was not allowed.
Action: Use PManager instance that is scoped for a tenant to create PTransaction.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02707: PContext with tenant id {0} cannot be used in scoped PManager with tenant id {1}.
Cause: Tenant id attached to PContext and the tenant id of tenant scoped PManager to which it was passed did not match.
Action: Create PContext from the tenant scoped PManager to which it is passed.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02708: PManager instance is being used after it has been released.
Cause: PManager instance was being used after it had been released.
Action: Create a new PManager.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02709: Configuration change operation "{0}" on scoped PManager is not allowed for the tenant {1}. Only global tenant is allowed to change the configuration settings in PManager.
Cause: A non global tenant attempted to change configurations in scoped PManager.
Action: Use global tenant scoped PManager to change the configuration settings.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02710: Operation "{0}" is not allowed in unscoped PManager.
Cause: A tenant aware operation was invoked in an unscoped PManager instance.
Action: Use a global or tenant scoped PManager to do the operation.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02711: No tenant operations are allowed on MetadataStoreConnection not associated with any tenant id.
Cause: A tenant aware operation was invoked in MetadataStoreConnection to database store which did not have any tenant id attached.
Action: Create a new MetadataStoreConnection with a valid tenant id.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02712: The operation {0} is not allowed in this MetadataStoreConnection to database store because the MetadataStoreConnection is not attached to any tenant id.
Cause: A tenant aware operation was invoked in MetadataStoreConnection to database store which did not have any tenant id attached.
Action: Create a new MetadataStoreConnection with a valid tenant id.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02713: PContext associated with tenant {0} cannot be used with MetadataStoreConnection associated with different tenant {1}. Operation {2} failure.
Cause: The tenant id attached to PContext and MetadataStoreConnection did not match.
Action: Use PContext with same tenant id as the one attached to metadata store connection.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02714: Creating metadata store connection for tenant {0} is not allowed in non multitenant application.
Cause: An attempt was made to create metadata store connection for non global tenant in non multitenant application.
Action: Use global tenant id to create metadata store connection.
Level: 1  
Type: ERROR  
Impact: Programmatic

MDS-02715: No tenant scoped PManager instances can be created on already released PManager instance.
Cause: An attempt was made to create a tenant scoped PManager instance on already released PManager instance.
Action: Create new PManager instance using a PConfig then try creating scoped PManager instance.

Level: 1  
Type: ERROR  
Impact: Programmatic

MDS-02720: Cannot rename the document {0} to {1} as the new tenant scope does not match the original tenant scope.
Cause: The new name for the document was configured to a different tenant scope to the old document name.
Action: Provide a new valid document name that maps to the same tenant scope as the original document.

Level: 1  
Type: ERROR  
Impact: Programmatic

MDS-02721: PResource {0} for tenant {1} cannot be used with MetadataStoreConnection that is associated with different tenant {2}. Operation {3} failure.
Cause: The tenant ids of the PResource and the MetadataStoreConnection did not match.
Action: Use PResource with same tenant id of the one attached to metadata store connection.

Level: 1  
Type: ERROR  
Impact: Programmatic

MDS-02722: Mar Lineage can be created by global tenant only. Creating MAR lineage is not supported for tenant {0}.
Cause: A non-global tenant attempted to create MAR lineage which is not supported. MAR lineage creation is allowed only for global tenant currently.
Action: Create MAR lineage from global tenant context.

Level: 1  
Type: ERROR  
Impact: Programmatic

MDS-02723: Operation "{0}" is not supported in Sandbox currently.
Cause: Unsupported operation was invoked in Sandbox instance.
Action: This operation is not supported in Sandbox currently.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02724: The ResourceName that is attached to tenant scope {0} is not allowed in SandboxPTransaction that is attached to the different tenant scope {1}. Operation (2) failure.
Cause: Tenant scope for ResourceName and SandboxPTransaction did not match.
Action: Use ResourceName with same tenant scope of the one attached to SandboxPTransaction.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02725: The Label {0} that is attached to tenant {1} is not allowed in MetadataStoreConnection that is attached to different tenant {2}. Operation (3) failure.
Cause: Tenant id for Label and MetadataStoreConnection did not match.
Action: Use label with same tenant id of the one attached to MetadataStoreConnection.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02726: The tenant {0} that is attached to PDocument {1} is not allowed in SandboxPTransaction that is attached to different tenant {2}. Operation (3) failure.
Cause: Tenant id for PDocument and SandboxPTransaction did not match.
Action: Use PDocument with same tenant id of the one attached to SandboxPTransaction.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02727: The tenant {0} that is attached to Label {1} is not allowed in SandboxPTransaction that is attached to different tenant {2}. Operation (3) failure.
Cause: Tenant id for Label and SandboxPTransaction did not match.
Action: Use label with same tenant id of the one attached to SandboxPTransaction.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02728: The tenant {0} that is attached to {1} {2} is not allowed in Sandbox that is attached to different tenant {3}. Operation (4) failure.
Cause: Tenant id attached and Sandbox did not match.
**Action:** Use tenant id same as the one attached to Sandbox.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-02729: The tenant scope {0} that is attached to {1} is not allowed in Sandbox that is attached to the different tenant scope {2}. Operation {3} failure.  
**Cause:** Tenant scope attached and Sandbox did not match.  
**Action:** Use tenant scope same as the one attached to Sandbox.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-02730: Error in deprovisioning the tenant {0}. Unable to delete the resources in {1}.  
**Cause:** Tenant resources might be on read-only store.  
**Action:** Verify that tenant resources exist on a writable store.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-02731: Tenant specific operations cannot be done in multitenant disabled environment for tenant {0}.  
**Cause:** An attempt was made to do tenant specific operations in Multitenant disabled environment.  
**Action:** Enable the multitenant feature.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-02732: TenantId cannot be created for the value "{0}".  
**Cause:** TenantId could not be created with negative values or a value with more than 18 digits.  
**Action:** Use positive values with max of 18 digits in decimal format to create a valid TenantId object.

**Level:** 1  
**Type:** ERROR  
**Impact:** Programmatic

MDS-02733: Rename across multiple tenant stripes is not supported on this store.  
**Cause:** The store does not support writing to multiple tenant stripes or multitenancy is not enabled.  
**Action:** Enable the multitenant feature.

**Level:** 1  
**Type:** ERROR
Impact: Programmatic

MDS-02734: Unable to get TenantInfo for TenantId "{0}" from tenant management system.

Cause: Tenant is not yet provisioned or was deprovisioned from the POD.

Action: Check tenant provisioning system to ensure tenant is provisioned.

Level: 1
Type: ERROR
Impact: Configuration

MDS-02735: Label "{0}" cannot be deleted since it is attached to sandbox(es): "{1}".

Cause: An attempt was made to delete a label that is attached to active sandbox(es).

Action: Make sure that there are no sandboxes attached to label to be deleted. Refer to FMW Enterprise Manager MDS repository home page to check labels that are attached to a sandbox.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02736: Failed to update purge configuration value for tenant {0}.

Cause: An error occurred while updating purge configuration.

Action: Retry the operation. Also, refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-02737: Prevented potential duplicate tip version for document "{0}". Original request was to update document with PATH_DOC_ID={1}, PATH_VERSION={2} and PATH_LOW_CN={3}, updated latest tip version having PATH_DOC_ID={4}, PATH_VERSION={5} PATH_LOW_CN={6} to avoid duplicate tip version.

Cause: MDS detected code flow which could have lead to duplicate tip issue.

Action: Previous tip document is replaced forcefully with new content, validate content of the document.

Level: 1
Type: WARNING
Impact: Programmatic

MDS-02738: Database based metadata repository initialization failure because of invalid MDS database schema at "{0}".

Cause: Configured Database details refer to invalid or non-MDS schema.

Action: Configure a valid MDS database schema created using Repository Creation Utility

Level: 1
Type: ERROR
Impact: Configuration
MDS-02739: MDS Partition with ID {0} does not exist in the database repository
Cause: This could be caused by deleting the partition while still being used by application.
Action: Ensure partition is deleted only when not in use. To resolve the current issue, restart the application or server.
Level: 1

Type: ERROR
Impact: Programmatic
MDS-02740: MDS repository version for tenant "{0}" is not same as Global MDS repository version. Repository version for tenant is "{1}" whereas GLOBAL repository version is "{2}".
Cause: MDS Repository version for Tenant is not same as Global MDS repository version
Action: Upgrade the MDS repository to the required version so that Global and Tenant repository versions are same.
Level: 1

Type: ERROR
Impact: Configuration
MDS-02741: The metadata changes cannot be written to underlying store because read-only mode is enabled in the configuration.
Cause: An attempt to change metadata was made while changes were disabled for maintenance operations.
Action: Reconfigure the application to not specify read-only mode in the configuration and use a writable metadata store to persist metadata changes.
Level: 1

Type: ERROR
Impact: Configuration
MDS-02742: Instance of {0} is being used after it has been released.
Cause: Instance of a MDS object was used after it was released.
Action: Create a new instance.
Level: 1

Type: ERROR
Impact: Programmatic
MDS-02743: Error deleting partition {0} in repository {1}.
Cause: The directory or partition doesn't exist.
Action: Verify that the metadata path or partition for the repository exists.
Level: 1

Type: ERROR
Impact: Configuration
MDS-02744: Failed to delete directory {0}.
Cause: The specified directory was invalid, read only or was in use and could not be deleted.
Action: Check exception message in logs for the exception stack and underlying cause.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02800: The label "{0}" cannot be provided as null for label based transfer.
Cause: The label was provided as null for label based transfer.
Action: Provide valid label name for label based transfer.
Level: 1
Type: ERROR
Impact: Configuration

MDS-02801: Document {0} with scope {1} cannot be transferred by tenant {2}.
Cause: The given document could not be transferred from source store by current tenant because the document was not in the scope of current tenant.
Action: Ensure that document being transferred mapped to current tenant scope.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02802: Transfer is not supported for multitenant MDSInstance with file store.
Cause: Either source or target MDSInstance has multitenancy enabled and configured with file store.
Action: Use a non multitanant MDSInstance with file store.
Level: 1
Type: ERROR
Impact: Configuration

MDS-02803: List of patterns to select the MOs are either empty or null.
Cause: List of MOPatterns are empty or null.
Action: Ensure that valid list of MOPatterns are provided.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02804: Layer name "{0}" configured in CustLayerFilter to remove customizations, contains patterns.
Cause: Layer name contains patterns.
Action: Ensure that layer name doesn't contain any patterns.
Level: 1
**Type:** ERROR  
**Impact:** Programmatic

**MDS-02805:** Import Metadata With Exact Copy is allowed only from archive.  
**Cause:** Source MetadataStore was not archive.  
**Action:** Use an archive as source store.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-02806:** Source archive is invalid because it is missing the export criteria metadata file.  
**Cause:** MetadataFile containing the export criteria was missing in the source archive  
**Action:** Import from an archive which has metadata file.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-02807:** Import Metadata With Exact Copy is allowed only to Database repository  
**Cause:** Target MetadataStore was not Database repository  
**Action:** Use Database repository as target for import.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-02808:** Category with which Export Criteria is written in the archive file is different from the one which is used to get ExportCriteriaReader  
**Cause:** Wrong category was used to get Export Criteria Reader.  
**Action:** Use right category.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-02809:** Import Metadata With Exact copy operation is not supported when export criteria used to generate source archive contains fromLabel or toLabel conditions.  
**Cause:** Export parameters fromLabel or toLabel were specified to generate archive that was acting as source for Import Metadata With Exact Copy Operation.  
**Action:** Use an archive MetadataStore that was exported without fromLabel or toLabel specified.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration
MDS-02810: Transfer operation with TransferType "[0]" has been aborted and rolled back because too many documents failed.
Cause: Operation failed for high number of documents.
Action: Check the server logs to identify root cause, rerun the operation after correcting the issue in the system environment.
Level: 1
Type: ERROR
Impact: Other

MDS-02811: Wrong TransferType [0] is passed in for Sandbox [1]
Cause: TransferType and TransferParams which is created for Sandbox transfer doesn't match.
Action: Supply the right TransferType.
Level: 1
Type: ERROR
Impact: Configuration

MDS-02812: Parameter [0] has null values in it.
Cause: Parameter contains null values.
Action: Ensure that the indicated parameter does not contain null values when the method is called.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-02813: Parameter TransferOptions must be set when transferBaseDocument is set to false.
Cause: Filtering out base documents is supported only when TransferOptions is set.
Action: Ensure that TransferOptions is set when transferBaseDocument is set to false.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-05786: Unable to deploy the metadata archive: [0].
Cause: Metadata archive (MAR) is corrupt.
Action: Validate that the metadata archive (MAR) is valid and readable.
Level: 1
Type: ERROR
Impact: Configuration

MDS-05787: Partition name is not specified in adf-config.xml file.
Cause: A property with name partition-name was not found as a child of the metadata-store element.
Action: Specify the target partition as a child property of the metadata-store element in adf-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

MDS-05788: Unable to find the JNDI datasource in the file adf-config.xml.
Cause: A property with name jndi-datasource was not found as a child of the metadata-store element.
Action: Specify the JNDI datasource a child property of the metadata-store element in adf-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

MDS-05789: Unable to deploy the metadata archive.
Cause: Metadata archive (MAR) was not found.
Action: Ensure that the metadata archive (MAR) is packaged with the application.

Level: 1
Type: ERROR
Impact: Configuration

MDS-05790: The metadata store definition is either missing or incorrectly specified in the application configuration.
Cause: The metadata store definition is either missing or incorrectly configured in the file adf-config.xml.
Action: Ensure that the metadata store definition is present and contains the correct repository configuration

Level: 1
Type: ERROR
Impact: Configuration

MDS-05791: An error occurred during the deployment of the metadata archive (MAR) [0].
Cause: Details are usually given in the cause exception. Look for messages describing the cause exception and take the appropriate action.
Action: Ensure that the metadata store configuration is correct.

Level: 1
Type: ERROR
Impact: Configuration

MDS-05792: Unable to load MDS configuration from "[0]"
Cause: The MDS configuration is either not defined or incorrect.
Action: Ensure that the MDS configuration is correctly defined.

Level: 1
Type: ERROR
Impact: Configuration

MDS-05793: Metadata path {2} for partition {1} of MDS file repository {0} specified in adf-config.xml is either invalid or unreachable.
Cause: The metadata path named in the error message for the MDS file repository partition cited in the error message was either invalid or unreachable.
Action: Ensure that the MDS file repository named in the error message is registered and that the metadata partition cited in the error message is configured with a valid metadata path in adf-config.xml.

Level: 1
Type: ERROR
Impact: Configuration

MDS-05794: Unable to load MDS persistence configuration from "{0}"
Cause: The MDS persistence configuration is either not defined or incorrect.
Action: Ensure that the MDS persistence configuration is correctly defined.

Level: 1
Type: ERROR
Impact: Configuration

MDS-05795: Invalid value "{0}" specified in the content-config of the application's configuration
Cause: Only restriction type CUSTOMIZATIONS is supported in content-config. It is only allowed with path "/" and no file extension.
Action: Ensure that the MDS persistence configuration is correctly defined.

Level: 1
Type: ERROR
Impact: Configuration

MDS-10001: Error:
Cause: An error occurred. Details are usually given in the accompanying messages.
Action: Look for messages describing the cause and take the appropriate action.

Level: 1
Type: ERROR
Impact: Data

MDS-10003: The specified {0} argument is null or empty.
Cause: A required program argument was null or empty.
Action: Record any accompanying exception messages and contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic
MDS-10009: The transfer of the document {0} is not successful.
Cause: Document transfer failed
Action: Examine any accompanying messages to decide if further action is required.
Level: 1
Type: WARNING
Impact: Data

MDS-10010: Deleting the document {0} is not successful.
Cause: Document deletion failed
Action: Examine any accompanying messages to decide if further action is required.
Level: 1
Type: WARNING
Impact: Data

MDS-10011: The operation on {0} has been rolled back. Total number of documents failed during the operation is {1}.
Cause: The transfer was rolled back
Action: Examine any accompanying messages to decide if further action is required.
Level: 1
Type: WARNING
Impact: Data

MDS-10012: The operation has failed.
Cause: The operation has failed.
Action: Examine any accompanying messages to decide if further action is required.
Level: 1
Type: WARNING
Impact: Data

MDS-10013: {0} operation started.
Cause: Transfer started.
Action: Transfer started, no action required.
Level: 1
Type: NOTIFICATION
Impact: Data

MDS-10014: {0} is completed. Total number of documents successfully processed : {1}, total number of documents failed : {2}.
Cause: Transfer complete.
Action: Check any accompanying messages to decide if any action is required.
Level: 1
Type: NOTIFICATION
Impact: Data
MDS-10015: Failure occurred while committing the {0} operation. The operation has been rolled back.
Cause: Failure occurred while committing the operation.
Action: Examine any accompanying messages to decide if further action is required.
Level: 1
Type: ERROR
Impact: Data
MDS-10016: The operation on {0} has been rolled back. The post transfer label {1} could not be created.
Cause: Failure occurred when creating the post transfer label.
Action: Examine any accompanying messages to decide if further action is required.
Level: 1
Type: ERROR
Impact: Data
MDS-10017: The target store does not support deployment management. Given application name "[0]" and deployment module name "[1]" could not be persisted as deployment information in store.
Cause: The target store does not support deployment management.
Action: No action required. The documents will be transferred without the deployment information attached. If you want to store deployment information as well, configure a metadata store that supports deployment management, typically a DB store.
Level: 1
Type: WARNING
Impact: Data
MDS-10018: The transfer restriction [0] is not supported in target store. All the documents will be transferred to target store.
Cause: Given transfer restriction is not supported in target store.
Action: No action required. The given restriction will not be applied to the transfer, all the documents will be transferred to target store.
Level: 1
Type: WARNING
Impact: Data
MDS-10019: The deployment information for application name "[0]" and module name "[1]" ignored since transfer operation is of type "[2]."
Cause: The deployment information will not be processed in transfer operation type other than "Deployment."
Action: No action required. Given deployment information will not be processed in the current transfer operation.

Level: 1
Type: WARNING
Impact: Data

MDS-10020: Querying checksum data from target repository to avoid transferring unchanged documents.
Cause: To apply transfer restriction CHANGED, transfer queries the target repository to check whether documents being transferred already exist with same content.
Action: No action required.

Level: 1
Type: NOTIFICATION
Impact: Data

MDS-10022: Query to get the checksum of the documents from target repository completed successfully.
Cause: To apply transfer restriction CHANGED, transfer queries the target repository to check whether documents being transferred already exist with same content.
Action: No action required.

Level: 1
Type: NOTIFICATION
Impact: Data

MDS-10023: No valid exclusion rules are specified in mds-transfer-config.xml to preserve documents in target store.
Cause: No valid namespaces or metadata object names specified in /meta-inf/mds-transfer-config.xml to preserve the documents in target store.
Action: No action required.

Level: 1
Type: WARNING
Impact: Data

MDS-10024: Preparing the list of documents to be excluded during transfer as per the configuration given in mds-transfer-config.xml.
Cause: To preserve the documents in target store as specified in the given /meta-inf/mds-transfer-config.xml, MDSTransfer prepares the list of documents to be excluded by looking at source and target stores.
Action: No action required.

Level: 1
Type: NOTIFICATION
Impact: Data
MDS-10025: Following metadata paths are configured in mds-transfer-config.xml to preserve existing documents under this metadata path in target repository. Configured metadata paths are as follows {0}:

Cause: Some metadata paths are configured in mds-transfer-config.xml to preserve existing documents in target repository.

Action: No action required.

Level: 1
Type: NOTIFICATION
Impact: Other

MDS-10026: Following Metadata object names are configured in mds-transfer-config.xml to preserve existing metadata objects with same name in target repository. Configured metadata object names are {0}:

Cause: Some metadata object names are configured in mds-transfer-config.xml to preserve existing documents in target repository.

Action: No action required.

Level: 1
Type: NOTIFICATION
Impact: Other

MDS-10027: To preserve documents in target store, the following documents from source store are marked as excluded by transfer {0}.

Cause: To preserve documents in target store, some documents from source store are marked as excluded by transfer.

Action: No action required.

Level: 1
Type: NOTIFICATION
Impact: Other

MDS-10030: Sandbox {0} created as part of Import operation is not destroyed after import failed.

Cause: A Critical Write error on database side has occurred. Look for specific exception in the log file.

Action: Destroy unused sandbox from metadata repository. Contact application administrator for assistance.

Level: 1
Type: NOTIFICATION
Impact: Other

MDS-10031: Value provided in {0} in CustLayerUsage or CustLayerFilter is not properly encoded. Passed in value will considered as it is without interpreting intended encoded value.

Cause: Passed in value is not proper hexadecimal encoded value

Action: No action required.

Level: 1
Type: WARNING
Impact: Data

MDS-10032: Transfer operation with transfer type {0} ignoring document {1} because MDSInstance {2} reported it as not existing.
Cause: MDSTransfer is configured to ignore such document.
Action: No action required.

Level: 1
Type: WARNING
Impact: Programmatic

MDS-10033: Transfer operation with transfer type {0} has been rolled back because {1} documents failed with exceptions.
Cause: Operation failed for large number of documents due to exceptions.
Action: Check the server logs to identify root cause, rerun the operation after correcting the issue in the system environment.

Level: 1
Type: ERROR
Impact: Other

MDS-10034: Polling for store {0} failed - {1}. Polling will retry when the polling interval has elapsed.
Cause: The polling query was unable to run. If this is a temporary condition, polling should recover automatically once the error condition is resolved.
Action: Polling will be retried. If problem persists enable tracing for oracle.mds.dbstore to get full stack trace and check datasources.

Level: 1
Type: WARNING
Impact: Other

MDS-11001: The type information for "{0}" is not obtainable though the document exists in the MetadataStore.
Cause: Could not get type information for a document, a possibly non-wellformed XML document.
Action: Examine the document

Level: 1
Type: WARNING
Impact: Other

MDS-11002: The type information for "{0}" is not obtainable because of exception "{1}"
Cause: Failed to get type information because an exception was raised.
Action: Examine the exception and the document.

Level: 1
Type: WARNING
Impact: Data
MDS-11003: Failed to force timestamp advance on file {0}: original timestamp = {1}, new timestamp = {2}.
Cause: Failed to advance the timestamp on a file which is being saved.
Action: Examine the file and its permissions.
Level: 1
Type: WARNING
Impact: Data

MDS-11006: Directory {0} does not exist.
Cause: The value of a name condition package did not have a corresponding file system directory.
Action: Check if the directory was expected and determine why it is not present.
Level: 1
Type: NOTIFICATION
Impact: Files

MDS-11007: Skipping directory {0} because {1} does not match the condition.
Cause: The query considered the given directory, but it could only contain documents that would not match the query.
Action: If you expected results from the directory, check that the query is correctly specified.
Level: 1
Type: NOTIFICATION
Impact: Programmatic

MDS-11008: Skipping directory {0} because it is a filestore root.
Cause: The query considered the directory, but it was another root path of the metadata store. This can arise when file store configuration includes multiple root paths and one of these is contained in another.
Action: If you expected results from the directory, check that the file store is configured correctly.
Level: 1
Type: NOTIFICATION
Impact: Files

MDS-11009: Skipping directory {0} because {1} is not a valid package name.
Cause: The query skipped the directory because the corresponding package name is invalid.
Action: If you expected results from the directory, check the directory name for validity.
Level: 1
Type: NOTIFICATION
Impact: Programmatic

MDS-11010: Document cache {0} exceeds its maximum number of entries {1}, so the cache is cleared.
Cause: The document cache exceeded its defined maximum size so it was cleared. If memory allows, the cache should be large enough for all documents for optimum performance but this is not required.
Action: Edit the adf-config.xml file and increase the size of the document cache.

Level: 1
Type: NOTIFICATION
Impact: Configuration

MDS-11011: Attempting to get failover connection to retry the operation because the database connection failed.
Cause: The connection to the database failed.
Action: No action is required. The database is configured with FCF so failover will be attempted.

Level: 1
Type: NOTIFICATION
Impact: Configuration

MDS-11012: Cache collision has been detected when adding key {0}, label set {1}, sandbox name {2}, scope {3}.
Cause: The described document was being added to the cache, but it was already present. This can be caused by an incorrect miss in the preceding lookup, or very rarely by the document having been just inserted by another thread.
Action: If this occurs frequently, contact Oracle Support Services.

Level: 1
Type: NOTIFICATION
Impact: Programmatic

MDS-11013: Cannot store the object of type {0} in the Java Object Cache because the cache or cache region is full
Cause: A CacheFullException or RegionFullException was reported when attempting to store an object in the Java Object Cache.
Action: Consider increasing the size of the configured MDS Cache by modifying the cache-config entry in adf-config.xml.

Level: 1
Type: NOTIFICATION
Impact: Configuration

MDS-11014: Purge-Repos Diagnostics [auto-purge, partition-name, partition-id, tenant-id, #versions purged]: {0}, {1}, {2}, {3}, {4}.
Cause: An auto-purge occurred on a metadata-store.
Action: No action required.

Level: 1
Type: NOTIFICATION
Impact: Other
MDS-11016: MDS JSP Integration has been configured in Developer Mode to allow changes to files to be detected. Do not use this mode for production or performance testing.

Cause: Developer Mode is configured as a servlet initialization parameter either explicitly or because the application is being run within JDeveloper.

Action: No action required.

Level: 1

Type: NOTIFICATION

Impact: Configuration

MDS-11017: Started creating the final archive file at {0}.

Cause: ArchiveMetadataStore has started to create final archive file with all the changes done on the archive file so far.

Action: No action required.

Level: 1

Type: NOTIFICATION

Impact: Other

MDS-11018: The final archive file has been created successfully. The archive file is available at {0}.

Cause: ArchiveMetadataStore has created final archive file with all the changes done on the archive file so far.

Action: No action required.

Level: 1

Type: NOTIFICATION

Impact: Other

MDS-11019: The default CharSet {0} is not a unicode character set. File names with non-ASCII characters may not operate as expected. Check locale settings.

Cause: The Java default CharSet is used to convert file names to and from Java Strings. When this CharSet is a non-unicode character encoding, filenames that contain non-ASCII characters may not be correctly mapped to Java characters.

Action: Check the locale environment variable settings for the process that is running the JVM that MDS is running in to ensure that a UTF encoding is being used. For example, the LC_ALL and LANG settings may be relevant.

Level: 1

Type: WARNING

Impact: Configuration

MDS-11020: Cannot delete the intermediary archive file {0}.

Cause: The intermediary archive file could not be deleted.

Action: Try deleting the file outside of MDS.

Level: 1

Type: WARNING

Impact: Other
MDS-11023: MDS Remote Notifications: Coherence is not configured to use unicast and no cluster name is specified so remote notification is not enabled.

**Cause:** MDS remote notification only works if the Coherence configuration specifies unicast or a cluster name.

**Action:** Unicast can be set by either specifying a unicast-listener in your Coherence cluster-config or by system property tangosol.coherence.wk. A cluster-name can be set either as part of a member-identity in your cluster-config or by system property tangosol.coherence.cluster.

**Level:** 1

**Type:** WARNING

**Impact:** Configuration

MDS-11026: Ignoring the duplicate MDS component configuration file URL "{0}" found on the classpath.

**Cause:** A duplicate URL for an MDS component configuration file was found on the classpath.

**Action:** No action required.

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Configuration

MDS-11027: Some metadata is configured to be stored as xml-stream. However it will be ignored because no metadata store configured for this application supports storing metadata in that form.

**Cause:** xml-stream content type was configured for some metadata content, but no metadataStore supports the feature.

**Action:** No action required if not using xml-stream content type is acceptable. Otherwise, to enhance MDS repository performance, ensure that the metadata store supports xml-stream feature.

**Level:** 1

**Type:** WARNING

**Impact:** Configuration

MDS-11028: Some metadata is configured to be stored as xml-stream. However it will be ignored because the corresponding metadata store, with class name: {0}, repository name: {1}, partition name: {2}, does not support storing metadata in that form.

**Cause:** xml-stream content type was configured for some metadata content, but the metadata store did not support the feature.

**Action:** No action required if not using xml-stream content type is acceptable. Otherwise, to enhance MDS repository performance, ensure that the metadata store supports xml-stream feature.

**Level:** 1

**Type:** WARNING

**Impact:** Configuration
MDS-11029: MetadataStore configuration for metadata-store-usage "[0]" is invalid. However the MetadataStore is ignored because it is not referenced by any namespace mapping.

**Cause:** MetadataStore class or some of its properties were not valid.

**Action:** Ensure that the MetadataStore class exists and all required properties are valid.

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Configuration

MDS-11030: Failed to get schema version from registry for repository "[0]" because of exception: {1}

**Cause:** Either the DataSource definition for the repository is no longer valid or the MDS schema is not created using RCU.

**Action:** Ensure the DataSource connection is valid or the schema is created using RCU.

**Level:** 1

**Type:** WARNING

**Impact:** Configuration

MDS-11032: Registered grammar using remote schema "[0]". In design time (JDev) environment, it is recommended to use local resources.

**Cause:** Remote schema was referred with http URI. In design time environment, recommendation is to use local resources.

**Action:** Replace it with local copy of schema.

**Level:** 1

**Type:** WARNING

**Impact:** Configuration

MDS-11033: Duplicate mappings between namespace "[0]" and metadata store "[1]" are found in the persistence configuration.

**Cause:** There were more than one namespace to metadata store mappings for a given namespace in the persistence configuration.

**Action:** Correct the namespace mapping in persistence configuration to ensure that the namespace is mapped to only one metadata store.

**Level:** 1

**Type:** WARNING

**Impact:** Configuration

MDS-11034: The name [0] derived from JNDI will be registered as an MDS repository instead of the DataSource with the same name.

**Cause:** A JDBC DataSource and a JNDI have conflict in naming a MDS repository in the domain. MDS repository names must be unique within a domain.

**Action:** Find out which application is referencing the repository and the JNDI name. Resolve the naming conflict by removing the DataSource with same name only if it is unused.

**Level:** 1
Type: ERROR

Impact: Configuration

MDS-11100: MetadataObject.getBaseMO() found a mismatched CacheAccess in the cache. [refNoGUID={0}, guidRef={1}, mdxLookupKey={2}, isLabelledRead={3}, baseDocLabel={4}, setSandboxName={5}, cacheAccess={6}, doc={7}, name={8}, GUID={9}].

Cause: CacheAccess does not match the given MOReference/Guid combination. The metadata object will not be cached.

Action: Check the MOName and guid are correct and there are no duplicate GUIDs in the metadata store.

Level: 1

Type: WARNING

Impact: Other

MDS-11101: MetadataObject.getBaseMO() recursing too deep. [refNoGUID={0}, guidRef={1}, mdxLookupKey={2}, isLabelledRead={3}, baseDocLabel={4}, setSandboxName={5}, cacheAccess={6}, doc={7}].

Cause: CacheAccess does not match the given MOReference/Guid combination. The metadata object will not be cached.

Action: Check the data in the metadata store to determine the cause.

Level: 1

Type: WARNING

Impact: Other

MDS-11102: The MDS session was created by the ADF framework with a transaction key for its "single flush" feature, and the call to {0} is restricted to that framework. This call does not use that transaction key and although working now, will fail with an exception in future. To find the originator of the call, set the log level for logger "oracle.mds.transkey" to FINEST. Note that the ADF framework manages the MDS session created for the request so an explicit call to {0} should be removed.

Cause: A call was made to a restricted method on the MDS session and that call should be removed as it is liable to fail in later releases.

Action: Identify the caller and ensure that the call to this method is removed.

Level: 1

Type: WARNING

Impact: Other

MDS-11103: Failed to register dump classes.

Cause: Failed to register dump classes with DFW.

Action: Contact Oracle Support Services.

Level: 1

Type: WARNING

Impact: Other

MDS-11104: Content config mapping with path {0} contains reserved keyword "mdssys/cust/", use restrictionType="CUSTOMIZATIONS" instead.
Cause: The path of the content config mapping contains reserved keyword "mdssys/cust/".
Action: Change the content config mapping to use restrictionType="CUSTOMIZATIONS"

Level: 1
Type: WARNING
Impact: Configuration

MDS-90013: The metadata partition with name "[0]" does not exist in the metadata repository "[1]".
Cause: The metadata partition with the specified name was not found in the metadata repository.
Action: Create a metadata partition with the specified name in the metadata repository before trying this operation.

Level: 1
Type: ERROR
Impact: Topology

MDS-90014: cannot update the metadata because the application is read-only
Cause: No metadata update was made because the ReadOnlyMode attribute was enabled.
Action: Disable the ReadOnlyMode attribute of the target application configuration.

Level: 1
Type: ERROR
Impact: Topology

MDS-90015: The metadata repository with name "[0]" does not exist.
Cause: The metadata repository with the specified name was not found.
Action: Verify that the repository name is spelled correctly. If the repository does not exist, create one with the specified name and try again.

Level: 1
Type: ERROR
Impact: Topology

MDS-90016: There are no applications deployed to partition "[0]".
Cause: An attempt was made to perform this operation on a partition that is not associated with a deployed application.
Action: Specify a partition that is associated with a deployed application.

Level: 1
Type: ERROR
Impact: Topology

MDS-90017: The application to be used for this operation is not specified.
Cause: Could not determine which application configuration to use for this operation since there is more than one application deployed to partition "[0]".
Action: Specify an application that is deployed to partition "{0}" to be used for this operation.

Level: 1
Type: ERROR
Impact: Topology

MDS-90018: Application "{1}" is not deployed to partition "{0}".
Cause: The specified application was not deployed to the specified partition.
Action: Specify an application that is deployed to the partition.

Level: 1
Type: ERROR
Impact: Topology

MDS-90019: cannot set the user property on the driver: {0}
Cause: A problem occurred while setting the user property on the driver.
Action: Ensure that the database server is running properly.

Level: 1
Type: ERROR
Impact: Topology

MDS-90020: Metadata store cannot be assigned to server "{0}".
Cause: A problem occurred while assigning resource to the server.
Action: Ensure that the server is running properly.

Level: 1
Type: ERROR
Impact: Topology

MDS-90021: Metadata path {0} is invalid.
Cause: The path used to create a FileMetadataStore was invalid. It must point to a directory.
Action: Correct the metadata path.

Level: 1
Type: ERROR
Impact: Topology

MDS-90022: The host name of the database repository cannot be empty.
Cause: The host name of the database repository was empty or null.
Action: Use a valid host name.

Level: 1
Type: ERROR
Impact: Topology

MDS-90023: The database name of the database repository cannot be empty.
Cause: The database name of the database repository was empty or null.
MDS-90024: The user name of the database repository cannot be empty.
Cause: The user name of the database repository was empty or null.
Action: Use a valid user name.

MDS-90025: The password of the database repository cannot be empty.
Cause: The password of the database repository was empty or null.
Action: Use a valid password.

MDS-90026: The server name cannot be empty.
Cause: The server name was empty or null.
Action: Use a valid server name.

MDS-90027: cannot find server "[1]" to register the metadata repository "[0]"
Cause: The server name was invalid.
Action: Use a valid server name.

MDS-90028: Metadata repository with name "[0]" already exists.
Cause: Metadata repository with the specified name already exists.
Action: Verify that the repository name is spelled correctly. If the repository already exists, create one with a different name and try again.

MDS-90029: The metadata db repository with name "[0]" does not exist.
Cause: The metadata db repository with the specified name was not found.
Action: Verify that the db repository name is spelled correctly.
Level: 1  
Type: ERROR  
Impact: Topology

**MDS-90030:** The metadata file repository with name "\(0\)" does not exist.
**Cause:** The metadata file repository with the specified name was not found.
**Action:** Verify that the file repository name is spelled correctly.

Level: 1  
Type: ERROR  
Impact: Topology

**MDS-90031:** The JDBC resource of metadata db repository "\(0\)" cannot be found.
**Cause:** The JDBC resource was not found.
**Action:** Verify that the metadata db repository is set up correctly.

Level: 1  
Type: ERROR  
Impact: Topology

**MDS-90032:** The metadata store of metadata file repository "\(0\)" cannot be found.
**Cause:** The metadata store was not found.
**Action:** Verify that the metadata file repository is set up correctly.

Level: 1  
Type: ERROR  
Impact: Topology

**MDS-90033:** unknown DB vendor code: "\(0\)"
**Cause:** The DB vendor code is invalid.
**Action:** Use a valid DB vendor code, such as 0 (ORACLE), 1 (MSSQL), or 2 (IBMDB2).

Level: 1  
Type: ERROR  
Impact: Topology

**MDS-90034:** The source directory or archive "\(0\)" for importing metadata is invalid.
**Cause:** The directory or archive location used to import metadata was invalid. It must point to a valid, existing directory or archive.
**Action:** Correct the source directory or archive location.

Level: 1  
Type: ERROR  
Impact: Topology

**MDS-90035:** The target directory or archive "\(0\)" for exporting metadata is invalid.
**Cause:** The directory or archive location used to export metadata was invalid. It must point to a valid location.
**Action:** Correct the target directory or archive file location.
Level: 1  
Type: ERROR  
Impact: Topology

MDS-90036: The application does not have a valid MAR file path.  
Cause: The MAR path used to import MAR was invalid. It must point to a valid, existing MAR file.  
Action: Make sure the MAR file exists and is located in the correct directory of the application.

Level: 1  
Type: ERROR  
Impact: Topology

MDS-90037: The archive "[0]" does not contain valid contents.  
Cause: The archive used to import metadata was invalid. It must be to a valid, existing zip or jar file.  
Action: Make sure the archive is valid.

Level: 1  
Type: ERROR  
Impact: Topology

MDS-90038: The database authentication alias "[0]" already exists. To reuse the same authentication alias, try the operation again without specifying user and password.  
Cause: An attempt was made to configure a database authentication alias that already existed in Websphere server.  
Action: Delete the existing authentication alias and try again, or specify a new authentication alias, or reuse the existing authentication alias by not specifying user and password.

Level: 1  
Type: ERROR  
Impact: Topology

MDS-90039: The database authentication alias "[0]" cannot be found. To create the authentication alias, try the operation again with user and password specified.  
Cause: An attempt was made to use a database authentication alias that was not configured in Websphere server.  
Action: Make sure the specified database authentication alias is properly configured in Websphere server, or automatically create the authentication alias by specifying user and password.

Level: 1  
Type: ERROR  
Impact: Topology

MDS-90040: failed to connect to database  
Cause: An error occurred when trying to connect to database.
Action: Make sure the database connection details are correct. Look at the cause exception for more details.

Level: 1
Type: ERROR
Impact: Topology

MDS-90041: Customization layer values are not supported for "excludeCustFor" parameter.
Cause: One or more customization layer values was specified for "excludeCustFor" parameter.
Action: Make sure there are no customization layer values specified for "excludeCustFor" parameter.

Level: 1
Type: ERROR
Impact: Topology

MDS-90042: "[0]" is not a valid tenant name.
Cause: The specified tenant was not provisioned in the specified partition and repository.
Action: Specify a valid tenant name.

Level: 1
Type: ERROR
Impact: Configuration

MDS-90043: This operation cannot be performed by the tenant named "[0]". It can only be invoked by the "[1]" tenant.
Cause: The specified tenant was not provisioned in the partition and repository provided.
Action: Execute this operation as GLOBAL tenant.

Level: 1
Type: ERROR
Impact: Configuration

MDS-90044: This operation cannot be performed because the WebLogic edit session has been locked by a different user.
Cause: The WebLogic edit session has been locked by a different user.
Action: Retry the operation after the edit session lock is released.

Level: 1
Type: ERROR
Impact: Configuration

MDS-90045: MDS dump operation "[0]" failed.
Cause: Exception occurred during the execution of the command.
Action: Provide the required parameters for the command.

Level: 1
Type: ERROR
Impact: Data
MDS-90046: MDS Application runtime MBean for application "[0]" running in server "[1]" is not available. "[2]" operation failure.
Cause: MDS Application runtime MBean was not available in the server.
Action: Ensure the MDS Application runtime MBean for the application is available in the server. Ensure application name is correct.

Level: 1
Type: ERROR
Impact: Configuration
MDS-90047: The target archive name "[0]" is invalid. It must point to a local file name with a valid archive extension.
Cause: The archive location used for mds dump operation was invalid.
Action: Ensure target archive name is a valid local file name with valid archive extension.

Level: 1
Type: ERROR
Impact: Data
MDS-90048: The dump argument "[0]" is invalid. It cannot be an empty string.
Cause: A request to execute dump was made with an invalid argument.
Action: Ensure valid values are given for the dump arguments.

Level: 1
Type: ERROR
Impact: Data
MDS-90049: Exclusion of documents during exportMetadata is not supported for seeded documents.
Cause: It was invalid to specify excludeDocs while not setting excludeSeededDocs to true.
Action: Either set excludeSeededDocs to true, or unspecify excludeDocs.

Level: 1
Type: ERROR
Impact: Data
MDS-90050: ExportParameters can not be null for [0] operation.
Cause: ExportParameters with null value was not allowed.
Action: Specify a valid ExportParameters argument.

Level: 1
Type: ERROR
Impact: Data
MDS-90051: ImportParameters can not be null for [0] operation.
Cause: ImportParameters with null value was not allowed.
**Action:** Specify a valid ImportParameters argument.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-90052: Cannot deregister metadata repository "{0}" because it is based on a JNDI name of a consolidated data source.

**Cause:** The deregistration of a metadata repository that is based on a JNDI name of a consolidated data source is not allowed.

**Action:** Perform deregistration operation on a metadata repository that is based on a non-consolidated data source only.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-90053: Import Metadata With Exact copy operation is not supported when export operation used to generate source archive uses programmatic TransferListener.

**Cause:** Export parameter transferListener was specified to generate archive that was acting as source for Import Metadata With Exact Copy Operation.

**Action:** Use an archive MetadataStore that was exported without programmatic TransferListener specified.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-90054: The resource group "{0}" cannot not be found in "{1}" partition.

**Cause:** The specified resource group was not found in the current domain partition.

**Action:** Verify that the specified resource group is defined in the current domain partition.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-90055: The resource group must be specified to register a metadata repository at "{0}" partition.

**Cause:** The resource group was not specified to register a metadata repository at partition scope.

**Action:** Specify a resource group for registering a metadata repository at the domain partition containing that resource group.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

MDS-90056: {0} can not be null for {1} operation.
Cause: Null value was not allowed.
Action: Specify a valid argument.
Level: 1
Type: ERROR
Impact: Data

MDS-90057: The document name used in exportDocVersions operation is invalid.
Cause: Document pattern or empty document name was used.
Action: Use the exact full document path.
Level: 1
Type: ERROR
Impact: Data

MDS-90058: [0] operation is not permitted in Weblogic domain configured with consolidate schema or datasource.
Cause: It was unnecessary to register or deregister a metadata DB repository in consolidate Weblogic domain.
Action: Use pre-configured metadata DB repository.
Level: 1
Type: ERROR
Impact: Data

MDS-90143: "[0]" is not a valid component name.
Cause: The specified component name is invalid.
Action: Specify a valid audit component name that uses only letters.
Level: 1
Type: ERROR
Impact: Configuration

MDS-90144: Error registering audit event definitions for component "[0]".
Cause: The audit event definitions could not be registered.
Action: Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Configuration

MDS-90145: Error occurred when raising audit event "[0]" for component "[1]".
Cause: The audit event was not registered or an unknown error occurred in the auditing system.
Action: Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.
Level: 1
Type: ERROR
Impact: Configuration

MDS-90146: Error occurred when checking if "[0]" is auditable.
Cause: An unknown error occurred when checking if auditing is enabled for the component "[0]."
Action: Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Configuration

MDS-90147: Error occurred when checking if the component "[0]" is auditable.
Cause: An unknown error occurred when checking if auditing is enabled for the event "[1]" defined for the component "[0]."
Action: Refer to the error messages that describe the cause exception in the application logs for more information on the actual reason for failure.

Level: 1
Type: ERROR
Impact: Configuration

MDS-90243: Content auto merge failed for MO part "[0]" with change type "[1]" because its type is not registered for auto merge.
Cause: The specified MOType is not registered for auto merge functionality.
Action: Register the MOType for auto merge functionality.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-90244: Content auto merge failed for MO part "[0]" with change type "[1]" because its base document is not accessible for read from any configured metadata stores.
Cause: Base document is not accessible for read.
Action: Make sure base document is available for read through any of configured metadata stores.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-90245: Content auto merge failed for MO part "[0]" with change type "[1]" because both base and customization MOParts have conflicts and base MOPart is not a stub.
Cause: Base MOPart is not a stub document.
Action: This is unsupported case. Contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-90246: Content auto merge failed for MO part "(0)" with change type "(1)" because mainline contains conflicting change type "(2)" for the same MOPart.
Cause: There were conflicting changes for MetadataObject between sandbox and mainline and cannot be resolved by content auto merge.
Action: Contact Application Administrator to resolve these conflicts manually or perform the changes again in a new sandbox.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-90247: Content auto merge failed for MOPart "(0)" with change type "(1)", because conflicts identified for metadata object include changes for non tip or non configured customization layer "(2)".
Cause: Conflicts detected for given metadata object include changes for non tip or non configured customization layer.
Action: This is unsupported case. Contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-90248: Content auto merge failed for MetadataObject "(0)".
Cause: Content auto merge failed for specified MO.
Action: Please check each MOPart exception for detailed reasons.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-90249: Content auto merge failed for MetadataObject "(0)", because the MO constitutes more than one customization MOPart for the customization layer "(2)".
Cause: Customization layer yields multiple layer values.
Action: This is unsupported case. Contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-90251: Conflict resolution hook annotation is missing for MOType (0).
Cause: Conflict resolution policy was set to "callback" for the document type but associated Conflict resolution hook annotation configuration is missing.
Action: Record the accompanying error and contact the developers of the application.

Level: 1
Type: ERROR
Impact: Configuration
MDS-90252: Conflict resolution policy is either found missing or it's value is not set to "callback" for MOType {0}

Cause: Conflict resolution hook annotation was found in document type but conflict resolution policy configuration was either not supplied or the value was not set to "callback".
Action: Record the accompanying error and contact the developers of the application.

Level: 1
Type: ERROR
Impact: Configuration

MDS-90253: AutoMergePluginContext is null for AutoMergePlugin class {0}

Cause: AutoMergePluginContext was found as null in AutoMergePlugin instance.
Action: Record the accompanying error and contact the developers of the application.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-90254: Unable to get AutoMergePlugin for MOType "{0}", Parameter AutoMergePluginContext must have a value.

Cause: Parameter AutoMergePluginContext was null.
Action: Record the accompanying error and contact the developers of the application.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-90255: Conflict resolution hook class "{0}" cannot be instantiated for MOType "{1}"

Cause: An exception occurred while instantiating conflict resolution hook class.
Action: Record the accompanying error and contact the developers of the application.

Level: 1
Type: ERROR
Impact: Configuration

MDS-90256: Unable to get AutoMergePlugin instance from AutoMergePluginFactory for MOType "{0}".

Cause: AutoMergePluginFactory returned null for AutoMergePlugin.
Action: Record the accompanying error and contact the developers of the application.

Level: 1
Type: ERROR
Impact: Programmatic
MDS-90257: Unable to get AutoMergePluginFactory instance from ConflictResolutionHook for MOType "[0]".
Cause: ConflictResolutionHook returned null for AutoMergePluginFactory.
Action: Record the accompanying error and contact the developers of the application.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-90258: Conflict resolution hook class "[0]" cannot be instantiated to get merge handler for MOType "[1]"
Cause: An exception occurred while instantiating conflict resolution hook class to get merge handler.
Action: Record the accompanying error and contact the developers of the application.
Level: 1
Type: ERROR
Impact: Configuration

MDS-90259: Unable to get MergeHandler instance from MergeHandlerFactory for MOType "[0]".
Cause: MergeHandlerFactory returned null for MergeHandler.
Action: Record the accompanying error and contact the developers of the application.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-90260: Unable to get MergeHandlerFactory instance from ConflictResolutionHook for MOType "[0]".
Cause: MergeHandlerFactory returned null for MergeHandlerFactory.
Action: Record the accompanying error and contact the developers of the application.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-90343: Sandbox "[0]" Apply operation failed for MO part "[1]" since conflict were identified with mainline changes for MO Part "[2]" that violates the relationship and dependency constraints.
Cause: Sandbox changes violate some dependency constraints with mainline changes.
Action: Contact Application Administrator to resolve these conflicts manually or perform the changes again in a new sandbox.
Level: 1
Type: ERROR
Impact: Programmatic

MDS-90344: Sandbox "[0]" apply operation with content auto merge failed.
  Cause: Sandbox apply operation with auto merge failed.
  Action: Please check each MO exception for detailed reasons.

  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-90345: Failure to get conflicts for sandbox
  Cause: Target label is older than the sandbox mainline label.
  Action: Specify a target label which is later than current label.

  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-90346: Invalid SandboxUsage. The sandbox name "[0]" in sandboxUsage does not match with Sandbox instance being operated upon.
  Cause: Wrong sandbox name used while retrieving MDSSession for conflict resolution.
  Action: Use right SandboxUsage that was used earlier for making the sandbox changes.

  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-90347: Retry refresh operation on Sandbox "[0]" failed as it detected some unexpected mainline changes on MDSSession which is intended for conflict resolution, for following documents: [1]
  Cause: Unexpected mainline changes detected on MDSSession that was retrieved for conflict resolution during sandbox refresh operation.
  Action: Cancel mainline document changes from the MDSSession and retry the refresh operation.

  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-90348: This operation cannot continue as Refresh is in progress for Sandbox [0].
  Cause: Some other refresh operation might be in progress.
  Action: Cancel or End the in-progress refresh before trying this operation.

  Level: 1
  Type: ERROR
  Impact: Programmatic

MDS-90349: This operation cannot continue as Refresh operation is either not initiated OR already ended for Sandbox [0].
Cause: Sandbox beginRefresh() hasn’t been called.
Action: Invoke the beginRefresh() first before this operation.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-90350: This operation cannot continue as in progress refresh transaction is not yet completed for Sandbox {0}.
Cause: Sandbox refresh operation hasn’t ended using endRefresh() call.
Action: Invoke the endRefresh() before trying this operation.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-90351: Tip customization layer name and value are not defined for refresh operations for Sandbox {0}.
Cause: Tip customization layer name and value are not defined.
Action: Define tip customization layer name and value to perform sandbox refresh.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-90352: Refresh operation cannot be ended since there are pending conflicts to resolve for Sandbox {0}.
Cause: There are pending conflicts to resolve.
Action: Resolve the pending conflicts and try the operation again.

Level: 1
Type: ERROR
Impact: Programmatic

MDS-90500: Count of unresolved merge conflict(s) - {0}
Cause: One or more unresolved merge conflict(s) exists.
Action: For more details, use getUnresolvedMergeConflicts() method on MOPartChangeContentAutoMergeException instance.

Level: 1
Type: ERROR
Impact: Data

MDS-90501: Unexpected content auto-merge error
Cause: An unexpected content auto-merge error occurred.
Action: Please resolve the conflict before attempting auto-merge operation again.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-90502: Invalid input documents for content auto-merge operation.
  Cause: Invalid documents are provided to perform content auto-merge operation.
  Action: Provide valid documents.

Level: 1
Type: ERROR
Impact: Data

MDS-90503: Limited support available for XSD content auto-merge operation.
  Cause: Unable to auto-merge changes being made by the request or by another user done to XSD metadata object.
  Action: Please resolve the conflict before attempting auto-merge operation again.

Level: 1
Type: INCIDENT_ERROR
Impact: Programmatic

MDS-90504: No support to auto-merge updates done to elements with brittle local reference.
  Cause: Updates done on elements with brittle local reference.
  Action: Resolve the conflict before attempting auto-merge operation again.

Level: 1
Type: ERROR
Impact: Data

MDS-90505: Auto-merge synchronous XML tree walk failure occurred while handling following merge conflict - *{0}
  Cause: An error occurred in the MDSDocumentAutoMergePlugin.
  Action: Check for log messages. If the problem persists, contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Data

MDS-90506: No support to auto-merge move operation
  Cause: Encountered move operation while performing content auto-merge operation.
  Action: Resolve the conflict before attempting auto-merge operation again.

Level: 1
Type: ERROR
Impact: Data

MDS-90507: Type annotation "automerge" for child-list order preference on element with local reference "[0]" in metadata object "[1]" does not have valid value. Valid values are "childListOrderNotImportant" and "childListOrderImportant"
Cause: Child-list of the underlying element was modified as part of content auto-merge operation.

Action: Provide valid value for "automerge" type-annotation. Valid values are "childListOrderNotImportant" and "childListOrderImportant".

Level: 1
Type: ERROR
Impact: Data

MDS-90508: Type annotation automergeChildListOrderDefault set on element definition of root element in metadata object "[0]" does not have valid value. Valid values are "childListOrderNotImportant" and "childListOrderImportant".

Cause: Invalid value provided for automergeChildListOrderDefault type-annotation.

Action: Provide valid value for automergeChildListOrderDefault type-annotation. Valid values are "childListOrderNotImportant" and "childListOrderImportant".

Level: 1
Type: ERROR
Impact: Data

MDS-90540: Unable to automerge changes done to attribute on element "[0]" with local reference "{1}" since attribute "{2}" is inserted with different values "{3}" in the current transaction and "{4}" in another transaction.

Cause: Encountered element attribute automerge conflict while performing content automerge.

Action: Resolve the conflict before attempting automerge operation again.

Level: 1
Type: ERROR
Impact: Data

MDS-90541: Unable to automerge changes done to attribute on element "[0]" with local reference "{1}" since attribute "{2}" is updated with different values "{3}" in the current transaction and "{4}" in another transaction.

Cause: Encountered element attribute automerge conflict while performing content automerge.

Action: Resolve the conflict before attempting automerge operation again.

Level: 1
Type: ERROR
Impact: Data

MDS-90542: Unable to automerge changes done to attribute on element "[0]" with local reference "{1}" since attribute "{2}" is deleted in the current transaction but updated with value "{3}" in another transaction.

Cause: Encountered element attribute automerge conflict while performing content automerge.

Action: Resolve the conflict before attempting automerge operation again.

Level: 1
Type: ERROR
Impact: Data
Type: ERROR  
Impact: Data

MDS-90543: Unable to automerge changes done to attribute on element "(0)" with local reference "(1)" since attribute "(2)" is updated with value "(3)" in the current transaction but deleted in another transaction.

Cause: Encountered element attribute automerge conflict while performing content automerge.

Action: Resolve the conflict before attempting automerge operation again.

Level: 1

Type: ERROR  
Impact: Data

MDS-90550: Unable to automerge changes done to text content of element "(0)" with local reference "(1)" since its text content is inserted with different values "(2)" in the current transaction and "(3)" in another transaction.

Cause: Encountered text content element automerge conflict while performing content automerge.

Action: Resolve the conflict before attempting automerge operation again.

Level: 1

Type: ERROR  
Impact: Data

MDS-90551: Unable to automerge changes done to text content of element "(0)" with local reference "(1)" since its text content is updated with different values "(2)" in the current transaction and "(3)" in another transaction.

Cause: Encountered text content element automerge conflict while performing content automerge.

Action: Resolve the conflict before attempting automerge operation again.

Level: 1

Type: ERROR  
Impact: Data

MDS-90552: Unable to automerge changes done to text content of element "(0)" with local reference "(1)" since its text content is deleted in the current transaction but updated with value "(2)" in another transaction.

Cause: Encountered text content element automerge conflict while performing content automerge.

Action: Resolve the conflict before attempting automerge operation again.

Level: 1

Type: ERROR  
Impact: Data

MDS-90553: Unable to automerge changes done to text content of element "(0)" with local reference "(1)" since its text content is updated with value "(2)" in the current transaction but deleted in another transaction.

Cause: Encountered text content element automerge conflict while performing content automerge.
**Action:** Resolve the conflict before attempting automerge operation again.

**Level:** 1
**Type:** ERROR
**Impact:** Data

**MDS-90560:** Unable to automerge insertion of element "[0]" with local reference "[1]" under parent element "[2]" with local reference "[3]" since its fragment contents differ in the current transaction and in another transaction.

**Cause:** Encountered element insertion automerge conflict while performing content automerge.

**Action:** Resolve the conflict before attempting automerge operation again.

**Level:** 1
**Type:** ERROR
**Impact:** Data

**MDS-90561:** Unable to automerge insertion of merge-unit "[0]" with local reference "[1]" under parent element "[2]" with local reference "[3]" since its fragment contents differ in the current transaction and in another transaction.

**Cause:** Encountered merge-unit insertion automerge conflict while performing content automerge.

**Action:** Resolve the conflict before attempting automerge operation again.

**Level:** 1
**Type:** ERROR
**Impact:** Data

**MDS-90562:** Unable to automerge updates done to element "[0]" with local reference "[1]" under parent element "[2]" with local reference "[3]" since its fragment contents differ in the current transaction and in another transaction.

**Cause:** Encountered element update automerge conflict while performing content automerge.

**Action:** Resolve the conflict before attempting automerge operation again.

**Level:** 1
**Type:** ERROR
**Impact:** Data

**MDS-90563:** Unable to automerge updates done to merge-unit "[0]" with local reference "[1]" under parent element "[2]" with local reference "[3]" since its fragment contents differ in the current transaction and in another transaction.

**Cause:** Encountered merge-unit update automerge conflict while performing content automerge.

**Action:** Resolve the conflict before attempting automerge operation again.

**Level:** 1
**Type:** ERROR
**Impact:** Data

**MDS-90564:** Unable to automerge changes done to element "[0]" with local reference "[1]" under parent element "[2]" with local reference "[3]" since it is deleted in
the current transaction but its fragment contents are updated in another transaction.

**Cause:** Encountered element automerge conflict while performing content automerge.

**Action:** Resolve the conflict before attempting automerge operation again.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**MDS-90565:** Unable to automerge changes done to merge-unit "[0]" with local reference "[1]" under parent element "[2]" with local reference "[3]" since it is deleted in the current transaction but its fragment contents are updated in another transaction.

**Cause:** Encountered merge-unit automerge conflict while performing content automerge.

**Action:** Resolve the conflict before attempting automerge operation again.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**MDS-90566:** Unable to automerge changes done to element "[0]" with local reference "[1]" under parent element "[2]" with local reference "[3]" since its fragment contents are updated in the current transaction but this element is deleted in another transaction.

**Cause:** Encountered element automerge conflict while performing content automerge.

**Action:** Resolve the conflict before attempting automerge operation again.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**MDS-90567:** Unable to automerge changes done to merge-unit "[0]" with local reference "[1]" under parent element "[2]" with local reference "[3]" since its fragment contents are updated in the current transaction but this merge-unit is deleted in another transaction.

**Cause:** Encountered merge-unit automerge conflict while performing content automerge.

**Action:** Resolve the conflict before attempting automerge operation again.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data

**MDS-90568:** Unable to automerge changes done to element "[0]" with local reference "[1]" since it is deleted in the current transaction but moved under a different parent in another transaction.

**Cause:** Encountered element automerge conflict while performing content automerge.
**Action:** Resolve the conflict before attempting automerge operation again.

**Level:** 1
**Type:** ERROR
**Impact:** Data

**MDS-90569:** Unable to automerge insertion of element with local reference "(0)" in the current transaction since it is inserted under a different parent in another transaction.
**Cause:** Encountered element automerge conflict while performing content automerge.
**Action:** Resolve the conflict before attempting automerge operation again.

**Level:** 1
**Type:** ERROR
**Impact:** Data

**MDS-90570:** Unable to automerge insertion of root element "(0)" with local reference "(1)" since its fragment contents differ in the current transaction and in another transaction.
**Cause:** Encountered element insertion automerge conflict while performing content automerge.
**Action:** Resolve the conflict before attempting automerge operation again.

**Level:** 1
**Type:** ERROR
**Impact:** Data

**MDS-90571:** Unable to automerge insertion of root merge-unit "(0)" with local reference "(1)" since its fragment contents differ in the current transaction and in another transaction.
**Cause:** Encountered merge-unit insertion automerge conflict while performing content automerge.
**Action:** Resolve the conflict before attempting automerge operation again.

**Level:** 1
**Type:** ERROR
**Impact:** Data

**MDS-90572:** Unable to automerge updates done to root element "(0)" with local reference "(1)" since its fragment contents differ in the current transaction and in another transaction.
**Cause:** Encountered element update automerge conflict while performing content automerge.
**Action:** Resolve the conflict before attempting automerge operation again.

**Level:** 1
**Type:** ERROR
**Impact:** Data
MDS-90573: Unable to automerge updates done to root merge-unit "[0]" with local reference "[1]" since its fragment contents differ in the current transaction and in another transaction.
Cause: Encountered merge-unit update automerge conflict while performing content automerge.
Action: Resolve the conflict before attempting automerge operation again.
Level: 1
Type: ERROR
Impact: Data

MDS-90574: Unable to automerge changes done to element "[0]" with local reference "[1]" since it is moved under a different parent in the current transaction but deleted in another transaction.
Cause: Encountered element automerge conflict while performing content automerge.
Action: Resolve the conflict before attempting automerge operation again.
Level: 1
Type: ERROR
Impact: Data

MDS-90590: Unable to automerge updates done to element "[0]" with local reference "[1]" since its child order differs between the current transaction and another transaction.
Cause: Encountered child order conflict while performing content automerge.
Action: Resolve the conflict before attempting automerge operation again.
Level: 1
Type: ERROR
Impact: Data

MDS-91001: MDS domain runtime MBean is not available. "[0]" operation failure.
Cause: MDS domain runtime MBean was not available in the server.
Action: Ensure the MDS domain runtime MBean is available in the server.
Level: 1
Type: ERROR
Impact: Configuration

MDS-91002: MDS Application runtime MBean for "[0]" is not available. "[1]" operation failure.
Cause: MDS Application runtime MBean was not available in the server.
Action: Ensure the MDS Application runtime MBean for the application is available in the server.
Level: 1
Type: ERROR
Impact: Configuration
MDS-91003: Multiple MDSAppRuntimeMBean exist for "[0]". To execute the command, parameter "applicationVersion" is required. "[1]" operation failure.
Causes: Multiple MDSAppRuntimeMBean for the application were found in the server.
Action: Provide the 'applicationVersion' parameter.
Level: 1
Type: ERROR
Impact: Configuration

MDS-91004: MDS domain runtime MBean commands can be executed only from the Admin server. "[0]" operation failure.
Causes: WLST was not connected to the Admin server.
Action: Connect to an Admin server before executing the command.
Level: 1
Type: ERROR
Impact: Configuration

MDS-91005: No connection to a "[0]" server exists. The operation "[1]" can be executed only in the online mode.
Causes: Command was executed in the offline mode.
Action: Ensure WLST is connected to the server.
Level: 1
Type: ERROR
Impact: Configuration

MDS-91006: Expecting a "[0]" for parameter "[1]" but encountering "[2]". "[3]" operation failure.
Causes: Parameter type passed to the command was not correct.
Action: Ensure the correct type of parameters are passed to the command.
Level: 1
Type: ERROR
Impact: Data

MDS-91007: dbVendor should be one of ORACLE, MSSQL, IBMDB2, or MYSQL. "[0]" operation failure.
Causes: dbVendor value was not correct.
Action: Ensure the dbVendor value is one of ORACLE, MSSQL, IBMDB2, or MYSQL.
Level: 1
Type: ERROR
Impact: Data

MDS-91008: The "[0]" parameter is required. Provide a valid value and retry the operation.
Causes: Required parameter for the command was not given.
Action: Provide the required parameters for the command.
Level: 1
Type: ERROR
Impact: Data

MDS-91009: Operation "{0}" failure.
Cause: Exception occurred during the execution of the command.
Action: Provide the required parameters for the command.

Level: 1
Type: ERROR
Impact: Data

MDS-91010: The "adf-config" element is not available in the given archive file. "{0}" operation failure.
Cause: The "adf-config" element is not available in the given archive file.
Action: Ensure the "adf-config" element is available in the adf-config.xml of the given archive file.

Level: 1
Type: ERROR
Impact: Configuration

MDS-91011: No "mds-config" element exists in the adf-config.xml of the given archive. "{0}" operation failure.
Cause: No mds-config element existed in the adf-config.xml file of the archive file.
Action: Ensure the "mds-config" element is available in the adf-config.xml file.

Level: 1
Type: ERROR
Impact: Configuration

MDS-91012: Metadata repository connection type value should be either "File" or "DB". "{0}" operation failure.
Cause: Metadata repository connection type value is not correct.
Action: Ensure the metadata repository connection type value is either 'File' or 'DB'.

Level: 1
Type: ERROR
Impact: Data

MDS-91013: For the metadata repository"s DB connection type, JNDI location is a required parameter. "{0}" operation failure.
Cause: JNDI location not provided for DB connection type.
Action: Provide the JNDI location string while updating the repository connection to DB.

Level: 1
Type: ERROR
Impact: Data
MDS-91014: For the metadata repository"s File connection type, path location is a required parameter. "[0]" operation failure.
Cause: The path value was not provided for File connection type.
Action: Provide the path location string while updating the repository connection to File.
Level: 1
Type: ERROR
Impact: Data

MDS-91015: All parameters are required to update shared metadata repository configuration in adf-config.xml. At present, source archive has no connection details for the namespace "[0]". "[1]" operation failure.
Cause: Complete connection information was not provided to set the shared repository for the given namespace.
Action: Provide complete connection information in case the adf-config.xml file does not have any metadata repository connection information for the given namespace already.
Level: 1
Type: ERROR
Impact: Data

MDS-91016: All parameters are required to define new application metadata repository configuration in adf-config.xml. The source archive configuration does not contain any application metadata repository at present. "[0]" operation failure.
Cause: Complete connection information was not provided to set the application target repository.
Action: Provide complete connection information in case the adf-config.xml does not have any metadata repository connection information for the application target repository already.
Level: 1
Type: ERROR
Impact: Data

MDS-91017: The given namespace "[0]" to set the shared repository is not valid. Ensure that the namespace is available in the adf-config.xml file and it is not a sub-namespace of any other namespace. "[1]" operation failure.
Cause: The namespace provided to set the shared repository details is not valid.
Action: Ensure that the namespace is available in the adf-config.xml file and it is not a subnamespace of any other namespace in that file.
Level: 1
Type: ERROR
Impact: Data

MDS-91018: No namespaces are mapped to any shared repository in the source archive adf-config.xml configuration file. Shared repository details cannot be set. "[0]" operation failure.
**Cause:** No namespaces were mapped to any shared repository in the source archive adf-config.xml configuration file.

**Action:** To set the shared repository connections, ensure at least one namespace is mapped to shared repository in the source archive adf-config.xml file.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-91019:** Multiple MDSAppRuntimeMBean exist for application "[0]". Ensure that the "application" "node" and "server" parameters are correct. "[1]" operation failure.

**Cause:** Multiple MDSAppRuntimeMBean for the application were found in the server.

**Action:** Ensure that the "application" "node" and "server" parameters are correct.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-91020:** MDS Application runtime MBean for "[0]" is not available in server "[2]". Ensure server name and application name are correct. "[1]" operation failure.

**Cause:** MDS Application runtime MBean was not available in the server.

**Action:** Ensure the MDS Application runtime MBean for the application is available in the server. Ensure the server name and the application name are correct.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-91021:** Multiple MDSAppRuntimeMBean exist for "[0]" in server "[2]". To execute the command, parameter "applicationVersion" is required. "[1]" operation failure.

**Cause:** Multiple MDSAppRuntimeMBean for the application were found in the server.

**Action:** Provide the 'applicationVersion' parameter.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**MDS-91022:** Parameter "[0]" cannot be an empty string. "[1]" operation failure.

**Cause:** The parameter is not allowed to be an empty string.

**Action:** Ensure the parameter has a correct value.

**Level:** 1  
**Type:** ERROR  
**Impact:** Data
MDS-91023: Parameter ";{0}" contains at least one empty element. ";{1}" operation failure.
Cause: The parameter is not allowed to contain one or more empty elements.
Action: Ensure every element specified in the parameter is correct.
Level: 1
Type: ERROR
Impact: Data

MDS-91024: Parameters ";{0}" and ";{1}" cannot be specified at the same time.
Cause: The two parameters are not allowed to be specified at the same time.
Action: Remove one of the parameters.
Level: 1
Type: ERROR
Impact: Data

MDS-92000: Oracle Metadata Services schema upgrade is invalid.
Cause: Specified Metadata Services schema was updated but is invalid.
Action: Restore the Metadata Services schema from a backup and retry. Check the error messages in log file. Correct the problem before running the Assistant again.
Level: 1
Type: ERROR
Impact: Upgrade

MDS-92001: The upgrade is not supported from Oracle Metadata Services schema version of {0}.
Cause: An unsupported base schema version was being upgraded.
Action: Refer to the Oracle Metadata Services Upgrade Guide for supported versions to upgrade.
Level: 1
Type: ERROR
Impact: Upgrade

MDS-92002: Error in upgrading Oracle Metadata Services schema.
Cause: An unexpected error occurred during Oracle Metadata Services schema upgrade.
Action: Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.
Level: 1
Type: INCIDENT_ERROR
Impact: Upgrade

MDS-92003: Error occurred while verifying the character set in target Metadata Services schema
Cause: A SQL error occurred while verifying the character set in target Metadata Services schema.
**Action:** Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.

**Level:** 1  
**Type:** INCIDENT_ERROR  
**Impact:** Upgrade

**MDS-92004: Error occurred while closing the resources during Metadata Services schema upgrade**  
**Cause:** A SQL error occurred while closing the resources during Metadata Services schema upgrade.  
**Action:** Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.

**Level:** 1  
**Type:** INCIDENT_ERROR  
**Impact:** Upgrade

**MDS-92005: Error occurred while closing Metadata Services schema upgrade log files.**  
**Cause:** An unexpected error occurred while closing Metadata Services schema upgrade log files.  
**Action:** Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.

**Level:** 1  
**Type:** INCIDENT_ERROR  
**Impact:** Upgrade

**MDS-92006: Oracle Metadata Service schema status is invalid.**  
**Cause:** Specified Oracle Metadata Services database schema was invalid.  
**Action:** Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.

**Level:** 1  
**Type:** INCIDENT_ERROR  
**Impact:** Upgrade

**MDS-92007: Error occurred while verifying the user privileges in target Metadata Services schema**  
**Cause:** A SQL error occurred while verifying the user privileges in target Metadata Services schema.  
**Action:** Check the error messages in log file. Correct the problem before running the Assistant again. Contact Oracle Support Services if you are unable to correct the problem.

**Level:** 1  
**Type:** INCIDENT_ERROR
Impact: Upgrade

MDS-92008: The logon DBA user does not have sufficient privileges to upgrade the target Metadata Services schema user

Cause: The logon DBA user needs to have grant execute privilege on specific DBMS packages to other users for upgrading the schema user privileges in target Metadata Services schema.

Action: Logon as SYSDBA or other DBA users with sufficient privileges to grant execute on DBMS packages to other users and run the Assistant again.

Level: 1
Type: ERROR
Impact: Upgrade

MDS-92009: Oracle Metadata Services schema is not enabled for EBR.

Cause: Specified Oracle Metadata Services database schema was not enabled for EBR.

Action: Specify an Oracle Metadata Service schema that is enabled for EBR or Specify an upgrade for Oracle database type.

Level: 1
Type: ERROR
Impact: Upgrade

MDS-92010: Unable to continue due to an unexpected error

Cause: An unexpected error occurred.

Action: See the secondary error message for additional details.

Level: 1
Type: INCIDENT_ERROR
Impact: Upgrade
MFT-02001: Not able to load the MDS repository.

**Cause:** MDS repository initialization failed.

**Action:** Check the metadata repository configuration and make sure that they are valid.

**Level:** HIGH

**Type:** ERROR

**Impact:** SYSTEM

MFT-02002: No transfer found for the source(ID {0}).

**Cause:** No transfer found for the source.

**Action:** Ensure that the source is attached to a transfer.

**Level:** HIGH

**Type:** ERROR

**Impact:** SYSTEM

MFT-02003: No purge schedule found with name [{0}].

**Cause:** No purge schedule found with provided name.

**Action:** Ensure that the purge oschedule has been created.

**Level:** LOW

**Type:** ERROR

**Impact:** SYSTEM

MFT-02004: [{0}] with label [{1}] is not found in MDS.

**Cause:** Artifact does not exist in MDS.

**Action:** Please check artifact name.

**Level:** HIGH

**Type:** ERROR

**Impact:** SYSTEM

MFT-02006: Data not found in MDS repository.

**Cause:** Data not found in MDS repository.

**Action:** Check the metadata repository configuration and make sure that they are valid. Also, review the diagnostic log for the exact error. Make sure the meta data exists.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-02007: Error while creating new label with value {0} in MDS repository.
Cause: An error while creating new MDS label. Check if the label already exists.
Action: Check the metadata repository configuration and make sure that they are valid. Check if the label already exists in the system.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-02008: Not able to resolve the MDS reference for source with ID {0}.
Cause: Reference meta data not exists in repository.
Action: Restore the deleted data in the MDS repository.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-02009: Not able to resolve the MDS reference for transfer with ID {0}.
Cause: Reference metadata does not exist in the repository.
Action: Restore the deleted data in the MDS repository.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-02010: Not able to resolve the MDS reference for target with ID {0}.
Cause: Referenced metadata does not exist in the repository.
Action: Restore the deleted data in the MDS repository.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-02011: Label {0} does not exist in the MDS repository.
Cause: Label no longer exists in the MDS repository.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-02101: Validation failed for the artifact [{}].
Cause: Validation failed for the given artifact.
Action: Check the artifact configuration and try again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-02102: Not able to retrieve {0} from the credential store for {1}.
  Cause: Not able to retrieve the password from the credential store.
  Action: Check the settings and data in the credential store or recreate the password. Contact Oracle Support Services if the problem persists.

  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-02104: No target associated with the transfer.
  Cause: No target is associated with the transfer.
  Action: Associate at least one target with the transfer and redeploy.

  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-02105: No source associated with the transfer.
  Cause: No source is associated with the transfer.
  Action: Associate a source with the transfer and redeploy.

  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-02301: Error occurred while exporting the metadata.
  Cause: Error during metadata export.
  Action: Check the metadata repository configuration and make sure that they are valid. Also, review the diagnostic log for the exact error.

  Level: LOW
  Type: ERROR
  Impact: SYSTEM

MFT-02302: Error generating the config plan XML.
  Cause: Error generating the config plan XML.
  Action: Review the diagnostic log for the exact error. Contact Oracle Support Services if the problem persists.

  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-02351: Error occurred while importing the metadata.
  Cause: Invalid import metadata.
  Action: Make sure that import zip file is proper. Also, review the diagnostic log for the exact error.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02401: The source [{0}] is currently associated with some transfers and so cannot be deleted.
Cause: The given source is currently referenced in some transfers and so cannot be deleted at this point.
Action: For each associated transfer that is associated with given source, detach the source, associate a new source, or delete the transfer. Then try deleting the source again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-02402: The target [{0}] is currently associated with some transfers and so cannot be deleted.
Cause: The given target is currently referenced in some transfers and so cannot be deleted at this point.
Action: For each associated transfer that is associated with given target, detach the target, associate a new target, or delete the transfer. Then try deleting the target again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-02403: Error occurred while resetting the metadata with preserved user changes {0}.
Cause: Exception while resetting the metadata.
Action: Check the metadata repository configuration and make sure that they are valid. Also, review the diagnostic log for the exact error.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02404: Error occurred while deleting the source [{0}] from metadata store.
Cause: Exception while deleting the given source from metadata store.
Action: Check the metadata repository configuration and make sure that they are valid. Also, review the diagnostic log for the exact error.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02405: Cannot delete the domain-info(name {0}) because it is referenced in some B2B source/target types.
Cause: Cannot delete the domain-info because it is referenced in some B2B source/target types.
Action: Detach the domain-info from the referring B2B sources or targets. Then try deleting the domain-info again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-02406: Cannot delete the domain-info(name {0}) because it is referenced in some Healthcare source/target types.
Cause: Cannot delete the domain-info because it is referenced in some Healthcare source/target types.
Action: Detach the domain-info from the referring Healthcare sources or targets. Then try deleting the domain-info again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-02407: Cannot delete the callout(name {0}) because it is referenced in some transfer preprocessing.
Cause: Cannot delete the callout because it is referenced in some transfer preprocessing.
Action: Detach the callout from the referring transfer preprocessing. Then try deleting the callout again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-02408: Cannot delete the callout(name {0}) because it is referenced in some transfer postprocessing.
Cause: Cannot delete the callout because it is referenced in some transfer postprocessing.
Action: Detach the callout from the referring transfer postprocessing. Then try deleting the callout again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-02409: Cannot delete the domain-info(name {0}) because it is referenced in some Web Service source/target types.
Cause: Cannot delete the domain-info because it is referenced in some Web Service source/target types.
Action: Detach the domain-info from the referring Web Service sources or targets. Then try deleting the domain-info again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-02410: Error occurred while deleting the transfer [{0}] from metadata store.
Cause: Exception while deleting the given transfer from metadata store.
Action: Check the metadata repository configuration and make sure that they are valid. Also, review the diagnostic log for the exact error.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02411: Error occurred while deleting the target \([0]\) from metadata store.
Cause: Exception while deleting the given target from metadata store.
Action: Check the metadata repository configuration and make sure that they are valid. Also, review the diagnostic log for the exact error.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02501: Error occurred while deploying the source artifact with id \([0]\).
Cause: Error occurred while deploying the given source artifact.
Action: The configuration of the given source artifact may be incorrect or error occurred while deploying the artifact. Check the source configuration and try again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02502: Error occurred while enabling the source artifact with id \([0]\).
Cause: Error occurred while enabling the given source artifact.
Action: The configuration of the given source artifact may be incorrect or error occurred while enabling the artifact. Check the source configuration and try again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02503: Error occurred while disabling the source artifact with id \([0]\).
Cause: Error occurred while disabling the given source artifact.
Action: The configuration of the given source artifact may be incorrect or error occurred while disabling the artifact. Check the source configuration and try again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02504: Error occurred while undeploying the source artifact with id \([0]\).
Cause: Error occurred while undeploying the given source artifact.
Action: The configuration of the given source artifact may be incorrect or error occurred while undeploying the artifact. Check the source configuration and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02505: Could not delete Deployment record for the currently deployed {0} [{1}] with label [{2}].
Cause: Artifact corresponding to given name and label is currently an Active deployment.
Action: Undeploy the artifact from the MFT console monitoring page and try again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02506: Deployment record does not exist for {0} [{1}] with label [{2}].
Cause: Artifact corresponding to given name and label is not found.
Action: Review the deployment history from the MFT console deployment page for the given artifact and check if artifact with the given label exists.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02507: Artifact {0} of type {1} is referenced in Transfer {2}.
Cause: Artifact corresponding to the given name is referenced in a transfer and cannot be deleted.
Action: Review deployment history for the given artifact and make sure it is not referenced in Transfer Deployments.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02508: Error deploying source {0}. Another source {1} was found deployed for URL {2}.
Cause: Another source that is already deployed is configured with the same URL.
Action: Configure the source with a different URL and try deployment again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02509: Error deploying source {0}. Another source {1} was found deployed for folder {2}.
Cause: Another source that already deployed is configured with the same folder.
Action: Configure the source with a different folder and try deployment again.

Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-02510: Error deploying SFTP source {0}. The configured private key is incorrect.
Cause: Error occurred while deploying the SFTP source. The configured private key is incorrect.
Action: Check if the key is imported to the key store. If not, import it and try deployment again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02511: Error deploying SFTP target {0}. The configured private key is incorrect.
Cause: Error occurred while deploying the SFTP target. The configured private key is incorrect.
Action: Check if the key is imported to the key store. If not, import it and try deployment again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02512: Error deploying source {0}. The configured PGP encryption alias is incorrect.
Cause: Error occurred while deploying the source. The configured PGP encryption alias is not valid.
Action: Check if the encryption key is imported to the key store. If not, import it and try deployment again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02513: Error deploying source {0}. The configured PGP decryption alias is incorrect.
Cause: Error occurred while deploying the source. The configured PGP decryption alias is not valid.
Action: Check if the decryption key is imported to the key store. If not, import it and try deployment again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02514: Error deploying transfer {0}. The configured PGP encryption alias for target {1} is incorrect.
Cause: Error occurred while deploying the target. The configured PGP encryption alias is not valid.
Action: Check if the encryption key is imported to the key store. If not, import it and try deployment again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02515: Error deploying transfer {0}. The configured PGP decryption alias for target {1} is incorrect.
Cause: Error occurred while deploying the target. The configured PGP decryption alias is not valid.
Action: Check if the decryption key is imported to the key store. If not, import it and try deployment again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02516: Error deploying transfer {0}. No Internal server address configured in server properties.
Cause: Error occurred while deploying the Web Service target. The internal server address is not configured.
Action: Go to the Server Properties page and check the internal server information under Advanced Delivery Properties. Enter correct values and try deployment again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02517: Error deploying transfer {0}. No External server address configured in server properties.
Cause: Error occurred while deploying the Web Service target. The external server address is not configured.
Action: Go to the Server Properties page and check the external server information under Advanced Delivery Properties. Enter correct values and try deployment again

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02518: Error deploying transfer {0}. No internal FTP port configured in server properties.
Cause: Error occurred while deploying the Web Service target. The Internal Server FTP port is not configured in server properties.
Action: Go to the Server Properties page and check the internal server information under Advanced Delivery Properties. Enter correct values and try deployment again.

Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-02519: Error deploying transfer {0}. No external FTP port configured in server properties.
**Cause:** Error occurred while deploying the Web Service target. The External FTP port is not configured in server properties.
**Action:** Go to the Server Properties page and check the external server information under Advanced Delivery Properties. Enter correct values and try deployment again.

**Level:** LOW  
**Type:** ERROR  
**Impact:** SYSTEM

MFT-02520: Error deploying transfer {0}. No internal FTPS port configured in server properties.
**Cause:** Error occurred while deploying the Web Service target. The Internal Server FTPS port is not configured in server properties.
**Action:** Go to the Server Properties page and check the internal server information under Advanced Delivery Properties. Enter correct values and try deployment again.

**Level:** LOW  
**Type:** ERROR  
**Impact:** SYSTEM

MFT-02521: Error deploying transfer {0}. No external FTPS port configured in server properties.
**Cause:** Error occurred while deploying the Web Service target. The External FTPS port is not configured in server properties.
**Action:** Go to the Server Properties page and check the external server information under Advanced Delivery Properties. Enter correct values and try deployment again.

**Level:** LOW  
**Type:** ERROR  
**Impact:** SYSTEM

MFT-02522: Error deploying transfer {0}. No internal sFTP port configured in server properties.
**Cause:** Error occurred while deploying the Web Service target. The Internal Server sFTP port is not configured in server properties.
**Action:** Go to the Server Properties page and check the internal server information under Advanced Delivery Properties. Enter correct values and try deployment again.

**Level:** LOW  
**Type:** ERROR  
**Impact:** SYSTEM

MFT-02523: Error deploying transfer {0}. No external sFTP port configured in server properties.
**Cause:** Error occurred while deploying the Web Service target. The External sFTP port is not configured in server properties.
Action: Go to the Server Properties page and check the external server information under Advanced Delivery Properties. Enter correct values and try deployment again.

Level: LOW  
Type: ERROR  
Impact: SYSTEM  

**MFT-02524: Deployment validation failed while deploying source {0}**.  
Cause: Deployment validation failed while deploying the source.  
Action: Check the source configuration and try again. Deploy from the UI again to check what validations failed or deploy the source using WLST in interactive mode.  

Level: LOW  
Type: ERROR  
Impact: SYSTEM  

**MFT-02525: Deployment validation failed while deploying transfer {1}**.  
Cause: Deployment validation failed while deploying the transfer.  
Action: Check the transfer configuration and try again. Deploy from the UI again to check what validations failed or deploy the transfer using WLST in interactive mode.  

Level: LOW  
Type: ERROR  
Impact: SYSTEM  

**MFT-02526: Deployment validation failed while deploying target {1}**.  
Cause: Deployment validation failed while deploying the target.  
Action: Check the target configuration and try again. Deploy from the UI again to check what validations failed or deploy the target using WLST in interactive mode.  

Level: LOW  
Type: ERROR  
Impact: SYSTEM  

**MFT-02527: Deployment of source {0} failed. The password configured is incorrect**.  
Cause: Deployment of source failed due to invalid password.  
Action: Check the key store configuration and ensure the password configured for the source is available in the key store.  

Level: HIGH  
Type: ERROR  
Impact: SYSTEM  

**MFT-02528: Deployment of target {0} failed. The password configured is incorrect**.  
Cause: Deployment of target failed due to invalid password.  
Action: Check the key store configuration and ensure the password configured for the target is available in the key store.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02529: Error deploying source {0}. Transport Endpoint validation failed.
Cause: Error occurred while deploying the source. Transport validation failed due to incorrect configuration of the source endpoint.
Action: Check the source configuration and try again. Deploy from the UI again to check what validations failed or deploy the source using WLST in interactive mode.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02530: Error deploying Target {0}. Transport endpoint validation failed.
Cause: Error occurred while deploying the target. Transport validation failed due to incorrect configuration of the target endpoint.
Action: Check the target configuration and try again. Deploy from the UI again to check what validations failed or deploy the target using WLST in interactive mode.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02531: Invalid configuration found in the associated source {0}.
Cause: Error occurred while deploying the transfer because source configuration is invalid.
Action: Go to the source page, fix the invalid configuration, and try redeploying the transfer.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02532: Invalid configuration found in the associated target {0}.
Cause: Error occurred while deploying the transfer because the target configuration is invalid.
Action: Go to the target page, fix the invalid configuration, and try redeploying the transfer.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02533: Error. Could not find a deployment record for source [{0}].
Cause: A deployment record for the given source artifact could not be found in database.
Action: Deploy the source and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02534: Error. Could not find a deployment record for target [{0}].
Cause: A deployment record for the given target artifact could not be found in database.
Action: Deploy the target and try again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02535: Error. Could not find a deployment record for transfer [{0}].
Cause: A deployment record for the given transfer artifact could not be found in database.
Action: Deploy the transfer and try again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02536: The transfer [{0}] is already enabled.
Cause: The deployment record for the given transfer artifact is already enabled.
Action: No action required.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02537: The source [{0}] is already enabled.
Cause: The deployment record for the given source artifact is already enabled.
Action: No action required.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02538: The target [{0}] is already enabled.
Cause: The deployment record for the given target artifact is already enabled.
Action: No action required.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02539: The transfer [{0}] is already disabled.
Cause: The deployment record for the given transfer artifact is already disabled.
Action: No action required.
Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-02540: The source \([0]\) is already disabled.
Cause: The deployment record for the given source artifact is already disabled.
Action: No action required.
Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-02541: The target \([0]\) is already disabled.
Cause: The deployment record for the given target artifact is already disabled.
Action: No action required.
Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-02542: Error occurred while deploying the transfer artifact with id \([0]\).
Cause: Error occurred while deploying the given transfer artifact.
Action: The configuration of the given transfer artifact may be incorrect or error occurred while deploying the artifact. Check the transfer configuration and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-02543: Error occurred while deploying the target artifact with id \([0]\).
Cause: Error occurred while deploying the given target artifact.
Action: The configuration of the given target artifact may be incorrect or error occurred while deploying the artifact. Check the target configuration and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-02544: Error occurred while enabling the transfer artifact with id \([0]\).
Cause: Error occurred while enabling the given transfer artifact.
Action: The configuration of the given transfer artifact may be incorrect or error occurred while enabling the artifact. Check the transfer configuration and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-02545: Error occurred while enabling the target artifact with id \([0]\).
Cause: Error occurred while enabling the given target artifact.
Action: The configuration of the given target artifact may be incorrect or error occurred while enabling the artifact. Check the target configuration and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02546: Error occurred while disabling the transfer artifact with id [{0}].
Cause: Error occurred while disabling the given transfer artifact.
Action: The configuration of the given transfer artifact may be incorrect or error occurred while disabling the artifact. Check the transfer configuration and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02547: Error occurred while disabling the target artifact with id [{0}].
Cause: Error occurred while disabling the given target artifact.
Action: The configuration of the given target artifact may be incorrect or error occurred while disabling the artifact. Check the target configuration and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02548: Error occurred while undeploying the transfer artifact with id [{0}].
Cause: Error occurred while undeploying the given transfer artifact.
Action: The configuration of the given transfer artifact may be incorrect or error occurred while undeploying the artifact. Check the transfer configuration and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02549: Error occurred while undeploying the target artifact with id [{0}].
Cause: Error occurred while undeploying the given target artifact.
Action: The configuration of the given target artifact may be incorrect or error occurred while undeploying the artifact. Check the target configuration and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02550: Error creating source [{0}]. Another source was found with this name.
Cause: Another source found with the same name as the given name.
Action: Configure the source with a different name and try again.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02551: Error creating target [0]. Another target was found with this name.
  Cause: Another target found with the same name as the given name.
  Action: Configure the target with a different name and try again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02552: Error creating transfer [0]. Another transfer was found with this name.
  Cause: Another transfer found with the same name as the given name.
  Action: Configure the transfer with a different name and try again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02553: Incorrect additional http header value. Use key value pair and # as separator. Example pro1=value1#pro2=value2.
  Cause: Incorrect additional http header value.
  Action: Correct the value and try deploying again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02554: Payload access is referring to invalid user/groups/roles.
  Cause: Payload access is referring to invalid resource.
  Action: Associate valid users/groups/roles and try redeploying the transfer.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02555: Not valid integer value [0] for attribute [1].
  Cause: Not valid integer value.
  Action: Correct the value and reperform the action.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-02556: Not valid boolean value [0] for attribute [1]. Only true/false is allowed.
  Cause: Not valid boolean value. Only true/false is allowed.
  Action: Correct the value and reperform the action.
Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-02557: Not valid value \([0]\) for attribute \([1]\). Only allowed values are \(2\).

**Cause:** Possible values for the field are restricted to predefined. Specified value is not allowed for this field.

**Action:** Correct the value and reperform the action.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-02558: Invalid pattern \([0]\).

**Cause:** Invalid pattern.

**Action:** Correct the pattern and reperform the action.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-02559: Error creating source \([0]\). Another deployed source was found with this name.

**Cause:** Another deployed source found with the same name as the given name.

**Action:** Configure the source with a different name or undeploy the other source with same name and try again

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02560: Error creating target \([0]\). Another deployed target was found with this name.

**Cause:** Another deployed target found with the same name as the given name.

**Action:** Configure the target with a different name undeploy the other target with same name and try again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-02561: Error creating transfer \([0]\). Another deployed transfer was found with this name.

**Cause:** Another deployed transfer found with the same name as the given name.

**Action:** Configure the transfer with a different name or undeploy the other transfer with same name and try again.

Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-02562: Another source \{0\} was found with similar settings. Undeploy one of the source if they are identical.

**Cause:** Another source with similar settings is already deployed.

**Action:** Undeploy one of the source is its duplicate.

**Level:** LOW  
**Type:** WARNING  
**Impact:** SYSTEM

MFT-02563: Error deploying source \{0\}. The configured signing key alias is incorrect.

**Cause:** Error occurred while deploying the source. The configured PGP signing key alias is not valid.

**Action:** Check if the signing key is imported to the key store. If not, import it and try deployment again.

**Level:** LOW  
**Type:** ERROR  
**Impact:** SYSTEM

MFT-02564: Error deploying transfer \{0\}. The configured PGP signing key alias for target \{1\} is incorrect.

**Cause:** Error occurred while deploying the target. The configured PGP signing key alias is not valid.

**Action:** Check if the PGP signing key is imported to the key store. If not, import it and try deployment again.

**Level:** LOW  
**Type:** ERROR  
**Impact:** MESSAGE

MFT-02565: Invalid processing function order.

**Cause:** Invalid order specified for processing actions.

**Action:** Correct the processing order and retry.

**Level:** LOW  
**Type:** ERROR  
**Impact:** MESSAGE

MFT-02566: Callout param \{0\} doesn't matches with the callout[\{1\}] definition.

**Cause:** Invalid parameter specified in the request.

**Action:** Refer to the callout definition. Correct the callout parameters and retry.

**Level:** LOW  
**Type:** ERROR  
**Impact:** MESSAGE

MFT-02567: No need to deploy as latest version of the artifact is already deployed.

**Cause:** Latest version of the artifact is already deployed.

**Action:** No need to deploy the artifact again.

**Level:** LOW
Type: WARNING
Impact: MESSAGE

MFT-02568: startDate is not specified for the schedule.
Cause: startDate is required for the schedule.
Action: Provide the startDate and retry.
Level: LOW

Type: ERROR
Impact: MESSAGE

MFT-02569: Illegal Arguments Exception while fetching list of schedule occurrences from ESS
Cause: Problem with arguments passed to function
Action: Provide a valid time zone and retry
Level: LOW

Impact: MESSAGE

MFT-02600: Error in creating target {0}. Error Message: {1}
Cause: An Error occurred while either reading or parsing the metadata xml file.
Action: Refer to the plugin logs for more details.
Level: LOW
Type: ERROR
Impact: SYSTEM

**MFT-03001: Error while starting the MFT server.**
*Cause:* Unable to initialize the MFT Server dependent components.
*Action:* Ensure the infrastructure components like Identity Store, Security Store, Database, JCA are configured properly.

*Level:* CRITICAL
*Type:* ERROR
*Impact:* SYSTEM

**MFT-03002: Error while registering the Web Service source {0} with the provider.**
*Cause:* Unable to register the Web Service source with the provider.
*Action:* Verify the Web Service source configuration and provider availability. Contact Oracle Support Services if the problem persists.

*Level:* CRITICAL
*Type:* ERROR
*Impact:* SYSTEM

**MFT-03003: Error while Initializing Web Service source {0}.**
*Cause:* An error occurred while registering the Web Service sources.
*Action:* Check the configuration of the deployed Web Service sources.

*Level:* CRITICAL
*Type:* ERROR
*Impact:* SYSTEM

**MFT-03004: Error while initializing Security components for Stripe {0}.**
*Cause:* An Error occurred while creating the application policy data in the domain-wide policy store or while obtaining the connection to the default realm identity store.
*Action:* Ensure that the required permissions are granted to the MFT source and check the config parameters of the Identity Store.

*Level:* CRITICAL
*Type:* ERROR
*Impact:* SYSTEM

**MFT-03005: Error while initializing the WebLogic Work Manager {0}.**
*Cause:* Unable to look up the Work Manager from the underlying environment.
*Action:* Check the Work Manager configuration in the WebLogic console.

*Level:* CRITICAL
*Type:* ERROR
*Impact:* SYSTEM

**MFT-03006: Error while registering the EM Discovery Mbean with Object name {0}.**
*Cause:* An error occurred while registering the Config MBean with the Platform MBean Server.
**Action:** Review the diagnostic log for the exact error. Check whether management infrastructure is up and MFT MBean details are correct.

**Level:** CRITICAL  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-03007: Error while shutting down MFT server.**  
**Cause:** Unable to stop one or more dependent components of the MFT server.  
**Action:** Review the diagnostic log for the exact error. Failure might be due to configuration of infrastructure components or connection problem.

**Level:** CRITICAL  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-03008: Error occurred while unsubscribing the Web Service source.**  
**Cause:** Unable to unsubscribe the Web Service source.  
**Action:** Failure could be due to unavailability of Web Service registration service or improper Web Service configuration. Review the diagnostic log for the exact error.

**Level:** CRITICAL  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-03009: Error while getting the Application Properties metadata.**  
**Cause:** Unable to get the Application Properties details.  
**Action:** Check the Application Properties configuration in the system.

**Level:** CRITICAL  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-03010: Error occurred while updating the port \(2\) for service \(1\) of server \(0\) by user \(3\).**  
**Cause:** Exception while updating the port details of databases.  
**Action:** Check the service, server instance and port. If these are correct it could be due to database issue. Review the diagnostic log for the exact error.

**Level:** CRITICAL  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-03011: Error while loading the MFT Configuration MBean Properties from underlying infrastructure.**  
**Cause:** Unable to load the MBean Properties.  
**Action:** Unable to load the MBean config properties from the underlying metadata store. Review the diagnostic log for the exact error.

**Level:** CRITICAL
**Type:** ERROR
**Impact:** SYSTEM

**MFT-03012: Error while initializing the MFT persistence context.**
- **Cause:** Unable to initialize the persistence units context.
- **Action:** Check the database availability and connection configuration. Review the diagnostic log for the exact error.
- **Level:** CRITICAL
- **Type:** ERROR
- **Impact:** SYSTEM

**MFT-03013: Error while initializing the MFT System event manager.**
- **Cause:** Unable to initialize the System event manager with required Queue and Topic receiver(s).
- **Action:** Check the JMS system event Queue and Topic configurations in the WebLogic console.
- **Level:** CRITICAL
- **Type:** ERROR
- **Impact:** SYSTEM

**MFT-03014: Error while initializing the MFT Purge event manager.**
- **Cause:** Unable to initialize the Purge event manager with required Queue receiver(s).
- **Action:** Check the JMS purge event Queue and Topic configurations in the WebLogic console.
- **Level:** CRITICAL
- **Type:** ERROR
- **Impact:** SYSTEM

**MFT-03015: Error while initializing the source listener {0}**
- **Cause:** Unable to start the JCA adapter to poll the files on the source.
- **Action:** Check the source configuration parameters. Contact Oracle Support Services if the problem persists.
- **Level:** CRITICAL
- **Type:** ERROR
- **Impact:** SYSTEM

**MFT-03016: Error updating port for server instance [{0}] and service [{1}]. The given server instance or service is incorrect.**
- **Cause:** Error occurred while updating port assignment for the given server instance and service in database.
- **Action:** Check the port configuration for the server instance. Contact Oracle Support Services if the problem persists.
- **Level:** CRITICAL
- **Type:** ERROR
- **Impact:** SYSTEM
MFT-03017: File [0] doesn't exist.
   Cause: File doesn't exist.
   Action: Check if the file exists.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-03018: Not able to create file [0].
   Cause: Invalid location.
   Action: Check if the parent directory exists. Also, check the file permission for the parent directory.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-03019: Invalid XML format or scheam validation failed for [0].
   Cause: Invalid XML or schema validation failed.
   Action: Validate the XML against the schema and rerun.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-03250: Invalid argument(s) {0} provided to MFT utility for method {1}.
   Cause: Arguments of the MFT command line utility are either missing or invalid.
   Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-03251: MFT utility - Operation {0} failed for parameters {1}.
   Cause: EJBException thrown by the MFT utility due to failure in operation.
   Action: Refer to MFT utilities documentation to determine the arguments and their types for the given command.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-03252: Exception occurred while executing runtime purge for batch id [0].
   Cause: Exception occurred while executing runtime purge for batch id [0].
   Action: Try again with the recovery option by passing same batch id. If the problem persists, contact Oracle Support Services.
   Level: HIGH
   Type: ERROR
Impact: SYSTEM

MFT-03253: Error while processing the purge event {0}.

Cause: An error occurred during processing of the purge event by the JCA JMS Adapter.

Action: Check the Purge Event Queue configuration in the server. Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. Contact Oracle Support Services if the problem persists.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03254: Exception occurred while executing runtime archive for batch id [{0}].

Cause: Exception occurred while executing runtime archive for batch id [{0}].

Action: Try again by passing same batch id. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-03255: Exception occurred while executing runtime restore from archive file [{0}].

Cause: Exception occurred while executing runtime restore from archive file [{0}].

Action: Try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-03302: Failed to initialize the engine. The engine message queue receivers for queue {0} were not initialized properly.

Cause: Problem with JMS queue settings.

Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Correct the queue settings and restart the MFT server.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03303: Error while stopping queue receivers for queue {0}.

Cause: An error has occurred while stopping the queue receivers.

Action: Review the diagnostic log for the exact error. Check the MFT specific JMS Queue settings in the WebLogic console.

Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-03304: Failed to initialize the engine. The engine queue message producer for queue {0} was not initialized properly.
Cause: Problem with JMS queue settings.
Action: Check the MFT specific JMS Queue settings in the WebLogic console.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-03305: Error while stopping the message producer for queue {0}.
Cause: An error has occurred while stopping queue message producer.
Action: Review the diagnostic log for the exact error. Check the MFT specific JMS Queue settings in the WebLogic console.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-03306: Error while initializing the source listeners
Cause: Unable to start the JCA adapter to poll the files on the sources.
Action: Check the source configuration parameters. Contact Oracle Support Services if the problem persists.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03307: Error initializing the MFT message processing engine.
Cause: An error has occurred while starting the message processing engine for MFT.
Action: Check the MFT specific JMS Queue settings in the WebLogic console.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03308: Error during shutdown of source listener {0}.
Cause: Unable to stop the JCA Adapter that is polling the source.
Action: Review the diagnostic log for the exact error. Check the MFT specific JMS Queue settings in the WebLogic console.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03309: Error stopping the MFT message processing engine.
Cause: An error has occurred while stopping the message processing engine for MFT.
Action: Review the diagnostic log for the exact error. Check the MFT specific JMS Queue settings in the WebLogic console.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03310: Error initializing the task queue receivers.
Cause: An error has occurred while starting the task queue receivers for MFT.
Action: Check the MFT task queue JMS Queue settings in the WebLogic console.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03601: Error while starting the hosted server \{0\} with root dir \{1\} and port \{2\}.
Cause: An error occurred while starting the hosted server at a specified port and root directory.
Action: Check the root directory and Port assigned to the hosted server. For FTP over SSL and sFTP Servers, verify that all the required keys are configured.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03602: Error while shutting down the Hosted Server \{0\} running at port \{1\}.
Cause: An error occurred while stopping the hosted server running at the specified port.
Action: Review the diagnostic log for the exact error.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03604: Error while allocating the HA ports for the server instance \{0\}.
Cause: An error occurred while persisting the ports of the hosted servers for a given server instance.
Action: Check the ports definitions in MDS and the database config parameters. Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. Contact Oracle Support Services if the problem persists.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-03605: Error while fetching the Key store configuration from MDS.
Cause: An Error occurred while getting the default key store MO from MDS.
Action: Unable to get the key store information from the underlying metadata store during initialization. Review the diagnostic log for the exact error.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM
MFT-03606: Error while fetching the ES root directories from path {0} with option {1} for {2} server
Cause: An Error occurred while getting the directories under the ES root directory
Action: Check the Embedded Server root directory configuration and access permissions. Review the diagnostic log for the exact error.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-04001: No associated active source found for the incoming file {0} from the endpoint {1}.
Cause: No matching MFT source found for the incoming message.
Action: Create and deploy the matching source. Redeliver the message to MFT.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04002: Multiple matching active sources found for the file {0} from endpoint {1}. Matching sources : {3}.
Cause: Invalid configuration: multiple active deployed sources for the same endpoint.
Action: Activate only one source for a given endpoint configuration.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04003: Not able to find the metadata reference for source with id {0}.
Cause: Reference metadata for the given source id does not exist in repository.
Action: Restore the deleted data in the metadata repository and redeploy the source.
Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04004: Invalid source message received for source message processing. Source message ID {0}.
Cause: Internal processing error.
Action: Contact Oracle Support Services.
Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04005: Invalid source configuration.
Cause: Invalid source configuration.
Action: The listening or Web Service source could not be registered due to error while creating the endpoint. Review the diagnostic log for the exact error.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04007: Associated source {2} for the file {0} from endpoint {1} was disabled.
Cause: Associated source was disabled.
Action: Enable the source and redeliver the message to MFT.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04008: No matching active transfer found for the message.
Cause: There is no associated transfer with a matching content type for the incoming message.
Action: Associate and deploy the matching transfer for the incoming message and resubmit the source message.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04009: Error during source message processing.
Cause: Unexpected error.
Action: Unexpected error encountered during source processing. Review the diagnostic log for the exact error.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04010: Source {0} is disabled.
Cause: Source is disabled.
Action: Enable the source and retry.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04011: Duplicate source message. Original message id {0}.
Cause: Duplicate message submitted.
Action: Check the status of original message.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04012: Directory reference as payload is not allowed for the source if compression processing action is not associated with the source.
Cause: Directory reference as payload is not allowed if compression processing action is not associated with the source.

Action: Associate compression as processing action for the source and redeploy the source. Resubmit the message after that.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04013: Invalid Payload information.
Cause: Bad request or specified payload doesn’t exists.
Action: Send valid request, make sure payload information is correct.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04014: No source metadata record found with name [{0}].
Cause: No source metadata record found with given name.
Action: Check if the source metadata was deleted. Try again by specifying correct source name.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04015: Source plugin error while creating the endpoint from source metadata.
Cause: Plugin error while creating the endpoint from source metadata.
Action: Check the logs for more details. In case of custom plugin implementation, check the plugin implementation otherwise contact Oracle Support Services if the problem persists

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04202: File {0} does not exist in the file system.
Cause: File does not exist in the file system.
Action: If the file has been purged, restore the file and resubmit the appropriate message.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04204: IO exception encountered during message processing.
Cause: IO exception.
Action: IO exception encountered. Review the diagnostic log for the exact error.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04205: Error while encrypting the payload using PGP.
Cause: PGP encryption setting error.
Action: Review the diagnostic log for the exact error.
Level: LOW

Type: ERROR
Impact: MESSAGE

MFT-04206: Error while decrypting payload using PGP.
Cause: Invalid PGP-encrypted payload.
Action: Check the incoming payload.
Level: LOW

Type: ERROR
Impact: MESSAGE

MFT-04207: Error while compressing the payload.
Cause: Compression setting error.
Action: Review the diagnostic log for the exact error.
Level: LOW

Type: ERROR
Impact: MESSAGE

MFT-04208: Error while decompressing the payload.
Cause: Invalid compressed payload.
Action: Check the incoming payload.
Level: LOW

Type: ERROR
Impact: MESSAGE

MFT-04209: Error while executing source preprocessing
Cause: Unexpected source preprocessing error.
Action: Review the diagnostic log for the exact error.
Level: LOW

Type: ERROR
Impact: MESSAGE

MFT-04210: Error while executing source postprocessing
Cause: Unexpected source postprocessing error.
Action: Review the diagnostic log for the exact error.
Level: LOW

Type: ERROR
Impact: MESSAGE
MFT-04211: Error while executing target preprocessing
    Cause: Unexpected target preprocessing error.
    Action: Review the diagnostic log for the exact error.
    Level: LOW
    Type: ERROR
    Impact: MESSAGE

MFT-04212: Error while executing target postprocessing.
    Cause: Unexpected target postprocessing error.
    Action: Review the diagnostic log for the exact error.
    Level: LOW
    Type: ERROR
    Impact: MESSAGE

MFT-04213: Error during instance message processing.
    Cause: Unexpected error.
    Action: Review the diagnostic log for the exact error.
    Level: LOW
    Type: ERROR
    Impact: MESSAGE

MFT-04214: Unsupported compressed payload content.
    Cause: The compression format of the payload is not supported in MFT.
    Action: None: compressed format is not supported in MFT.
    Level: LOW
    Type: ERROR
    Impact: MESSAGE

MFT-04215: Multiple file decompression is only supported for web service targets: SOAP, SOA, Service Bus, and ODI
    Cause: Compressed payload contains multiple files. Multiple file decompression is only supported for web service targets: SOAP, SOA, Service Bus, and ODI.
    Action: Decompress and submit a message for each decompressed file.
    Level: LOW
    Type: ERROR
    Impact: MESSAGE

MFT-04216: No file found after decompression.
    Cause: There were no files found after decompression.
    Action: None: Invalid input message.
    Level: LOW
    Type: ERROR
    Impact: MESSAGE
MFT-04217: PGP private key not found for key alias {0}
  Cause: Key for the alias is not present in the key store.
  Action: Import the key and resubmit the message.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04218: PGP public key not found for key alias {0}
  Cause: Key for the alias is not present in the key store.
  Action: Import the key and resubmit the message.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04219: Message cannot be processed as the associated schedule has expired.
  Cause: Message cannot be processed as the associated schedule has expired.
  Action: Associate valid schedule and redeploy.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04220: PGP private key is invalid or key password is incorrect.
  Cause: PGP private key is invalid or key password is incorrect.
  Action: Correct the key password if key password is incorrect otherwise import valid PGP private key.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04221: Incoming data is encrypted with different public key.
  Cause: PGP public key used for encryption is not corresponding key pair for private key specified.
  Action: Associate correct private key alias for the decryption action.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04222: Incoming data is not a valid PGP encrypted data.
  Cause: Incoming data is not a valid PGP encrypted data.
  Action: Check the incoming data.
Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-04223: Encryption algorithm or key length is restricted under the java policy.
 Cause: Encryption algorithm or key length is restricted.
 Action: Make sure algorithms and key used is not restricted under java security policy.
 Level: LOW
 Type: ERROR
 Impact: SYSTEM

MFT-04224: PGP Encryption key is not a valid encryption key.
 Cause: PGP Encryption key is not a valid encryption key.
 Action: Make sure key alias is a correct PGP encryption public key.
 Level: LOW
 Type: ERROR
 Impact: SYSTEM

MFT-04225: Error while decryption. Signature is not valid.
 Cause: Signature is not valid.
 Action: Check if the encrypted payload is valid or not.
 Level: LOW
 Type: ERROR
 Impact: MESSAGE

MFT-04226: Cannot find the matching signee key.
 Cause: Unknown signee.
 Action: Add signee's pgp key to the key store.
 Level: LOW
 Type: ERROR
 Impact: MESSAGE

MFT-04227: Script({0}) execution failed with error: ({1})
 Cause: Error in script execution.
 Action: Review the diagnostic log for the exact error and resubmit the message after fixing script.
 Level: LOW
 Type: ERROR
 Impact: MESSAGE

MFT-04228: Script({0}) execution failed with unknown error
 Cause: Unexpected error in script execution.
 Action: Review the diagnostic log for the exact error and resubmit the message after fixing script.
 Level: LOW
 Type: ERROR
 Impact: MESSAGE
MFT-04229: Script({0}) execution timed out
  Cause: Script execution timed out.
  Action: Script execution is taking longer time than given timeout. Fix the script and resubmit the message.
  Level: LOW
  Type: ERROR
  Impact: MESSAGE

MFT-04230: Script({0}) execution interrupted
  Cause: Script execution interrupted.
  Action: Please validate the script.
  Level: LOW
  Type: ERROR
  Impact: MESSAGE

MFT-04401: Exception encountered during execution of callout {0}.
  Cause: Error while executing custom callout.
  Action: Review the diagnostic log for the exact error.
  Level: LOW
  Type: ERROR
  Impact: MESSAGE

MFT-04501: Payload {0} not found in the MFT data storage.
  Cause: Payload does not exist in the MFT data storage.
  Action: If the data exists, try to restore the data.
  Level: LOW
  Type: ERROR
  Impact: MESSAGE

MFT-04502: Invalid digest algorithm {0}.
  Cause: Invalid algorithm.
  Action: Correct the setting for the digest algorithm.
  Level: LOW
  Type: ERROR
  Impact: SYSTEM

MFT-04503: Unexpected Error.
  Cause: Unexpected exception occurred.
  Action: Review the diagnostic log for the exact error.
  Level: MEDIUM
  Type: ERROR
  Impact: MESSAGE

MFT-04504: JTA Transaction Error
Cause: JTA Transaction Error
Action: Review the diagnostic log for the exact error.

Level: MEDIUM
Type: ERROR
Impact: MESSAGE

MFT-04506: The archive \{0\} does not exist.
Cause: The given archive file could not be found. The file path is incorrect or the archive is empty.
Action: Check the archive file path. If path is correct, then ensure that the archive file is proper and try again.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04507: IP address or name of the host machine could not be determined.
Cause: IP address or name of the host machine could not be determined.
Action: Check if the system and network configuration is correct. Contact Oracle Administrator if problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-04508: Invalid argument.
Cause: Invalid argument.
Action: Check the input arguments provided and try again.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04509: External ports in the application properties cannot be null.
Cause: External ports in the application properties are null.
Action: Set the external ports in the application properties.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04510: External ports in the application properties cannot be null.
Cause: External ports in the application properties are null.
Action: Set the external ports in the application properties.

Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-04511: External ports in the application properties cannot be null.
   Cause: External ports in the application properties are null.
   Action: Set the external ports in the application properties.
   Level: LOW
   Type: ERROR
   Impact: SYSTEM

MFT-04512: Error creating the directory {0}.
   Cause: IO exception.
   Action: Review the diagnostic log for the exact error.
   Level: LOW
   Type: ERROR
   Impact: MESSAGE

MFT-04513: Invalid in-progress transfer count {0} for source.
   Cause: Unexpected error.
   Action: Internal error while calculating the progress in transfer count. No action needed.
   Level: LOW
   Type: ERROR
   Impact: SYSTEM

MFT-04514: Invalid in-progress target count {0} for the transfer.
   Cause: Unexpected error.
   Action: Internal error while calculating the progress in transfer count. No action needed.
   Level: LOW
   Type: ERROR
   Impact: SYSTEM

MFT-04515: Transfer {0} is disabled.
   Cause: Transfer is disabled.
   Action: Enable the transfer and retry.
   Level: LOW
   Type: ERROR
   Impact: SYSTEM

MFT-04516: Target {0} is disabled.
   Cause: Target is disabled.
   Action: Enable the target and retry.
   Level: LOW
   Type: ERROR
   Impact: SYSTEM
MFT-04517: No target record found for the instance ID [0].
  
  **Cause:** No target record found for the instance.
  
  **Action:** Try resubmitting the transfer or source instead.
  
  **Level:** LOW
  
  **Type:** ERROR
  
  **Impact:** SYSTEM

MFT-04518: Target [0] is no longer associated with transfer [1].
  
  **Cause:** Target is no longer associated with transfer [1].
  
  **Action:** Associate the target with the transfer and retry.
  
  **Level:** LOW
  
  **Type:** ERROR
  
  **Impact:** SYSTEM

MFT-04519: Unexpected error occurred while processing message with id [[0]].
  
  **Cause:** An unexpected error occurred during processing of the message with the given message id.
  
  **Action:** Review the diagnostic log for the exact error.
  
  **Level:** LOW
  
  **Type:** ERROR
  
  **Impact:** MESSAGE

MFT-04520: Internal ports in the application properties cannot be null.
  
  **Cause:** Internal ports in the application properties are null.
  
  **Action:** Set the internal ports in the application properties.
  
  **Level:** LOW
  
  **Type:** ERROR
  
  **Impact:** SYSTEM

MFT-04521: Internal ports in the application properties cannot be null.
  
  **Cause:** Internal ports in the application properties are null.
  
  **Action:** Set the internal ports in the application properties.
  
  **Level:** LOW
  
  **Type:** ERROR
  
  **Impact:** SYSTEM

MFT-04522: Internal ports in the application properties cannot be null.
  
  **Cause:** Internal ports in the application properties are null.
  
  **Action:** Set the internal ports in the application properties.
  
  **Level:** LOW
  
  **Type:** ERROR
  
  **Impact:** SYSTEM

MFT-04523: Error while moving the file [[0]] to location [[1]].
Cause: Issue while moving the file from one location to another.
Action: Check user permissions in the destination location.
Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-04524: Unexpected error occurred during instance message processing for transfer \([0]\).
Cause: An unexpected error occurred during instance message processing for the given transfer.
Action: Review the diagnostic log for the exact error.
Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04525: Unexpected error occurred during message processing for target \([0]\).
Cause: An unexpected error occurred during message processing for the given target.
Action: Review the diagnostic log for the exact error.
Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04526: Unexpected error occurred during message processing for source \([0]\).
Cause: An unexpected error occurred during message processing for the given source.
Action: Review the diagnostic log for the exact error.
Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-04801: Error while processing the system event \(0\).
Cause: An error occurred during processing of the system event by the JCA JMS Adapter.
Action: Check the System Event Queue and Topic configuration in the server. Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. Contact Oracle Support Services if the problem persists.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-04802: Error while submitting the system event \(0\) for service \(1\).
Cause: An error occurred during processing of the system event by the JCA JMS Adapter.
Action: Check the System Event Queue and Topic configuration in the server. Review the diagnostic log for the exact error, which begins with the string 'ERROR'. Contact Oracle Support Services if the problem persists.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-04803: Error while submitting the system event {0} with resubmit type as {1} for instances {2} by user {3}.
Cause: An error occurred during submission of the system event by the JCA JMS Adapter.
Action: Check the System Event Queue and Topic configuration in the server. Review the diagnostic log for the exact error, which begins with the string 'ERROR'. Contact Oracle Support Services if the problem persists.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-04804: Error while submitting the system event {0} with instance ID {1} by user {2}.
Cause: An error occurred during submission of the system event by the JCA JMS Adapter.
Action: Check the System Event Queue and Topic configuration in the server. Review the diagnostic log for the exact error, which begins with the string 'ERROR'. Contact Oracle Support Services if the problem persists.

Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-04805: Error while submitting pause transfer request. Target Message with Id [{0}] does not exist.
Cause: The given target message does not exist in database.
Action: Check the target message Id is correct and try again. Use the UI Monitoring Dashboard to verify target message details.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-04806: Error while submitting resume transfer request. Target Message with Id [{0}] does not exist.
Cause: The given target message does not exist in database.
Action: Check the target message Id is correct and try again. Use the UI Monitoring Dashboard to verify target message details.

Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-05001: Unsupported endpoint {0} passed to adapter.
  Cause: Unsupported endpoint has been passed to the adapter. Adapter only supports File / FTP / sFTP / JMS.
  Action: Check the endpoint that was passed.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05002: Error occurred while creating JCABindingFactoryImpl. Type: {0}, endpoint: {1}.
  Cause: An error occurred while initializing the adapter.
  Action: Check the adapter properties and try again. Contact Oracle Support Services if the problem persists.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05003: No payload found while delivering to endpoint {0}.
  Cause: No payload found while delivering a message.
  Action: Try resubmitting the message.
  Level: HIGH
  Type: ERROR
  Impact: MESSAGE

MFT-05004: Error occurred while delivering message [{0}] to endpoint [{1}].
  Cause: Error occurred while delivering message.
  Action: Check the adapter properties and try again. Contact Oracle Support Services if the problem persists.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05005: Error occurred while closing connection after sending file to endpoint {0}.
  Cause: Error occurred while closing adapter connection.
  Action: Check adapter properties and try again. If the problem persists, contact Oracle Support Services.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05006: Error occurred while trying to open connection for endpoint [{0}], Type [{1}] and interface [{2}].
  Cause: Error occurred while trying to open connection.
  Action: Check the adapter properties and try again. If the problem persists, contact Oracle Support Services.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05007: Exception occurred while sending file [{0}] to endpoint [{1}].
  Cause: File [{0}] does not exist.
  Action: Ensure that the file [{0}] exists and resubmit.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05008: Exception occurred while creating connection with [{0}] for operation [{1}].
  Cause: Error occurred while creating connection.
  Action: Check the adapter properties and try again. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05010: Exception occurred while validating adapter binding reference property for end point [{0}].
  Cause: Could not validate Binding reference properties.
  Action: Check the adapter properties and try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05011: Value for property 'Physical Directory' is missing.
  Cause: No value specified for property 'Physical Directory' in the input connection properties.
  Action: Specify a value for 'Physical Directory' in the connection properties for the endpoint and try again.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05012: Exception occurred while creating connection for polling to end point [{0}] for operation [{1}]
  Cause: Error occurred while creating connection.
  Action: Check the adapter properties and try again. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-05013: Exception occurred while creating poller service for endpoint [0].
  Cause: Error occurred while creating poller service.
  Action: Check the adapter properties and try again. If the problem persists, 
           contact Oracle Support Services.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM
MFT-05014: Exception occurred while starting poller service for endpoint [0].
  Cause: Error occurred while starting poller service.
  Action: Check the adapter properties and try again. Contact Oracle Support 
           Services if the problem persists.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM
MFT-05015: Exception occurred while validating poller service for endpoint [0].
  Cause: Could not validate adapter properties for poller service.
  Action: Check the adapter properties and try again. If the problem persists, 
           contact Oracle Support Services.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM
MFT-05016: NOT_IN_USE
  Cause: NOT_IN_USE
  Action: NOT_IN_USE
  Level: HIGH
  Type: ERROR
  Impact: MESSAGE
MFT-05017: Error occurred while stopping the adapter polling.
  Cause: Exception occurred while trying to close the adapter to stop polling the 
          messages.
  Action: Check the adapter properties and try again. If the problem persists, 
          contact Oracle Support Services.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM
MFT-05018: NOT_IN_USE
  Cause: NOT_IN_USE
  Action: NOT_IN_USE
Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05019: Exception occurred while creating file \([0]\) received from end point \([1]\).
Cause: Could not create the file \([0]\), which was received from endpoint \([1]\).
Action: Check if the file exists but is a directory rather than a regular file, does not exist but cannot be created, or cannot be opened for any other reason.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05020: IO Exception occurred while writing to file \([0]\) received from endpoint \([1]\).
Cause: File created, but could not write to the file \([0]\), which was received from endpoint \([1]\).
Action: Check if write permissions are provided for file \([0]\).

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05021: IO Exception occurred while closing file \([0]\) after writing. This file was received from endpoint \([1]\).
Cause: File \([0]\) written, but IO exception occurred while closing the file, which was received from endpoint \([1]\).
Action: Check if write permissions are provided for the file \([0]\).

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05022: Source Message was found null while transferring to endpoint \([0]\).
Cause: Source message found null.
Action: Resubmit the message. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05023: The JNDI queue name specified is null.
Cause: Adapter initialization failed because of invalid queue name.
Action: Try again. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-05024: Exception occurred in postprocessing while moving or renaming the file after sending to [5]. Source File Name [1], Source Folder [0], Target Folder [2], Target File Name [3], Target File Naming Convention [4].

Cause: Error occurred while moving or renaming a file after sending.
Action: Check the adapter properties and resubmit the message. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05025: Exception occurred while creating directory [0] for storing file [1] received from endpoint [2].

Cause: Could not create directory [0].
Action: Ensure that permissions (for creating directory and files) are assigned to this folder.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05026: NOT_IN_USE

Cause: NOT_IN_USE
Action: NOT_IN_USE

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05027: Exception occurred while looking for directory for storing file [0] received from endpoint [1].

Cause: Error occurred while looking for directory for storing file.
Action: Check server properties. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05028: Exception occurred while deactivating poller service for end point [0].

Cause: Error occurred while deactivating poller service.
Action: Check the adapter properties and try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05029: Exception occurred while closing poller service for endpoint [0].

Cause: Error occurred while closing poller service.
Action: Check the adapter properties and try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05030: Configuration mismatch found while polling to endpoint [{0}]. Alert code [{1}].
Cause: Configuration mismatch found while polling to endpoint [{0}].
Action: Ensure that the host name, port, username and password configured are correct and that the server is running.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05031: Error occurred while reading metadata of file [{0}] from endpoint [{1}].
Cause: Error occurred while reading metadata of file.
Action: Check the adapter properties and try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05032: Unexpected error during target delivery.
Cause: Unexpected error during target delivery.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-05033: Error while creating the B2B/Healthcare endpoint {0} during target delivery.
Cause: Unexpected error while creating a b2b/healthcare endpoint.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05034: Error while delivering the payload to B2B/Healthcare target.
Cause: Unexpected error while delivering the payload.
MFT-05035: Error occurred while closing connection after getting size for file \{0\} for end point \{1\}.

Cause: Error occurred while closing adapter connection.

Action: Check adapter properties and try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05036: Error occurred while closing connection after pausing transfer for end point \{0\}.

Cause: Error occurred while closing adapter connection.

Action: Check adapter properties and try again. If the problem persists, contact Oracle Support Services.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05037: Value for property 'Host Name' is missing.

Cause: No value specified for property 'Host Name' in the input connection properties.

Action: Specify a value for 'Host Name' in the connection properties for the endpoint and try again.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05038: Value for property 'Port' is missing.

Cause: No value specified for property 'Port' in the input connection properties.

Action: Specify a value for 'Port' in the connection properties for the endpoint and try again.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05039: Value for property 'User Name' is missing.

Cause: No value specified for property 'User Name' in the input connection properties.
Action: Specify a value for 'User Name' in the connection properties for the endpoint and try again.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05040: Error occurred during shutting down while clearing JCA resources.
Cause: Unexpected error occurred while clearing JCA resources.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-05041: Error occurred while polling the listening source {0}.
Cause: Unexpected error occurred while polling the JCA source.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-05201: Access denied.
Cause: Access denied for the resource/action.
Action: Check if you have the permission for given resource/action.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05202: Unable to authenticate the user.
Cause: An error occurred while authenticating the user.
Action: Correct the username/password and retry.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05203: The Content-MD5 you specified did not match what is received.
Cause: Content-MD5 mismatch.
Action: 

Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-05204: A container with same name already exists.
   Cause: A container with same name already exists.
   Action: Provide a different container name and retry.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-05205: Container isn't empty.
   Cause: There are some objects stored in the container.
   Action: Delete all the objects in the container and retry.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-05206: No container found for given container name.
   Cause: No container found.
   Action: Provide a valid container name or create new container with the given name.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-05207: Invalid key name.
   Cause: Invalid key name.
   Action: Provide a valid key name and retry.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-05208: The requested range cannot be satisfied.
   Cause: Invalid range.
   Action: Provide a valid range.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-05209: Invalid request.
   Cause: Some required parameter is missing in the request.
   Action: Provide all the parameters in the request and retry.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-05210: Unexpected server error.
Cause: Unexpected server error, response code 500.
Action: Check the service setting and retry. For more details, review the diagnostic log for the exact error, which begins with the string 'ERROR:'. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05211: Malformed URL used.
Cause: A malformed URL has occurred. Either no legal protocol could be found in a specification string or the string could not be parsed.
Action: Correct the provided url and retry.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05212: Unexpected error occurred.
Cause: Unexpected error.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05213: Unexpected source error occurred.
Cause: Unexpected error.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05214: Error encountered while connection/authentication.
Cause: Error while connection/authentication.
Action: Make sure the connection url and user information is correct. Also, make sure to import the certificate in the server.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05215: Client error encountered for the request.
Cause: Client error encountered for the request.
Action: Check the server connection/user details. Also, review the diagnostic log for the exact error, which begins with the string 'ERROR:'. Contact Oracle Support Services if the problem persists.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05216: Server error encountered for the request.
Cause: Server error encountered for the request.
Action: Check the storage service setting.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05217: Malformed URI used.
Cause: A malformed URI has been used. Unable to locate the required file
Action: Correct the provided uri and retry.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05218: File Not Found.
Cause: File you are trying to refer to is not found
Action: Correct the provided file path.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05219: IO Exception
Cause: An I/O Exception occurred
Action: An I/O exception occurred.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05220: URI Exception
Cause: URI Exception has occurred
Action: Please provide a valid URI location

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05250: Error while reading or writing the serialized configuration information for [0].
Cause: Endpoint configuration issue.
Action: Check the configuration and try again.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05251: Error in the idc filters.
  Cause: Error in the idc filters.
  Action: Check the logs for the exception trace and try again. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05252: Errors while processing service request [{0}] from content server [{1}].
  Cause: Errors thrown from the Content Server.
  Action: Check the logs for the exception trace and try again. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05253: Error in the connection for endpoint [{0}].
  Cause: Error in the protocol layer.
  Action: Check the logs for the exception trace and try again. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05255: Folder [{0}] 't accessible.
  Cause: Folder not accessible.
  Action: Check if the remote folder exists and user has permission to access the folder.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05256: Error while processing the service due to SSL configuration and setup for endpoint [{0}].
  Cause: Exception due to SSL configuration and setup.
  Action: Make sure certificate is imported properly.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05257: Error occured during the post download operation[{0}].
  Cause: Error occured during the post download operation.
**Action:** Review the diagnostic log for the exact error, which begins with the string ‘ERROR:’. Contact Oracle Support Services if the problem persists.

**Level:** LOW
**Type:** ERROR
**Impact:** SYSTEM

**MFT-05400:** Invalid SOAP request received by MFTService on endpoint {0}.
**Cause:** SOAP message contains invalid XML.
**Action:** Review the SOAP request and check if the SOAP message contains invalid XML. This can be done by copying the request to a temporary XML file and opening the file in a web browser.

**Level:** HIGH
**Type:** ERROR
**Impact:** SYSTEM

**MFT-05401:** MFT Service could not deliver message to Web Service endpoint {0}.
**Cause:** Web Service endpoint configured in MFT Target definition is either invalid or down.
**Action:** Check the Target configuration in the MFT console and verify the Web Service configuration parameters such as url, Port and Service. Try connecting to the configured endpoint by typing URL in a web browser.

**Level:** CRITICAL
**Type:** ERROR
**Impact:** SYSTEM

**MFT-05402:** Invalid SOAP request received by MFT Discovery Service from URL {0}.
**Cause:** SOAP Message contains invalid XML.
**Action:** Review the SOAP request and check if the SOAP message contains invalid XML. This can be done by copying the request to a temporary XML file and opening the file in a web browser.

**Level:** HIGH
**Type:** ERROR
**Impact:** SYSTEM

**MFT-05403:** Discovery service is unable to query MFT Sources for the given application {0} and search Filter {1}.
**Cause:** MFT Source Message Table cannot be queried due to a Persistence Error.
**Action:** Verify whether the MFT Server is initialized successfully in the MFT Diagnostic Log. If there are issues in loading MFT persistence, try restarting MFT.

**Level:** HIGH
**Type:** ERROR
**Impact:** SYSTEM

**MFT-05404:** Discovery service is unable to create a SOAP response for the given application {0} and search Filter {1}.
**Cause:** SOAP exception in creating SOAP response.
**Action:** Contact your Oracle Administrator.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-05405:** SOAP Request received on endpoint url {0} contains multiple attachments, which is not supported in MFT.

**Cause:** SOAP message contains an AttachmentPart that has multiple attachments. MFT does not support multiple attachments inline. Only one attachment is allowed.

**Action:** Review the SOAP request and make sure that the AttachmentPart has only one attachment.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** MESSAGE

**MFT-05406:** MFT Service is unable to process the AttachmentPart in the SOAP request received from endpoint url {0}.

**Cause:** IO error in reading the attachment stream.

**Action:** Review the SOAP request and make sure the attachment is configured according to SOAP standards.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** MESSAGE

**MFT-05407:** MFT Service is unable to process inline payload received from endpoint url {0}.

**Cause:** IO exception in reading inline Payload embedded in the SOAP body.

**Action:** Review the SOAP request and make sure the inline payload embedded in the SOAP body conforms to the schema defined in the MFT Service wsdl.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** MESSAGE

**MFT-05408:** MFT Service is unable to process reference payload coming from the endpoint url {0}.

**Cause:** IO exception in reading Reference payload embedded in the SOAP body.

**Action:** Review the SOAP request and make sure the FileReference or FTPReference element in the SOAP body conforms to the schema defined in the MFT Service wsdl.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** MESSAGE

**MFT-05409:** MFT Service is unable to process SOAP Headers coming from the endpoint url {0}.
**Cause:** IO exception in reading SOAP Headers embedded in the SOAP message.

**Action:** Review the SOAP request and make sure the headers conform to the MFTHeader element schema defined in the MFT Service wsdl.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** MESSAGE

**MFT-05410: Invalid url in Reference Payload element received on endpoint url {0} for reference type {1}.**

**Cause:** For an incoming SOAP request containing a Reference Payload element, the URL defined in the message is invalid.

**Action:** Review the SOAP request and verify that the URL element in the Reference Payload contains a valid URL.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** MESSAGE

**MFT-05411: Unable to create SOAP message from MessageFactory.**

**Cause:** Unknown error due to the SOAP MessageFactory being unable to create the SOAP message.

**Action:** Contact the Oracle Administrator.

**Level:** CRITICAL  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-05412: MFT Web Service transport is unable to create a SOAP Message with InlinePayload for Web Service endpoint {0}.**

**Cause:** SOAP exception while adding InlinePayload element in the SOAP message. This could be due to invalid inline payload data passed to Transport layer

**Action:** Review the SOAP target configured in the MFT console to verify the Payload type and message type configuration. Also verify that the InlinePayload being passed to transport layer.

**Level:** CRITICAL  
**Type:** ERROR  
**Impact:** MESSAGE

**MFT-05413: MFT Web Service transport is unable to create a SOAP Message with Reference Payload for Web Service endpoint {0}.**

**Cause:** SOAP exception while adding Reference Payload element in the SOAP message. This could be due to invalid Reference payload data passed to Transport layer

**Action:** Review the SOAP target configured in the MFT console to verify the type of reference defined.

**Level:** CRITICAL  
**Type:** ERROR
Impact: MESSAGE

MFT-05414: MFT Web Service transport is unable to create SOAP Message with Reference of type {0} for Web Service endpoint {1}
Cause: SOAP exception while adding FTP reference Payload element in the SOAP message. This could be due to invalid Reference payload data passed to the transport layer
Action: Review the SOAP target configured in the MFT console to verify the type of reference defined.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05415: MFT Web Service transport is unable to create SOAP Message with Base64 Encoded format for Web Service endpoint {0}
Cause: Error in encoding the SOAP message in Base64 format.
Action: Review the SOAP target configured in the MFT console to verify the payload type and Message Type.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05416: MFT Web Service transport is unable to create SOAP Message with SOAP Header {0} for Web Service endpoint {1}.
Cause: SOAP Exception while adding the SOAP headers to SOAP Message.
Action: Contact the Oracle Administrator.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05417: MFT Web Service transport is unable to create SOAP Message with additional transport headers for Web Service endpoint {0}.
Cause: SOAP Exception while adding the HTTP headers to SOAP Message.
Action: Review Target configuration in MFT console to verify Additional headers field. Headers format is \[header1]=[value1]#\[header2]=[value2].

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05418: MFT Service is unable process SOAP Message containing Base64 content for Web Service endpoint {0}.
Cause: Error in Decoding the SOAP message containing Inline payload in Base64 format. This could be because the message does not contain a valid Base64 format.
Action: Review the SOAP target configured in the MFT console to verify the payload type and Message Type. Also check the SOAP request to validate the Base64 format.

Level: HIGH
Type: ERROR
Impact: MESSAGE

**MFT-05419: URL {0} configured for Web Service endpoint is invalid.**

**Cause:** Web Service endpoint configured in MFT Target definition is either invalid or down.

**Action:** Check the target configuration in the MFT console and verify the Web Service URL. Try connecting to the configured endpoint by typing the URL in a web browser.

**Level:** HIGH
**Type:** ERROR
**Impact:** SYSTEM

**MFT-05420: MFT webservice Transport has encountered error parsing Inline XML payload for webservice endpoint {0}.**

**Cause:** Error in parsing Inline XML payload. This could be because the Inline payload does not contain a valid XML format.

**Action:** Review the SOAP target configured in the MFT console to verify the payload type and MessageType. Also check the inline payload to validate the XML format.

**Level:** High
**Type:** ERROR
**Impact:** Message

**MFT-05421: MFT webservice Transport has encountered error processing the payload stream.**

**Cause:** Error in reading the inline payload stream. This could be because the payload stream may be NULL or contains invalid data.

**Action:** Review the SOAP target configured in the MFT console to verify the payload type and MessageType. Also check the payload received from MFT Source contains valid data.

**Level:** High
**Type:** ERROR
**Impact:** Message

**MFT-05422: Error in processing EventService request. SourceName input parameter {0} is invalid.**

**Cause:** Error in processing the EventService request. The provided Source name is invalid or does not exists.

**Action:** Submit the Event Request with valid Source Name.

**Level:** High
**Type:** ERROR
**Impact:** Message

**MFT-05423: Error in processing EventService request. The Source {0} either doesn't exist or not deployed.**

**Cause:** Error in processing the EventService request. The provided Source does not exist or is not deployed.
Action: Submit the Event Request with valid Source Name or after deploying the intended Source.

Level: High
Type: ERROR
Impact: Message

MFT-05424: Error in processing EventService request. The Source \{0\} is not active.
Cause: Error in processing the EventService request. The provided Source is disabled.
Action: Submit the Event Request after enabling the intended Source.

Level: High
Type: ERROR
Impact: Message

MFT-05425: Error in processing EventService request. Unable to fetch the metadata for Source \{0\}.
Cause: Error in processing the EventService request. Error while fetching the metadata for the Source.
Action: Contact your Oracle Administrator.

Level: High
Type: ERROR
Impact: Message

MFT-05426: Error in processing EventService request. Event is not supported for Source \{0\}, which is of type \{1\}.
Cause: Error in processing the EventService request. The Source does not accept the event request, Event mechanism is not supported for these types of Sources.
Action: Submit the Event Request with Sources for which events are supported, ex. File, FTP, SFTP.

Level: High
Type: ERROR
Impact: Message

MFT-05427: Error in processing EventService request. Event is not enabled for Source \{0\}.
Cause: Error in processing the EventService request. The Event option is not enabled at the Source.
Action: Submit the Event Request after enabling the event option in the Source.

Level: High
Type: ERROR
Impact: Message

MFT-05428: Error in processing EventService request. User \{0\} is not authorized to invoke the Event on Source \{1\}.
Cause: Error in processing the EventService request. The User does not have the requisite permission to invoke the event on Source.
Action: Submit the request with user having the necessary permissions.

Level: High
Type: ERROR
Impact: Message

MFT-05429: Error in processing EventService request. There is an Event with session id {0} already active on Source {1}.
Cause: Error in processing the EventService request. Previous Event submitted for the source is still in progress.
Action: Submit the request once the previous event request is completed.

Level: High
Type: ERROR
Impact: Message

MFT-05430: Error in processing EventService request. Polling is active on Source {0}.
Cause: Error in processing the EventService request. Source is already started in polling mode.
Action: Submit the request once the polling is stopped.

Level: High
Type: ERROR
Impact: Message

MFT-05431: Error in processing EventService request. Error in validating the Event Request.
Cause: Error in processing the EventService request. Exception while validating the request.
Action: Submit the request again. Contact your Oracle Administrator if the problem persists.

Level: High
Type: ERROR
Impact: Message

MFT-05432: Error in processing EventService request. Required input parameter {0} is missing.
Cause: Error in processing the EventService request. The parameter required for processing the event request for source is missing.
Action: Submit the request with required parameter.

Level: High
Type: ERROR
Impact: Message

MFT-05433: Error in processing EventService request.
Cause: Exception in processing the EventService request.
Action: Contact your Oracle Administrator.

Level: High
Type: ERROR
Impact: Message

MFT-05434: Error in processing EventService request. Invalid User, unable to get the user details from request.
Causes: Exception in processing the EventService request. User Subject is null in the request.
Action: Contact your Oracle Administrator.
Level: High
Type: ERROR
Impact: Message

MFT-05435: Error in processing EventService request. Invalid Event Session Id {0}.
Causes: Exception in processing the EventService request. Provided Event Session Id is invalid.
Action: Resubmit the request with valid Event Session Id.
Level: High
Type: ERROR
Impact: Message

MFT-05436: Error in processing EventService request. No Event found with provided Event Session Id {0}.
Causes: Exception in processing the EventService request. No Event found with provided Event Session Id.
Action: Resubmit the request with valid Event Session Id.
Level: High
Type: ERROR
Impact: Message

MFT-05437: Error in processing EventService request. Persistence error while getting the Event/Instance details.
Causes: Exception in processing the EventService request. Error in Persistence layer.
Action: Contact your Oracle Administrator.
Level: High
Type: ERROR
Impact: Message

MFT-05438: Error in processing EventService request. SOAP error while creating the response.
Causes: Exception in processing the EventService request. Error in creating the response.
Action: Contact your Oracle Administrator.
Level: High
Type: ERROR
Impact: Message
MFT-05439: Parameter {0} configured with value {1} at ODIInvoke processing action is invalid.
Cause: The Parameter(s) configured at the ODIInvoke processing function is not valid.
Action: Correct the parameter configured as per the standard expected for Webservices.
Level: High
Type: ERROR
Impact: Message

MFT-05440: Error while getting the {1} type of Operation {0}.
Cause: An error occurred while parsing the request/response/fault types of an Operation.
Action: Verify whether the valid Operation is configured. Contact Oracle Support if the problem persists.
Level: High
Type: ERROR
Impact: Message

MFT-05441: Exception while processing the ODIInvoke Processing function. {0}
Cause: An error occurred while processing the ODIInvoke processing function.
Action: Verify whether the valid parameters are configured at the ODIInvoke processing function. Contact Oracle Support if the problem persists.
Level: High
Type: ERROR
Impact: Message

MFT-05442: Invalid Export type {0}.
Cause: Export type is not the supported one.
Action: Send the request again after changing the export type.
Level: High
Type: ERROR
Impact: Message

MFT-05443: Invalid {0} file.
Cause: The archive file uploaded is invalid.
Action: Send the request again after selecting the valid archive file.
Level: High
Type: ERROR
Impact: Message

MFT-05444: Invalid RESTful resource {0}.
Cause: The resource name provided in the url is invalid.
Action: Send the request again after changing resource name path parameter.
Level: High
Type: ERROR
Impact: Message

MFT-05445: Unable to list the resources catalog of MFT RESTful services.
  Cause: An exception occurred while listing the resources.
  Action: Review diagnostic log for detailed error message.
  Level: High

Type: ERROR
Impact: Message

MFT-05501: The {0} record {1} is already persisted.
  Cause: The new record you are trying to persist is already available in the database.
  Action: Check the details of the record you are trying to insert and try again.
  Level: CRITICAL

Type: ERROR
Impact: MESSAGE

MFT-05502: No instance record found for message ID {0}.
  Cause: There was no instance record found in the database.
  Action: Check the ID of the entity.
  Level: LOW

Type: ERROR
Impact: MESSAGE

MFT-05503: Error occurred while performing persistence operation.
  Cause: Exception occurred while performing the persistence operation.
  Action: Review diagnostic log for detailed error message.
  Level: LOW

Type: ERROR
Impact: MESSAGE

MFT-05504: Could not perform the persistence lock operation {0} for entity {1}.
  Cause: Exception occurred while performing the persistence operation.
  Action: The exception may have occurred while performing the corresponding database lock operation. Check the logs for the exception trace.
  Level: LOW

Type: ERROR
Impact: MESSAGE

MFT-05505: Error while deleting Data Storage {0}.
  Cause: Error occurred while deleting the Data Storage entity in the database.
  Action: Make sure the Data Storage is not associated with any entity. Check the logs for the exception trace.
  Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05506: Error deleting Source Message for source {0}.
  Cause: Error occurred while deleting the Source Message entity in the database.
  Action: Make sure the source is not associated with any transfer. Check the logs for the exception trace.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05507: Error deleting transfer instance for transfer {0}.
  Cause: Error occurred while deleting the transfer instance entity in the database.
  Action: Check the logs for the exception trace.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05508: Error deleting Target Message {0}.
  Cause: Error occurred while deleting the Target Message entity in the database.
  Action: Check the logs for the exception trace.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05509: No retry info record exists in database.
  Cause: Retry information not found for target.
  Action: Resubmit the message again.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-05510: No source lifecycle record exists for source name {0} and label {1} in database.
  Cause: No record found.
  Action: Redeploy the source and resubmit the message.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05511: No source record found for message ID {0}.
  Cause: There was no source record found in the database.
  Action: Check the ID of the entity.

Level: LOW
Type: ERROR
Impact: MESSAGE

MFT-05512: No transfer instance record found for message ID {0}.
    Cause: There was no transfer instance record found in the database.
    Action: Check the ID of the entity.
    Level: LOW

Type: ERROR
Impact: MESSAGE

MFT-05513: No target message record found for ID {0}.
    Cause: There was no transfer message record found in the database.
    Action: Check the ID of the entity.
    Level: LOW

Type: ERROR
Impact: MESSAGE

MFT-05514: Source {0} is not deployed.
    Cause: Source is not deployed.
    Action: Deploy the source and retry.
    Level: LOW

Type: ERROR
Impact: SYSTEM

MFT-05515: Transfer {0} is not deployed.
    Cause: Transfer is not deployed.
    Action: Deploy the transfer and retry.
    Level: LOW

Type: ERROR
Impact: SYSTEM

MFT-05516: Target {0} is not deployed.
    Cause: Target is not deployed.
    Action: Deploy the target and retry.
    Level: LOW

Type: ERROR
Impact: SYSTEM

MFT-05517: Error deleting source {0}.
    Cause: Error occurred while deleting the source in the database.
    Action: Check the logs for the exception trace.
    Level: HIGH

Type: ERROR
Impact: SYSTEM
MFT-05518: Error deleting transfer [0].
Cause: Error occurred while deleting the transfer in the database.
Action: Check the logs for the exception trace.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05519: Error deleting target [0].
Cause: Error occurred while deleting the target in the database.
Action: Check the logs for the exception trace.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05520: Error fetching sources with label [0].
Cause: Error occurred while fetching sources with this label from the database.
Action: Check the logs for the exception trace.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05521: Error fetching transfers with label [0].
Cause: Error occurred while fetching transfers with this label from the database.
Action: Check the logs for the exception trace.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05522: Error fetching targets with label [0].
Cause: Error occurred while fetching targets with this label from the database.
Action: Check the logs for the exception trace.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05523: Batch id [0] provided by user for purge recovery does not exist.
Cause: Batch id [0] provided by user for purge recovery does not exist.
Action: Check the passed batch id and try again. You can start a new purge also by passing the batch id as blank. Contact Oracle Support if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05524: Batch id [0] provided by user, for filesystem purge, does not exist.
**Cause:** Batch id [{0}] provided by user, for filesystem purge, does not exist.

**Action:** Check the passed batch id and try again. Contact Oracle Support if the problem persists.

**Level:** MEDIUM

**Type:** ERROR

**Impact:** SYSTEM

**MFT-05525: Filesystem purge is already run successfully for the provided batch id [{0}].**

**Cause:** Filesystem purge is already run successfully for the provided batch id [{0}].

**Action:** Check the passed batch id and try again. Contact Oracle Support if the problem persists.

**Level:** MEDIUM

**Type:** ERROR

**Impact:** SYSTEM

**MFT-05526: Filesystem purge can not be run without a valid Root Directory configured.**

**Cause:** No Root directory configured in the Application Settings.

**Action:** Check the Root Directory under Hosted Server properties. Contact Oracle Support if the problem persists.

**Level:** HIGH

**Type:** ERROR

**Impact:** SYSTEM

**MFT-05527: Runtime Purge is not yet executed for the batch id [{0}]. FS Purge can not be run without first running the Runtime Purge.**

**Cause:** Runtime Purge is not yet executed for the batch id. FS Purge can not be run without first running the Runtime Purge.

**Action:** Check the Root Directory under Hosted Server properties. Contact Oracle Support if the problem persists.

**Level:** HIGH

**Type:** ERROR

**Impact:** SYSTEM

**MFT-05528: Filesystem archive is already run successfully for the provided batch id [{0}].**

**Cause:** Filesystem archive is already run successfully for the provided batch id [{0}].

**Action:** Check the passed batch id and try again. Contact Oracle Support if the problem persists.

**Level:** MEDIUM

**Type:** ERROR

**Impact:** SYSTEM
MFT-05529: Batch id \([0]\) provided by user, for filesystem archive, does not exist.
  
  **Cause:** Batch id \([0]\) provided by user, for filesystem archive, does not exist.
  
  **Action:** Check the passed batch id and try again. Contact Oracle Support if the problem persists.
  
  **Level:** MEDIUM
  
  **Type:** ERROR
  
  **Impact:** SYSTEM

MFT-05530: Filesystem archive can not be run without a valid Root Directory configured.
  
  **Cause:** No Root directory configured in the Application Settings.
  
  **Action:** Check the Root Directory under Hosted Server properties. Contact Oracle Support if the problem persists.
  
  **Level:** HIGH
  
  **Type:** ERROR
  
  **Impact:** SYSTEM

MFT-05531: Error while creating the archive file \(0\). Error Message: \(1\)
  
  **Cause:** Error while creating the archive file.
  
  **Action:** Check the Root Directory under Hosted Server properties. Contact Oracle Support if the problem persists.
  
  **Level:** HIGH
  
  **Type:** ERROR
  
  **Impact:** SYSTEM

MFT-05532: Filesystem Archive operation started for the provided batch id \([0]\) but not complete. Filesystem purge can not continue.
  
  **Cause:** Filesystem Archive operation started for the provided batch id but not complete. Filesystem purge can not continue.
  
  **Action:** Check the passed batch id and try again. Contact Oracle Support if the problem persists.
  
  **Level:** MEDIUM
  
  **Type:** ERROR
  
  **Impact:** SYSTEM

MFT-05533: Error while adding payload \(0\) to the archive file. Error Message: \(1\)
  
  **Cause:** Filesystem error while adding payload file to the archive.
  
  **Action:** Check the payload file path, permissions and try again. Contact Oracle Support if the problem persists.
  
  **Level:** MEDIUM
  
  **Type:** ERROR
  
  **Impact:** SYSTEM

MFT-05534: Error while working with archive file \(0\). Error Message: \(1\)
  
  **Cause:** Filesystem error while working with archive file.
Action: Check the archive file path, permissions and try again. Contact Oracle Support if the problem persists.

Level: MEDIUM  
Type: ERROR  
Impact: SYSTEM

MFT-05535: Error while working with archive file [0] for restore. Error Message: {1}  
Cause: Filesystem error while working with archive file.  
Action: Check the archive file path, permissions and try again. Contact Oracle Support if the problem persists.

Level: MEDIUM  
Type: ERROR  
Impact: SYSTEM

MFT-05536: No Schedule Purge record found for schedule name [[0]].  
Cause: There was no Schedule Purge record found in the database.  
Action: Check the Name of the Schedule Purge. Please review the diagnostic logs for specified schedule purge

Level: LOW  
Type: ERROR  
Impact: MESSAGE

MFT-05537: Error occurred while performing persistence operation.  
Cause: Exception occurred while performing the persistence operation.  
Action: Review diagnostic log for detailed error message.

Level: LOW  
Type: ERROR  
Impact: MESSAGE

MFT-05802: Exception occurred while querying for ESS job definition [[0]].  
Cause: Unexpected exception occurred while querying for the ESS job definition [[0]].  
Action: Ensure that the MFT Custom Hosting App is properly deployed. For further details, contact Oracle Support Services.

Level: HIGH  
Type: ERROR  
Impact: SYSTEM

MFT-05803: NOT_IN_USE  
Cause: NOT_IN_USE  
Action: NOT_IN_USE

Level: HIGH

  Impact: MESSAGE

MFT-05805: NOT_IN_USE
  Cause: NOT_IN_USE
  Action: NOT_IN_USE
  Level: HIGH
  Type: ERROR
  Impact: MESSAGE

MFT-05806: Exception occurred while looking up JNDI context.
  Cause: Unexpected exception occurred while looking up the JNDI context.
  Action: Check the JNDI configuration for ESS on your application server.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05807: Exception occurred while looking up EJB [{0}].
  Cause: Could not look up ESS EJB [{0}].
  Action: Ensure that the MFT custom hosting app (MFTCustomHostingApp) is installed properly.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05808: Unexpected error occurred while submitting an ESS job with details:
  job type [{0}], schedule name [{1}], job description [{2}], schedule time [{3}].
  Cause: Unexpected error occurred while submitting an ESS job.
  Action: Check the schedule details and deploy again. Also verify that ESS environment is up and running.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05809: {0}
  Cause: Validation failed for schedule.
  Action: Check your schedule details. Contact Oracle Support Services if the problem persists.
  Level: HIGH
  Type: ERROR
Impact: SYSTEM
MFT-05810: Exception occurred while looking for schedule with name [{0}].
   Cause: Unexpected exception occurred while looking for schedule with name [{0}].
   Action: Ensure that the schedule is attached to the artifact and try deploy again. For further details, contact Oracle Support Services.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-05811: Could not find schedule with name [{0}].
   Cause: Could not find a schedule with name [{0}].
   Action: Ensure that the schedule is attached with artifact and try deploy again. For further details, contact Oracle Support Services.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-05812: Exception occurred while opening ESS runtime service. Event: [{0}].
   Cause: Could not open ESS runtime service.
   Action: Check that ESS environment is up and running.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-05813: Exception occurred while opening ESS metadata service. Event: [{0}].
   Cause: Could not open ESS metadata service
   Action: Check that ESS environment is up and running.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-05814: Exception occurred while closing ESS runtime service. Event: [{0}].
   Cause: Could not close ESS runtime service.
   Action: Check that ESS environment is up and running.
   Level: HIGH
   Type: ERROR
   Impact: SYSTEM

MFT-05815: Exception occurred while closing ESS runtime service. Event: [{0}].
   Cause: Could not close ESS metadata service.
   Action: Check that ESS environment is up and running.
   Level: HIGH
   Type: ERROR
Impact: SYSTEM

MFT-05816: Could not find ESS job with id [{0}] while cancelling.
  Cause: Could not find the ESS job while cancelling.
  Action: Ignore this exception. A new job has been submitted as part of a new deployment.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05817: Exception occurred while cancelling the ESS job with ID [{0}].
  Cause: Illegal Job State Found. Cannot be cancelled.
  Action: Try again or contact Oracle Support Services.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05818: Could not find ESS job request with ID [{0}]. Event [{0}].
  Cause: Could not find ESS job request with id [{0}].
  Action: Check that the artifact is deployed and try again.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05819: Unexpected error occurred for job request ID [{0}]. Event [{1}].
  Cause: Unexpected error occurred for job request ID [{0}].
  Action: Check that the artifact is deployed and try again.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05820: NOT_IN_USE
  Cause: NOT_IN_USE
  Action: NOT_IN_USE
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05821: Exception occurred while looking up EJB [{0}].
  Cause: Could not look up ESS EJB [{0}].
  Action: Ensure that the MFT custom hosting app (MFTCustomHostingApp) is installed properly. For further details, contact Oracle Support Services.
  Level: HIGH
  Type: ERROR
Impact: SYSTEM

MFT-05822: Error occurred for schedule name [{1}]. Event: [{0}].
  Cause: Error occurred for schedule name [{1}]. Event: [{0}].
  Action: Check the schedule details and try again.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05823: Validation failed for schedule name [{1}]. Event: [{0}].
  Cause: Validation failed for schedule name [{1}]. Event: [{0}].
  Action: Check the schedule details and try again.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05824: Schedule already exists with name [{1}]. Event: [{0}].
  Cause: Schedule already exists with name [{1}]. Event: [{0}].
  Action: Check the schedule details and try again.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05825: Null schedule passed for event [{0}].
  Cause: Null schedule passed for event [{0}].
  Action: Check the schedule details and try again.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05826: ID in schedule found null for event [{0}].
  Cause: ID in schedule found null for event [{0}].
  Action: Check the schedule details and try again.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05827: Exception occurred for schedule [{1}]. Event: [{0}].
  Cause: Unexpected exception occurred for schedule.
  Action: Check the schedule details and try again.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-05828: Validation failed for schedule [{1}]. Event: [{0}].
MFT-05829: Schedule object found null for event [0].
Cause: Schedule object found null.
Action: Check the schedule details and try again.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05830: Passed schedule name is null for event [0].
Cause: Passed schedule name is null.
Action: Check the schedule details and try again.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05831: No schedule found with given name [0].
Cause: No schedule found with given name.
Action: Check the schedule details and try again.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05832: Unexpected error occurred while querying for schedule with name [0].
Cause: Unexpected error occurred while querying for schedule.
Action: Check the schedule details and try again. Also verify that ESS environment is up and running.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05833: Schedule name passed as NULL while deleting schedule.
Cause: Schedule name passed as NULL while deleting schedule.
Action: Check the schedule details and try again.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05834: Unexpected error occurred while deleting schedule with name [0].
Cause: Unexpected error occurred while deleting schedule.
Action: Check the schedule details and try again. Also verify that ESS environment is up and running.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-05835: Trying to deactivate a non-active Schedule Purge \([0]\).
Cause: Trying to access a non-active schedule purge.
Action: Scheduled purge is not active, Please active it first.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-05836: Error occurred while deleting an active schedule purge \([0]\) with ESS Job ID\([1]\).
Cause: Trying to delete an active schedule purge.
Action: An active schedule purge can't be deleted. Deactivate it and then try to delete it.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-05837: Trying to activate an active Schedule Purge \([0]\).
Cause: Trying to activate an active Schedule Purge \([0]\).
Action: Scheduled purge is active, Please deactivate it first.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-05838: Trying to modify an active Schedule Purge \([0]\).
Cause: Trying to modify an active Schedule Purge \([0]\).
Action: An active schedule purge can't be modified. Deactivate it and then try to modify it.

Level: LOW
Type: ERROR
Impact: SYSTEM

MFT-05839: Error occurred while creating ESS schedule for purge schedule \([0]\).
Cause: Error occurred while creating ESS schedule for purge schedule \([0]\).
Action: Check the purge schedule details and try again.

Level: LOW
Type: ERROR
Impact: SYSTEM
MFT-05840: Error occurred while updating ESS schedule \([1]\) for purge schedule \([0]\).

**Cause:** Error occurred while updating ESS schedule \([1]\) for purge schedule \([0]\).

**Action:** Check the purge schedule details and try again.

**Level:** LOW

**Type:** ERROR

**Impact:** SYSTEM

MFT-05841: Could not find job definition with name \([0]\).

**Cause:** Could not find job definition with name \([0]\).

**Action:** Ensure that the MFT Custom Hosting App is deployed. For further details, contact Oracle Support Services.

**Level:** HIGH

**Type:** ERROR

**Impact:** SYSTEM

MFT-05842: Exception occurred while checking if schedule with name \([0]\) is in use.

**Cause:** Unexpected exception occurred while checking if schedule with name \([0]\) is in use.

**Action:** Check the database connection.

**Level:** HIGH

**Type:** ERROR

**Impact:** SYSTEM

MFT-05843: Could not find ESS job with id \([0]\) while doing operation \([1]\).

**Cause:** Could not find the ESS job while doing a specified operation.

**Action:** Ignore this exception. Job has been cancelled already as part of deployment cleanup.

**Level:** HIGH

**Type:** ERROR

**Impact:** SYSTEM

MFT-05844: Exception occurred while doing the operation \([1]\) with ESS job ID \([0]\).

**Cause:** Illegal Job State Found. Cannot do the specified operation.

**Action:** Try again or contact Oracle Support Services.

**Level:** HIGH

**Type:** ERROR

**Impact:** SYSTEM

MFT-05845: Operation \([1]\) with ESS job ID \([0]\) is not allowed.

**Cause:** Specified operation is not allowed on the given job.

**Action:** Try again or contact Oracle Support Services.

**Level:** HIGH

**Type:** ERROR
Impact: SYSTEM
MFT-05846: {0}
  Cause: Exception occurred while interacting with ESS
  Action: Check your ESS environment and try again.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM
MFT-05847: {0}
  Cause: Exception occurred while invoking the ESS through security interceptor.
  Action: Check your ESS environment and try again.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM
MFT-06001: Error while initializing security for stripe {0}.
  Cause: An error occurred while defining the required policy for the application stripe.
  Action: Check whether the application has all the required permissions in the EM and policy store connection properties. Review the diagnostic log for the exact error, which begins with the string 'ERROR'. Contact Oracle Support Services if the problem persists.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM
MFT-06002: An error occurred while performing the security operation.
  Cause: An error occurred while executing the security operation on the specified application stripe.
  Action: Check the security store configuration in the WebLogic console or jps-config.xml and default permissions of MFT in the policy store. Review the diagnostic log for the exact error.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM
MFT-06003: Error while initializing the identity store for default realm.
  Cause: An error occurred while initializing identity store with default security realm.
  Action: Check the security store configuration in the WebLogic console or jps-config.xml and default permissions of MFT in the policy store. Review the diagnostic log for the exact error.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM
MFT-06005: Illegal MFTESPermission resource name {0}.
Cause: The resource name is not in the expected MFT ES Permission format.
Action: Correct the resource name parameter using the format
'resourceName={ResourceName},includeSubfolders=true | false,,serverType=FTP | SFTP'.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-06006: Error while performing the SSH Key store operations on key type:{0}
and alias {1}.
Cause: An error occurred while getting the SSH key store keys or aliases from the
specified location.
Action: Check the key store location in the metadata repository and ensure that
the required keys are present in the specified location. Review the diagnostic log
for the exact error, and Contact Oracle Support Services if the problem persists.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-06007: Secured Method {0} is not annotated with required parameters.
Cause: An error occurred while checking the access provisioning before executing
the method.
Action: Annotate the method with the required parameters.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-06008: Error while performing the credential operation {0} for alias {1}.
Cause: An error occurred while performing the credential operation.
Action: Review the diagnostic log for the exact error, which begins with the string
'ERROR:'. This error line, along with the preceding lines, indicates the reason for
this exception. Contact Oracle Support Services if the problem persists.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-06009: Error while performing the key store operation {0}.
Cause: An error occurred while performing the key store operation.
Action: Review the diagnostic log for the exact error, which begins with the string
'ERROR:'. This error line, along with the preceding lines, indicates the reason for
this exception. Contact Oracle Support Services if the problem persists.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM
MFT-06010: An error occurred while performing the security operation on stripe {0}, store {1} and alias {2}.

Cause: An error occurred while executing the security operation on the specified application stripe.

Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06011: Invalid key file location [{0}]. The given path does not exist.

Cause: The given key file location does not exist or the key file is an empty file.

Action: Provide the correct path for export and while importing make sure that valid non empty key file exists at the given path.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06012: The imported key file {0} has multiple key rings. Importing multiple key rings is not supported.

Cause: The key file being imported has more than one PGP key.

Action: Import a valid key file that has only one key ring.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06013: Unable to get the resource type {0} while granting the permission for resource {1}.

Cause: Internal resource type definition might have failed, there is no associated resource type defined in the policy store.

Action: Resource type should be predefined before granting the permission by the security layer. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06014: Unable to get the Principal of user/group {0} with type {1}.

Cause: The principal type specified for permission grant is invalid.

Action: Grant the permission with the valid principal type which can be a User or Group or Application Role.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06015: Error while granting the permission {2} to resource {0} for principal(s){1}.
Cause: An exception occurred while granting the permission for a resource.
Action: Check the parameters used for granting the permission. Contact Oracle Support Services if the problem persists.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06016: Error while getting principals and actions of resource {0} with type {1}.
Cause: An exception occurred while getting the principals and actions of a resource.
Action: Check the resource name for validity. Contact Oracle Support Services if the problem persists.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06017: Error while revoking the permission {2} of a resource{0} for principal(s){1}.
Cause: An exception occurred while deleting the permissions of a resource.
Action: Check the revoke parameters. Contact Oracle Support Services if the problem persists.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06018: Authorization failure for principal(s) {0} to resource {1} for action {2}.
Cause: Access control exception occurred for a user while doing an operation.
Action: If this error encountered even if the operation was allowed for the user, then check the permissions of the user. Contact Oracle Support Services if the problem persists.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06019: Unable to create the MFT OPSS resource type {0}.
Cause: An error occurred while defining the resource type.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06020: Unable to create the Principal object for principal name {0} and type {1}.
Cause: An error occurred while creating the principal object.
**Action:** Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-06021: Unable to get the members of the role {0}.**  
**Cause:** An error occurred while fetching the members of a role.  
**Action:** Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-06022: Error while fetching all the application roles of application stripe {0}.**  
**Cause:** An error occurred while fetching all the application roles.  
**Action:** Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-06023: Error while fetching all the application roles of principal {0} with type {1}.**  
**Cause:** An error occurred while fetching all the application roles of a principal.  
**Action:** Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-06024: Error while fetching the granted resources of a principal {0}.**  
**Cause:** An error occurred while fetching the resources of a principal.  
**Action:** Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-06025: Error while deleting all the grants of a resource {0} with type {1}.**
Cause: An error occurred while deleting all the grants of a resource.

Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06026: Error while creating an application role with name {0}.

Cause: An error occurred while creating an application role.

Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06027: Error while deleting the application role with name {0}.

Cause: An error occurred while deleting an application role.

Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06028: Error while adding the member(s) {0} to application role {1}.

Cause: An error occurred while adding members to an application role.

Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06029: Error while removing the member(s) {0} from application role {1}.

Cause: An error occurred while removing members of an application role.

Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06030: Unable to authenticate the user {0}.

Cause: An error occurred while authenticating the user.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06031: Unable to get the enterprise groups of the user {0}.
Cause: An error occurred while getting the enterprise groups of the user.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06032: Error while retrieving the list of users/groups from identity store with criteria {0}.
Cause: An error occurred while fetching the users from identity store with search criteria.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06033: Invalid value [{0}] for parameter [{1}].
Cause: Parameter value supplied is incorrect.
Action: Provide the expected parameter value.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06034: The imported key file is not having valid encryption/decryption key.
Cause: The key file being imported has no valid PGP key.
Action: Import a key file that has a valid PGP key.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-06035: A key already exists for the given key alias {0} in credential store.
Cause: A key is already created for the given key alias in the credential store.
Action: Import the key file again with a different key alias.

Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-06036: Key not found for the given key alias [0] in credential store.
Cause: No key was found for the given key alias in the credential store.
Action: Check if a key for the given key alias has been generated or not in the credential store.
Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-06037: Invalid key file [0]. The given key file is an empty file.
Cause: The given key file location to export CSF Key does not exist.
Action: Provide the correct path for export and while importing make sure that valid non empty key file exists at the given path.
Level: HIGH
Type: ERROR
Impact: SYSTEM
MFT-06038: Path [0] specified on MFT embedded server for the resource is invalid.
Cause: No directory exists on MFT Embedded server specified by given path.
Action: Check if path specified is a valid directory on MFT Embedded server. If directory does not exist correct the Path input to point to existing directory OR create a new directory with the given Path.
Level: MEDIUM
Type: ERROR
Impact: MESSAGE
MFT-06039: Error in configuring home directory [0] for user [1].
Cause: Error in configuring user home directory due to error accessing metadata for User/Group.
Action: Review Metadata repository configuration for MFT Embedded Server users. Try running MFT metadata export command to see if metadata repository configured properly.
Level: MEDIUM
Type: ERROR
Impact: MESSAGE
MFT-06040: Invalid Embedded Server types specified in the input.
Cause: Server Types specified in the input does not belong to one/more of the types FTP,SFTP.
Action: Provide server types which contains one ore more values FTP,SFTP.
Level: MEDIUM
Type: ERROR
Impact: MESSAGE
MFT-06041: Invalid permissions set [0] provided.
  Cause: The permissions set provided contains one or more values that are not
from the supported set 'READ,WRITE,DELETE,LIST'.
  Action: Provide permissions that contains one or more values from supported set
'READ,WRITE,DELETE,LIST'.
  Level: MEDIUM
  Type: ERROR
  Impact: SYSTEM

MFT-06042: Error while registering the WSM Security Policies to endpoint [0].
  Cause: An exception occurred while registering the WSM policies with WSM
Policy Manager.
  Action: Check the endpoint policies and WSM Manager configuration.
  Level: MEDIUM
  Type: ERROR
  Impact: SYSTEM

MFT-06043: Error while unregistering the WSM Security Policies of endpoint [0].
  Cause: An exception occurred while unregistering the WSM policies from WSM
Policy Manager.
  Action: Check the endpoint policies and WSM Manager configuration.
  Level: MEDIUM
  Type: ERROR
  Impact: SYSTEM

MFT-06044: Error while deleting the WSM assembly file of endpoint [0].
  Cause: An exception occurred while deleting the WSM assembly file from the
MDS repository.
  Action: Check the MDS configuration and endpoint availability.
  Level: MEDIUM
  Type: ERROR
  Impact: SYSTEM

MFT-06045: No user found by name [0].
  Cause: No user found.
  Action: Specify the valid user name and retry the action.
  Level: LOW
  Type: ERROR
  Impact: MESSAGE

MFT-06046: No user group found by name [0].
  Cause: No user group found.
  Action: Specify the valid user group name and retry the action.
  Level: LOW
MFT-07001: Error while creating audit record for the event [0].
Cause: Error while creating audit record for the event.
Action: Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.
Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-07002: Error while initializing audit framework.
Cause: Error initializing audit framework.
Action: Check Audit configuration in EM console. Contact Oracle Administrator.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07003: Audit enabled method [0] is not annotated with the required parameters.
Cause: An error occurred during auditing after executing a method.
Action: Annotate the method with the required parameters.
Level: CRITICAL
Type: ERROR
Impact: SYSTEM

MFT-07201: Error while sending notification.
Cause: Error while sending notification.
Action: Check the notification settings. Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07202: Error while sending email notification.
Cause: Error while sending email notification.
Action: Check the notification settings. Review the diagnostic log for the exact error, which begins with the string 'ERROR:'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM
MFT-07203: Error while sending sms notification.

**Cause:** Error while sending sms notification.

**Action:** Check the notification settings. Review the diagnostic log for the exact error, which begins with the string 'ERROR'. This error line, along with the preceding lines, indicates the reason for this exception. Contact Oracle Support Services if the problem persists.

**Level:** MEDIUM
**Type:** ERROR
**Impact:** SYSTEM

MFT-07204: Email settings are not configured for user [{0}].

**Cause:** Email settings are not configured for user.

**Action:** Configure the email settings for user in the user store and retry the action.

**Level:** LOW
**Type:** ERROR
**Impact:** MESSAGE

MFT-07205: SMS settings are not configured for user [{0}].

**Cause:** SMS settings are not configured for user.

**Action:** Configure the SMS settings for user in the user store and retry the action.

**Level:** LOW
**Type:** ERROR
**Impact:** MESSAGE

MFT-07206: Delivery channel [{0}] is not supported for notification. Only SMS/Email delivery channel is only supported.

**Cause:** Delivery channel is not supported.

**Action:** Change the delivery channel to Email/SMS and retry the action.

**Level:** LOW
**Type:** ERROR
**Impact:** MESSAGE

MFT-07207: Delivery channel information is required.

**Cause:** Delivery channel cannot be null.

**Action:** Specify delivery channel and retry the action.

**Level:** LOW
**Type:** ERROR
**Impact:** MESSAGE

MFT-07208: Notification template file[{0}] doesn't exist.

**Cause:** Template file not exists.

**Action:** Specify the correct template file location and retry the action.

**Level:** HIGH
**Type:** ERROR
MFT-07209: Invalid notification template [{0}], no notification message subject found.
Cause: No notification message subject found.
Action: Correct the template file to add the message subject and retry the action.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07210: Invalid notification template [{0}], no notification message body found.
Cause: No notification message body found.
Action: Correct the template file to add the message body and retry the action.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07401: Callout with name: {0} exists in the Metadata Store. Not creating a new one.
Cause: An existing callout with same name was found in the Metadata Store.
Action: Change the callout name and try again. Refer to the MFT utilities documentation to determine the arguments and their types for the given command.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07402: Exception while creating Callout.
Cause: EJBEexception thrown by utility while creating callout.
Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07403: Callout definition XML input file [{0}] not found.
Cause: Callout definition XML input file not found. The given file name or file path is incorrect.
Action: Provide provide a valid file path and try again.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07404: Callout definition XML File validation failed. Correct the errors and rerun the utility.
Cause: Callout definition XML File validation failed. Correct the errors and rerun the utility.

Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07405: Invalid Notification event type: {0}.

Cause: Invalid notification event type.

Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07406: Contact Information not found. Type: {0} Value: {1}.

Cause: Contact not found. Add the contact to the system and rerun the utility.

Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-07407: An Exception occurred while running MFT utility. {0}.

Cause: An Exception occurred while running the MFT utility.

Action: Refer to the MFT utilities documentation to determine arguments and their types for the given command to make sure correct values are passed to the given method.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07408: Contact already exists. Type: {0} # Value: {1}.

Cause: A contact of the given type and value already exists in the system.

Action: Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-07409: Error while creating contact of type: {0} and value: {1}.
**Cause:** An error occurred while creating a new contact of the given type and value.

**Action:** Refer to the MFT utilities help to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

**Level:** HIGH
**Type:** ERROR
**Impact:** MESSAGE

**MFT-07410: Error while deleting callout: {0}.**

**Cause:** An error occurred while deleting the given callout.

**Action:** Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

**Level:** HIGH
**Type:** ERROR
**Impact:** MESSAGE

**MFT-07411: Error occurred while listing all the callouts in the system.**

**Cause:** An error occurred while listing all the callouts in the system.

**Action:** Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

**Level:** HIGH
**Type:** ERROR
**Impact:** SYSTEM

**MFT-07412: Error while adding a contact to notification event. Event: {0} # Contact type: {1} # Value: {2}.**

**Cause:** An error occurred while adding a contact to the notification event.

**Action:** Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

**Level:** HIGH
**Type:** ERROR
**Impact:** MESSAGE

**MFT-07413: Error while removing a contact from a notification event. Error Message: {0}.**

**Cause:** An error occurred while removing a contact from a notification event.

**Action:** Refer to the MFT utilities documentation to determine the arguments and their types for the given command to make sure correct values are passed to the given method.

**Level:** HIGH
**Type:** ERROR
**Impact:** MESSAGE
MFT-07414: Error while deleting a contact from the system. Error Message: {0}.
  Cause: An error occurred while deleting a contact from the system.
  Action: Refer to the MFT utilities documentation to determine the arguments and
  their types for the given command to make sure correct values are passed to the
  given method.
  Level: HIGH
  Type: ERROR
  Impact: MESSAGE

MFT-07415: Unsupported artifact type found. Artifact type: {0}.
  Cause: Unsupported artifact type found. Supported values are SOURCE,
  TARGET and TRANSFER.
  Action: Contact the Oracle Administrator.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-07416: Exception while getting the id for source artifact [{0}].
  Cause: Exception occurred while getting the source id from metadata store for the
  given name.
  Action: Contact the Oracle Administrator.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-07417: Cannot delete the contact. Given contact is associated with a
  notification event. Contact type: {0} :: Value: {1}.
  Cause: Given contact is associated with a notification event. First remove the
  contact from the event and then try deleting the contact again.
  Action: Refer to the MFT utilities documentation to determine the arguments and
  their types for the given command to make sure correct values are passed to the
  given method.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-07418: Error while listing contacts from the system. Contact type: {0}.
  Cause: Error while listing the contacts of the given type. Try again.
  Action: Refer to the MFT utilities documentation to determine the arguments and
  their types for the given command to make sure correct values are passed to the
  given method.
  Level: HIGH
  Type: ERROR
  Impact: SYSTEM

MFT-07419: Callout with name: {0} not found in MDS. No changes done.
**Cause:** An existing callout with the given name was not found in the Metadata Store.

**Action:** Provide a different and correct callout name and try again. Refer to the MFT utilities documentation to determine the arguments and their types for the given command.

**Level:** MEDIUM  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-07420: Invalid value supplied for group name. Callout definition for {0} not changed.**

**Cause:** Incorrect value provided for group name.

**Action:** Valid values for group name can contain any combination of comma-separated values of following: Source-pre, Source-post, Target-pre, Target-post. Refer to the MFT utilities documentation to determine the arguments and their types for the given command.

**Level:** MEDIUM  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-07421: Error while modifying callout {0}. Error Message: {1}.**

**Cause:** An Error occurred while modifying the callout definition.

**Action:** Refer to the MFT utilities documentation to determine the arguments and their types for the given command.

**Level:** MEDIUM  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-07422: Error while creating {0} keys. Error Message: {1}.**

**Cause:** An Error occurred while creating sample keys.

**Action:** Refer to the MFT utilities documentation to determine the arguments and their types for the given command.

**Level:** MEDIUM  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-07423: Exception while getting the id for target artifact [{0}].**

**Cause:** Exception occurred while getting the target id from metadata store for the given name.

**Action:** Contact the Oracle Administrator.

**Level:** HIGH  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-07424: Exception while getting the id for transfer artifact [{0}].**
Cause: Exception occurred while getting the transfer id from metadata store for the given name.
Action: Contact the Oracle Administrator.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07425: Exception while getting the name for transfer artifact id [{0}].
Cause: Exception occurred while getting the transfer id from metadata store for the given name.
Action: Contact the Oracle Administrator.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07426: Exception while getting the name for target artifact id [{0}].
Cause: Exception occurred while getting the target id from metadata store for the given name.
Action: Contact the Oracle Administrator.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07427: Exception while getting the name for source artifact id [{0}].
Cause: Exception occurred while getting the source id from metadata store for the given name.
Action: Contact the Oracle Administrator.
Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07428: Error while retrieving deployment history for transfer [{0}].
Cause: Exception occurred while retrieving deployment history information for the given transfer.
Action: Check the transfer deployment details in UI. Deploy the transfer from UI or WLST and try again.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07429: Error while retrieving deployment history for target [{0}].
Cause: Exception occurred while retrieving deployment history information for the given target.
Action: Check the target deployment details in UI. Deploy the target from UI or WLST and try again.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07430: Error while retrieving deployment history for source [{0}].
Cause: Exception occurred while retrieving deployment history information for the given source.
Action: Check the source deployment details in UI. Deploy the source from UI or WLST and try again.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07431: Error while retrieving deployment history for transfer [{0}].
Cause: Exception occurred while retrieving deployment history information for the transfer source.
Action: Check the transfer deployment details in UI. Deploy the transfer from UI or WLST and try again.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07432: Exception occurred while checking if transfer [{0}] exists in metadata store.
Cause: Exception occurred while checking if the given transfer exists in metadata store.
Action: Restore the deleted transfer artifact in metadata store and try again.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07433: Exception occurred while checking if target [{0}] exists in metadata store.
Cause: Exception occurred while checking if the given target exists in metadata store.
Action: Restore the deleted target artifact in metadata store and try again.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07434: Exception occurred while checking if source [{0}] exists in metadata store.
Cause: Exception occurred while checking if the given source exists in metadata store.
Action: Restore the deleted source artifact in metadata store and try again.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07435: Could not parse xml [{0}]
   Cause: Exception occurred while parsing xml
   Action: Check / Validate the xml against given xsd and try again.
   Level: MEDIUM
   Type: ERROR
   Impact: SYSTEM

MFT-07436: File [{0}] doesn't exist or is a directory.
   Cause: File doesn't exist or is a directory
   Action: Ensure that file exists and try again. File should exist on machine where server is running.
   Level: MEDIUM
   Type: ERROR
   Impact: SYSTEM

MFT-07437: Exception while creating mds session.
   Cause: Could not create mds session
   Action: Check the logs for the exception trace and try again. Contact Oracle Support Services if the problem persists.
   Level: MEDIUM
   Type: ERROR
   Impact: SYSTEM

MFT-07438: Exception while creating mds artifact.
   Cause: Could not create mds artifact.
   Action: Check the logs for the exception trace and try again. Contact Oracle Support Services if the problem persists.
   Level: MEDIUM
   Type: ERROR
   Impact: SYSTEM

MFT-07439: Exception while querying mds artifact id using artifact name [{0}]
   Cause: Could not query mds artifact id.
   Action: Check the logs for the exception trace and try again. Contact Oracle Support Services if the problem persists.
   Level: MEDIUM
   Type: ERROR
   Impact: SYSTEM

MFT-07440: Exception while fetching mds artifact using artifact id [{0}].
   Cause: Could not fetch mds artifact by id.
   Action: Check the logs for the exception trace and try again. Contact Oracle Support Services if the problem persists.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07441: Exception while saving mds artifact.
Cause: Could not save mds artifact.
Action: Check the logs for the exception trace and try again. Contact Oracle Support Services if the problem persists.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07442: Exception while fetching processing functions.
Cause: Could not fetch processing functions from mds
Action: Check the logs for the exception trace and try again. Contact Oracle Support Services if the problem persists.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07443: Parameter not found with name [[0]] for function [[1]].
Cause: Could not find parameter with name [[0]] for function [[1]]
Action: Check the parameter name and try again.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07444: Function not found with name [[0]].
Cause: Could not find function with name [[0]]
Action: Check the function name and try again.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07445: Domain not found with name [[0]].
Cause: Could not find domain with name [[0]]
Action: Check the domain name and try again.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07446: Exception while fetching domain MO from domain name {0}.
Cause: Could not fetch domain info from mds
Action: Check the logs for the exception trace and try again. Contact Oracle Support Services if the problem persists.
Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07447: Artifact with name [{0}] already exists.
Cause: Artifact with given name already exists.
Action: Try with a new name or pass updateIfExists as true.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07448: Could not parse date {0}.
Cause: Could not parse date.
Action: Correct the date format and try again. It should be 'MM/dd/yyyy H:m:s'

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07449: Could not parse given month of year {0} for schedule {1}.
Cause: Could not parse month of year given with schedule definition.
Action: Check the passed month of year and try again. Contact Oracle Support Services if the problem persists.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07450: Could not parse given day of month {0} for schedule {1}.
Cause: Could not parse day of month given with schedule definition.
Action: Check the passed day of month and try again. Contact Oracle Support Services if the problem persists.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07451: Could not parse given week of month {0} for schedule {1}.
Cause: Could not parse week of month given with schedule definition.
Action: Check the passed week of month and try again. Contact Oracle Support Services if the problem persists.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07452: Could not parse given day of week {0} for schedule {1}.
Cause: Could not parse day of week given with schedule definition.
**Action:** Check the passed day of week and try again. Contact Oracle Support Services if the problem persists.

**Level:** MEDIUM  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-07453:** Could not initiate mds storage provider while attaching policy with artifact {0}.

**Cause:** Could not initiate mds storage provider.

**Action:** Check the mds settings and try again. Contact Oracle Support Services if the problem persists.

**Level:** MEDIUM  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-07454:** Error occurred while attaching OWSM policies for artifact {0}.

**Cause:** Error occurred while attaching OWSM policies.

**Action:** Check the policy details, ensure policy name is valid and try again. Contact Oracle Support Services if the problem persists.

**Level:** MEDIUM  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-07455:** Could not create empty assembly.

**Cause:** Could not create empty assembly.

**Action:** Review the diagnostic log for the exact error. Contact Oracle Support Services if the problem persists.

**Level:** MEDIUM  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-07456:** Could not fetch domain from MDS store.

**Cause:** Could not fetch domain from MDS store.

**Action:** Check the mds settings and try again. Contact Oracle Support Services if the problem persists.

**Level:** MEDIUM  
**Type:** ERROR  
**Impact:** SYSTEM

**MFT-07457:** User is not authorize to create domain.

**Cause:** User is not authorize to create domain.

**Action:** Only Administrator can create the domain. Check the user permissions and try again.

**Level:** MEDIUM  
**Type:** ERROR
Impact: SYSTEM

MFT-07458: Domain with name (0) not found.
Cause: Could not find domain with given name.
Action: Check the domain name and try again.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07459: Error while deleting domain with name (0).
Cause: Could not delete domain with given name.
Action: Review the diagnostic log for the exact error. Contact Oracle Support Services if the problem persists.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07460: Could not lookup EJB with name (0).
Cause: Could not lookup EJB.
Action: Review the diagnostic log for the exact error. Contact Oracle Support Services if the problem persists.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07461: PGP encryption and decryption functions are not allowed in post processing.
Cause: PGP encryption and decryption functions are not allowed in post processing.
Action: Remove the PGP functions from post processing and try again. If required, these functions can be used as pre processing functions.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07462: Unsupported value (0) found for (1).
Cause: Could not find given value.
Action: Check the documentation for supported values for [(1)] and try again.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07463: Artifact not found for given name [(0)].
Cause: Could not find artifact for given name.
Action: Check the artifact name and try again.
MFT-07464: Callout [{0}] exists but not allowed for given artifact type.
Cause: Callout not allowed for given artifact.
Action: Check the artifact definition and try again.

MFT-07465: Invalid processing function [{0}] found for post processing.
Cause: Processing function [{0}] is not allowed in post processing.
Action: Remove the function from post processing and try again. If required, these functions can be used as pre processing functions.

MFT-07466: Invalid action type found for source. Allowed action types are "{1}", "{2}" and "{3}". Value found: [{0}].
Cause: Invalid action type found for source.
Action: Check the action type and try again.

MFT-07467: Invalid action type found for target. Allowed action types are "{1}", "{2}" and "{3}". Value found: [{0}].
Cause: Invalid action type found for target.
Action: Check the action type and try again.

MFT-07468: One of property ['Physical Target Directory' / 'Moved To Folder' / 'File Naming Convention'] found null.
Cause: Required property found null.
Action: Check the properties and try again.

MFT-07469: Creating external contacts isn't allowed.
Cause: Creating external contacts is disabled.
Action: Creating external contacts is disabled so create internal user/group contact instead otherwise contact your administrator.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07470: Contact[1] is already associated with event[0].
Cause: Contact is already associated with the notification event.
Action: Check the contact details.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-07471: Polling/Event options are not enabled for the source {0}.
Cause: Either One of Polling/Event options should be enabled.
Action: Enable one of the option and try again.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-07472: Schedule definition is missing for source {0}.
Cause: Polling along with Event can be enabled only when schedule(s) are defined.
Action: Add schedule and try again.

Level: HIGH
Type: ERROR
Impact: MESSAGE

MFT-07473: Unsupported action[0].
Cause: Unsupported action for schedule purge found. Supported values are ACTIVATE and DEACTIVATE.
Action: Contact the Oracle Administrator.

Level: HIGH
Type: ERROR
Impact: SYSTEM

MFT-07474: Could not parse given date[0] in format[1].
Cause: Provided date in not in valid format.
Action: Check the input date and try again. Contact Oracle Support Services if the problem persists.

Level: MEDIUM
Type: ERROR
Impact: SYSTEM

MFT-07475: Could not parse given time[0] in format[1].
**Error Messages**

**MFT-07476: Invalid Target artifact [0]. Only one among Append/Overwrite/CreateOnly attributes can be true.**

   Impact: Other

ODI-01209: Session start failure on agent {0}: work repository {1} is in an invalid state.
   Cause: The work repository was in a state that did not allow connections. This is the case if an upgrade was being performed.
   Action: Verify the state of the work repository.
   Level: 1
   Type: ERROR
   Impact: Other

ODI-01210: Session start failure on agent {0}: work repository {1} version {2} is not compatible with the agent version {3}.
   Cause: The work repository was upgraded but not this agent, or the agent was upgraded but not the work repository.
   Action: Upgrade the work repository version or the agent version.
   Level: 1
   Type: ERROR
   Impact: Other
ODI-01211: Session start failure on agent {0}: work repository {1} is not bound to the master repository.
Cause: The work repository specified in the request was not found in the list of work repositories attached to this master.
Action: Verify that work repository name matches an existing one.
Level: 1
Type: ERROR
Impact: Other

ODI-01212: Session preparation failure: scenario {0} does not exist in work repository {1}.
Cause: The session request was received, but the agent was unable to find the named scenario in the work repository.
Action: Verify that the scenario name matches an existing scenario name in the work repository.
Level: 1
Type: ERROR
Impact: Other

ODI-01213: Session preparation failure: scenario {0} version {1} does not exist in work repository {2}.
Cause: The session request was received, and the scenario existed in the work repository, but not with the specified version.
Action: Ensure that the scenario version matches an existing scenario version in the work repository.
Level: 1
Type: ERROR
Impact: Other

ODI-01214: Session preparation failure: context {0} does not exist in the master repository.
Cause: The session request was received, but the agent was unable to find the context in the master repository.
Action: Ensure that the context matches an existing context code in the Topology.
Level: 1
Type: ERROR
Impact: Other

ODI-01215: Session preparation failure: privileges are insufficient to run scenario {0}.{1} in repository {2}.
Cause: User privileges were not sufficient for running this scenario in this repository.
Action: Ensure that the user has sufficient privileges for this task.
Level: 1
Type: ERROR
Impact: Other
ODI-01216: Session preparation failure: insufficient privileges to use Context {0} (1).
    Cause: User privileges were not sufficient for using this context.
    Action: Ensure that the user has sufficient privileges for this task.
    Level: 1
    Type: ERROR
    Impact: Other

ODI-01217: Session {0} (1) fails with return code {2}.
    Cause: The session finished in an error state.
    Action: Review the session execution details in the Operator Navigator or Repository Explorer.
    Level: 1
    Type: ERROR
    Impact: Other

ODI-01218: Session preparation failure: database error occurs while connecting to the master repository.
    Cause: The agent received a database error from the master repository while creating the session.
    Action: Verify the state of the master repository database.
    Level: 1
    Type: ERROR
    Impact: Other

ODI-01219: Session preparation failure: database error while connecting to work repository {0}.
    Cause: The agent received a database error from the work repository while creating the session.
    Action: Verify the state of the work repository database.
    Level: 1
    Type: ERROR
    Impact: Other

ODI-01220: Session preparation failure: an unexpected exception occurred.
    Cause: The remote agent faced an unexpected error while attempting to create the session.
    Action: Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode).
    Level: 1
    Type: ERROR
    Impact: Other

ODI-01221: Unable to restart session {0}: session is not found in work repository {1}.
Cause: The session to restart did not exist in the repository. This session may have been deleted, or an incorrect session ID or work repository was supplied.
Action: Verify that a session with this ID exists in the repository.

Level: 1
Type: ERROR
Impact: Other

ODI-01222: Session start failure on agent {0}: logical schema {1} cannot be found in the master repository.
Cause: The object to be executed referred to a logical schema not present in the master repository.
Action: Ensure that the logical schema configuration exists in your master repository.

Level: 1
Type: ERROR
Impact: Other

ODI-01223: Database error while connecting to the master repository.
Cause: The connection for the master repository database was incorrect, or the repository database was down.
Action: Verify the master repository connection information and the status of the master repository database.

Level: 1
Type: ERROR
Impact: Other

ODI-01224: Database error while connecting to work repository {0}
Cause: The connection for the work repository database was incorrect, or the repository database was down.
Action: Verify the work repository connection information and the status of the master repository database.

Level: 1
Type: ERROR
Impact: Other

ODI-01225: An unexpected exception occurred.
Cause: The agent faced an unexpected exception.
Action: Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode).

Level: 1
Type: ERROR
Impact: Other

ODI-01226: Step {0} fails after {1} attempt(s).
Cause: This is an execution warning. The session step failed to execute after the maximum number of retries. If step failure was not handled in the package design, the session finished in an error state.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01227: Task \{0\} fails on the source connection \{1\}.

Cause: This is an execution warning. The command on the source for this task finished with an error.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01228: Task \{0\} fails on the target connection \{1\}.

Cause: This is an execution warning. The command on the target for this task finished with an error.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01229: An error occurred while performing a \{0\} operation on model code \{1\}.

Cause: This is an execution warning. The operation specified failed on the model.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01231: An error occurred while performing a \{0\} operation on datastore \{1\}.

Cause: This is an execution warning. The operation specified failed on the datastore.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01232: Procedure \{0\} execution fails.

Cause: This is an execution warning. The procedure execution failed.
**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** WARNING  
**Impact:** Other

**ODI-01233: Error while evaluating variable the following expression: {0} {1} {2}**  
**Cause:** This is an execution warning. The variable evaluation failed.  
**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** WARNING  
**Impact:** Other

**ODI-01235: Error while incrementing variable {0} to value {1}**  
**Cause:** This is an execution warning. The variable increment failed.  
**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** WARNING  
**Impact:** Other

**ODI-01236: Error while refreshing variable {0}.**  
**Cause:** This is an execution warning. The variable refresh failed.  
**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** WARNING  
**Impact:** Other

**ODI-01237: Error while setting variable {0} to value {1}.**  
**Cause:** This is an execution warning. The set variable operation failed.  
**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** WARNING  
**Impact:** Other

**ODI-01238: Flow {0} fails because the maximum number of allowed errors ({1} rows) is exceeded during the flow check. This flow loads target table {2}.**  
**Cause:** This is an execution warning. The interface failed because the number of errors detected in the flow exceeded the value defined in the interface.  
**Action:** Review the session execution details in the Operator Navigator or Repository Explorer. Review the erroneous records for this interface in the error table.

**Level:** 1  
**Type:** WARNING  
**Impact:** Other
Level: 1
Type: WARNING
Impact: Other

ODI-01239: Flow {0} fails because the maximum percentage of allowed errors ({1} %) is exceeded during the flow check. This flow loads target table {2}.

Cause: This is an execution warning. The interface failed because the percentage of errors detected in the flow exceeded the value defined in the interface.

Action: Review the session execution details in the Operator Navigator or Repository Explorer. Review the erroneous records for this interface in the error table.

Level: 1
Type: WARNING
Impact: Other

ODI-01240: Flow {0} fails while performing a {1} operation. This flow loads target table {2}.

Cause: This is an execution warning. The interface failed because one of the statements returned an error return code.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01241: Oracle Data Integrator tool execution fails.

Cause: This is an execution warning. The tool execution failed.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01242: Operating system command execution fails.

Cause: This is an execution warning. Execution of the operating system command failed.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: WARNING
Impact: Other

ODI-01243: Session {0} ({1}) fails because work repository {2} went down.

Cause: Work repository database went down while session was being executed.

Action: Verify the state of the work repository database. The session must be restarted.
Level: 1
Type: ERROR
Impact: Other

ODI-01244: Session [0] [1] was prepared successfully but fails because work repository [2] went down before execution could begin.
Cause: Work repository database went down while session was starting its execution.
Action: Verify the state of the work repository database. The session must be restarted.

Level: 1
Type: ERROR
Impact: Other

ODI-01245: Session preparation failure: work repository [0] went down during session preparation.
Cause: Work repository went down while session was being prepared.
Action: Verify the state of the work repository database. The session must be restarted.

Level: 1
Type: ERROR
Impact: Other

ODI-01246: The Logical Schema has not been set for [0].
Cause: Because the logical schema had not been set, the object could not be executed.
Action: Verify the object that you are trying to execute, and set the logical schema for this object.

Level: 1
Type: ERROR
Impact: Other

ODI-01247: Session [0] [1] was prepared successfully but fails because master repository went down before execution could begin.
Cause: Master repository database went down while session was starting its execution.
Action: Verify the state of the master repository database. The session must be restarted.

Level: 1
Type: ERROR
Impact: Other

ODI-01248: Session preparation failure by Agent [0]: master repository went down during session preparation.
Cause: Master repository went down while session was being prepared.
Action: Verify the state of the master repository database. The session must be restarted.
ODI-01249: Session {0} ({1}) fails because master repository went down.
Cause: Master repository database went down while session was being executed.
Action: Verify the state of the master repository database. The session must be restarted.

ODI-01250: Session {0} ({1}) could not be stopped by Agent {2} because session {0} {1} already completed execution.
Cause: The session has already completed and cannot be stopped.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.

ODI-01251: Session {0} could not be stopped by Agent {1} because session {0} was not found in work repository {2}.
Cause: The session was not found in the work repository.
Action: Verify that a session with this ID exists in the repository.

ODI-01252: Session {0} could not be stopped by Agent {1}: insufficient privileges to access session.
Cause: User privileges were not sufficient for accessing this session in this agent.
Action: Ensure that the user has sufficient privileges for this task.

ODI-01253: Session {0} could not be stopped by Agent {2}: an unknown error occurred.
Cause: An unexpected Exception occurred.
Action: Verify your Agent configuration and make sure other operations on Agent are working correctly.
ODI-01254: Session {0} ({1}) could not be stopped by Agent {2}: a JDBC error occurred on work repository {3}.
   Cause: The agent had incorrect connection for the work repository database, or repository database was down.
   Action: Verify the work repository connection information and the status of the work repository database.

   Level: 1
   Type: ERROR
   Impact: Other

ODI-01255: Session {0} ({1}) could not be stopped by Agent {2}: insufficient privileges to stop the session.
   Cause: User privileges were not sufficient for stopping this session in this agent.
   Action: Ensure that the user has sufficient privileges for this task.

   Level: 1
   Type: ERROR
   Impact: Other

ODI-01256: Session {0} ({1}) stopped (Normal) by user {2}.
   Cause: Session was stopped by the user.
   Action: Review the session execution details in the Operator Navigator or Repository Explorer.

   Level: 1
   Type: ERROR
   Impact: Other

ODI-01257: Session {0} ({1}) stopped (Immediate) by user {2}.
   Cause: Session was stopped by the user.
   Action: Review the session execution details in the Operator Navigator or Repository Explorer.

   Level: 1
   Type: ERROR
   Impact: Other

ODI-01258: Session {0} ({1}) stopped (Abort) by user {2}.
   Cause: Session was aborted by the user.
   Action: Review the session execution details in the Operator Navigator or Repository Explorer.

   Level: 1
   Type: ERROR
   Impact: Other

ODI-01259: Session Task {0} stopped (Normal) by user {1}.
   Cause: Task was stopped by the user.
   Action: Review the task execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: ERROR
Impact: Other

ODI-01260: Session Task {0} stopped (Immediate) by user {1}.
Cause: Task was stopped by the user.
Action: Review the task execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01261: Session Task {0} stopped (Abort) by user {1}.
Cause: Task was aborted by the user.
Action: Review the task execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01262: Session {0} ([1]) could not be stopped by Agent {2}: a JDBC error occurred on master repository.
Cause: The agent had incorrect connection for the master repository database, or repository database was down.
Action: Verify the master repository connection information and the status of the master repository database.

Level: 1
Type: ERROR
Impact: Other

ODI-01263: Step {0} stopped (Normal) by user {1}.
Cause: Step was stopped by the user.
Action: Review the step execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01264: Step {0} stopped (Immediate) by user {1}.
Cause: Step was stopped by the user.
Action: Review the step execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other
ODI-01265: Step {0} stopped (Abort) by user {1}.
  Cause: Step was aborted by the user.
  Action: Review the step execution details in the Operator Navigator or Repository Explorer.
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01266: Agent {0} detected Session as stale session and set to error status.
  Cause: The agent detected a stale session and the session status was set to error status.
  Action: Review the session execution details in the Operator Navigator or Repository Explorer.
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01267: Session {0} could not be stopped by Agent {1} because stop type {2} provided in the request is an invalid stop type.
  Cause: The agent attempted to stop a session with an invalid stop type.
  Action: Review the session execution details in the Operator Navigator or Repository Explorer.
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01268: Agent {0} does not support stopping asynchronous child sessions.
  Cause: The agent attempted to stop an asynchronous child session and this is not supported.
  Action: Review the session execution details in the Operator Navigator or Repository Explorer.
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01269: Session {0} could not be stopped by Agent {2}: session is being run by another Agent with the same name.
  Cause: The agent attempted to stop a session that is being run by a different agent.
  Action: Review the session execution details in the Operator Navigator or Repository Explorer.
  Level: 1
  Type: ERROR
  Impact: Other
ODI-01270: Session {0} ({1}) could not be stopped by Agent {2}: session {0} ({1}) is being run by {3} Agent which is not a listener Agent.

Cause: The agent attempted to stop a session that is being run by the internal agent and this is not supported.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01271: The asynchronous jndi name cannot be null for asynchronous jobs. The ESS job status cannot be updated.

Cause: The agent attempted to set the status of the asynchronous ESS job and its jndi name was not set.

Action: Review the jndi name supplied to the Enterprise Scheduler job.

Level: 1
Type: WARNING
Impact: Other

ODI-01272: The Logical Schema has not been set on {0} for {1}.

Cause: The logical schema for this object has not been set.

Action: Verify that the logical schema has been set in the Topology.

Level: 1
Type: ERROR
Impact: Other

ODI-01273: The selected technology {0} is not supported on source for {1}.

Cause: The selected technology is not supported for this object.

Action: Verify that the object has a valid technology.

Level: 1
Type: ERROR
Impact: Other

ODI-01274: Agent Exception

Cause: An error was detected by the agent when performing an operation.

Action: Review the underlying exception for more details.

Level: 1
Type: ERROR
Impact: Other

ODI-01275: An error occurred while performing a {0} operation on submodel step {1} of the model code {2}.

Cause: This is an execution warning. The operation specified failed on the submodel operation.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.
Level: 1
Type: WARNING
Impact: Other

ODI-01276: An error occurred while executing the OnConnect command on JDBC connection created for data server {0} with transaction label {1}.

Cause: An error was occurred while executing the OnConnect command on the JDBC connection created to the data server.

Action: Review the underlying exception and update the OnConnect command definition configured for the data server.

Level: 1
Type: ERROR
Impact: Other

ODI-01277: An error occurred while executing the OnDisconnect command on JDBC connection created for data server {0} with transaction label {1}.

Cause: An error was occurred while executing the OnDisconnect command on the JDBC connection created to the data server.

Action: Review the underlying exception and update the OnDisconnect command definition configured for the data server.

Level: 1
Type: ERROR
Impact: Other

ODI-01278: Load plan instance {0}, run {1} does not exist in work repository {2}.

Cause: The Load Plan Instance run does not exist in the repository. This Load Plan Instance run may have been deleted, or an incorrect instance ID/run number or work repository was supplied.

Action: Verify that a load plan instance run with this instance ID and run number exists in the repository.

Level: 1
Type: ERROR
Impact: Other

ODI-01279: The Source Logical Schema {0} and Context {1} of the task {2} are not mapped to any Physical Schema.

Cause: The Logical Schema to Physical Schema Mapping is not defined for the Context used.

Action: For the Context used define the Logical Schema to Physical Schema Mapping in the Topology.

Level: 1
Type: ERROR
Impact: Other

ODI-01280: The Target Logical Schema {0} and Context {1} of the task {2} are not mapped to any Physical Schema.
**Cause:** The Logical Schema to Physical Schema Mapping is not defined for the Context used.

**Action:** For the Context used define the Logical Schema to Physical Schema Mapping in the Topology.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01281:** Source Technology \{0\} of task \{1\} is not of JDBC Type. When both Source and Target commands are specified, the Source Technology should be of JDBC type.

**Cause:** When Source and Target commands are specified, the Source Technology should always be of JDBC type.

**Action:** Make Sure that you modify your Procedure or KM to either use a JDBC Source Technology or edit your step to use only the Target command.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01282:** Invalid log level \{0\} is specified. A valid log level value is between \{1\} and \{2\}.

**Cause:** Invalid log level specified for scenario/session invocation or for session restart.

**Action:** Please specify a valid log level.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01283:** Owb preparation failure: Owb object \{0\} of type \{1\} in location \{2\} does not exist in Owb repository \{3\}.

**Cause:** The session request was received, but the agent was unable to find the named Owb object in the Owb repository.

**Action:** Verify that the Owb object name matches an existing Owb object in the location in the Owb repository.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01284:** Session \{0\} (\{1\}) with Owb audit Id \{2\} fails.

**Cause:** The session finished in an error state.

**Action:** Review the session execution details in the Operator Navigator or Repository Explorer.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other
ODI-01285: Session {0} ({1}) Retrieval of audit for auditId {2} failed in the {3} phase {4}. Please use OWB Design Client or Browser for further information.

Cause: An error was raised during the retrieval of the Owb audit data.

Action: Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

Level: 1
Type: ERROR
Impact: Other

ODI-01286: Session {0} ({1}) could not find Owb job for this session.

Cause: The session being aborted is not an Owb Job.

Action: Review the session being aborted in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01287: Session {0} ({1}) with Owb audit Id {2} is in an invalid state to be aborted.

Cause: The session being aborted is not in a state that can be aborted.

Action: Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

Level: 1
Type: ERROR
Impact: Other

ODI-01288: Session {0} ({1}) with Owb audit Id {2} abort fails.

Cause: The session abort finished in an error state.

Action: Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

Level: 1
Type: ERROR
Impact: Other

ODI-01289: Agent {0} detected Session as stale session and set to error status. Please use OWB Design Client or Browser for further information.

Cause: The agent detected a stale OWB session and the session status was set to error status.

Action: Review the session execution details in the OWB Design Client or Browser.

Level: 1
Type: ERROR
Impact: Other
   **Cause:** An error was raised during the loading of the Owb audit data.
   **Action:** Review the session execution details in the Operator Navigator or Repository Explorer. Also please use OWB Design Client or Browser for further information.

   **Level:** 1
   **Type:** ERROR
   **Impact:** Other

ODI-01291: Workspace [0] cannot be resolved to a physical workspace using context [1].
   **Cause:** The context does not contain a mapping for the logical workspace.
   **Action:** Review the mappings defined in the context.

   **Level:** 1
   **Type:** ERROR
   **Impact:** Other

ODI-01292: An execution context cannot be determined for this job.
   **Cause:** An execution context cannot be determined for this job.
   **Action:** Use the Context to provide an explicit context for this execution.

   **Level:** 1
   **Type:** ERROR
   **Impact:** Other

ODI-01293: Exception occurred during spawning of ECID to child session.
   **Cause:** Spawning of ECID from parent session to child session failed.
   **Action:** Review the exception raised to get more detail.

   **Level:** 1
   **Type:** WARNING
   **Impact:** Other

ODI-01294: Unwrapping of a wrapped ECID [0] failed.
   **Cause:** Unwrapping of ECID failed.
   **Action:** Review the exception raised and the format of wrapped ECID to get more detail on unwrap failure

   **Level:** 1
   **Type:** WARNING
   **Impact:** Other

ODI-01295: Cleanup of Session [0] ((1)) raised the following [2] messages: [3]
   **Cause:** Messages were raised during the Cleanup phase.
   **Action:** Review the messages raised during the Cleanup and you may need to perform some manual cleanup.

   **Level:** 1
Type: WARNING
Impact: Other

ODI-01296: The Cleanup Tool encountered the following {0} nested errors when executing the Cleanup tasks: {1}
Cause: Messages were raised during the Cleanup tool execution.
Action: Review the messages raised during the Cleanup and you may need to perform some manual cleanup.

Level: 1
Type: ERROR
Impact: Other

ODI-01297: Parallel task "{0}" failed; {1} child task(s) in error; Failed child tasks: {2}
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01298: Serial task "{0}" failed because child task "{1}" is in error.
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01299: A task "{0}" from one of the parallel branches has failed. Hence aborting the current branch
Cause: null
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01300: ASYNC_JNDI_NAME cannot be null for async job.
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01301: Unable to submit Job Definition: {0}
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01302: Logical Agent {0} must be mapped to a Physical Agent in the ContextCode {1}
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01303: RuntimeSessionfactory must not be null.
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01304: Unable to find request for ID {0}
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01305: jobDefinitionId must not be null
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01306: scheduleDefinitionId must not be null
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01307: ContextCode is null, cannot lookup physical agent
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01308: SchedulingService object was created without an EntityManager, cannot lookup physical agent
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01309: Unable to find logical agent: {0}.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01310: Unable to find context: {0}.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01311: JobDefinition with name: {0} already exists.
Cause: JobDefinition already exists.
Action: Check JobDefinition name.
Level: 32
Type: ERROR
Impact: Other

ODI-01312: Schedule with name: {0} already exists.
Cause: Schedule already exists.
Action: Check Schedule name.
Level: 32
Type: ERROR
Impact: Other

ODI-01313: Unable to find job definition for ID: {0}.
Cause: Wrong ID.
Action: Check ID.
Level: 32
Type: ERROR
Impact: Other
ODI-01314: Unable to find job definition with name {0}.
  Cause: Wrong name.
  Action: Check name.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-01315: Unable to update job definition.
  Cause: Exception during updating.
  Action: Check cause exception details.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-01316: Unable to remove job request.
  Cause: Exception was thrown.
  Action: Check cause exception details.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-01317: Unable to find scheduler definition with name {0}.
  Cause: Wrong name.
  Action: Check name.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-01318: jobDefinition is required to have a not null ID.
  Cause: Metadata Object ID is null.
  Action: Check job definition.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-01319: Error while refreshing variable {0}. Null/Empty refresh query is provided.
  Cause: This is an execution warning. The variable refresh failed.
  Action: Review the session execution details in the Operator Navigator or Repository Explorer.
  Level: 1
  Type: WARNING
  Impact: Other
ODI-01320: Session start/restart failure on agent {0}: the session {1} is not in status WAITING, ERROR or WARNING
Cause: The session cannot be started/restarted because it is not in status WAITING, ERROR or WARNING
Action: Verify that a session with this ID exists in the repository and status WAITING, ERROR or WARNING.

Level: 1
Type: ERROR
Impact: Other

ODI-01321: Session Task {0} stopped (Graceful) by user {1}.
Cause: Task was stopped by the user.
Action: Review the task execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01322: Step {0} stopped (Graceful) by user {1}.
Cause: Step was stopped by the user.
Action: Review the step execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01323: Session {0} ({1}) stopped (Graceful) by user {2}.
Cause: Session was stopped by the user.
Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-01350: Credential map key "{0}" not found in credential map "{1}".
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01351: An unexpected error was thrown during execution of the scenario "{0} - {1}".
Cause:
Action:
ODI-01352: An unexpected error was thrown during job execution
Cause:
Action:

ODI-01353: RequestId={0} Scenario={1} : Agent URL must be specified. The Job Definition must include the LocalAgent or the job submission must include a physical agent url ({2}) parameter.
Cause:
Action:

ODI-01354: Load plan must be asynchronous
Cause:
Action:

ODI-01355: username '{0}' from credential map '{1}' does not match currentSubjectName '{2}'
Cause:
Action:

ODI-01356: Credential map key parameter '{0}' not found.
Cause:
Action:

ODI-01357: Error resolving ADF connection for connectionId='{0}'
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01400: Agent {0} start failure: JDBC connection error occurs while connecting to the master repository.
Cause: The master repository information was incorrect, or the repository database was down.
Action: Verify the master repository connection information and the status of the master repository database.

Level: 1
Type: ERROR
Impact: Other

ODI-01401: Agent {0} start failure: data source for master repository did not contain a master repository.
Cause: The master repository connection information pointed to a database schema that did not contain a master repository.
Action: Verify the master repository connection information.

Level: 1
Type: ERROR
Impact: Other

ODI-01402: Agent {0} start failure: the master repository is in an invalid state.
Cause: The master repository was in a state that did not allow connections. This is the case when an upgrade is being performed.
Action: Verify the state of the master repository.

Level: 1
Type: ERROR
Impact: Other

ODI-01403: Agent {0} start failure: the master repository version {1} is not compatible with the agent version {2}.
Cause: The master repository was upgraded but not this agent, or the agent was upgraded but not the master repository.
Action: Upgrade the master repository version or the agent version.

Level: 1
Type: ERROR
Impact: Other

ODI-01404: Agent {0} start failure: an authentication error occurred while connecting to the master repository.
Cause: An incorrect ODI user or password was specified for this master repository.
Action: Verify the ODI user and password used for connecting.
Type: ERROR
Impact: Other

ODI-01405: Agent [0] start failure: the agent is not defined in the topology for master repository.
Cause: This agent was not declared in the topology.
Action: Add this physical agent in the list of agents in the ODI topology.

Level: 1
Type: ERROR
Impact: Other

ODI-01406: Agent [0] started with warning: JDBC connection error occurs while connecting to the work repository [1].
Cause: The work repository information was incorrect, or the repository database was down.
Action: Verify the work repository connection information and the status of the work repository database.

Level: 1
Type: ERROR
Impact: Other

ODI-01407: Agent [0] started with warning: connection details of [1] do not contain a work repository.
Cause: The work repository connection information pointed to a database schema that did not contain a work repository.
Action: Review the work repository connection information and revise it as necessary.

Level: 1
Type: ERROR
Impact: Other

ODI-01408: Agent [0] started with warning: work repository [1] is in an invalid state.
Cause: The work repository was in a state that did not allow connections. This is the case when an upgrade is being performed.
Action: Verify the state of the work repository.

Level: 1
Type: ERROR
Impact: Other

ODI-01409: Agent [0] started with warning: work repository [1] version [2] is not compatible with the agent version [3].
Cause: The work repository was upgraded but not this agent, or the agent was upgraded but not the work repository.
Action: Upgrade the work repository version or the agent version.

Level: 1
Type: ERROR
Impact: Other

ODI-01410: Agent {0} started with warning: work repository {1} is not bound to the master repository.
Causes: The work repository specified in the request was not found in the list of work repositories attached to this master.
Action: Ensure that work repository name matches an existing one.
Level: 1
Type: ERROR
Impact: Other

ODI-01411: Agent {0} started with warning: a database error occurs while cleansing stale sessions.
Causes: The agent encountered a database error while attempting to close stale sessions.
Action: Review the status of the sessions for this agent, and manually remove the stale sessions.
Level: 1
Type: ERROR
Impact: Other

ODI-01412: Agent {0} started with warning: an unexpected error occurs while cleaning stale sessions.
Causes: The agent encountered an unexpected error while attempting to close stale sessions.
Action: Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode). Verify the status of the sessions for this agent, and manually remove the stale sessions.
Level: 1
Type: ERROR
Impact: Other

ODI-01413: Request is incorrectly formed.
Causes: A malformed request was sent to the agent.
Action: Review the request format and parameters sent to the agent.
Level: 1
Type: ERROR
Impact: Other

ODI-01414: Error connecting to agent {0}: a JDBC error occurs while connecting to the master repository.
Causes: The remote agent had incorrect connection for the master repository database, or repository database was down.
Action: Verify the master repository connection information and the status of the master repository database.
Level: 1
Type: ERROR
Impact: Other

ODI-01415: Error connecting to agent [0]: data source for master repository did not contain a master repository.
Cause: The master repository connection information for the remote agent pointed to a database schema that did not contain a master repository.
Action: Review the master repository connection information and revise it as necessary.

Level: 1
Type: ERROR
Impact: Other

ODI-01416: Error connecting to agent [0]: the master repository is in an invalid state.
Cause: The master repository was in a state that did not allow connections from the remote agent. This is the case when an upgrade is being performed.
Action: Verify the state of the master repository.

Level: 1
Type: ERROR
Impact: Other

ODI-01417: Error connecting to agent [0]: the master repository version [1] is not compatible with the agent version [2].
Cause: The master repository was upgraded but not the remote agent, or the remote agent was upgraded but not the master repository.
Action: Upgrade the master repository version or the agent version.

Level: 1
Type: ERROR
Impact: Other

ODI-01418: Error connecting to agent [0]: an authentication error occurs while connecting to the master repository.
Cause: An incorrect ODI user or password was specified for this master repository.
Action: Verify the ODI user and password used for connecting.

Level: 1
Type: ERROR
Impact: Other

ODI-01419: Warning connecting to Agent [0]: JDBC connection error occurs while connecting to the work repository [1].
Cause: The remote agent had incorrect connection for the work repository database, or the repository database was down.
Action: Verify the work repository connection information and the status of the work repository database.

Level: 1
Type: ERROR
Impact: Other

ODI-01420: Warning connecting to Agent {0}: connection details of {1} do not contain a work repository.
Cause: The work repository connection information for the remote agent pointed to a database schema that did not contain a work repository.
Action: Verify the work repository connection information.
Level: 1

Type: ERROR
Impact: Other

ODI-01421: Warning connecting to Agent {0}: work repository {1} is in an invalid state.
Cause: The work repository was in a state that did not allow connections from the remote agent. This is the case when an upgrade is being performed.
Action: Verify the state of the work repository.
Level: 1

Type: ERROR
Impact: Other

ODI-01422: Warning connecting to Agent {0}: work repository {1} version {2} is not compatible with the agent version {3}.
Cause: The work repository was upgraded but not the remote agent, or the remote agent was upgraded but not the work repository.
Action: Upgrade the work repository version or the agent version.
Level: 1

Type: ERROR
Impact: Other

ODI-01423: Warning connecting to Agent {0}: work repository {1} is not bound to the master repository.
Cause: The work repository specified in the request was not found in the list of work repositories attached to the master.
Action: Verify that work repository name matches an existing one.
Level: 1

Type: ERROR
Impact: Other

ODI-01424: Agent host or port cannot be reached using {0}.
Cause: Incorrect host or port information was provided, or the agent was not started on the remote host.
Action: Correct the host or port information or start the agent.
Level: 1

Type: ERROR
Impact: Other
ODI-01425: Agent application cannot be reached using {0}.
  Cause: An incorrect application name was provided for this agent, or the agent application was not started on the host.
  Action: Correct the application name used in the URL or verify the agent status.
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01426: Agent {0} is not defined in the topology for the master repository.
  Cause: This agent was not declared in the topology.
  Action: Add this physical agent to the list of agents in the ODI topology.
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01427: invalid parameters
  Cause: Invalid parameters were supplied in the request.
  Action: Check the parameters that were supplied as part of the request. Ensure that parameter names and cases are correct.
  Level: 1
  Type: WARNING
  Impact: Other

ODI-01428: internal error
  Cause: An agent internal error occurred.
  Action: Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode).
  Level: 1
  Type: FATAL
  Impact: Other

ODI-01429: The user {0} is not authorized to perform request {1} on Agent {2}.
  Cause: The user had insufficient privileges for performing this request against the remote agent.
  Action: Amend the user privileges.
  Level: 1
  Type: ERROR
  Impact: Other

ODI-01430: Agent {0} cannot clean the stale sessions in work repository {1} due to a database error.
  Cause: The remote agent faced a database error while attempting to close stale sessions.
  Action: Examine the status of the sessions for this agent, and manually remove the stale sessions.
Level: 1
Type: ERROR
Impact: Other

ODI-01431: Agent {0} cannot clean the stale sessions in work repository {1} because the work repository {1} is still down.
Cause: The remote agent was not able to connect to the work repository while attempting to close stale sessions.
Action: Determine the status of the repository. Once this repository is running, manually remove the stale sessions.

Level: 1
Type: ERROR
Impact: Other

ODI-01432: Agent {0} cannot clean the stale sessions in work repository {1} due to an unexpected error.
Cause: The remote agent faced an unexpected error while attempting to close stale sessions.
Action: Contact Oracle Support Services. Provide the error message, a description of the action causing this fault, and the exception stack trace in the log files (with the logging level set to debug mode). Determine the status of the sessions for this agent, and manually remove the stale sessions.

Level: 1
Type: ERROR
Impact: Other

ODI-01433: The Internal agent does not support cleaning stale sessions from multiple work repositories.
Cause: Empty string value was passed for the work repository name in the Clean Stale Sessions request sent to the Internal Agent.
Action: Specify a non-empty valid work repository name in the Clean Stale Sessions request sent to the Internal Agent. If you want to clean the stale sessions across the work repositories, perform this operation on a Remote physical Agent.

Level: 1
Type: ERROR
Impact: Other

ODI-01434: Agent {0} start failure: error while trying to use JMX Port {1}.
Cause: JMX Registry was unable to use the given port.
Action: Specify a different port by using the command-line parameter JMXPORT.

Level: 1
Type: ERROR
Impact: Other

ODI-01435: Storage space for the IDs of some object types is low in Repository {0}.
When no storage space is available, it will not be possible to create objects of
these types. Consider creating a new repository for the following object types (Object Type: Number Remaining) (1).

**Cause:** Storage space was low for some IDs in this repository.

**Action:** Consider creating a new repository.

**Level:** 1  
**Type:** WARNING  
**Impact:** Other

**ODI-01436:** Error retrieving ID statistics for repository [0].

**Cause:** The ID statistics for this repository could not be verified.

**Action:** Verify the statistics for this repository manually.

**Level:** 1  
**Type:** WARNING  
**Impact:** Other

**ODI-01437:** Error retrieving information from the credential store map.

**Cause:** Could not retrieve information from the credential store map.

**Action:** Verify that the credentials have been entered correctly into the credential store map.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01438:** Agent [0] cannot be stopped by user [1]: a JDBC error occurred on master repository [2].

**Cause:** Some SQL Exception occurred on the Master Repository.

**Action:** Verify that other operations on the Agent are working correctly.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01439:** Agent [0] cannot be stopped by user [1]: a JDBC error occurred on work repository [2].

**Cause:** Some SQL Exception occurred on the Work Repository.

**Action:** Verify that other operations on the Agent are working correctly.

**Level:** 1  
**Type:** ERROR  
**Impact:** Other

**ODI-01440:** Agent [0] cannot be stopped by user [1]: an unknown error occurred.

**Cause:** An unexpected Exception occurred.

**Action:** Verify your Agent configuration and make sure other operations on Agent are working correctly.

**Level:** 1
Type: ERROR
Impact: Other

ODI-01441: Unable to connect to the master repository at JBDC URL={0} with USER={1}.
Cause: An SQLException occurred while creating connection to the master repository with the given parameters.
Action: Verify your Agent configuration and make sure the master repository connection parameters are correct.

Level: 1
Type: ERROR
Impact: Other

ODI-01442: Unable to load JBDC Driver {0} configured for master repository connection.
Cause: ClassNotFoundException occurred while loading the driver class.
Action: Verify your Agent configuration and make sure the driver specified for master repository connection is correct and the corresponding jar is present under driver folder.

Level: 1
Type: ERROR
Impact: Other

ODI-01443: Error while starting agent : {0}
Cause: Error occurred while starting the embedded web container.
Action: Verify your Agent configuration and make sure that the specified ports are available.

Level: 1
Type: ERROR
Impact: Other

ODI-01444: The master repository signature specified by the client {0} does not match the master repository signature of the agent {1}.
Cause: The client and the agent are not using the same master repository.
Action: Verify the client and the agent are using the same master repository. Verify that the client is calling the correct agent.

Level: 1
Type: ERROR
Impact: Other

ODI-01445: Invalid HTTP/S URL retrieved from the JRF utility : {0}
Cause: JRF utility has returned an invalid HTTP/S URL for the agent.
Action: Verify if ODI agent's dependent modules are successfully deployed on the container.

Level: 1
Type: ERROR
Impact: Other
ODI-01446: Agent {0} is already running on port {1}.
    Cause: This agent is already running.
    Action: Stop the agent before attempting to start it.
    Level: 1
    Type: ERROR
    Impact: Other

ODI-01447: Agent {0} failed to start. {1}.
    Cause: The agent failed to start.
    Action: See the nodemanager and agent log for further information.
    Level: 1
    Type: ERROR
    Impact: Other

ODI-01448: Failed to execute command {1} for agent {0}.
    Cause: A command failed to execute on the agent.
    Action: Review the agent log for further information.
    Level: 1
    Type: ERROR
    Impact: Other

ODI-01449: Injection risk detected for command {0}. Command not executed.
    Cause: The command was not executed because it contained characters that pose an injection risk.
    Action: Adjust the command to eliminate characters that pose an injection risk.
    Level: 1
    Type: ERROR
    Impact: Other

ODI-01450: ODI does not support soft restart.
    Cause: The process management softRestart method was invoked, but it is not supported.
    Action: Do not invoke the softRestart method.
    Level: 1
    Type: ERROR
    Impact: Other

ODI-01451: Using localhost for hostname because of {0} when trying to get hostname.
    Cause: An exception was thrown while trying to get the actual host name for the local host.
    Action: No action is required as the exception is caught and the host name is defaulted to localhost.
Level: 1
Type: ERROR
Impact: Other

ODI-01452: Agent {0} cannot be started, {1} is already in use by another agent.
Cause: An attempt was made to restart the agent, but it is currently in use.
Action: Wait for other dependent agents to complete before restarting this agent.

Level: 1
Type: ERROR
Impact: Other

ODI-01453: Agent {0} cannot be started, {1} is already in use by another process.
Cause: An attempt was made to restart the agent, but it is currently in use.
Action: Wait for dependent processes to complete before restarting this agent.

Level: 1
Type: ERROR
Impact: Other

ODI-01454: Agent {0} cannot be started at {1}. Unexpected http response = {2}.
Cause: The agent cannot be started. It is possible that another processes is already running on the agent port.
Action: Review the http response to determine the process running on the agent port.

Level: 1
Type: ERROR
Impact: Other

ODI-01455: System component creation failed: instanceName={0}, cause={1}
Cause: An exception prevented the ODI component from being created.
Action: Review the exception to determine the cause.

Level: 1
Type: ERROR
Impact: Other

ODI-01456: getServerConfiguration() failed. domainDir={0}, dirPath={1}, instanceName={2}, cause={3}
Cause: An exception was thrown while setting the ODI configuration parameters.
Action: Review the exception text at the end of the message to determine the cause.

Level: 1
Type: ERROR
Impact: Other

ODI-01457: getDBConfiguration() failed. domainDir={0}, dirPath={1}, datasourceName={2}, cause={3}
Cause: An exception was thrown while setting the ODI database configuration parameters.

Action: Review the exception text at the end of the message to determine the cause.

Level: 1
Type: ERROR
Impact: Other

ODI-01458: ODI configuration files found, but a corresponding instance is not configured. dirPath={0}. Cause={1}

Cause: An exception was thrown while retrieving database configuration parameters from a file.

Action: Review the exception text at the end of the message to determine the file name and exception cause.

Level: 1
Type: WARNING
Impact: Other

ODI-01459: Failed to retrieve master repository name and timestamp for agent {0}. Using the values from instance.properties. Cause={1}

Cause: An exception was thrown while attempting to read metadata for the master repository.

Action: Review the exception text at the end of the message to determine the cause.

Level: 1
Type: WARNING
Impact: Other

ODI-01460: Unable to insert into table {0} for concurrent execution control.
Exceptions due to competing insertions can happen and are handled to continue execution. Other exceptions likely indicate a runtime problem. Error message: {1}

Cause: An exception was raised when inserting a record into the concurrent execution control table.

Action: Exceptions due to competing insertions can happen and are handled to continue execution. Other exceptions likely indicate a runtime problem.

Level: 1
Type: WARNING
Impact: Other

ODI-01461: {0} job status has changed unexpectedly from {1} to {2} while waiting for its turn to run under concurrent execution control.

Cause: The status of a job was likely changed outside of the control of the runtime agent while the job was waiting for its turn to run under concurrent execution control by the agent.

Action: The job may have been changed outside of the agent, and the agent skipped the job execution. Start the job again if it was not executed.
Level: 1
Type: WARNING
Impact: Other

ODI-01462: {0} job [{1}] should be the last one in the following waiting {0} list: {2}
Cause: The job may have been changed or deleted outside of the runtime agent while the job was waiting for its turn to run under concurrent execution control by the agent.
Action: The job may have been changed or deleted outside of the agent, and the agent skipped the job execution. Start the job again if it was not executed.

Level: 1
Type: WARNING
Impact: Other

ODI-01463: {0} job [{1}] blocked by the following {0} job(s) due to potential concurrent execution condition: {2}[3]
Cause: The job was under concurrent execution control with Raise Error violation behavior, and there were existing runnable and/or waiting jobs submitted ahead of the job.
Action: Start the job when other concurrently running and waiting jobs are completed, or change the job’s violation behavior to Wait To Execute before starting the job.

Level: 1
Type: WARNING
Impact: Other

ODI-01464: There is no Hadoop Dataserver selected for PigDataServer- {0} from topology.
Cause: Repository Error.
Action: Verify the dataservers in topology and associate a Hadoop dataserver to Pig dataserver when in Mapreduce mode.

Level: 1
Type: ERROR
Impact: Other

ODI-01465: Error while trying to read values of DataServer- {0} from topology.
Cause: Repository Error.
Action: Verify the dataservers in topology and if needed, associate a Hadoop dataserver to Pig dataserver when in Mapreduce mode.

Level: 1
Type: ERROR
Impact: Other

ODI-01466: Error occurred previewing file on agent {0}
Cause: Error previewing file on the agent
Action: Verify that file configuration is valid. Verify that file is available
Level: 1
Type: ERROR
Impact: Other

ODI-01467: Error occurred trying to find URL of ODI scripting JAR {0}
Cause: Error getting the URL of ODI scripting language JAR
Action: Verify that the path is valid

Level: 1
Type: ERROR
Impact: Other

ODI-01500: SQL Exception when accessing work repository {0} while executing load plan instance {1} - {2}
Cause: A SQLException was thrown when trying to update the work repository
Action: The same set of updates will be attempted later, potentially from a different agent

Level: 1
Type: ERROR
Impact: Other

ODI-01501: Cannot find variable "{0}" in the definition of load plan instance {1}.
Cause: The start/restart load plan request contained startup values for variables that are not defined in the load plan
Action: User error or problem in the IDE invocation code

Level: 1
Type: ERROR
Impact: Other

ODI-01502: Load plan instance {0} is in an inconsistent state: {1}
Cause: Indicates a problem in the ODI code, like a wrapped IllegalStateException
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01503: Load plan logs for instance {0}, run {1} are corrupted: {2}
Cause: Indicates a problem in the ODI code, it is a wrapped IllegalStateException
Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01504: Trying to update variables during execution of step "{0}" (load plan instance {1}, run {2}), as part of the exception handler for step "{3}", but variable updates during exception handlers are not supported.
Error Messages

ODI-01505: Current value "{0}" of variable "{1}" (while evaluating When clause "{2}") is not a valid value of type {3} (load plan instance {4}, run {5}).

ODI-01506: "Comparison value of step "{2}" ("{0}") is not a valid value of type {3} (load plan instance {4}, variable tested "{1}").

ODI-01507: Load Plan Instance restart called for instance {0}, but no previous runs were found.

ODI-01508: Load Plan Instance start called for instance {0}, but previous runs have been found.

ODI-01509: Load Plan Instance {0} cannot be restarted because the previous run ({1}) status "{2}" is not in "{3}" status.

Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other
Impact: Other

ODI-01510: The same load plan instance {0} simultaneously started by two agents.
  Cause: null
  Action: null
  Level: 1

Impact: Other

ODI-01588: The specified operation [0] provided is not supported by this tool.
  Cause: The operation provided is not supported by this tool.
  Action: Verify the parameters

Level: 1
Type: ERROR
Impact: Other

  Cause: The execution of the OdiOggCommand operation failed.
  Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01590: The execution of the script failed. [0]
  Cause: The execution of the script failed in the BSF Engine.
  Action: null

Level: 1
Type: ERROR
Impact: Other

ODI-01591: The ODI agent name [0] specified in the client request does not match with the ODI agent [1] serving the request.
  Cause: The client and the agent are not using the same physical agent name.
  Action: Verify the client and the agent are using the same agent name. Verify that the client is calling the correct agent.
Level: 1
Type: ERROR
Impact: Other

ODI-01592: Error occurred testing connection to dataserver with agent {0}
Cause: Dataserver connection test failed on the agent
Action: Verify that dataserver connection configuration is valid. Verify that dataserver is available

Level: 1
Type: ERROR
Impact: Other

ODI-01593: The following bind parameters ({0}) in the task command {1} are not bound to any value. All the bind parameters should be bound for the command to be successful.
Cause: Either the source command is not providing values for some of the bind parameters in target command or the Odi Variables and/or Odi Sequence meta-data is not generated for the Scenario.
Action: Verify that either the source command is correct or the Odi Variables and/or Odi Sequences meta-data is generated in the Scenario.

Level: 1
Type: ERROR
Impact: Other

ODI-01594: The connection to the data server {0} failed.
Cause: The data server might be down or the data server connectivity settings are not correct.
Action: Verify that you are able to test the data server using the Studio successfully.

Level: 1
Type: ERROR
Impact: Other

ODI-01595: The command script failed with trace {0}.
Cause: There was a failure in the Ftp or Sftp command script.
Action: Verify the trace and resolve the error in the command script passed to the tool.

Level: 1
Type: ERROR
Impact: Other

ODI-01596: Failed to execute the pig script.
Cause: There was a failure in executing Pig script.
Action: Verify the trace and resolve the error in the command script passed.

Level: 1
Type: ERROR
ODI-01597: The submitted pig script is empty.
   Cause: The command did not contain or generate any pig script.
   Action: Verify the trace and resolve the error in the code generation.

   Level: 1
   Type: ERROR
   Impact: Other

ODI-01598: Failed to call method {0}.
   Cause: Invocation Error.
   Action: Verify the trace and resolve the error in the runtime pig engine.

   Level: 1
   Type: ERROR
   Impact: Other

ODI-01599: The associated Dataserver with ID- {0} is missing for DataServer- {1} from topology.
   Cause: Repository Error.
   Action: Verify the dataservers in topology and associate a Dataserver to current Dataserver.

ODI-01615: DESCRIPTION Resumes an execution session. See Oracle Data Integrator documentation for the detailed syntax. SYNTAX
restartsession.(cmd|sh) "-INSTANCE=<instance_name>" <session_number> [<log_level>] ["-AGENT_URL=<agent_url>" | "-AGENT_NAME=<physical_agent_name>"]

Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01616: DESCRIPTION Starts an agent. See Oracle Data Integrator documentation for the detailed syntax. SYNTAX
agent.(cmd|sh) -NAME=<agent name> [-PORT=<port>] [-PROTOCOL=<protocol>] [-JMXPORT=<jmxport>] [-ODI_CONNECTION_RETRY_COUNT=<nn>] [-ODI_CONNECTION_RETRY_DELAY=<nn>] PORT represents the listening port. It should match the port value specified against the physical agent defined in Topology. PROTOCOL represents the listening protocol, HTTP or HTTPS. Its default value is HTTP. NAME represents the name of this physical agent. It should match the name of a physical agent defined in Topology. User must have created an agent with this name using configuration wizard. JMXPORT represents the JMX port used for JMX notifications etc. Its default value is calculated as PORT + 1000, or 20810 if the calculated value is greater than 65535. ODI_CONNECTION_RETRY_COUNT represents the number of times a connection to the ODI Repository will be retried. Its default value is 10. ODI_CONNECTION_RETRY_DELAY represents the number of milliseconds between connection retries to the ODI Repository. Its default value is 7000.

Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01617: DESCRIPTION Stops an agent. See Oracle Data Integrator documentation for the detailed syntax. SYNTAX
agentstop.(cmd|sh) "-NAME=<agent name>" ["-AGENT_URL=<agent_url>"
["-IMMEDIATE=<true(default)|false>" ["-MAX_WAIT=<stop timeout in millis>"]]

Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01618: DESCRIPTION Restarts execution of a load plan instance. See Oracle Data Integrator documentation for the detailed syntax. SYNTAX
restartloadplan.(cmd|sh) "-INSTANCE=<instance_name>" <load_plan_
instance_id> [<log_level>] "-AGENT_URL=<agent_url>" ["-SYNC=(no|yes)""] ["-POLLINT=<msec>""]
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01619: DESCRIPTION Starts a Oracle Data Integrator command. See Oracle Data Integrator documentation for the detailed syntax. SYNTAX
startcmd.(cmd | sh) "-INSTANCE=<instance_name>" <Command Name> ["<command parameter>"]*
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01620: DESCRIPTION Starts a load plan. See Oracle Data Integrator documentation for the detailed syntax. SYNTAX
startloadplan.sh "-INSTANCE=<instance_name>" <load_plan_name> <context_code> [<log_level>] ["-AGENT_URL=<agent_url>" ["-SYNC=(no|yes)""] ["-POLLINT=<msec>""] ["-KEYWORDS=<keywords>"] ["<variable>=<value>"]*
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01621: DESCRIPTION Starts a scenario. See Oracle Data Integrator documentation for the detailed syntax. SYNTAX
startscen.(cmd | sh) "-INSTANCE=<instance_name>" <scenario_name> <scenario_version> <context_code> [<log_level>] ["-SESSION_NAME=<session_name>""] ["-KEYWORDS=<keywords>"] ["-AGENT_URL=<agent_url>""] ["-ASYNC=(no|yes)"] ["-DEBBUGGABLE=(no|yes)"] ["-SUSPEND_FIRST_STEP=(no|yes)"] ["-DESCENDANTS_DEBUGGABLE=(no|yes)"] ["-BREAK_ON_ERROR=(no|yes)"] ["<variable>=<value>"]* -ASYNC=no is default; -ASYNC=yes is valid only if -AGENT_URL is specified.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-01622: DESCRIPTION Stops a load plan instance execution. See Oracle Data Integrator documentation for the detailed syntax. SYNTAX
stoploadplan.(cmd | sh) "-INSTANCE=<instance_name>" <load_plan_instance_
id> [<load_plan_run_count>] "-AGENT_URL=<agent_url>" [-STOP_LEVEL=<normal(default) | immediate>]

Action: Check the log for details on the error, fix the error and restart the OdiConsole application.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01810: Error {0} has occurred during registration of Work Repository Service Mbean.
Cause: A runtime error has occurred.
Action: Check the log for details on the error, fix the error and restart the OdiConsole application.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01811: Error {0} has occurred during registration of Session Service Mbean.
Cause: A runtime error has occurred.
Action: Check the log for details on the error, fix the error and restart the OdiConsole application.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01812: Error {0} has occurred during registration of Event Service Mbean.
Cause: A runtime error has occurred.
Action: Check the log for details on the error, fix the error and restart the OdiConsole application.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01813: Error {0} has occurred during registration of Session Search Service Mbean.
Cause: A runtime error has occurred.
Action: Check the log for details on the error, fix the error and restart the OdiConsole application.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01814: No repository definition found for work repository {0} in repositories.xml. Search will be disabled for this repository.
Cause: A configuration error has occurred.
Action: Add the jndi entries for all the work repositories for each of the master repositories in repositories.xml.

Level: 1
Type: ERROR
Impact: Configuration

ODI-01815: Exception {0} has occurred during Session Search by id.
Cause: A runtime error has occurred.
Action: No action is required. The session id mentioned for search is not available.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01816: Session status passed {0} is invalid.
Cause: A runtime error has occurred.
Action: Check the log for details on the error.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01817: Error {0} has occurred while fetching statistics for agents. Statistics shown might not be complete.
Cause: A runtime error has occurred.
Action: Check the log for details on the error.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01818: Agent Service Mbean is not initialized. Re-initialization of agents in tree is disabled.
Cause: A runtime error has occurred.
Action: Check the log for details on the error, fix the same and restart the OdiConsole application.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01819: Event Service Mbean is not initialized. Re-initialization of event notification listeners is disabled.
Cause: A runtime error has occurred.
Action: Check log for details on the error, fix the same and restart the OdiConsole application.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-01820: Agent {0} is not up at {1} for reason {2}.
Cause: A runtime error has occurred.
Action: Check the log for details on the error.
Level: 1

Type: ERROR
Impact: Programmatic

ODI-01821: JMXConnector failed to provide MBean server connection.
Cause: A runtime error has occurred.
Action: Check the log for details on the error.
Level: 1

Type: ERROR
Impact: Programmatic

ODI-01822: Error occurred while closing JMXConnector.
Cause: A runtime error has occurred.
Action: Check the log for details on the error.
Level: 1

Type: ERROR
Impact: Programmatic

ODI-03000: error in creating repository connection {0}
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1

Type: ERROR
Impact: Programmatic

ODI-03001: error in updating repository connection {0}
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1

Type: ERROR
Impact: Programmatic

ODI-03002: error in deleting repository connection {0}
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1

Type: ERROR
Impact: Programmatic
ODI-03003: Failed to connect to the error table {0}. Check the connection details and retry.
Cause: The table might no longer exist or the structure of the table might not be correct.
Action: Check the connection details and retry.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03016: Creation of Work Repository failed because a previous Work repository was found, and the user had asked not to overwrite any existing repository.
Cause: Work repository already exists and overwriting of the repository was not chosen
Action: Select overwriting of Work Repository
Level: 1
Type: ERROR
Impact: Data

ODI-03017: Exception occurred while creating Work Repository at {0} failed. Failure reason {1}.
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03018: Test connection failed due to {0}.
Cause: Connection to DB failed
Action: Check the logs.
Level: 1
Type: ERROR
Impact: Data

ODI-03019: Exception occurred while exporting Master Repository. Failure reason {0}.
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1
Type: ERROR
Impact: Data

ODI-03020: Only zip files can be uploaded, the {0} upload was unsuccessful.
Cause: A file with extension other than zip was uploaded.
Action: Make sure file uploaded has zip as extension
Level: 1
Type: ERROR
Impact: Data

ODI-03021: Exception occurred while importing Work Repository. Failure reason {0}.
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1

Type: ERROR
Impact: Data

ODI-03022: Attaching of Work Repository failed due to error: {2}
Cause: Errored out due to {2} and overwriting of the repository was not chosen
Action: Check the logs
Level: 1

Type: ERROR
Impact: Programmatic

ODI-03023: Attaching of Work Repository failed
Cause: An unexpected error occured and overwriting of the repository was not chosen
Action: Check the logs
Level: 1

Type: ERROR
Impact: Programmatic

ODI-03024: Exception occurred while attaching Work Repository at {0} failed.
  Failure reason {1}.
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1

Type: ERROR
Impact: Programmatic

ODI-03031: Creation of Master Repository failed at {0}.
Cause: Creation of Master Repository Failed
Action: Check the logs.
Level: 1

Type: ERROR
Impact: Data

ODI-03032: Exception occurred while creating Master Repository at {0} failed.
  Failure reason {1}.
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03033: Supervisor Password and Confirm Supervisor Password fields should match.
Cause: Supervisor Password and Confirm Supervisor Password fields must match
Action: Input same passwords
Level: 1

Type: ERROR
Impact: Data

ODI-03034: Test connection failed due to {0}.
Cause: Testing of DB connection failed
Action: Check the logs
Level: 1

Type: ERROR
Impact: Data

ODI-03035: Supervisor Password and Confirm Supervisor Password fields should match and only zip files can be uploaded, the {0} upload was unsuccessful.
Cause: Both the password match and zip files to be uploaded conditions failed
Action: Make sure both the passwords are same and file uploaded is zip file
Level: 1

Type: ERROR
Impact: Data

ODI-03036: Only zip files can be uploaded, the {0} upload was unsuccessful.
Cause: zip files to be uploaded condition failed
Action: Make sure file uploaded is zip file
Level: 1

Type: ERROR
Impact: Data

ODI-03037: Exception occurred while exporting Master Repository. Failure reason {1}.
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1

Type: ERROR
Impact: Programmatic

ODI-03038: Exception occurred while exporting Physical Topology. Failure reason {1}.
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03039: Exception occurred while Importing Master Repository. Failure reason {1}.
Cause: An unexpected error occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03040: Unable to connect to the Repository User. {0}
Cause: Testing of DB connection failed
Action: Check the logs

Level: 1
Type: ERROR
Impact: Data

ODI-03041: Unable to connect to the DBA User. {0}
Cause: Testing of DB connection failed
Action: Check the logs

Level: 1
Type: ERROR
Impact: Data

ODI-03046: unable to find the agent for given logical agent and context code
Cause: Physical Agent mapping was not defined for selected logical agent and context.
Action: A different set of credentials is required or the mapping needs to be defined.

Level: 1
Type: ERROR
Impact: Data

ODI-03047: exception while executing {0}. Failure reason {1}
Cause: An unexpected error occurred.
Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03048: Only XML files can be uploaded: the {0} upload fails
Cause: File selected for import was not a XML file.
Action: Provide the XML file.
Level: 1
Type: ERROR
Impact: Data

ODI-03049: exception while importing {0}. Failure reason {1}
  Cause: An unexpected error occurred.
  Action: Check the logs.

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03050: failed to start scenario : {0} ? {1} in debug mode.
  Cause: An unexpected error occurred.
  Action: Check the logs

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03075: Error in purging Load Plans Executions/Sessions {0}
  Cause: An exception has occurred.
  Action: Check the logs

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03076: exception while killing {0}. Failure reason {1}
  Cause: An unexpected error occurred.
  Action: Check the logs

Level: 1
Type: ERROR
Impact: Programmatic

ODI-03077: Selected Session {0} is in {1} State, and therefore cannot be killed.
  Cause: The selected session was in Done, Error, or Warning state.
  Action: No action is required.

Level: 1
Type: ERROR
Impact: Data

ODI-03078: Selected Session {0} is in {1} State, and therefore cannot be restarted.
  Cause: The selected session was not in Error state.
  Action: No action is required.

Level: 1
Type: ERROR
Impact: Data

ODI-03079: exception while restarting {0}. Failure reason {1}
- **Cause**: An unexpected error occurred.
- **Action**: Check the logs.
- **Level**: 1
- **Type**: ERROR
- **Impact**: Programmatic

ODI-03080: exception while clearing stalesessions. Failure reason {0}
- **Cause**: An unexpected error occurred.
- **Action**: Check the logs.
- **Level**: 1
- **Type**: ERROR
- **Impact**: Programmatic

ODI-03081: Error fetching records from error table {0}. The table might no more exist or the format of the table is not correct
- **Cause**: The table might no longer exist or the structure of the table might not be correct
- **Action**: Upgrade the CKM
- **Level**: 1
- **Type**: ERROR
- **Impact**: DATA

ODI-03082: CKM SQL does not contain ODI_PK primary key column. Hence unable to delete the error records.
- **Cause**: CKM SQL does not contain ODI_PK primary key column. Hence unable to delete the error records.
- **Action**: Future release will have the ODI_PK primary key column incorporated in CKM SQL.
- **Level**: 1
- **Type**: ERROR
- **Impact**: Programmatic

ODI-03083: Scenario "{0}" parent not found.
- **Cause**: Trying to get the Odi Object which does not exist or has been deleted.
- **Action**: Check the logs
- **Level**: 1
- **Type**: ERROR
- **Impact**: Data

ODI-03090: failed to restart session : {0} in debug mode.
- **Cause**: An unexpected error occured
- **Action**: Check the logs
- **Level**: 1
- **Type**: ERROR
- **Impact**: DATA

ODI-03330: Exception while importing attributes. Reason: {0}
  Cause: An unexpected error occurred.
  Action: Check the logs.
  Level: 1
  Type: ERROR
  Impact: Programmatic

ODI-03331: Exception while importing properties. Reason: {0}
  Cause: An unexpected error occurred.
  Action: Check the logs.
  Level: 1
  Type: ERROR
  Impact: Programmatic

ODI-03332: Exception while fetching attributes. Reason: {0}
  Cause: An unexpected error occurred.
  Action: Check the logs.
  Level: 1
  Type: ERROR
  Impact: Programmatic

ODI-03333: Exception while fetching properties. Reason: {0}
  Cause: An unexpected error occurred.
  Action: Check the logs.
  Level: 1
  Type: ERROR
  Impact: Programmatic

ODI-03334: Exception while importing properties and expressions of attributes.
  Reason: {0}
  Cause: An unexpected error occurred.
  Action: Check the logs.
  Level: 1
  Type: ERROR
  Impact: Programmatic

ODI-03335: Exception while loading components. Reason: {0}
  Cause: An unexpected error occurred.
  Action: Check the logs.
  Level: 1
  Type: ERROR
  Impact: Programmatic

ODI-03336: Error in persisting user preferences {0}
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03337: UserPref.xml path is not set
Cause: An unexpected error occurred
Action: Check the logs
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03338: Failed to get User Preferences
Cause: An unexpected error occurred
Action: Check the logs
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03339: Error in getting policies. Reason: {0}
Cause: Error occurred.
Action: Check the logs.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-03501: Exception while applying deployment archive. Failure reason {0}
Cause: An unexpected error occurred.
Action: Check the logs.
Level: 1
Type: ERROR
Impact: Programmatic

ODI-05000: Task {0} ({1}) on logical schema {2} with Context Id {3} fails since scripting technology name could not be discovered.
Cause: null
Action: null
Level: 1
Type: ERROR
Impact: Other

ODI-05001: Session {0} ({1}) could not be stopped by Agent {2}: Session run on an 'Internal' agent cannot be stopped from another process.
Cause: Stopping a session being run by an internal agent from another process is not possible.

Action: Review the session execution details in the Operator Navigator or Repository Explorer.

Level: 1
Type: ERROR
Impact: Other

ODI-05002: Pig Script Execution failure: The following \{0\} Job(s) - [[\{1\}]] reported failed. Please check the resource manager logs for these jobs for the failure reason.

Cause: There was a failure in executing Pig script in MapReduce Mode. Some Jobs have been reported failed.

Action: Verify the Resource Manager trace and resolve the error in the command script passed.

Level: 1
Type: ERROR
Impact: Other

ODI-05003: No associated Hadoop dataserver found for given logical schema \{0\}.

Cause: Repository Error.

Action: Verify given logical schema is Hadoop dataserver or associated with Hadoop dataserver.

Level: 1
Type: ERROR
Impact: Other

ODI-05004: None of the logical schemas \{0\} and \{1\} associated with Hadoop dataserver.

Cause: Repository Error.

Action: Verify given logical schema is Hadoop dataserver or associated with Hadoop dataserver.

Level: 1
Type: ERROR
Impact: Other

ODI-05100: Agent \{0\} cannot read configuration. Cause: \{1\}.

Cause: The agent configuration cannot be read.

Action: Review the cause and take appropriate action.

Level: 1
Type: ERROR
Impact: Other

ODI-10000: Method setObject class DwgObjectRepresentor does not support object class: \{0\}.

Cause: Java method was not found.
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-10001: Action unauthorized for this license: \{0\}
Cause: Action was unauthorized for this license.
Action: Choose another license.

Level: 32
Type: ERROR
Impact: Security

ODI-10002: Only one local repository can be defined; \{0\} were found.
Cause: More than one local repository was found.
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-10003: No connection set.
Cause: No connection was set.
Action: Set connection.

Level: 32
Type: ERROR
Impact: Other

ODI-10004: File already exists.
Cause: File already existed.
Action: Choose another file.

Level: 32
Type: ERROR
Impact: File

ODI-10005: Repository is expected to be a master repository.
Cause: Repository was expected to be a master repository.
Action: Choose master repository.

Level: 32
Type: ERROR
Impact: Other

ODI-10006: Repository is expected to be enterprise repository.
Cause: Repository was expected to be an enterprise repository.
Action: Choose enterprise repository.
Level: 32
Type: ERROR
Impact: Other

ODI-10007: Object must be in editable state before using set methods.
Cause: The object was not in editable state.
Action: Edit this object.

Level: 32
Type: ERROR
Impact: Other

ODI-10008: Object must be in consult mode before using methods get.
Cause: The object was not in consult mode.
Action: Consult the object.

Level: 32
Type: ERROR
Impact: Other

ODI-10009: Object does not exist in the repository.
Cause: The repository did not contain this object.
Action: Choose another object or create first this one.

Level: 32
Type: ERROR
Impact: Other

ODI-10010: This type of object cannot be updated.
Cause: Object could not be updated.
Action: Do not update this object.

Level: 32
Type: ERROR
Impact: Other

ODI-10011: Invalid object; it has been updated by another user.
Cause: Object was updated by another user.
Action: Refresh the object.

Level: 32
Type: ERROR
Impact: Other

ODI-10012: Object cannot be inserted
Cause: Object could not be inserted.
Action: Check object.

Level: 32
Type: ERROR
Impact: Other

ODI-10013: This import action has been cancelled because it could damage your repository. This is due to an [0] object that has object identifier [1] that is greater than that for the current [0] id sequence. Importing this object would lead to primary key violations in the future.

Cause: Import could damage your repository.

Action: Check identifier sequences.

Level: 32
Type: ERROR
Impact: Other

ODI-10014: Method must be redefined in derived classes. It cannot be called for DwgObject

Cause: Method must be redefined in derived classes.

Action: Call redefined method.

Level: 32
Type: ERROR
Impact: Other

ODI-10015: The work repository [0] is not declared in this master repository, the import process has been cancelled.

Cause: Work repository was not declared in this master repository.

Action: Declare work repository and try again.

Level: 32
Type: ERROR
Impact: Other

ODI-10016: Import aborted.

Cause: Import was aborted.

Action: Check objects and try again.

Level: 32
Type: ERROR
Impact: Other

ODI-10017: This import is forbidden: the text [0] has a different origin in the repository and in the import file.

Cause: The text has a different origin in the repository and in the import file.

Action: Check import file and try again.

Level: 32
Type: ERROR
Impact: Other

ODI-10018: The repository [0] is not coherent between the current repository and the import file.
cause: The repository was not coherent between the current repository and the import file.
action: Check import file.
level: 32
type: error
impact: other

ODI-10019: Impossible to create the directory {0}.
cause: I was not possible to create the directory.
action: Check your system rights for creating directory; directory’s path and name.
level: 32
type: error
impact: file

ODI-10020: Impossible to replace the file
cause: It was not possible to replace the file.
action: Check, if you have enough rights for this operation.
level: 32
type: error
impact: file

ODI-10021: Unspecified save directory.
cause: Directory to save environment information was unspecified.
action: Specify the directory for saving the environment information file.
level: 32
type: error
impact: other

ODI-10022: You must specify all options.
cause: Missed one or more options.
action: Specify missed options.
level: 32
type: error
impact: other

ODI-10023: Invalid license. This license is suitable for {0}.
cause: Invalid license.
action: Check license.
level: 32
type: error
impact: security

ODI-10024: Your installation of Oracle Data Integrator is corrupted.
Cause: The technology description file contains errors.
Action: Reinstall Oracle Data Integrator.

Level: 32
Type: ERROR
Impact: Other

ODI-10025: Your installation of Oracle Data Integrator is corrupted.
Cause: The technology description file is missing.
Action: Reinstall Oracle Data Integrator.

Level: 32
Type: ERROR
Impact: Other

ODI-10026: Error while testing the Master Repository technology.
Cause: Error occurred while testing the Master Repository technology.
Action: Check parameters.

Level: 32
Type: ERROR
Impact: Other

ODI-10027: The import is canceled because at least one object is locked by another user.
Cause: At least one object was locked by another user.
Action: Check objects' locks.

Level: 32
Type: ERROR
Impact: Other

ODI-10028: It is forbidden to import a log into a repository having the same ID.
Cause: The log had the same ID as repository.
Action: Check log and/or repository id.

Level: 32
Type: ERROR
Impact: Other

ODI-10029: Version {0} for object {1} already exists.
Cause: Version already existed.
Action: Choose another version.

Level: 32
Type: ERROR
Impact: Other

ODI-10030: DwgBeanWrapper can only wrap DwgObjects
Cause: DwgBeanWrapper can only wrap DwgObjects
Action: Choose correct type of objects.
Level: 32
Type: ERROR
Impact: Other

ODI-10031: Object {0}: {1} is locked by user {2}
Cause: Object was locked by another user.
Action: Wait until object is unlocked.
Level: 32
Type: ERROR
Impact: Other

ODI-10032: You cannot import this object ({0}). A referenced object ({1}) does not exist in the repository.
Cause: A referenced object does not exist in the repository.
Action: Check import file.
Level: 32
Type: ERROR
Impact: Other

ODI-10033: You cannot delete this object because it is locked by another user ({0}).
Cause: This object was locked by another user.
Action: Wait until object is unlocked.
Level: 32
Type: ERROR
Impact: Other

ODI-10034: The technology hosting your master repository does not support Versioning.
Cause: The technology did not support versioning.
Action: Choose another repository or technology.
Level: 32
Type: ERROR
Impact: Other

ODI-10035: {0} : "{1}" (with global id: {5} and internal id: {6}) violates alternate key constraint {2} {3} for values {4}
Cause: Object violated alternate key constraint.
Action: Check object properties and constraint's values.
Level: 32
Type: ERROR
Impact: Other

ODI-10036: Importing object {0} : {1} (with global id: {2} and internal id: {3}) failed.
Cause: Import failed.
**ODI-10037:** Import-replace for this node is supported for action groups only. The import file is invalid.
**Cause:** Import-replace for this node was supported for action groups only.
**Action:** Check import file.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-10038:** The interface you are trying to use (\{0\}) is related to a logical schema (\{1\}) that no longer exists. 
**Cause:** Logical schema was not found.
**Action:** Check interface.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-10039:** Bad ID for an object representer
**Cause:** Bad ID for an object representer
**Action:** Check object’s ID.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-10040:** Cannot create directory
**Cause:** Directory could not be created. 
**Action:** Check directory path/name.

**Level:** 32  
**Type:** ERROR  
**Impact:** File

**ODI-10041:** Oracle Data Integrator Remote Object (SnpRemoteObject) must inherit from SnpsFunction.
**Cause:** Oracle Data Integrator Remote Object (SnpRemoteObject) did not inherit from SnpsFunction.
**Action:** Use SnpsFunction as parent.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-10042:** SnpsQuery must be connected prior to execution
**ODI-10043: Security token is a mandatory parameter**

*Cause:* Security token was not specified.

*Action:* Check security parameters.

*Level:* 32  
*Type:* ERROR  
*Impact:* Security

**ODI-10044: Unable to save the interface. Maximum number of source datastores exceeded.**

*Cause:* Maximum number of source datastores was exceeded.

*Action:* Contact Oracle Support Services.

*Level:* 32  
*Type:* ERROR  
*Impact:* Other

**ODI-10045: a2.getCargo() not instance of SAPSegment**

*Cause:* a2.getCargo() not instance of SAPSegment

*Action:* Check SAP Tree.

*Level:* 32  
*Type:* ERROR  
*Impact:* Other

**ODI-10046: No IDoc.**

*Cause:* Missed IDoc.

*Action:* Check IDoc.

*Level:* 32  
*Type:* ERROR  
*Impact:* Other

**ODI-10047: Repository is not a development work repository**

*Cause:* Repository was not a development work repository.

*Action:* Choose development work repository.

*Level:* 32  
*Type:* ERROR  
*Impact:* Other

**ODI-10048: No work repository found.**

*Cause:* No work repository was found.
**Action:** Check your connection settings or database.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-10049: Missing parameter**  
**Cause:** Parameter was missing.  
**Action:** Check all parameters.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-10050: Missing parameter at: {0} SQL: {1}**  
**Cause:** Parameter was missing.  
**Action:** Check all parameters.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-10051: Some objects cannot be exported because they do not exist in the repository: {0} {1}**  
**Cause:** Objects did not exist in the repository.  
**Action:** Check objects state.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-10052: A problem occurred in your repository.**  
**Cause:** A problem occurred in your repository.  
**Action:** Contact Oracle Support Services.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-10053: Problem retrieving JCOFunction object. {0}**  
**Cause:** Problem occurred retrieving JCOFunction object.  
**Action:** Check JCO Function object.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-10054: Unable to find the XML file corresponding to your technology.**  
**Cause:** XML file corresponding to your technology was not found.  
**Action:** Check technology and/or XML file for the technology.
Level: 32
Type: ERROR
Impact: Other

**ODI-10055: This ID is already in use in the repository**
Causes: This ID was already in use in the repository.
Action: Change ID.

Level: 32
Type: ERROR
Impact: Other

**ODI-10056: This repository ID already exists. This repository cannot be created.**
Cause: Repository ID already existed.
Action: Change repository ID.

Level: 32
Type: ERROR
Impact: Other

**ODI-10057: Unrecognized export type.**
Cause: Export type was unrecognized.
Action: Check export type.

Level: 32
Type: ERROR
Impact: Other

**ODI-10058: You are trying to import objects from a master repository of an older version into {0} version. This action is forbidden. Master repositories must be upgraded using the upgrade assistant, not using the export/import facility.**
Cause: You tried to import objects from a master repository of an older version.
Action: Master repositories must be upgraded using the upgrade assistant, not using the export/import facility.

Level: 32
Type: ERROR
Impact: Other

**ODI-10059: Repository is null**
Cause: Repository was null.
Action: Check repository.

Level: 32
Type: ERROR
Impact: Other

**ODI-10060: Saputil is mandatory.**
Cause: Saputil was mandatory.
Action: Check Saputil
Level: 32
Type: ERROR
Impact: Other

ODI-10061: Empty XML Character Set
Cause: XML Character Set was empty.
Action: Fill XML Character Set.

Level: 32
Type: ERROR
Impact: Other

ODI-10062: Unable to find license key \{0\}. An exception \{1\} occurred with message: \{2\}
Cause: An exception occurred.
Action: Check license key.

Level: 32
Type: ERROR
Impact: Other

ODI-10063: Unable to check the license key. An exception \{0\} occurred with message: \{1\}
Cause: An exception occurred.
Action: Check license key.

Level: 32
Type: ERROR
Impact: Other

ODI-10064: The interface must have a JMS datastore as a source or target. Another license is required otherwise.
Cause: The interface must have a JMS datastore as a source or target.
Action: Check datastore type and/or license.

Level: 32
Type: ERROR
Impact: Other

ODI-10065: You license does not include these features. Please contact your reseller.
Cause: You license does not include these features.
Action: Please contact your reseller.

Level: 32
Type: ERROR
Impact: Other

ODI-10066: The interface is using a Datastore defined in Model \"\{0\}\" which is linked to a logical schema \"\{1\}\" that no longer exists.
Cause: Logical schema was not found.
**Action:** Correct interface.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-10067: Target file already exists.**  
**Cause:** Target file already existed.  
**Action:** Choose another target file name.

**Level:** 32  
**Type:** ERROR  
**Impact:** File

**ODI-10068: SnpsConnection: Current Isolation level: {0}. The new Isolation level: {1}, not supported**  
**Cause:** Isolation level not supported.  
**Action:** Check isolation level.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-10069: Unsupported XML Character Set: {0}**  
**Cause:** Unsupported XML Character Set.  
**Action:** Check XML charset.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-10070: Cannot delete this object. It is being edited or viewed**  
**Cause:** Object was being edited or viewed.  
**Action:** Stop edit or view object and try again.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-10071: Cannot delete this object**  
**Cause:** Could not delete this object.  
**Action:** Check object state.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-10073: A repository already exists on this data server**  
**Cause:** A repository already existed on this data server.  
**Action:** Choose another data server.
Level: 32
Type: ERROR
Impact: Other

ODI-10074: An object with the wrong type was given to an object representative
Cause: An object with the wrong type was given to an object representative
Action: Check object type.

Level: 32
Type: ERROR
Impact: Other

ODI-10075: An object is in an unidentified state {0}
Cause: An object is in an unidentified state.
Action: Check object state.

Level: 32
Type: ERROR
Impact: Other

ODI-10076: A collection object is the wrong class
Cause: A collection object is the wrong class.
Action: Check collection object's class

Level: 32
Type: ERROR
Impact: Other

ODI-10077: Undefined action performed on an object: {0}
Cause: An undefined action was performed on an object.
Action: Check action and object.

Level: 32
Type: ERROR
Impact: Other

ODI-10078: An object will be in an unidentified state (it is in the state "{0}" and "{1}" is currently being performed on it)
Cause: An object would have been in an unidentified state.
Action: Check object state.

Level: 32
Type: ERROR
Impact: Other

ODI-10080: Incorrect License ....
Cause: Incorrect License.
Action: Contact your seller.

Level: 32
Type: ERROR
Impact: Other

ODI-10081: You are not authorized to Insert the Object: {0}: {1} / {2}
Cause: You were not authorized to Insert the Object.
Action: Login with user with right privileges.

Level: 32
Type: ERROR
Impact: Security

Type: WARNING
Impact: Other

ODI-10112: Project code will be changed from <{0}> to <{1}>.
    Cause: The import will make a change to an existing project code.
    Action: Determine whether the change to project code is desired or not.

Level: 32
Type: WARNING
Impact: Other

ODI-10113: {0} with {1} <{2}> does not exist.
    Cause: A referenced object does not exist.
    Action: Either import the missing object or change to reference a different object.

Level: 32
Type: WARNING
Impact: Other

ODI-10114: {0} with {1} id <{2}> does not exist.
    Cause: A referenced object does not exist.
    Action: Either import the missing object or change to reference a different object.

Level: 32
Type: WARNING
Impact: Other

ODI-10115: {0} with the same name <{1}> already exists.
    Cause: A different object with the same name already exists.
    Action: Either change the name of the object being imported or use match by
            name to match to the already existing object with the same name.

Level: 32
Type: WARNING
Impact: Other

ODI-10116: Model code will be changed from <{0}> to <{1}>.
    Cause: The import will make a change to an existing model code.
    Action: Determine whether the change to model code is desired or not.

Level: 32
Type: WARNING
Impact: Other

ODI-10117: Sub-model code will be changed from <{0}> to <{1}>.
    Cause: The import will make a change to an existing sub-model code.
    Action: Determine whether the change to sub-model code is desired or not.

Level: 32
Type: WARNING
Impact: Other

ODI-10118: A different Physical Schema is already set as the default physical schema for the same data server.
Cause:
Action:
Level: 32
Type: WARNING
Impact: Other

ODI-10119: A different Context is already set as the default Context.
Cause:
Action:
Level: 32
Type: WARNING
Impact: Other

ODI-10120: Context code will be changed from <{0}> to <{1}>.
Cause: The import will make a change to an existing context code.
Action: Determine whether the change to context code is desired or not.
Level: 32
Type: WARNING
Impact: Other

ODI-10121: Logical schema name will be changed from <{0}> to <{1}>.
Cause: The import will make a change to an existing logical schema name.
Action: Determine whether the change to logical schema name is desired or not.
Level: 32
Type: WARNING
Impact: Other

ODI-10122: Logical agent name will be changed from <{0}> to <{1}>.
Cause: The import will make a change to an existing logical agent name.
Action: Determine whether the change to logical agent name is desired or not.
Level: 32
Type: WARNING
Impact: Other

ODI-10123: {0} with {1} <{2}> and {3} <{4}> does not exist.
Cause: A referenced object does not exist.
Action: Either import the missing object or change to reference a different object.
Level: 32
Type: WARNING
Impact: Other

**ODI-10124: Smart import of file \{0\} cannot be run due to unfixed critical issues.**

*Cause:* Critical issues exist for objects in the Smart Import.

*Action:* A fix must be provided for all critical issues before the Smart Import can be run.

*Level:* 32

*Type:* ERROR

*Impact:* Other

**ODI-10125: Smart Export file name cannot be null.**

*Cause:* Smart Export file name not specified for Smart Export.

*Action:* Specify a Smart Export file via Smart Export.

*Level:* 32

*Type:* ERROR

*Impact:* Other

**ODI-10126: File \{0\} already exists.**

*Cause:* The file already exists.

*Action:* Specify another file name.

*Level:* 32

*Type:* ERROR

*Impact:* Other

**ODI-10127: Column position \{0\} is being used by another object <\{1\}>.**

*Cause:* The position value is already in use.

*Action:* Specify a unique position value.

*Level:* 32

*Type:* ERROR

*Impact:* Other

**ODI-10128: Multiple primary keys found. Only one primary key can be defined per datastore.**

*Cause:* Multiple primary keys defined.

*Action:* Delete or match primary keys so that only one is defined.

*Level:* 32

*Type:* ERROR

*Impact:* Other

**ODI-10129: Object with id \{0\} and type \{1\} is not a smart exportable object.**

*Cause:* Smart Export does not support the type of object specified.

*Action:* Do not export this object.

*Level:* 32

*Type:* ERROR
Impact: Other

ODI-10130: Smart Import Response file {0} is not valid for Smart Export file {1}.
  Cause: Smart Import Response file was not generated for the Smart Export file being imported.
  Action: Specify a Smart Import response file that belongs to the Smart Export file being imported.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-10131: Entity of type {0} cannot be merged.
  Cause: Wrong entity type.
  Action: Check entity type.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-10132: Entity of type {0} cannot be removed.
  Cause: Wrong entity type.
  Action: Check entity type.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-10133: Cannot create a transaction against the extended persistent context [{0}].
  Cause: Another persistence context is already bound to the current thread.
  Action: Unbound persistence context from current thread.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-10134: You don't have READ permission on at least one object from the collection/list.
  Cause: Insufficient level of permissions.
  Action: Check your permissions
  Level: 32
  Type: ERROR
  Impact: Security

ODI-10135: Max value ({1}) reached for sequence {0} and reset is not allowed.
  Cause: Reset is not allowed.
  Action: Check configuration of sequence behaviour.
  Level: 32
  Type: ERROR
Impact: Other

ODI-10136: Illegal transaction state: transaction synchronization is active but entity manager is not synchronized within the transaction.
   Cause: Entity manager is not synchronized within the transaction.
   Action: Synchronize entity manager and try again.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-10137: Your program needs to set authentication first.
   Cause: There is no authentication set.
   Action: Set authentication via
            odilInstance.getSecurityManager().setGlobalAuthentication(.) or
            odilInstance.getSecurityManager().setCurrentThreadAuthentication(.), see the
            SecurityManager API for more detail.
   Level: 32
   Type: ERROR
   Impact: Security

ODI-10138: Unable to create DwgConnectConnection to {0} repository.
   Cause: Exception during connection.
   Action: Check repository configuration.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10139: {0} must not be null or empty.
   Cause: Parameter is null or empty.
   Action: Check parameter name.
   Level: 32
   Type: ERROR
   Impact: Configuration

ODI-10140: {0} must be greater or equal 0.
   Cause: Parameter is negative.
   Action: Check parameter value.
   Level: 32
   Type: ERROR
   Impact: Configuration

ODI-10141: Unable to create datasource provider from class [{0}].
   Cause: Exception during creation.
   Action: Check configuration.
   Level: 32
Type: ERROR
Impact: Configuration

ODI-10142: Active transaction is required to use the method \{0\} on the TransactionalOdiEntityManager.
Cause: Transaction isn’t active.
Action: Check transaction state.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10143: Error while accessing the \{0\} repository.
Cause: Network problems.
Action: Check the network connection and the database status.

Level: 32
Type: ERROR
Impact: Network

ODI-10144: OdiInstance is closed.
Cause: OdiInstance is closed.
Action: Check OdiInstance status.

Level: 32
Type: ERROR
Impact: Other

ODI-10145: Limited persistence support.
Cause: Limited persistence support.
Action: Check OdiInstance configuration.

Level: 32
Type: ERROR
Impact: Other

ODI-10146: Cannot create JDBC DataSource for this type of DataServer.
Cause: Invalid connection provider.
Action: Check connection provider.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10147: Repository type mismatches.
Cause: Wrong repository type.
Action: Check repository type.

Level: 32
Type: ERROR
Impact: Configuration

ODI-10148: Repository is in error install/upgrade state and needs to be repaired. Connection has been disabled.
Cause: Repository install/upgrade did not complete successfully.
Action: Check install/upgrade log files and/or ODI user documentation for information on reparation process.

Level: 32
Type: ERROR

Impact: Configuration

ODI-10149: Local Repository table is empty.
Cause: Local Repository table is empty.
Action: Check repository configuration.

Level: 32
Type: ERROR

Impact: Configuration

ODI-10150: Work repository with ID {0} is not bound to master: Definition in master ID:{0}, Name:{1}, Timestamp:{2} Definition in work ID:{3}, Name:{4}, Timestamp:{5}.
Cause: Work repository with ID is not bound to master repository.
Action: Check work and master repositories configuration.

Level: 32
Type: ERROR

Impact: Configuration

ODI-10151: Unable to get ID for entity {0}.
Cause: Wrong entity ID.
Action: Check entity properties.

Level: 32
Type: ERROR

Impact: Security

ODI-10152: I_OBJECTS for entity class {0} is not found.
Cause: Entity type is not mapped to I_OBJECTS.
Action: Check entity class.

Level: 32
Type: ERROR

Impact: Programmatic

ODI-10153: {0} is denied.
Cause: Insufficient level of permissions.
Action: Check permissions.

Level: 32
Type: ERROR
Impact: Security
ODI-10154: {0} is denied for {1}.
Cause: Insufficient level of permissions.
Action: Check permissions.
Level: 32
Type: ERROR
Impact: Security
ODI-10155: You don’t have {0} permission on at least one object from the collection/list.
Cause: Insufficient level of permissions.
Action: Check permissions.
Level: 32
Type: ERROR
Impact: Security
ODI-10156: Impossible to connect to JPS MBean Server.
Cause: Exception during connection.
Action: Check configuration.
Level: 32
Type: ERROR
Impact: Configuration
ODI-10157: {0}: must call preWebLogic() before postWebLogic().
Cause: Wrong API usage.
Action: Call preWebLogic() before postWebLogic().
Level: 32
Type: ERROR
Impact: Programmatic
ODI-10158: The credential with map name {0} and key {1} already exists.
Cause: Wrong credential.
Action: Check credential configuration.
Level: 32
Type: ERROR
Impact: Programmatic
ODI-10159: The user {0} hasn’t required CONNECT profile.
Cause: The user hasn’t required profile.
Action: Grant the user CONNECT profile first.
Level: 32
Type: ERROR
Impact: Security

**ODI-10160: Unable to load user.**
*Cause:* Exception during user loading.
*Action:* Check repository connection.

Level: 32
Type: ERROR
Impact: Other

**ODI-10161: Trying to create authentication with Subject parameter which should be applicable when OPSS authentication is used, but ODI shows it is using ODI internal authentication.**
*Cause:* ODI internal authentication is used instead of OPSS authentication.
*Action:* Check authentication type.

Level: 32
Type: ERROR
Impact: Programmatic

**ODI-10162: This OPSS user 
''{0}'' is not registered to Oracle Data Integrator.**
*Cause:* The user is not registered to ODI.
*Action:* Check user name.

Level: 32
Type: ERROR
Impact: Configuration

**ODI-10163: This OPSS user 
''{0}'' has different GUID than the one found in Oracle Data Integrator repository.**
*Cause:* OPSS user differs from ODI user in GUID.
*Action:* Check user GUID.

Level: 32
Type: ERROR
Impact: Security

**ODI-10164: Only supervisor user can invoke this API.**
*Cause:* Insufficient level of permissions.
*Action:* Check user role.

Level: 32
Type: ERROR
Impact: Security

**ODI-10165: The RunAsUser {0} is not a valid user from external user identity store.**
*Cause:* User isn't valid.
*Action:* Check user.

Level: 32
Type: ERROR
Impact: Security

ODI-10166: The RunAsUser: {0} has different GUID in ODI repository and external user identity store.
  Cause: User from external user identity store differs from ODI user in GUID.
  Action: Check user.
  Level: 32
  Type: ERROR
  Impact: Security

ODI-10167: Authentication is missing.
  Cause: Authentication is missing.
  Action: Check authentication configuration.
  Level: 32
  Type: ERROR
  Impact: Security

ODI-10168: There is already an Authentication bound to this thread.
  Cause: There is already an Authentication bound to this thread.
  Action: Check authentication configuration.
  Level: 32
  Type: ERROR
  Impact: Security

ODI-10169: Trying to set authentication object which is not created by this security manager.
  Cause: Authentication object isn’t created by this security manager.
  Action: Check authentication configuration.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-10170: There is currently no Authentication bound to this thread.
  Cause: There is currently no Authentication bound to this thread.
  Action: Check authentication configuration.
  Level: 32
  Type: ERROR
  Impact: Security

ODI-10171: There is already an Authentication bound as global Authentication.
  Cause: There is already an Authentication bound as global Authentication.
  Action: Check authentication configuration.
  Level: 32
  Type: ERROR
Impact: Programmatic

ODI-10172: There is currently no global Authentication bound to this SecurityManager.
Cause: There is currently no global Authentication bound to this SecurityManager.
Action: Check authentication configuration.
Level: 32
Type: ERROR
Impact: Security

ODI-10173: You are not authorized to change the password for external user "{0}".
Cause: Insufficient level of permissions.
Action: Check permissions.
Level: 32
Type: ERROR
Impact: Security

ODI-10174: You are not authorized to change the password for user "{0}".
Cause: Insufficient level of permissions.
Action: Check permissions.
Level: 32
Type: ERROR
Impact: Security

ODI-10175: You are not authorized to change the password for external user.
Cause: Insufficient level of permissions.
Action: Check permissions.
Level: 32
Type: ERROR
Impact: Security

ODI-10176: Authentication is needed to change password.
Cause: Authentication is missed.
Action: Authenticate first.
Level: 32
Type: ERROR
Impact: Security

ODI-10177: ODI was not able to load the jdbc driver class "{0}" provided on {1}.
Cause: Wrong jdbc driver class.
Action: Check that the driver class name is correct and that this driver is available to ODI classloader.
Level: 32
Type: ERROR
Impact: Other

ODI-10178: The jdbc URL "{1}" was not accepted by the jdbc driver class "{0}" provided on {2}.
   Cause: Insufficient jdbc URL.
   Action: Check that the jdbc URL and the driver class name are matching.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10179: Client requires a repository with version {0} but the repository version found is {1}.
   Cause: Insufficient repository version.
   Action: Check repository configuration.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10180: ODI was not able to load the jdbc driver class {0} specified in ODI topology for work repository {1}.
   Cause: Wrong jdbc driver class.
   Action: Check that the driver class name is correct and that this driver is available to ODI classloader. If the driver class name is incorrect please connect to ODI topology to fix it.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10181: Uncategorized configuration exception.
   Cause: An unexpected error occurred.
   Action: Check exception cause for details.
   Level: 32
   Type: ERROR
   Impact: Configuration

ODI-10182: Uncategorized exception during repository access.
   Cause: An unexpected error occurred.
   Action: Check exception cause for details.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-10183: {0} is an invalid finder class.
   Cause: Wrong finder class.
   Action: Check finder class.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-10184: Could not get ESS {0}.
   Cause: Exception during session retrieving.
   Action: Check configuration and try again.

Level: 32
Type: ERROR
Impact: Session

ODI-10185: Operation is not granted.
   Cause: Current level of permission is not sufficient.
   Action: Check your permissions.

Level: 32
Type: ERROR
Impact: Security

ODI-10186: User {0} is inactive.
   Cause: There is no GUID defined for this User in ODI repository
   Action: Check user GUID.

Level: 32
Type: ERROR
Impact: Security

ODI-10187: The authentication API is used in wrong way.
   Cause: The authentication API is used in wrong way.
   Action: Check usage of API.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10188: Error while login from OPSS.
   Cause: Exception was thrown during login process.
   Action: Make sure OPSS is configured correctly for this installation.

Level: 32
Type: ERROR
Impact: Other

ODI-10189: The password violates the following rule: "Password policy {0}". Select another password.
   Cause: Weak password
   Action: Check password policy and correct password.

Level: 32
Type: ERROR
Impact: Security

ODI-10190: The user {0} has its account expired.
  Cause: Account expired
  Action: Request supervisor for account unlocking.
  Level: 32

Type: ERROR
Impact: Security

ODI-10191: Unable to create datasource provider.
  Cause: Exception during creation.
  Action: Check configuration.
  Level: 32

Type: ERROR
Impact: Configuration

ODI-10192: Unable to retrieve user GUID.
  Cause: Exception during GUID retrieving.
  Action: Check repository connection.
  Level: 32

Type: ERROR
Impact: Other

ODI-10193: Unexpected null value in port.
  Cause: JPS port value is null.
  Action: Check JPS configuration.
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-10194: Uncategorized security exception.
  Cause: An unexpected error occurred.
  Action: Check exception cause for details.
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-10195: CsfAccessor is only available for CsfPasswordStorageConfiguration
  Cause: Password storage configuration is internal.
  Action: Check storage configuration.
  Level: 32

Type: ERROR
Impact: Programmatic
ODI-10196: Error while accessing the repository.
   Cause: Network problems.
   Action: Check the network connection and the database status.
   Level: 32
   Type: ERROR
   Impact: Network

ODI-10197: Instance is not connected to a work repository
   Cause: Work datasource is null.
   Action: Check work datasource.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-10198: Context with code '{0}' wasn't found.
   Cause: Context wasn't found.
   Action: Check context code.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-10199: Incorrect ODI username or password.
   Cause: Incorrect ODI username or password.
   Action: Check username and password.
   Level: 32
   Type: ERROR
   Impact: Security

ODI-10200: Work repository {0} wasn't found.
   Cause: Wrong repository name or repository isn't defined.
   Action: Check repository name.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-10201: The user {0} has its password expired.
   Cause: Account expired
   Action: Request supervisor for changing password.
   Level: 32
   Type: ERROR
   Impact: Security

ODI-10202: Supervisor privilege is required to setup repository.
   Cause: Insufficient level of permissions.
Action: User supervisor account for this operation.

Level: 32
Type: ERROR
Impact: Security

ODI-10203: Transaction state is illegal.
Cause: Transaction state is illegal.
Action: Check transaction state.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10204: Inappropriate usage of a ODI transaction API.
Cause: Inappropriate usage of a ODI transaction API.
Action: Check ODI transaction API.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10205: Unexpected rollback.
Cause: Attempt to commit a transaction resulted in an unexpected rollback.
Action: Check transaction.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10206: Transaction can't be created.
Cause: Exception was thrown during transaction creation.
Action: Check transaction.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10207: Uncategorized exception during transaction system usage.
Cause: An unexpected error occurred.
Action: Check exception cause for details.

Level: 32
Type: ERROR
Impact: Other

ODI-10208: Error when changing password for user {0}.
Cause: An unexpected error occurred.
Action: Check exception cause for details.
Level: 32
Type: ERROR
Impact: Other

ODI-10209: Cannot access a closed IODiEntityManager.
Cause: IODiEntityManager has been closed.
Action: Check IODiEntityManager state.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-10210: File {0} does not contain any objects to be imported by Smart Import.
Cause: Smart Export file specified for Smart Import is empty.
Action: Specify a Smart Export file with objects for importing via Smart Import.

Level: 32
Type: ERROR
Impact: Other

ODI-10211: Unsupported Java Character Set: {0}
Cause: Unsupported Java Character Set.
Action: Check Java charset.

Level: 32
Type: ERROR
Impact: Other

ODI-10212: Parent object {0}: "{1}" already has child {2}: "{3}". Technical details: {2} : "{3}" (with global id: {7} and internal id: {8}) violates alternate key constraint {4} {5} for values {6}
Cause: Object violated alternate key constraint.
Action: Check object properties and constraint's values.

Level: 32
Type: ERROR
Impact: Other

ODI-10213: Fixed format file field {0} (starts at {1} ends at {2}) has a file position that overlaps with the file position of field {3} (starts at {4} ends at {5}).
Cause: Two fields from a fixed format file have overlapping file positions.
Action: Modify the file positions or remove a field if the overlapping file positions are not correct.

Level: 32
Type: ERROR
Impact: Other

ODI-10214: Fixed format file fields {0} (starts at {1} ends at {2}) and {3} (starts at {4} ends at {5}) have unused file positions between them.
Cause: Two fields from a fixed format file have unused file positions between them.
Action: Modify the file positions if having unused file positions is not correct.

Level: 32
Type: ERROR
Impact: Other

ODI-10215: It is forbidden to import a log into a repository using any other import mode except "Synonym Mode Insert".
Cause: Import mode is not "Synonym Mode Insert".
Action: Correct import mode.

Level: 32
Type: ERROR
Impact: Other

ODI-10216: Upgrade key cannot be null when importing objects from before ODI 12C.
Cause: Upgrade key is not set for import that must upgrade objects to have global ids.
Action: Specify the upgrade key to be used.

Level: 32
Type: ERROR
Impact: Other

ODI-10217: Permission check failed for instance object {0}.
Cause: Permission check failed for instance object.
Action: Need to grant initial permission for creator on object.

Level: 32
Type: NOTIFICATION
Impact: Other

ODI-10218: Invalid WAS_HOME ("{0}") set or WebSphere library jar ("{1}") not found under WAS_HOME/plugins.
Cause: Wrong WAS_HOME set (or) WebSphere libraries (com.ibm.ws.admin.core.jar, com.ibm.ws.admin.services.jar, com.ibm.ws.runtime.jar) are moved
Action: Check that the environment-variable WAS_HOME is set properly to point to WebSphere Application Server root. Also, ensure the libraries exist under WAS_HOME/plugins.

Level: 32
Type: ERROR
Impact: Other

ODI-10219: ODI Library for WebSphere access ("{0}") not found.
Cause: Library could be moved / deleted
Action: Check that the specified library present
ODI-10220: ODI was unable to find the technology "[0]".
    Cause: Missing technology.
    Action: Check that this technology is defined in the repository.

ODI-10221: It's taken {0} second to synchronize Snp_Ent_Principal table content.
    Cause:
    Action:

ODI-10222: The compatible Mapping/ReusableMapping {0} can only be modified by 11g SDK.
    Cause: An attempt was made to modify compatible Mapping using 12c SDK.
    Action: Modify compatible Mapping using 11g Interface SDK.

ODI-10223: A non-legacy compatible import source cannot be imported into a legacy compatible repository.
    Cause: An attempt was made to import a non-legacy compatible import source into a legacy compatible repository.
    Action: Import a legacy compatible import source or make repository not legacy compatible.

ODI-10224: You are not authorized to create new user.
    Cause: Only SUPERVISOR could create users.
    Action: Check permissions.

ODI-10225: Invalid wallet password: A valid password must have a minimum length of eight characters and contain alphabetic characters combined with numbers or special characters.
Cause: Invalid wallet password.
Action: Please choose a valid wallet password accordingly.
Level: 32
Type: ERROR
Impact: Security

ODI-10226: Wallet already exists.
Cause: Try to create a wallet which already exists.
Action: Please stop creating a wallet. Instead use the existing one.
Level: 32
Type: ERROR
Impact: Security

ODI-10227: Wallet new password is same as old password.
Cause: You provide a new wallet password which is the same as the old one.
Action: Please choose different wallet password than the old one.
Level: 32
Type: ERROR
Impact: Security

ODI-10228: Repository with id "{0}" or with name "{1}" has been already used in your master repository.
Cause: Master repository has already work repository with the same name or id.
Action: Check your master repository and work repository.
Level: 32
Type: ERROR
Impact: Configuration

ODI-10229: Repository with id "{0}" has been already used in your master repository.
Cause: Master repository has already work repository with the same id.
Action: Check your master repository and work repository.
Level: 32
Type: ERROR
Impact: Configuration

ODI-10230: Repository with name "{0}" has been already used in your master repository.
Cause: Master repository has already work repository with the same name.
Action: Check your master repository and work repository.
Level: 32
Type: ERROR
Impact: Configuration
ODI-10231: Interface {0} cannot be imported because source temporary interface / mapping {1} is not found.
Cause: An attempt was made to import an interface with a source temporary interface / mapping that cannot be found in the import source or target repository.
Action: Import the missing source temporary interface / mapping.
Level: 32
Type: ERROR
Impact: Other

ODI-10232: The password violates the following rule: "New password must be different from old one". Select another password.
Cause: Weak password
Action: Check password policy and correct password.
Level: 32
Type: ERROR
Impact: Security

ODI-10234: Object cannot be imported since it contains non XML files
Cause: ZipFolder to be imported should not contain non XML files
Action: Check ZipFolder to be imported
Level: 32
Type: ERROR
Impact: Other

ODI-10235: No Importable files found
Cause: None of XML files imported from ZipFolder
Action: Check XML files to be imported from Zip Folder
Level: 32
Type: ERROR
Impact: Other

ODI-10236: Object must be replaced with an object of same KM type
Cause: KM of different type to the existing KM was selected for import replace.
Action: Import Replace KM with existing KM type
Level: 32
Type: ERROR
Impact: Other

ODI-10237: Object not replaced
Cause: A KM was selected for the Import Replace with a different type to the current KM.
Action: Select a KM of the same type for import replace.
Level: 32
Type: WARNING
Impact: Other

ODI-10238: Object must be replaced with an object of same type
Cause: Different ODI object is used to Import Replace KM
Action: Import Replace KM with Same type

ODI-10243: Cannot import an export file with parents using regular import and INSERT_UPATE mode. Use smart import instead.
Cause: An attempt was made to import an export file created with parent objects using regular import and INSERT_UPATE mode. This would cause all other objects under the parent objects and not in the import file to be deleted.
Action: Use smart import to import an export file created with parent objects when INSERT_UPDATE functionality is needed.

Level: 32
Type: ERROR
Impact: Other

ODI-10244: Cannot import {0} {1} (with global id: {2} and internal id: {3}) because referenced {4} with global id {5} does not exist.
**Cause:** The referenced object for a foreign key cannot be found in order to set the reference and a missing reference cannot be created.
**Action:** Import the missing referenced object before importing the referencing object.

Level: 32
Type: ERROR
Impact: Other

ODI-10245: Cannot import {0} {1} (with global id: {2} and internal id: {3}) belonging to {4} {5} (with global id: {6} and internal id: {7}) because its referenced object is not found in the target repository.
**Cause:** The object was imported in a SYNONYM UPDATE mode and the referenced object was not found in the repository.
**Action:** Change the import mode to INSERT_UPDATE or import the file twice first in INSERT MODE and then in UPDATE mode.

Level: 32
Type: ERROR
Impact: Other

ODI-10246: No Exportable objects found in the repository.
**Cause:** No objects are present in the repository for export
**Action:** Create repository objects

Level: 32
Type: ERROR
Impact: Other

ODI-10247: Specified project {0} does not exist in the repository.
**Cause:** The repository did not contain the specified project.
**Action:** Choose another project or create the project with the specified name.

Level: 32
Type: ERROR
Impact: Other

ODI-10248: {0} : Not an ODI special driver.
**Cause:** Invalid Special driver.
**Action:** Check that this technology is part of the special driver list.

Impact: Other

ODI-14137: Error occurred while validating database {0}.
Cause: Database validation failed
Action: Refer to the certification matrix for supported DB versions.

Level: 32
Type: ERROR
Impact: Other

ODI-14138: Could not perform validation of the database. Please check the database user privileges.
Cause: Database validation failed
Action: Check if database user has sufficient privileges or required table/view/file exist.
Level: 32
Type: NOTIFICATION
Impact: Other

ODI-14139: Encryption Standard is not set in Master Repository.
Cause: Master Repository configured with invalid or no Encryption Standard.
Action: Set the Encryption Standard to be used in the Master Repository, with valid value for algorithm ('AES') and key-length ('128' / '256').

Level: 32
Type: ERROR
Impact: Security

ODI-14140: Master key data is not set in Master Repository
Cause: Master Repository does not have the master key data.
Action: Set the Master key data to be used in the Master Repository.

Level: 32
Type: ERROR
Impact: Security

ODI-14141: The provided key is not matching the key-specification. Key must be of length 8-100, contain at least one alphabet (lower/uppercase), contain at least one numeric-digit (or) a special-character from: [@ # $ % + / =].
Cause: The provided key is not matching the key-specification.
Action: Provide key that matches the key-specification

Level: 32
Type: ERROR
Impact: Security

ODI-14142: The Security Policy currently in force, does not allow the use of AES-256.
Action: To use AES-256, please replace the security policy files in JRE_HOME/lib/security, with Unlimited Strength Policy Files available at Java SE downloads at http://www.oracle.com/technetwork/java. Refer Java SE documentation for more information.

Level: 32
Type: ERROR
Impact: Security

ODI-14143: Encryption Standard persisted in master repository is not AES-128 or AES-256.
Cause: The Encryption Standard configured in the repository is not supported.
Action: Edit the master repository configuration to set the Encryption Standard as AES-128 or AES-256.

Level: 32
Type: ERROR
Impact: Security

ODI-14144: An Error occurred while parsing the ODI Tool Command.
   Cause: An error occurred while parsing the ODI Tool Command text.
   Action: Refer to stack trace for more details.
   Level: 32

Type: ERROR
Impact: Security

ODI-14145: An Error occurred while setting parameter {0} in ODI Tool Command.
   Cause: Unable to set parameter in ODI Tool Command.
   Action: Refer to stack trace for more details.
   Level: 32

Type: ERROR
Impact: Security

ODI-14146: Incorrect Export Key
   Cause: The Export Key provided is incorrect for the import source
   Action: Provide a valid Export Key that was used during Export of object
   Level: 32

Type: ERROR
Impact: Security

ODI-14147: An error occurred while migrating cipher text in object {0} - "{1}" (with Internal ID: {2} and Global ID: {3})
   Cause: Invalid Cipher content or Invalid Export Key
   Action: If exporting, check if the cipher data present in the object is correct. If importing, check if Export Key is correct.
   Level: 32

Type: ERROR
Impact: Security

ODI-14148: An Error occurred while creating Cipher for migration.
   Cause: An error occurred while creating ODI Cipher.
   Action: Refer to stack trace for more details
   Level: 32

Type: ERROR
Impact: Security

ODI-14149: Invalid Encoder/Decoder for Cipher Text Migration.
   Cause: The ODI Encoder/Decoder is invalid.
   Action: Create valid Encoder/Decoder for Cipher Text Migration.
   Level: 32
Type: ERROR
Impact: Security

ODI-14150: An Error occurred while migrating password cipher text
Cause: An error occurred while migrating the password cipher text
Action: Refer to stack trace for more details
Level: 32
Type: ERROR
Impact: Security

ODI-14151: An error occurred while retrieving parameters from ODI Tool Command.
Cause: Invalid ODI Tool Command.
Action: Check ODI Tool Command text.
Level: 32

ODI-14173: The repository is for {0} so you cannot connect to this repository from {1}.
Cause: Repository is not valid for the invoking application.
**Action:** Connect to this repository use the proper application.

**Level:** 32  
**Type:** ERROR  
**Impact:** Security

**ODI-14174:** You are using Oracle Golden Gate Studio which only supports internal authentication mode. But the repository is in external authentication mode which cannot be used for Oracle Golden Gate Studio.  
**Cause:** The repository is in external authentication mode and it is not valid for Oracle Golden Gate Studio since Oracle Golden Gate Studio only supports internal authentication mode. One possibility could be that this repository is for Oracle Data Integrator.  
**Action:** Connect to a different repository.

**Level:** 32  
**Type:** ERROR  
**Impact:** Security

**ODI-14175:** Cannot delete this user since it is the last supervisor user.  
**Cause:** You are trying to delete the last supervisor user which cannot deleted.  
**Action:** Create another user and make it supervisor user and then you can delete this supervisor user.

**Level:** 32  
**Type:** ERROR  
**Impact:** Security

**ODI-14176:** Password cannot be empty for accessing the MBean Server, which is used for External Password Storage.  
**Cause:** Password is empty for the accessing the MBean Server.  
**Action:** Provide MBean server password.

**Level:** 32  
**Type:** ERROR  
**Impact:** Security

**ODI-14177:** The external user: {0} does not exist in ODI repository and also has no ODI role granted. The GUID of the user : {1}  
**Cause:** The specified external user does not exist in ODI repository and has no ODI role granted.  
**Action:** Add the external user in ODI repository or grant required ODI roles to the user.

**Level:** 32  
**Type:** ERROR  
**Impact:** Security

**ODI-14178:** Schema name and Catalog name is not unique for the dataserver {0}  
**Cause:** Duplicate physical schema. Physical Schema with the same schema name and catalog name already exists for this dataserver.
Action: Choose another schema name and/or catalog name.

Level: 32
Type: ERROR
Impact: Other

ODI-14179: For security reasons, you cannot use odiRef.getJDBCConnection("WORKREP"), since your Work Repository and Master Repository use the same database schema. Please contact your Oracle Data Integrator Administrator to grant you <Create JDBC Connection> permission on Master Repository object from Oracle Data Integrator Studio Security Explorer and try again. Please note that the <Create JDBC Connection> permission is located under Master Repository object in the Objects section from Security Explorer. You can give the permission to a user, say User1, by 1) drag and drop it to the user User1 2) then mark the newly granted permission as Generic Privilege: the newly granted permission <Create JDBC Connection> will be under the tree node User1/Objects/Master Repository, open the editor of the granted permission and select the check box named <Generic Privilege>.

Cause: The Work Repository and Master Repository use same database schema and you do not have the required permission granted.

Action: Please contact your Oracle Data Integrator Administrator to grant you <Create JDBC Connection> permission on Master Repository object from Oracle Data Integrator Studio Security Explorer and try again. Or you also can re-create your Master and Work repositories in different database schema. Please note that the <Create JDBC Connection> permission is located under Master Repository object in the Objects section from Security Explorer. You can give the permission to a user, say User1, by 1) drag and drop it to the user User1 2) then mark the newly granted permission as Generic Privilege: the newly granted permission <Create JDBC Connection> will be under the tree node User1/Objects/Master Repository, open the editor of the permission and select the check box named <Generic Privilege>.

Cause: The context object cannot be found.
Action: Check the context selection.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15020: No JKM available
Cause: JKM has not been set or is not found.
Action: Set a valid JKM for the interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15021: Journalizing requires a Primary Key on the Table:
Cause: Journalizing is enabled, but the target table has no primary key.
Action: Add a primary key to the target table.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15022: No RKM Set.
Cause: RKM has not been set or is not found.
Action: Set a valid RKM for the object.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15023: Cannot perform standard reverse. Choose customized reverse and set RKM.
Cause: Standard reverse engineering is not supported for this object.
Action: Select customized reverse engineering for the object and select an RKM.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15025: The interface clause text does not exist.
Cause: The interface clause refers to text that does not exist.
Action: Check interface clauses for (join, filter, etc.) for consistency.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15026: Interface clauses are missing.
Cause: The code generator cannot find the clause collection for the interface.
Action: Check the interface for consistency.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15027: Interface source tables are missing.
Cause: The code generator cannot find the source table collection for the interface.
Action: Check the interface for consistency.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15028: Interface result collection is null.
Cause: Interface generation method buildSqlCauses as been called with a null results parameter.
Action: Ensure that a non null Map is passed for the result parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15029: Interface error clause collection is missing.
Cause: Interface generation method buildSqlCauses as been called with a null error clauses parameter.
Action: Ensure that a non null collection is passed for the error clauses parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15030: Interface is missing the integration work table collection.
Cause: Interface generation method buildSqlCauses as been called with a null work table collection parameter.
Action: Ensure that a non null collection is passed for the work table parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15031: Technology not selected.
Cause: No technology is selected for the interface target execution location.
Action: Check the technology selection for the interface target.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15032: Unknown object in interface source table collection
Cause: Interface generation method buildSqlCauses as been called with a source table collection having a non table item.
Action: Ensure that only table type items are included in the source table collection.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15033: The expression: [0] does not have an associated column.
Cause: The expression should represent a column, but no column is found for the name.
Action: Fix the expression.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15034: A scenario with the same name and the same number already exists. Please select other values.
Cause: Cannot create a duplicate scenario with the same name and version number as an existing scenario.
Action: Give the scenario a different name or version.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15036: Scenario's name and/or number are missing.
Cause: A scenario must have a name and version, but the name or version is missing.
Action: Set values for name and version for the scenario.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15037: The interface [0] has fatal errors.
Cause: The interface has fatal errors.
Action: Check and fix interface issues.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15038: The scenario name substitution pattern [0] is not supported. Please check the user parameter for the scenario naming convention.
Cause: Invalid substitution pattern used for scenario name.
Action: Change the substitution pattern.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15039: The interface [0] use native sequence. Native sequence are not allowed for Derived Table (sub select statement)
Cause: Native sequence was used in a sub-select or derived interface.
Action: Remove the native sequence usage.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15040: Errors detected when building SQL clauses.
Cause: An error occurred when generating code for the SQL clauses.
Action: Fix the interface clauses.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15041: An aggregation function may not be used in a join condition. Please use a separate interface for the aggregation and join the result in this interface.
Cause: An aggregation function was used inside a join condition expression.
Action: Change the join condition to remove the aggregation function.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15042: Unable to regenerate this scenario. It references an package that does not exist.
Cause: The scenario must reference a package, but it doesn’t.
Action: Delete the scenario and create a new one.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15043: Unable to regenerate this scenario from a Runtime repository.
Cause: The scenario must cannot be regenerated from the runtime repository.
Action: Delete the scenario and create a new one.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15044: Invalid pScenSource type when calling SnpGeneratorSQLCIT.mainGenScenSourceScenario
Cause: The scenario generator has been invoked with an invalid scenario source.
Action: Ensure that only valid scenario source types are used to generate a scenario.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15045: Invalid value for KM type.
Cause: An invalid value was specified for the KM type.
Action: Specify a valid value.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15046: The column cache is null during code generation.
Cause: The getSnpCol method has been invoked while the SnpColCache member is null;
Action: Ensure that SnpGeneratorSQLCIT has been properly initialized before invoking getSnpCol.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15047: The getSnpCol method has been invoked with a null column ID during code generation.
Cause: The getSnpCol method has been invoked with a null column ID.
Action: Ensure that getSnpCol is only called with valid column ID values.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15050: Flow Control not possible if no key is declared in your target datastore
Cause: Flow control is enabled for the interface, but the target datastore has no primary key defined.
Action: Define a primary key for the target datastore object, and re-add the target datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15051: Missing mapping instance for interface.
  Cause: The target column does not have any mapping.
  Action: Add a mapping expression for the target column.
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-15052: The interface is missing a dataset.
  Cause: There is no dataset for the interface source.
  Action: Check the interface for consistency.
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-15054: Scenario generation error: Cannot regenerate the scenario. The physical mapping design used to generated the scenario is not found.
  Cause: The physical mapping design used to generated the scenario is not found.
  Action: Choose to create or replace the scenario.
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-15055: Character ""]" missing in: {0}.
  Cause: A bracketed tag inside a KM line is missing a closing bracket ("]") character.
  Action: Fix the KM line.
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-15057: Non-ordered outer join not supported for technology.
  Cause: Non-ordered outer join syntax disabled for technology.
  Action: Correct join.
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-15058: Variable scenario generation error: Logical schema is required.
  Cause: Variable scenario cannot be generated if logical schema is not set.
  Action: Set the logical schema.
  Level: 32
Type: ERROR
Impact: Programmatic

ODI-15059: I_TXT is mandatory.
 Cause: A call was made to SnpTxtCachedHashMap.getInstance, but the pITxt parameter was null.
 Action: Contact Oracle support.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15060: The JKM line {0} uses an unsupported execution channel: {1}
 Cause: A line in the JKM uses an execution channel that is not supported.
 Action: Change the line in the JKM to use a supported channel.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15061: The JKM line {0} uses an unsupported commit type: {1}
 Cause: A line in the JKM uses a commit type that is not supported.
 Action: Change the line in the JKM to use a supported commit type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15062: Invalid commit type: {0}
 Cause: An invalid commit type was passed to SnpServiceGenerator.convertCommitType
 Action: Contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15063: The alternate key {0} is not unique.
 Cause: An alternate key defined by the repository is found to be non-unique.
 Action: Check the data or the alternate key definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15064: The primary key {0} is not unique.
 Cause: A primary key defined by the repository is found to be non-unique.
 Action: Check the data or primary key definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15065: Join error ({0}) between the table {1} and the table {2}.
Cause: A foreign key relationship is not found.
Action: A foreign key relationship between 2 tables defined in the repository is not valid.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15066: The column {0} cannot be null.
Cause: The column is marked in the repository as not nullable.
Action: Check the data, or change the not null value.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15067: The datatype value "{0}" is incorrect.
Cause: An invalid datatype has been found.
Action: The repository table contains an invalid datatype.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15068: Unknown flexfield code {0}.
Cause: An undefined flex field code is being referenced
Action: Check the flex field references in the KM, and the flex field definitions

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15069: {0} Is not valid without session context.
Cause: A current session context does not exist.
Action: Check session definition.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15070: Unable to find method object: PythonInterpreter.initialize(Properties, Properties, String[]) method
Cause: The python method used by the script is not found.
Action: Check the KM step.

Level: 32
Type: ERROR
Impact: Other

ODI-15071: Error occurred
Cause: An exception was thrown while executing a python script in the KM step.
Action: Check the cause.
Level: 32

Type: ERROR
Impact: Other

ODI-15072: There is no PK constraint
Cause: There is a call to "getPK" in the KM, but no PK is found.
Action: Check the KM and the PK definitions.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15073: There is no index
Cause: There is a call to "getIndex" in the KM, but no index is found.
Action: Check the KM and the index definitions.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15076: no dataset
Cause: A KM line is calling "getDataSet", but no data set is found.
Action: Check the KM or the DataSet definitions.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15077: No Current Model Set
Cause: There is a call to "getModel" in the KM, but no model is found.
Action: Check the KM and the model definitions.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15078: There is no Not Null column
Cause: There is a call to "getNotNullCol" in the KM, but no not null column is found.
Action: Check the KM and the not null column definitions.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15079: There is no current Pop.
Cause: There is a call to "getPop" in the KM, but no interface is found.
Action: Check the KM and the interface definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15080: There is no Step
Cause: There is a call to "getStep" in the KM, but no step is found.
Action: Check the KM and the step definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15081: There is no Target Table
Cause: There is a call to "getTargetTable" in the KM, but no target table is found.
Action: Check the KM and the interface target table definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15083: Multiple Primary Keys have been detected for {0}.
Cause: A repository table can only have one primary key defined, but multiple primary keys are defined.
Action: Edit the table's primary key definitions and remove all but one.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15084: There is no session
Cause: There is a call to "getSession" in the KM, but no session is found.
Action: Check the KM and the session definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15085: The value : "((0))" is unknown.
Cause: A KM line has a templated call which contains an unknown bracketed property.
Action: Fix the KM.

Level: 32
Type: ERROR
Impact: Programmatic

**ODI-15086: There is no Temporary Index**

**Cause:** There is a call to "getTemporaryIndex" in the KM, but no temporary index is found.

**Action:** Check the KM and the temporary index definitions.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15087: There is no current execution context defined.**

**Cause:** There is a call to "getContext" in the KM, but no context is found.

**Action:** Check the KM and the context definitions.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15088: Not in designer mode**

**Cause:** A KM line has a call to access design information, but the interpretation location is not set to designer.

**Action:** Make sure that the interpretation location is set to designer when this line is executed.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15089: asked '{0}' and available value are between 0 and {1}**

**Cause:** A KM line is calling "getDataSet", but the specified index is out of range.

**Action:** Fix the KM or the DataSet definitions.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15090: Table "{0}" not found on model "{1}", schema "{2}"**

**Cause:** Attempt to initialize data services from a table that cannot be found.

**Action:** Change data services reference or make sure that table exists.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-15091: Impossible to connect to JPS MBean Server**

**Cause:** Cannot connect to JPS MBean server.

**Action:** Internal Error.

**Level:** 32

**Type:** ERROR
Impact: Other

ODI-15092: Unable to generate data service - the column [0] does not exist in the database.
Cause: A data service references a column that does not exist
Action: Fix the data service reference or make sure that the column exists
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15093: Unable to regenerate this scenario. It references a null package.
Cause: The scenario must reference a package, but the package is null.
Action: Delete the scenario and create a new one.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15094: You must give a name for the published entity for each datastore.
Cause: A web services data store does not have a name.
Action: Give the data store a name.
Level: 32
Type: ERROR
Impact: Other

ODI-15095: Invalid entity for datastore: [0]
Cause: A web services data store has an invalid entity.
Action: Associate the data store with a valid entity.
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15096: Property name must not be null.
Cause: The KM line is calling "isColAttrChanged", but the property value is null.
Action: Internal error, contact Oracle support.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15097: Unknown value [0] for property
Cause: The KM line is making a templated call, but the property value is unknown.
Action: Fix the KM.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15098: You must define a data source for the model.
Cause: The model used by a web service does not have any data source.
Action: Define a data source for the model.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15099: You must specify a JKM for the model.
Cause: The model used by a web service does not have an associated JKM.
Action: Define a JKM for the model.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15100: You must define a Java package for the model.
Cause: The model used by a web service does not have an associated Java package.
Action: Define a Java package for the model.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15101: Invalid Java package format: {0}
Cause: The Java package associated with a model has an invalid package format.
Action: Correct the package format for the model.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15102: You must specify an XML namespace for the model.
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15103: Invalid namespace: {0}
Cause: A model namespace used by a web service is invalid.
Action: Correct the namespace for the model.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other
ODI-15104: You must specify an SKM for the model.
   Cause: A model used by a web service does not have an associated SKM.
   Action: Add an SKM to the model.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

ODI-15105: You must specify which schema the model will be deployed to.
   Cause: No web service deployment schema is specified for the model.
   Action: Specify a schema to which the model will be deployed.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

ODI-15106: You must specify a name for the Data Service for the model.
   Cause: The data service for the model does not have a name.
   Action: Set a valid name for the data service.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

ODI-15107: Invalid model code: {0}. It should follow the Java identifiers naming conventions.
   Cause: The web service model name does not follow the standard Java identifier naming convention.
   Action: Set a valid name for the model.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

ODI-15108: Invalid model Data Service name: {0}. It should follow the Java identifiers naming conventions.
   Cause: The web service model Data Service name does not follow the standard Java identifier naming convention.
   Action: Set a valid name for the model Data Service.
   Level: 32
   Type: SET_AT_RUNTIME
   Impact: Other

ODI-15109: Invalid web service name for datastore: {0}
   Cause: The web service model data store has an invalid name.
   Action: Set a valid name for the model data store.
   Level: 32
   Type: SET_AT_RUNTIME
Impact: Other

ODI-15110: SKM is empty
Cause: The web service SKM has no valid lines.
Action: Add some lines to the SKM.
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15111: Problem during deployment
Cause: Internal error.
Action: Contact Oracle support.
Level: 32
Type: SET_AT_RUNTIME
Impact: Deployment

Cause: An attempt was made to reverse engineer a table, but it already exists in the model.
Action: Move or rename the data store in the model, or skip reverse engineering for the table.
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15116: There is not enough data in the target file to proceed with the reverse-engineering. Please make sure the file has at least one non-empty line and number of rows to skip is correct.
Cause: An attempt was made to reverse engineer a target file that is empty, or the number of skipped rows is larger than the number of rows in the file.
Action: Set the number of skipped lines to a lower value, or add some data to the file.
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15117: Not allowed (OLD and NEW are involved)
Cause: The KM line is calling "getColumn", but the ADH action origin is not "NEW" or "OLD".
Action: Change the ADH action origin.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15118: Invalid FTP URL
Cause: The URL given for a web services FTP connection is not correct.
**Action:** Check the URL for the FTP connection.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Network

**ODI-15119: Column [0] has no Java datatype.**  
**Cause:** During RDB model validation, no java data type was found for a column.  
**Action:** Check the model and ensure that a data type has been specified.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-15120: Column [0] has no String datatype.**  
**Cause:** During RDB model validation, no string data type was found for a column.  
**Action:** Check the model and ensure that a data type has been specified.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-15121: Selector must be not null**  
**Cause:** The ADH selector value must not be null when "getColumn" is called from the KM line.  
**Action:** Change the ADH selector value.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15122: Exception getPKColList**  
**Cause:** An exception was found when calling "getPKColList" during KM execution.  
**Action:** Fix the KM or the PK definitions.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15123: There is no AK constraint**  
**Cause:** There is a call to "getAK" in the KM, but no AK is found.  
**Action:** Check the KM and the AK definitions.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15124: Unable to regenerate the following scenario:**  
**Cause:** Cannot regenerate the scenario.
Action: Delete the scenario and create a new one.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15125: Missing DataSet.
Cause: The interface is missing a dataset.
Action: Check interface for consistency.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15126: The sub-model must be set.
Cause: The sub-model is not set for the source or target.
Action: Check the interface for consistency.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15127: There is no CK constraint
Cause: There is a call to "getCK" in the KM, but no CK is found.
Action: Check the KM and the CK definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15128: There is no FK constraint
Cause: There is a call to "getFK" in the KM, but no FK is found.
Action: Check the KM and the FK definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15129: Selector value must be 'OLD' or 'NEW'
Cause: The ADH selector value must be 'OLD' or 'NEW' when "getColumn" is called from the KM line.
Action: Change the ADH selector value.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15130: Unknown object in interface source table list
Cause: An invalid object was found in the SrcTableList member while processing getSrcTablesList.
Action: Ensure the SrcTableList is only populated with type SnpTable or SnpSourceTab.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15131: You must define the name of each web service to be generated for each datastore.
Cause: A web service associated with a data store has no name.
Action: Give a name to the web service.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15132: Exception getPK
Cause: An exception was found when calling "getPK" during KM execution.
Action: Fix the KM or the PK definitions.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15135: There is no current index.
Cause: The current index can not be found for the property name.
Action: Check the reference.

Level: 32
Type: ERROR
Impact: Other

ODI-15141: Repository is not a development work repository
Cause: When getting a connection used to execute the KM, it was determined that the provided connection information does not point to a development work repository
Action: Fix the connection information

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15142: [PROPERTY: {0} not found.]
Cause: The bracketed property in the KM line (e.g. "[COL_NAME]") is not found.
Action: Fix the KM line to specify a correct property name.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15143: Invalid isolation level : {0}
Cause: An invalid isolation level value was passed to SnpServiceGenerator.convertIsolationLevel
Action: Contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15144: KM not encrypted since it is empty.
Cause: KM was not encrypted since it is empty.
Action: Skip encryption.
Level: 32
Type: ERROR
Impact: Other

ODI-15146: Data Type can't be null
Cause: null DataType passed.
Action: Pass non null DataType.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15147: The changes on this target column will be lost since it is not saved (it has no mapping text)
Cause: Target column will not be saved.
Action: Enter mapping text if the column requires to be saved.
Level: 32
Type: WARNING
Impact: Interface Issue

ODI-15148: The target datastore is not on the Oracle Technology: this interface cannot be used with the platform compiler
Cause: Target datastore is not on Oracle.
Action: Move target datastore to an Oracle schema.
Level: 32
Type: WARNING
Impact: Interface Issue

ODI-15149: The staging area is not on the Oracle Technology: this interface cannot be used with the platform compiler
Cause: Staging Area is not on Oracle.
Action: Move Staging Area to an Oracle schema.
Level: 32
Type: WARNING
Impact: Interface Issue
ODI-15150: The source datastore is not on the Oracle Technology: this interface cannot be used with the platform compiler
  Cause: Source DataStore not on Oracle.
  Action: Use only DataStores located on an Oracle technology.
  Level: 32
  Type: WARNING
  Impact: Interface Issue

ODI-15151: Non ordered outer joins cannot be used with the platform compiler
  Cause: An outer join is not ordered.
  Action: Make the join ordered.
  Level: 32
  Type: WARNING
  Impact: Interface Issue

ODI-15152: Unhandled Action {0}
  Cause: This shouldn't happen. Programmer added an action in the enum and forgot to add it in switch.
  Action: Add action in switch.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15153: The column is already the first column and cannot be moved up
  Cause: Column already first and cannot be moved up.
  Action: Do not try to move first column up.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15154: The column is already the last column and cannot be moved down
  Cause: Column already last and cannot be moved down.
  Action: Do not try to move last column down.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15155: Cannot move a target column to a position that is 0 or negative: {0}
  Cause: Trying to move a column beyond the boundaries of column positions.
  Action: Use a value between 1 and the number of columns.
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-15156: Cannot move a target column to a position beyond the size of the column list: \{0\} is greater than \{1\}

Cause: Trying to move a column beyond the boundaries of column positions.

Action: Use a value between 1 and the number of columns.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15157: Cannot remove the only dataset of interface \{0\}

Cause: Trying to remove the last dataset of an interface is not permitted.

Action: Make sure there are more than one dataset in the interface before deleting it.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15159: Cannot move target columns on a non temporary DataStore.

Cause: Trying to move columns on a non temporary DataStore.

Action: Make sure that the target DataStore is temporary before attempting to move target columns.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15160: Native Sequences may not be supported by the target technology after transforming with the Platform Compiler

Cause: Using Native Sequence and Platform Compiler Enabled User Param Set

Action: Make sure that all target technologies will support native sequences

Level: 32
Type: WARNING
Impact: Programmatic

ODI-15162: The interface \{0\} use native sequence. Native sequence are not allowed for Derived Table (sub select statement)

Cause: Using native sequence in derived sub interface

Action: Make sure that none sub interface using native sequence

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15200: Tried to retrieve an int with an \{0\} object

Cause: Attempted to read the column from RDB as an integer, but the column type is not integer

Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15201: Tried to retrieve a short with an \{0\} object
  Cause: Attempted to read the column from RDB as a short type, but the column
  type is not short
  Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15202: This result set accepts only FETCHFORWARD requests
  Cause: Attempted to set the fetch direction to something other than FETCH_
  FORWARD for a RDB result set read
  Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15203: This function is unsupported: the software you are using might not be
compatible with this driver.
  Cause: A jdbc call was made that is not supported by the currently loaded jdbc
  driver for RDB
  Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15204: The \{0\} call is not implemented in this result set class.
  Cause: A result set call was made that is not implemented by the ODI RDB result
  set class
  Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15205: The call is not supported in this result set class.
  Cause: A result set call was made that is not supported by the ODI RDB result set
  class
  Action: Internal Error: contact Oracle support

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15206: Unmanaged numeric type \{0\}
Cause: The RDB inserter class was passed a data value of a numeric type that is not handled
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15207: Strange: a PK has multiple lines
Cause: When selecting a parent row based on a primary key, multiple rows were returned
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15208: The PK column of the root table has an unknown type: {0}
Cause: When unloading data from the RDB, the PK column of the parent table has an unknown type
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15209: Unsupported technology (Driver: {0}, Url: {1})
Cause: The jdbc driver is not supported by the ODI RDB
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15210: Unsupported technology: HSQL cannot create FKs after the tables have been created
Cause: The Hypersonic SQL engine cannot create FK after the table is already created
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15211: Unsupported technology: HSQL cannot create PKs after the tables have been created
Cause: The Hypersonic SQL engine cannot create PK after the table is already created
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15212: Datatype NULL (0) unsupported
Cause: The Hypersonic SQL engine does not support the null datatype
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15213: JDBC Datatype '{0}' unsupported
Cause: The Hypersonic SQL engine does not support the datatype
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15214: JDBC Datatype '{0}' with length parameter unsupported
Cause: The Hypersonic SQL engine does not support the datatype with length
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15215: JDBC Datatype '{0}' with length and scale parameters unsupported
Cause: The Hypersonic SQL engine does not support the datatype with scale
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15216: JDBC Datatype '{0}' unsupported
Cause: The internal MS Sql Server database does not support the datatype
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15217: JDBC Datatype '{0}' with length parameter unsupported
Cause: The internal MS SQL Server database does not support the datatype with length
Action: Internal Error: contact Oracle support
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15218: JDBC Datatype '{0}' with length and scale parameters unsupported
Cause: The internal MS SQL Server database engine does not support the datatype with length and scale
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15219: Please transform your URL into: {0};SelectMethod=cursor
Cause: The internal MS SQL Server database engine does not recognize the supplied URL
Action: Change the format of the connection URL
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15220: need length param
Cause: The internal Oracle database does not support the selected type without a length param
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15221: Datatype NULL (0) unsupported
Cause: The internal Oracle SQL engine does not support the null datatype
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15222: JDBC Datatype '{0}' unsupported
Cause: The internal Oracle database does not support the datatype
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15223: JDBC Datatype '{0}' with length parameter unsupported
Cause: The internal Oracle database does not support the datatype with length
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15224: JDBC Datatype '{0}' with length and scale parameters unsupported
Caused by: The internal Oracle database engine does not support the datatype with length and scale
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15225: No key found on table {0}
Caused by: The internal database table does not have a key
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15226: The root table {0} has no data
Caused by: The internal database table does not have any data
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15227: Multiple keys found on table {0}
Caused by: The internal database table has multiple keys
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15228: *** FATAL *** Table {0} could not be validated
Caused by: The internal database cannot validate the table
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15229: *** FATAL *** Table {0} could not be found
Caused by: The internal database cannot find the table
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic
ODI-15230: Could not convert object [0] to a [1]
   Cause: The internal database cannot convert the datatype of the selected column
   Action: Internal Error: contact Oracle support
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15231: No '=' sign found on line [0] of bundle [1]
   Cause: The internal database engine encountered a syntax error when reading the property file
   Action: Fix the property file
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15232: The alias [0] for table [1] is already used by another table, when reading bundle [2]
   Cause: The internal database found a duplicate table alias in a property file
   Action: Fix the property file
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15233: Table [0] is used twice. Make sure that the table names and aliases do not conflict.
   Cause: The internal database found a duplicate table name in the property bundle
   Action: Fix the property file
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15234: Internal RDB database table [0] not found
   Cause: The requested table cannot be found in the internal database
   Action: Internal Error: contact Oracle support
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15235: Internal RDB database key [0] not found
   Cause: The requested key cannot be found in the internal database
   Action: Internal Error: contact Oracle support
   Level: 32
   Type: ERROR
   Impact: Programmatic
ODI-15236: Unknown table [0]
  Cause: The requested table cannot be found in the internal database
  Action: Correct the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15237: Duplicate table
  Cause: The internal database table is a duplicate table
  Action: Correct the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15238: Could not find table although we should have created it!
  Cause: The newly created table cannot be found
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15239: Only SnpsRDBDiffActionImportDifference are supported for now.
  Cause: When processing diff actions in a diff operation, an unsupported diff
  action class was found
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15240: Unknown key {0}
  Cause: When processing diff actions in a diff operation, a nonexistent key was
  specified by the diff action
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15241: This type of difference is not managed for now: {0}
  Cause: When processing diff actions in a diff operation, an unsupported diff
  action class was found
  Action: Internal Error: contact Oracle support
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-15242: Unknown difference type: {0}
   Cause: When processing diff actions in a diff operation, an unknown diff class was found
   Action: Internal Error: contact Oracle support
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15243: Bad model number: {0}
   Cause: When processing diff actions in a diff operation, the 2 models that are being compared are internally numbered as model 1 and 2. A model number other than 1 or 2 was used internally in a call to getModel.
   Action: Internal Error: contact Oracle support
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15244: Could not add a key because {0} is not an ID key.
   Cause: When building a model, the specified key class instance was not an id key
   Action: Internal Error: contact Oracle support
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15245: Unknown key type: {0}
   Cause: When building a model, an unknown key class was found
   Action: Internal Error: contact Oracle support
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15246: Key {0}.{1} is of unknown type: {2}
   Cause: When building a model, an unknown key class was found
   Action: Internal Error: contact Oracle support
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15247: The table {0} cannot be found. It is referenced by key: {1}.
   Cause: When building a model, an table name is referenced by a key, but the table cannot be found
   Action: Check the model
   Level: 32
   Type: ERROR
Impact: Programmatic

ODI-15248: The column \{0\} in table \{1\} cannot be found. It is referenced by key: \{2\}.
Cause: When building a model, an column name is referenced by a key, but the column cannot be found
Action: Check the model
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15249: An \{0\} was caught while adding a key which is not an FK. Very strange.
Cause: When building a model, an column name is referenced by a key, but the column cannot be found
Action: Check the model
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15250: The key \{0\} referenced by table \{1\} cannot be found.
Cause: When building a model, a key name is referenced by a table, but the key cannot be found
Action: Check the model
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15251: A duplicate key was found: \{0\}
Cause: When dropping a model, a duplicate key was found in the model
Action: Check the model
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15252: Key already exists: \{0\}
Cause: When updating a model, a duplicate key was found in the model
Action: Check the model
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15253: Key not found: \{0\}
Cause: When updating a model, the key was not found
Action: Check the model
Level: 32
Type: ERROR
ODI-15254: Could not find a constructor with a key name for class {0}
Cause: When creating a key class instance, the constructor could not be found
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15255: Could not instantiate an object of class {0}
Cause: Could not instantiate the key class
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15256: Could not create an object for class {0} for security reasons
Cause: Could not instantiate the key class, due to a security failure
Action: Check security settings
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15257: Could create an object for class {0} because a {1} occurred saying {2}
Cause: Could not instantiate the key class, due to an invocation target exception
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15258: Column {0} not found
Cause: The column could not be found
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15259: The key class {0} is not an ID key class.
Cause: The specified key class instance was not a SnpsRDBldKey instance
Action: Internal Error: contact Oracle support
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15260: Could not add column {0}: Unsupported datatype: {1}
**Cause:** Cannot add the column to the model because the datatype is not supported by the technology

**Action:** Correct the model

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

ODI-15261: **Unsupported action: {0}**

**Cause:** The action class is not supported by the ODI RDB

**Action:** Internal Error: contact Oracle support

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

ODI-15262: **Cannot drop column {0}. It is used in a foreign key!**

**Cause:** An attempt was made to drop a column that participates in a foreign key

**Action:** Drop the key first, then the column

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

ODI-15263: **Cannot drop column {0}. It is used in a primary key!**

**Cause:** An attempt was made to drop a column that participates in a primary key

**Action:** Drop the key first, then the column

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

ODI-15264: **Cannot modify this column. It is used in a foreign key!**

**Cause:** An attempt was made to modify a column that participates in a foreign key

**Action:** Drop the key first, then modify the column

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

ODI-15265: **Cannot modify this column. It is used in a primary key!**

**Cause:** An attempt was made to modify a column that participates in a primary key

**Action:** Drop the key first, then modify the column

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic
ODI-15268: Table not found: {0}
  Cause: When attempting to drop a table during an update, the table name is not found
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15270: Key type {0} is not supported here.
  Cause: The key type is not supported
  Action: Correct the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15272: An error occurred while executing a RDB command: {0}
  Cause: When executing a command action, an exception was thrown
  Action: Check root cause
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15273: {0}: action is not accepted: {1}
  Cause: Attempt to execute a command action, but it is not accepted
  Action: Check root cause
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15274: Multiple PKs are not allowed on a table
  Cause: When reverse engineering a primary key, multiple primary keys were found for the table
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15275: An exception occurred while retrieving a table primary key: {0}
  Cause: When reverse engineering a table, a primary key could not be retrieved
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-15276: An exception occurred while retrieving the indexes of a table: [0]
  Cause: When reverse engineering a table, the indexes could not be retrieved
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15277: An exception occurred while retrieving a table foreign keys: [0]
  Cause: When reverse engineering a table, the foreign keys could not be retrieved
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15278: An exception occurred while retrieving the check constraints of a table: [0]
  Cause: When reverse engineering a table, the check constraints could not be retrieved
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15279: An exception occurred while retrieving the alternate keys of a table: [0]
  Cause: When reverse engineering a table, the alternate keys could not be retrieved
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15280: *** FATAL *** Table [0] is duplicate as root
  Cause: The table is duplicated as the root when determining the root tables of the model
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15281: *** FATAL ** Table [0] is unknown
  Cause: The root table is unknown
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-15282: Table [0] is unknown though it was reversed
    Cause: The table cannot be found in the ODI model, although it was reversed
    Action: Retry the reverse engineering
    Level: 32
    Type: ERROR
    Impact: Programmatic

ODI-15283: Duplicate declaration for table [0]
    Cause: The model XML contains a duplicate table declaration
    Action: Fix the XML
    Level: 32
    Type: ERROR
    Impact: Programmatic

ODI-15285: FK [0] references a table with no PK.
    Cause: The model XML contains a foreign key that references a table with no defined primary key
    Action: Fix the XML
    Level: 32
    Type: ERROR
    Impact: Programmatic

ODI-15286: Unknown PK table for foreign key [0]: please check the name and order of the tables and FK.
    Cause: The model XML contains a foreign key that references an unknown primary key table
    Action: Fix the XML
    Level: 32
    Type: ERROR
    Impact: Programmatic

ODI-15287: Unknown element: [0]
    Cause: The model XML contains an unknown element
    Action: Fix the XML
    Level: 32
    Type: ERROR
    Impact: Programmatic

ODI-15288: An [0] error occurred with the following message: [1]
    Cause: An error occurred when writing the model to a file
    Action: See root cause
    Level: 32
    Type: ERROR
    Impact: Programmatic
ODI-15290: Column {0} was not found in table {1}
  Cause: The column was not found when building the columns from column names
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15291: *** FATAL *** Could not rename table {0} to {1}
  Cause: Could not rename table
  Action: Check permissions and security settings
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15292: *** FATAL *** Could not rename table {0} because it was not found in the model!
  Cause: Could not rename table, because the table to be renamed does not exist
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15293: Unknown FK table for foreign key {0}: please check the name and order of the tables and FK.
  Cause: The model XML contains a foreign key that references an unknown table
  Action: Fix the XML
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15294: Unknown element: {0}
  Cause: The model XML contains an unknown XML element
  Action: Fix the XML
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15295: Unsupported datatype: {0}
  Cause: The datatype is unsupported when creating the column from attributes
  Action: Check the model
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-15300: A {0} occurred while creating the helper of class {1}. Error message: {2}
    Cause: INTERNAL ERROR: A helper cannot be created.
    Action: Internal error: contact Oracle support.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-15301: Choose: {0}
    Cause: Choose one of the displayed options.
    Action: Choose one of the displayed options.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-15302: FK is null: {0}
    Cause: The FK is null, may indicate repository corruption.
    Action: Internal error: contact Oracle support.
    Level: 32
    Type: ERROR
    Impact: Other

ODI-15303: JDBC Datatype '{0}' with length '{1}' parameter unsupported
    Cause: MySQL database does not support the datatype with length
    Action: Internal Error: contact Oracle support
    Level: 32
    Type: ERROR
    Impact: Programmatic

ODI-15304: JDBC Datatype '{0}' with length '{1}' and scale '{2}' parameter unsupported
    Cause: MySQL database does not support the datatype with scale
    Action: Internal Error: contact Oracle support
    Level: 32
    Type: ERROR
    Impact: Programmatic

ODI-15305: JDBC Datatype '{0}' unsupported
    Cause: MySQL database does not support the datatype
    Action: Internal Error: contact Oracle support
    Level: 32
    Type: ERROR
    Impact: Programmatic
ODI-15306: Column data type "{0}" not supported. Refer documentation for supported types.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15307: Metadata format of element with identifier "{0}" is incorrect. Found value "{1}"
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15308: Error unloading CLOB for column "{0}"
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15309: Error unloading BLOB for column "{0}"
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-15400: Error in generating data service
Cause: Exception thrown when creating the data service used for DDL generation and reverse engineering.
Action: Check the root cause.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15401: Unknown key {0}
Cause: Unknown key encountered when processing diff class instances during DDL generation.
Action: Check the model.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15402: Exception thrown in the DDL generation service: {0}
Cause: An exception was thrown while generating DDL.
Action: Check the root cause.

Level: 32
Type: ERROR

Impact: Programmatic

ODI-15403: The method is not supposed to sort something else than the expected actors. Attempting to sort class instances: {0}, {1}
Cause: While sorting action commands, the DDL generator service encountered an unknown class instance type.
Action: Internal Error: contact Oracle support.

Level: 32
Type: ERROR

Impact: Programmatic

ODI-15404: Scenario generation has not been implemented for this container.
Cause: During DDL generation, an attempt was made to generate a scenario for an object that does not support it.
Action: Internal Error: contact Oracle support.

Level: 32
Type: ERROR

Impact: Programmatic

ODI-15405: Scenario generation exception: {0}
Cause: An exception was thrown during scenario generation.
Action: Check root cause.

Level: 32
Type: ERROR

Impact: Programmatic

ODI-15406: Oozie workflow generation exception: {0}
Cause: An exception was thrown during Oozie workflow generation.
Action: Check root cause.

Level: 32
Type: ERROR

Impact: Programmatic

ODI-15407: Oozie workflow generation exception for Task: {0} - Transactions not supported on Oozie engine with commit mode not set. {1} command Transaction Channel: {2}.
Cause: Transactions are not supported on Oozie Engine.
Action: Please refer to documentation on Oozie Engine Execution.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15500: Column {0} is executed on the target
Cause: Possible Cause
Action: Suggested Action

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15501: Cannot attach a data store to a target mapping because column {0} is not found.
Cause: The specified target column was not found.
Action: Verify that the correct column has been specified.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15502: Target mapping not found for column {0}
Cause: The specified column is not mapped.
Action: Map the specified column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15503: Cannot set the attached datastore because the mapping is not executed on the SOURCE
Cause: The mapping has been configured for execution on the target.
Action: Configure the mapping for execution on the source.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15504: Unknown indicator type: {0}
Cause: An invalid indicator type has been specified.
Action: Specify one of the following indicator types from the IndicatorType enumeration: CHECK_NOT_NULL, INSERT, UPDATE, or UPDATE_KEY.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15505: Invalid UD number: {0}
Cause: An invalid UD number has been specified.
Action: Specify a UD number 1 to 10.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15506: The specified target column was not found: {0}
Cause: The specified target column was not found when attempting to remove a column from a temporary data store.
Action: Only remove columns which exist in the temporary target datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15507: Column {0} may not be removed. It is used in other mappings, join clauses, or filter clauses
Cause: The specified target column is used in other mappings, filters, or joins. This dependency prevents removal of the column.
Action: Only remove a column after mapping, filter, or join dependencies have been removed.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15508: Column {0} may not be removed because it is referenced in interface {1}.
Cause: The specified target column is referenced in a filter or join clause in another interface. This dependency prevents removal of the column.
Action: Only remove a column after other references have been removed.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15509: The specified target column was not found: {0}
Cause: The specified target column was not found.
Action: Verify the column name.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15510: A column was not found while updating the key
Cause: The update key contains a column that does not exist.
Action: Check the columns of the update key.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15511: The join must be attached to the datastore to expand a lookup.
Cause: The join is not attached to a datastore, so a valid lookup does not exist.
Action: Only use the lookup expansion, with a pCreateLookup parameter value of false, on valid lookups.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15512: Cannot transform a normal datastore into a normal lookup.
Cause: The datastore is already a non-lookup data store.
Action: Do not use this transformation on a non-lookup data store. If the datastore and join are non-lookup, use a pCreateLookup parameter value of true to create a lookup from a normal join and normal datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15513: Cannot transform a normal, non-lookup join into a normal join.
Cause: The join is already a normal join, not a lookup join, so expansion to a normal, non-lookup join is not possible.
Action: Do not use this transformation on a normal join. If the datastore and join are non-lookup, use a pCreateLookup parameter value of true to create a lookup from a normal join and normal datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15514: Cannot transform a lookup datastore into a lookup.
Cause: The data store is already designated as a lookup, so transforming to a lookup is not possible.
Action: Do not use this transformation on a lookup. If the datastore and join are designated for lookup, use a pCreateLookup parameter value of false to expand a lookup to a normal join and normal datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15515: Cannot transform a lookup join into a lookup.
Cause: The join is already designated as a lookup, so transforming to a lookup is not possible.
Action: Do not use this transformation on a lookup. If the datastore and join are designated for lookup, use a pCreateLookup parameter value of false to expand a lookup to a normal join and normal datastore.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-15516: The join must be attached to the datastore to make a lookup.
   **Cause:** The join is not properly attached to data sources, so transforming to a lookup is not possible.
   **Action:** Designate data sources for the join.

   **Level:** 32  
   **Type:** ERROR  
   **Impact:** Programmatic

ODI-15517: Cannot add a column with the same name as an existing target column: {0}.
   **Cause:** The column being added already exists.
   **Action:** Add a column with a unique name.

   **Level:** 32  
   **Type:** ERROR  
   **Impact:** Programmatic

ODI-15518: A dataset is already assigned the order: {0}.
   **Cause:** Another dataset has already been assigned the order that is being set.
   **Action:** Assign a unique order to the dataset.

   **Level:** 32  
   **Type:** ERROR  
   **Impact:** Programmatic

ODI-15519: The target datastore cannot be changed. Interface {0} is used in interface(s) {1} as a source datastore.
   **Cause:** The interface is used as a source datastore of another interface, so the target datastore cannot be changed.
   **Action:** Create a separate interface to avoid the source datastore dependency in the other interface.

   **Level:** 32  
   **Type:** ERROR  
   **Impact:** Programmatic

ODI-15520: Temporary interface from another project is not allowed.
   **Cause:** The interface is used as a source datastore of another interface, so the target datastore cannot be changed.
   **Action:** Create a separate interface to avoid the source datastore dependency in the other interface.

   **Level:** 32  
   **Type:** ERROR  
   **Impact:** Programmatic

ODI-15521: A source datastore with alias {0} already exists.
   **Cause:** The datastore alias has already been used.
   **Action:** Specify a unique alias.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15522: Cannot transform a join into a CrossJoin or natural join if it does not have both attached datastores set.
Cause: The join does not have datastores attached yet.
Action: Attach both join datastores before transforming to a cross join.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15523: LKM {0} not accepted for source set {1}
Cause: The LKM is not compatible with the source set technology or multi-connection setting.
Action: Select an LKM which matches the source set technology and multi-connection setting.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15524: LKM {0} not accepted for staging area to target
Cause: The LKM is not compatible with the staging area technology or multi-connection setting.
Action: Select an LKM which matches the staging technology and multi-connection setting.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15525: CKM {0} not accepted for target technology
Cause: The CKM is not compatible with the target technology.
Action: Select a CKM which matches the target technology.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15526: IKM {0} not accepted for staging and target technology
Cause: The IKM is not compatible with the staging or target technologies or multi-connection setting.
Action: Select an IKM which matches the staging and target technologies and multi-connection setting.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-15527: IKM \{0\} not accepted for target technology
  Cause: The IKM is not compatible with the target technology or multi-connection setting.
  Action: Select an IKM which matches the target technology and multi-connection setting.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15528: Mapping expression cannot be set because the target column \{0\} was not found.
  Cause: The column was not found when setting the expression for a mapping.
  Action: Specify a valid column for the expression.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15529: Action was not reversible.
  Cause: The actions causing an impact are not reversible.
  Action: Avoid the sequence of actions causing the impact.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15530: The interface does not have a source set.
  Cause: The interface does not have a source set.
  Action: Add a source set to the interface.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15531: The execution location parameter for the computeExpression method is invalid.
  Cause: The execution location parameter for the computeExpression method is invalid.
  Action: Specify an execution location parameter of ExecutionLocation.SOURCE, ExecutionLocation.WORK, or ExecutionLocation.TARGET.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15532: The pExecutableTextHolder parameter for the getLogicalSchemaForTextHolder method does not have a valid execution location.
  Cause: The pExecutableTextHolder parameter for the getLogicalSchemaForTextHolder method does not have a valid execution location.
**Action:** Specify an execution location parameter of ExecutionLocation.SOURCE, ExecutionLocation.WORK, or ExecutionLocation.TARGET.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15533:** The physical schema could not be mapped from logical schema [0] and context [1].  
**Cause:** The getPhysicalSchema method failed to map and logical schema and context to a physical schema.  
**Action:** Ensure that logical to physical schema mappings are created or check the logical schema and context parameters.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15534:** Sub interface must not be null.  
**Cause:** The pSubInterface parameter passed to the checkSubInterfaceValid method is null.  
**Action:** A non-null sub interface parameter is required for the checkSubInterfaceValid method.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15535:** The technology [0] of the source temporary interface [1] used as a derived table does not support derived tables.  
**Cause:** The pSubInterface parameter passed to the checkSubInterfaceValid method is null.  
**Action:** A non-null sub interface parameter is required for the checkSubInterfaceValid method.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-15536:** Source temporary interface [0] cannot be used as a derived table. Its source datastore [1] defined in logical schema [2] has no associated physical schema in the optimization context [3].  
**Cause:** The temporary interface cannot be used because a physical schema has not been mapped to the logical schema for the source.  
**Action:** Create a mapping between the logical schema, context, and physical schema for the source data store.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic
ODI-15537: Source temporary interface [0] cannot be used as a derived table. The logical schema of the target datastore [1] has no associated physical schema in context [2].

**Cause:** The temporary interface cannot be used because a physical schema has not been mapped to the logical schema for the target.

**Action:** Create a mapping between the logical schema, context, and physical schema for the target data store.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

ODI-15538: Source temporary interface [0] cannot be used as a derived table. The logical schema of the staging area [1] has no associated physical schema in the optimization context [2].

**Cause:** The temporary interface cannot be used because a physical schema has not been mapped to the logical schema for the staging area.

**Action:** Create a mapping between the logical schema, context, and physical schema.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

ODI-15539: Source temporary interface [0] cannot be used as a derived table. Source datastore [1] is not on the same data server as the target.

**Cause:** The temporary interface cannot be used because the source data store is not on the same data server as the target.

**Action:** Ensure that the source and target datastores are on the same data server.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

ODI-15540: Source temporary interface [0] cannot be used as a derived table. Staging area and target datastores are not in the same data server. You may have forced the target context to a different context than the optimization context.

**Cause:** The temporary interface cannot be used because the staging data store is not on the same data server as the target.

**Action:** Ensure that the staging and target datastores are on the same data server.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

ODI-15541: Source temporary interface [0] uses a journalized datastore and cannot be used as a derived table.

**Cause:** The temporary interface cannot be used because it uses a journalized datastore.

**Action:** Use only non journalized data stores in temporary interfaces.

**Level:** 32
Type: ERROR
Impact: Programmatic

ODI-15542: Source temporary interface {0} cannot be used as a derived table. All source datastores of this interface should be in the same data server as the target and should not be journalized.
Cause: The temporary interface cannot be used because it uses a journalized datastore.
Action: Use only non-journalized data stores in temporary interfaces.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15543: Another interface with the same name already exists in this folder. Please choose a unique interface name.
Cause: Another interface with the same name already exists in this folder.
Action: Specify a unique interface name.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15544: The interface must have a name.
Cause: The interface does not have a name.
Action: Specify a unique interface name.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15545: Temporary target datastore has no name.
Cause: The temporary target datastore has no name
Action: Specify a unique datastore name.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15546: The interface must have a logical schema.
Cause: The interface does not have a logical schema.
Action: Specify a logical schema for the interface.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-15547: Could not fix a missing reference correctly.
Cause: The interface is missing one or more references.
Action: Recheck target expressions for proper source references.
Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15548: The source datastore has already been set.  
Cause: The source datastore has already been set.  
Action: Only invoke setSourceDataStore once.

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15549: Cannot set the source filter because the source datastore is not set.  
Cause: The source datastore has not been set prior to setting the filter.  
Action: Set the source datastore prior to setting the filter.

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15550: The target datastore has already been set.  
Cause: The source datastore has already been set.  
Action: Only invoke setSourceDataStore once.

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15552: A source filter requires a source datastore.  
Cause: The interface cannot be saved because it contains a filter without a source datastore.  
Action: Create a source datastore before creating a source filter.

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15553: The target datastore must be set.  
Cause: The target datastore for the interface has not been set.  
Action: Set the target datastore before saving the interface.

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-15554: An LKM must be set on the source set.  
Cause: A loading knowledge module has not been assigned to the source set.  
Action: Set the LKM for the source set before saving the interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15555: Target IKM must be set on the target table.
Cause: An integration knowledge module has not been assigned to the target table.
Action: Set the IKM for the target before saving the interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15556: Unknown generic clause type: {0}
Cause: An unknown generic clause class was passed to the createSnpPopClauseFromGenericClause method.
Action: Pass only generic clause classes for join or filter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15557: Unknown execution location type: {0}
Cause: An unknown execution location enumeration was passed to the getStringExeDbFromExecutionLocation method.
Action: Pass only location enumerations of ExecutionLocation.SOURCE, ExecutionLocation.WORK, ExecutionLocation.TARGET.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15558: There is a conflict between physical schemas
Cause: There is a conflict between the various physical schemas used to obtain the data, such as multiple data stores in the same source set connected using different physical schemas.
Action: Ensure that physical schemas of a source set have consistent connection information.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15559: Unsupported component: {0}
Cause: An unsupported component was passed as a parameter to createDataAccessinfo.
Action: For the pInterfaceSubComponents parameter, supported components are SourceDataStore, ISourceColumn, TargetMapping, and GenericClause.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-15560: Fatal interface condition: {0}
  Cause: A fatal issue was discovered while saving or verifying an interface.
  Action: Correct the interface issue before saving it.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15561: Could not find column {0} which choosing a mapping.
  Cause: The MappingChooserFirst.chooseMapping method was called with an
  column name that does not exist.
  Action: Check the column name passed to chooseMapping.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15562: Source sets cannot be computed because one execution area doesn't
  have a physical schema. Check the errors on the interface.
  Cause: Source sets cannot be computed because one execution area doesn't have a
  physical schema.
  Action: Check the errors on the interface.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15563: Source sets cannot be computed because the staging area is not properly
  defined. Check your target datastore and the staging area's physical schema in
  the Definition tab.
  Cause: Source sets cannot be computed because the staging area is not properly
  defined.
  Action: Check your target datastore and the staging area's physical schema in the
  Definition tab.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15564: There should be one source set on the interface.
  Cause: The interface has more than one source set.
  Action: Ensure that only one source set is defined.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-15565: Column {0} not found while setting the update key.
  Cause: A column specified for the update key does not exist.
  Action: Recheck the column names used to define the update key.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15566: No target column was found while setting the target data store.
Cause: No target column was found while setting the target data store.
Action: Define columns before setting the target datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15567: Target column {0} was not found.
Cause: No specified target column was not found in the target data store.
Action: Check the column name parameter in the
RealBasicInterfaceCreationHelper.getTargetColumn method call.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15568: Column {0} not found on datastore {1}.
Cause: A referenced column was not found in a source data store.
Action: Check the source datastore columns and references for a mismatch.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15570: Cannot add a datastore of type {0} as source.
Cause: An invalid datastore type has been specified.
Action: Specify a datastore of type TargetDataStore, SourceDataStore, or OdiDataStore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15571: Unexpected join type {0}
Cause: An invalid join type has been specified when setting join properties.
Action: Specify a join type of INNER, CROSS, or NATURAL.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15572: Unexpected join state.
Cause: An invalid join state has been reached. The expected join type is CROSS or NATURAL.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15573: Failed to create an interface helper instance.
  Cause: A general exception was encountered while constructing an interface helper.
  Action: This is an internal error with no recommended user action.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15574: General exception encountered in the interface helper while preparing to persist.
  Cause: General exception encountered in the interface helper while preparing to persist.
  Action: This is an internal error with no recommended user action.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15575: Two journalized datastores have been found. There should be only one.
  Cause: Two journalized datastores have been found. There should be only one.
  Action: Remove journalizing from one or more datastores.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15576: Two journalized filters have been found. There should be only one.
  Cause: Two journalized filters have been found. There should be only one.
  Action: Remove journalizing from one or more datastores.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15577: Unmanaged type: {0}
  Cause: An invalid element type was passed to the prepareSQLStatement method.
  Action: Pass only valid element types such as GenericClause, SourceDataStore, TargetDataStore, ISourceColumn, TargetMapping, SourceSet, DataSet, or TargetColumn.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15578: No interface was found in the elements.
Cause: No interface could be traced to the elements passed to the prepareSQLStatement method.
Action: Create an interface.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15579: No dataset was found in the elements.
Cause: No data set could be traced to the elements passed to the prepareSQLStatement method.
Action: Ensure that a dataset has been created first.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15580: The target is a temporary table.
Cause: The target datastore is a temporary target.
Action: Use a non-temporary target.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15581: Cannot build the query because the ordered joins are not correct.
Cause: The SQL clause cannot be generated because the ordered joins are not correct.
Action: Ensure that all joins are correct.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15582: This operation is not supported on joined file datastores.
Cause: Multiple source datastores were found.
Action: Use only a single source datastore.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15583: This operation is not supported on multiple file datastores.
Cause: More than one source datastore was found.
Action: Use only a single source datastore.
Level: 32
Type: ERROR
Impact: Programmatic
ODI-15584: Elements are from different interfaces.
   **Cause:** The components passed to prepareSQLStatement are from different interfaces.
   **Action:** Only pass components from the same interface when preparing an SQL statement.
   **Level:** 32
   **Type:** ERROR
   **Impact:** Programmatic

ODI-15585: Elements are from different datasets.
   **Cause:** The components passed to prepareSQLStatement are from different data sets.
   **Action:** Only pass components from the same data set when preparing an SQL statement.
   **Level:** 32
   **Type:** ERROR
   **Impact:** Programmatic

ODI-15586: Unsupported component: {0}
   **Cause:** An invalid component type was passed to connectionForData.
   **Action:** Only pass components of type SourceDataStore, ISourceColumn, TargetMapping, TargetColumn, GenericClause, or TargetDataStore.
   **Level:** 32
   **Type:** ERROR
   **Impact:** Programmatic

ODI-15587: Journalization filter not found for the journalized table.
   **Cause:** The journalized table does not have a filter.
   **Action:** Define a journalizing filter for the table.
   **Level:** 32
   **Type:** ERROR
   **Impact:** Programmatic

ODI-15588: The SQL join clause is not valid for a cross join.
   **Cause:** A join clause has been specified for a cross join.
   **Action:** Remove the join condition or change the join type.
   **Level:** 32
   **Type:** ERROR
   **Impact:** Programmatic

ODI-15589: Cannot change the ON_TARGET indicator on a temporary interface.
   **Cause:** An attempt was made to set the ON_TARGET indicator for a temporary datastore.
   **Action:** Do not change the ON_TARGET indicator for a temporary datastore.
   **Level:** 32
Type: ERROR

Impact: Programmatic

ODI-15590: Unknown indicator type: [0]

Cause: An unknown value was passed to the constructor for InterfaceActionOnStagingAreaSetIndicator.

Action: Use valid values of DISTINCT_ROW, ON_TARGET, or ON_USER_DATABASE_SCHEMA for the pIndicatorType parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15591: Staging Area is on the target and cannot be switched to another logical schema.

Cause: The staging area is on the target and uses the target schema. It cannot be switched.

Action: Do not attempt to switch the schema, or use a separate staging area.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15592: GenericClause is of unknown type: [0]

Cause: InterfaceActionRemoveGenericClause was constructed with an invalid generic clause.

Action: Use a generic clause type of JOIN or FILTER.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15593: Could not set LKM for object of type [0]

Cause: An LKM is being set for a TargetDataStore or some other invalid type.

Action: Only set an LKM for a SourceSet or StagingArea.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15594: Could not set the CKM for a holder of type [0]

Cause: A CKM is being set for a SourceSet, StagingArea, or some other invalid type.

Action: Only set a CKM for a TargetDataStore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15595: Could not set the IKM for a holder of type [0]
Cause: An IKM is being set for a SourceSet, StagingArea, or some other invalid type.
Action: Only set an IKM for a TargetDataStore.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15596: Invalid KM type: {0}
Cause: An invalid object type is being used to set a KM.
Action: Only set a KM of type LKM, CKM, or IKM.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15597: Could not set the LKM option for a holder of type {0}
Cause: An LKM is being set for a TargetDataStore or some other invalid type.
Action: Only set an LKM option for a SourceSet or StagingArea.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15598: Could not set the CKM option for a holder of type {0}
Cause: A CKM option is being set for a SourceSet, StagingArea, or some other invalid KM holder type.
Action: Only set a CKM option for a KM holder of type TagetDataStore.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15599: Could not set the IKM option for a holder of type {0}
Cause: An IKM option is being set for a SourceSet, StagingArea, or some other invalid KM holder type.
Action: Only set an IKM option for a KM holder of type TagetDataStore.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15600: Dataset 1 was not found in the list of the interface datasets used with the interface.
Cause: The first dataset given as a parameter in the construction of the InterfaceActionSwitchDataSetOrders class is not used in the interface.
Action: Recheck the datasets being switched for this interface. Both datasets must be used in the interface.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15601: Dataset 2 was not found in the list of the datasets used with the interface.
Cause: The second dataset given as a parameter in the construction of the InterfaceActionSwitchDataSetOrders class is not used in the interface.
Action: Recheck the datasets being switched for this interface. Both datasets must be used in the interface.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15602: An unimplemented method has been called.
Cause: An unimplemented method has been called.
Action: Review the error details for information on the specific method call. Implement the method or call an alternative method.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15603: Cannot create an alias for a datastore of type \{0\}
Cause: The method computeAliasForDataStore was called with an invalid datastore type.
Action: Only call computeAliasForDataStore for datastores of type TargetDataStore or OdiDataStore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15604: A non ordered clause was passed to the buildTreeSet method.
Cause: A non ordered clause is passed to the construction of ordered joins trees method.
Action: Use ordered join clauses with this method.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15605: Multiple ordered joins in this dataset use the same order number.
Cause: One or more join clauses uses the same order number in the call to buildTreeSet.
Action: Ensure that all clauses of an ordered join have unique order numbers.

Level: 32
Type: ERROR
Impact: Programmatic
ODI-15606: Join references the same table twice (directly or indirectly).
   Cause: A join clause contains two references to the same table.
   Action: Ensure that the join clause only references one table.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15607: Join references the same table twice through other joins.
   Cause: A join clause contains two references to the same table.
   Action: Ensure that the join clause only references one table.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15608: Subcomponent type of {0} is not supported.
   Cause: An unsupported type was passed to getIssuesComputer.
   Action: Only pass types of OdiInterface, DataSet, SourceDataStore, Filter, Join,
            StagingArea, TargetDataStore, SourceSet, TargetMapping, or TargetColumn.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15609: Invalid KM holder type: {0}
   Cause: An invalid KM holder type was passed to InterfaceKMHolderFactory.getKMHolderFor
   Action: Only pass KM holder types of SOURCE_SET_LKM, STAGING_AREA_LKM, TARGET_CKM, or TARGET_IKM.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15610: Component must be a source datastore or a source column.
   Cause: ReferenceManagerAbstract.getReferencesTo was called with an invalid subcomponent.
   Action: Only pass subcomponent types of SourceDataStore or ISourceColumn.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-15611: Column not found from an xref.
   Cause: A column referenced in an expression was not found in a datastore. It may have been deleted.
   Action: Ensure that all columns referenced in the expression exist.
   Level: 32
Type: ERROR
Impact: Programmatic

ODI-15612: Failed to attach an element of type {0} to a source set.
Cause: An invalid type of component was found when attaching elements to a source set.
Action: Elements being attached to a source set must be of type SourceDataStore, Join, Filter, or TargetMapping.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15613: Interface must have only one dataset.
Cause: This sourceset computer can only handle a single dataset, and more than one was found.
Action: Ensure that the interface uses only one dataset.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15614: Interface must have only one source table.
Cause: This sourceset computer can only handle a single table, and more than one datastore was found.
Action: Ensure that multiple tables are contained in a sourceset.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15615: Interface must not have joins.
Cause: This sourceset computer can only handle a single table, and the interface contains a join.
Action: Ensure that joins are contained in a sourceset.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15616: Source datastore must be a real table
Cause: This sourceset computer can only handle a single, real table.
Action: Ensure that only a single, real table is used in the sourceset.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15617: Invalid type for a TextHolder: {0}
Cause: The method getExecutableTextHolderFor was called with an invalid TextHolder component type.
**Action**: Valid types are TargetMapping, TargetColumn, Filter, and Join.

**Level**: 32
**Type**: ERROR
**Impact**: Programmatic

**ODI-15618: Cannot set a source set on a target column.**
**Cause**: SetSourceSet was called for a target column, which is not a valid usage. This method is specified for the interface, but is not valid for this class.
**Action**: SetSourceSet should never be invoked for this class.

**Level**: 32
**Type**: ERROR
**Impact**: Programmatic

**ODI-15619: Inconsistent filter with a clauseType of {0}**
**Cause**: The Filter.getFilterType method was called, but the clause type was not a filter type.
**Action**: Ensure that the filter has a type of SnpPopClause.CLAUSE_TYPE_FILTER or SnpPopClause.CLAUSE_TYPE_JRN_FILTER.

**Level**: 32
**Type**: ERROR
**Impact**: Programmatic

**ODI-15620: Execution location is null. Target technology cannot be determined**
**Cause**: The execution filter for the location was not set.
**Action**: The execution location should be set in the Filter constructor or by invoking setExecutionLocation.

**Level**: 32
**Type**: ERROR
**Impact**: Programmatic

**ODI-15621: Attached datastore is null. Target technology cannot be determined**
**Cause**: The attached datastore for the execution location was not set.
**Action**: The datastore should be set in the Filter constructor or by invoking setAttachedDataStore.

**Level**: 32
**Type**: ERROR
**Impact**: Programmatic

**ODI-15622: Staging area does not have a logical schema. Target technology cannot be determined**
**Cause**: The attached datastore for the execution location was not set.
**Action**: The datastore should be set in the Filter constructor or by invoking setAttachedDataStore.

**Level**: 32
**Type**: ERROR
Impact: Programmatic

ODI-15623: Invalid technology for the given index type
Cause: The technology of the clause and index type do not match.
Action: Ensure that the index type technology matches the clause technology.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15624: Inconsistent join with clauseType = {0} and joinType = {1}
Cause: The join clause type is invalid.
Action: This exception is thrown from a deprecated method. Use isCross or isOrdered methods instead.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15625: Cannot set OdiDataType on a journalized source column
Cause: The setDataType method has been invoked for a journalized source column, but the datatype cannot be set for journalized columns.
Action: Do not invoke this method for a journalized column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15626: Cannot set the length on a journalized source column
Cause: The setLength method has been invoked for a journalized source column, but the length cannot be set for journalized columns.
Action: Do not invoke this method for a journalized column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15627: Cannot set the scale on a journalized source column
Cause: The setScale method has been invoked for a journalized source column, but the scale cannot be set for journalized columns.
Action: Do not invoke this method for a journalized column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15628: Cannot set the data type on a source column
Cause: The setDataType method has been invoked for a source column, but the datatype cannot be set for source columns.
Action: Do not invoke this method for a source column.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15629: Cannot set the length on a source column
Cause: The setLength method has been invoked for a source column, but the length cannot be set for source columns.
Action: Do not invoke this method for a source column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15630: Cannot set the scale on a source column
Cause: The setScale method has been invoked for a source column, but the scale cannot be set for source columns.
Action: Do not invoke this method for a source column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15631: Connection information is not available.
Cause: The physical schema has not been set.
Action: Define physical and logical schemas.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15632: Column \(0\) may not be removed because it is mapped in interface \(1\).
Cause: The specified target column is mapped in another interface. This dependency prevents removal of the column.
Action: Only remove a column after mapping dependencies have been removed.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15633: Data Type must be set first.
Cause: Data Type is null.
Action: Set Data Type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15634: Length is not allowed for the current Data Type
Cause: Data Type doesn't support length.
Action: Check Data Type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15635: Scale is not allowed for the current Data Type.
   Cause: Data Type doesn't support scale.
   Action: Check Data Type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15636: Cannot change the column because it's not a temporary column.
   Cause: Column isn't temporary.
   Action: Check column state.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15637: Execution location must be either null or target.
   Cause: Wrong Execution location state.
   Action: Check Execution location.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15638: Scenario {0} contains invalid characters. Try {1}.
   Cause: String contains invalid characters.
   Action: Check scenario name.

Level: 32
Type: ERROR
Impact: Other

ODI-15639: Scenario version is not set.
   Cause: Scenario version is not set.
   Action: Set scenation version.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-15640: No Scenario was found through the Tag : {0}.
   Cause: No Scenario was found.
   Action: Check tag.

Level: 32
Type: ERROR
Error Messages

ODI-15641: The refresh SQL statement of a variable cannot contain sequence references when the variable is added to a load plan.
Cause: SQL statement contains sequence references.
Action: Check refresh SQL statement.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-15642: Scenario name must be {0} characters long max.
Cause: Scenario name is too long.
Action: Check name length.
Level: 32
Type: ERROR
Impact: Other

ODI-15643: No Physical Mapping Design from Mapping: {0}.
Cause: Cannot find any Physical Mapping Design from Mapping.
Action: Check there is valid Physical Mapping Design.
Level: 32
Type: ERROR
Impact: Other

ODI-15644: The physical data server for the source code and for sequence(s) {0} is not the same, this may result in the same sequence value being used for each row.
Cause: The sequence may be remote so a single nextval is calculated and reused per row.
Action: Make sure the sequence and task have the same data server if you want the sequences to use distinct values per row.
Level: 1
Type: NOTIFICATION
Impact: Other

ODI-15645: The physical data server for the target code and for sequence(s) {0} is not the same, this may result in the same sequence value being used for each row.
Cause: The sequence may be remote so a single nextval is calculated and reused per row.
Action: Make sure the sequence and task have the same data server if you want the sequences to use distinct values per row.
Level: 1
Type: NOTIFICATION
Impact: Other

ODI-15700: Exception thrown in the Odi shortcut service: {0}
**Cause:** An exception was thrown while materializing a shortcut object.

**Action:** Check the root cause.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-16000: Dataset has no sources:** {0}

**Cause:** The Dataset has no source or the source is not available.

**Action:** Check sources.

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

**ODI-16001: Dataset {0} contains only one source.**

**Cause:** The Dataset has only one source.

**Action:** Check sources.

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

**ODI-16002: Dataset has added default join condition with cartesian product:** {0}

**Cause:** Dataset has added default join condition with cartesian product.

**Action:**

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

**ODI-16003: Multiple joins in the same dataset have the same order number:** {0}

**Cause:** Multiple joins in the same dataset have the same order number.

**Action:** Check the order numbers of join components in the dataset.

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

**ODI-16004: ANSI join:** {0} has no user-defined order. The default order -1 (meaning "random order") is assigned.

**Cause:** An ANSI join component does not have a join order assigned to it.

**Action:** Assign an order number that is not -1.

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

**ODI-16005: Join component inside dataset has no valid source references in the join condition. Join:** {0}, condition = {1}.
Cause: Join component inside dataset has no valid source references in the join condition.
Action: Check source references in the join condition.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16006: Join component inside dataset has only one source references in the join condition, must have at least 2 references. Join: {0}, condition = {1}
Cause: Join component inside dataset has only one source references in the join condition, must have at least 2 references.
Action: Check join condition.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16008: There is no possible pairwise join order that satisfies both the join condition references and the user order numbers.
Cause: There is no possible pairwise join order that satisfies both the join condition references and the user order numbers.
Action: Check both the join condition references and the user order numbers.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16009: Lookup component creation is not complete: it misses either driving and/or lookup source information.
Cause: Lookup component: {0} in dataset: {1} is incomplete. (Driving source: {2}, lookup source: {3})
Action: Set the missing driving and/or lookup source on the lookup component.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16010: Dataset has sources that are not referenced by any join condition.
Dataset: {0} , unconnected sources: {1}.
Cause: Dataset has sources that are not referenced by any join condition.
Action: Check sources.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16011: INTERNAL ERROR: Dataset error when connecting joins in order.
Cannot find source for join: {0}, referenced source name: {1}.
Cause: Dataset error when connecting joins in order. Cannot find source for join.
Action: Check sources.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16012: Cannot find ordered join connection in dataset for: {0}
Cause: Cannot find ordered join connection in dataset.
Action: Check ordered join connection.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16013: Cannot find a valid pairwise tree of join connections for dataset: {0}
unconnected join: {1} ({2})
Cause: Cannot find a valid pairwise tree of join connections for dataset.
Action: Check join connections.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16014: Cannot find a valid pairwise tree of join connections for dataset: {0}
Cause: Cannot find a valid pairwise tree of join connections for dataset.
Action: Check join connections.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16015: Missing expression for aggregate component {0}, attribute: {1}
Cause: Missing expression for aggregator attribute.
Action: Check aggregator attribute.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16016: Could not find an output signature for point: {0}
Cause: Could not find an output signature for point.
Action: Check output signature for the connection point.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16017: The join component: {0} has more than 2 input connector points. This is not recommended. ANSI SQL join syntax may not be supported.
Cause: The join component has more than 2 input connector points. This is not recommended. ANSI SQL join syntax may not be supported.
Action: Check the join component.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16018: The join condition for component: [0] only references [1] sources, but there are [2] input connector points. Expression text: [3]
Cause: The number of references sources is less than the number of input connector points.
Action: Check the join condition and input connector points.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

Cause: The number of input expressions is greater than the number of input connector points.
Action: Check expressions and input connector points.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16020: Set component output attribute expression for attribute: [0] does not have a scoping input connector point specified. Set component input expressions must have an associated scoping input connector point.
Cause: A scoping input connector point need to be specified.
Action: Check If set component input expressions have an associated scoping input connector point.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16021: The immediate downstream node [0] of the AP node [1], which uses a push style LKM, is not a target.
Cause: A push style LKM is assigned to an AP node but its immediate downstream node is not a target.
Action: Either change the LKM to a pull style LKM or move some physical nodes to source execution unit(s).

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16022: Set component output attribute: [0] does not have an expression that references through input: [1].
Cause: Not all input connector points have been referenced by one expression.
Action: Check input connector points and expressions.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16023: Expression cross reference object is null: {0}.
Cause: Expression cross reference object is null.
Action: Check expression cross reference object.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

Cause: The expression contains identifiers that were not resolved as attribute references.
Action: Check all identifiers in the expression for accessibility through a valid input connector point.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16025: An access point (AP) node has been created in the physical graph, but it does not have any columns: {0}.
Cause: ERROR: An access point (AP) node has been created in the physical graph, but it does not have any columns.
Action: Check access points.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16026: Cannot move an existing physical node to a different physical design!
Node: {0}.
Cause: Cannot move an existing physical node to a different physical design!.
Action: The action attempted is not supported.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16027: No path exists from physical node: {0} to: {1}.
Cause: No path exists between physical nodes.
Action: Check paths between physical nodes.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic
ODI-16028: Expression push is not allowed because it would push the expression through projector node: {0}.

Cause: Expression push is not allowed because it would push the expression through projector node.

Action: The action attempted is not supported.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16029: Expression {0} ({1}) owned by: {2} has blank value, but a non-blank value is required.

Cause: Expression has blank value, but a non-blank value is required.

Action: Check the expression text.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16030: An attribute expression must reference only one projector or joiner source. Attribute: {0}.

Cause: An attribute expression must reference only one projector or joiner source.

Action: Check attribute expressions.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16031: The lookup component must have a driver and a lookup source input connection.

Cause: The lookup component is not properly connected, it must have 2 input connections.

Action: Connect the lookup component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16032: Unsupported component type: {0}: component: {1} in dataset: {2}.

Cause: The dataset does not support the component type.

Action: Remove the component from the dataset.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16033: Aggregate filter: {0} is not supported in dataset: {1}.

Cause: The dataset does not support aggregate filters.

Action: Remove the aggregate filter.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16034: A transparent target LKM was picked for: {0}, but the AP node has more than one downstream target component.
Cause: An AP node with a transparent target LKM can only have one downstream target.
Action: Pick a different LKM.
Level: 32

Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16035: Target node {0} has assigned IKM {1}. The IKM will be ignored.
Cause: A target node that is loaded by an upstream AP node with a transparent target LKM assigned does not need an IKM assigned, since the loading functionality will be handled by the LKM transparent push.
Action: Set IKM to null.
Level: 32

Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16036: No target connected to AP node: {0} with SQL multi-connect LKM assigned.
Cause: An AP node with SQL multi-connect LKM assigned has no target.
Action: Add a target component.
Level: 32

Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16037: Only one target allowed for AP node: {0} with SQL multi-connect LKM assigned.
Cause: An AP node with multi-connect LKM assigned cannot have multiple targets.
Action: Pick different LKM, or remove all but one of the targets in the mapping.
Level: 32

Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16038: No extra logical components are allowed downstream from AP node: {0} with SQL multi-connect LKM assigned. The AP node must have a direct connection to target.
Cause: An AP node with multi-connect LKM assigned must be connected directly to the target, with no intervening nodes.
Action: Pick a different LKM, or reconfigure the physical graph such that the AP nodes connects directly to the target.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16039: The AP node: {0} has a transparent target LKM assigned, but it is not connected directly to the target.
Cause: An AP node with transparent target LKM assigned must be connected directly to the target, with no intervening nodes.
Action: Pick a different LKM, or reconfigure the physical graph such that the AP nodes connects directly to the target.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16040: Non-ANSI full outer join for component: {0} is not supported.
Cause: Full outer join is set to generate non-ANSI syntax.
Action: Check the box for "Generate ANSI Syntax" under Join properties.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16041: The manual group by clause is missing a required attribute: {0}
Cause: The manual group-by expression is missing one or more attributes required for the SQL group-by clause.
Action: Edit the manual group-by expression to included the missing attribute.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16042: The expression for attribute: {0} does not contain an aggregate function, but the group by column setting is NO. Non aggregate attributes should be part of the group-by clause.
Cause: The group-by column setting for an attribute is NO, but it should be part of the group-by clause because the expression does not contain an aggregate function.
Action: If the attribute expression does not contain an aggregate, set the group by column setting to YES.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16043: The expression for attribute: {0} contains an aggregate function, but the group by column setting is YES. Only non aggregate attributes should be included in the group-by clause.
Cause: The group by column setting for an attribute is YES, but it should not be part of the group-by clause because the expression contains an aggregate function.
Action: If the attribute expression contains an aggregate, set the group by column setting to NO.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16044: The having clause references aggregate attribute: {0}, but an aggregate function is not specified.
Cause: An aggregated attribute is used in a having clause without an aggregate function.
Action: If the having clause references an aggregated attribute, include the aggregate function used with that attribute.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16045: Input connector point {0} is not referenced by any attribute expression. That input to the set component is unused.
Cause: An input connector point for a set component is unused because no attribute expressions reference attributes scoped through that connector.
Action: At least one attribute expression should reference an attribute through the input connector in order to use that input to the set.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16046: Set components must have a minimum of two input connector points.
Cause: The set component has less than two input connector points.
Action: Add an input connector point. Set components must have at least two sources.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16047: Set component output attribute: {0} must have a non empty expression for input connector point {1}.
Cause: The number of input expressions is less than the number of input connector points.
Action: Specify a non empty expression for each input. Specify null if no attribute reference is used.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16048: Reusable mapping component: {0} must have a connection for input connector point {1}.
Cause: An input connector point is not connected to another map component.
Action: Connect the input connector point to a source component.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16049: Reusable mapping component {0} has one or more output connector points, but none are connected or contain target components. DML cannot be generated without a target component connected downstream or within the reusable mapping.
Cause: None of the output connector points for the reusable mapping component are connected or contain target components.
Action: Add a connection for at least one output connector point.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16050: Native sequence and ORDER BY operation are performed on the same flow. This might not be allowed in some technologies such as Oracle.
Cause: Sequence is used before order by, this is now allowed in Oracle.
Action: Remove sorter component or place sorter in an execution unit different from the sequence expression.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16051: The Sub select option may not be set for reusable mappings having an input signature.
Cause: The reusable mapping component setSubSelect method was called with a value of true, but sub select is not allowed if an input signature is present.
Action: Avoid calling the setSubSelect method or specify false for the value parameter.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16052: The Sub select option may not be set for reusable mappings having more than one output signature.
Cause: The reusable mapping component setSubSelect method was called with a value of true, but sub select is not allowed if more than one output signature is present.
Action: Avoid calling the setSubSelect method or specify false for the value parameter.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16053: Mixed non-ordered (outer) join and ordered join is not supported.
Cause: Outer join is set to non-ordered.
Action: Change the join to ordered join.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16054: An unparsed identifier, {0}, was found in the aggregate HAVING clause. This identifier was not found in any other aggregate or group by expressions.
Cause: An identifier was found in the HAVING clause, but is invalid because it is not present in any aggregation or group by expression.
Action: Remove this expression from the HAVING clause or use it in one of the aggregate output attribute expressions.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16055: Reusable mapping {0} for reusable mapping component {1} contains errors or warnings.
Cause: A reusable mapping used by this mapping has errors or warnings.
Action: See following error or warning messages regarding the reusable mapping.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16056: The driver connection for lookup component {0} is not connected to any source.
Cause: A connection has not been made between the source and driving connection of the lookup component.
Action: Connect a source to the lookup component driver connection.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16057: The lookup connection for lookup component {0} is not connected to any source.
Cause: A connection has not been made between the source and lookup connection of the lookup component.
Action: Connect a source to the lookup component lookup connection.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16058: Output signature {0} of reusable mapping {1} is not connected to any input source.
Cause: An output signature is not connected to any upstream component.
Action: Connect the output signature to an upstream component.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16059: Error adding lines to task container for KM {0}: {1}
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16060: Error finding helper component KM for AST processing of a node with 11g KM assigned: node={0}, helper KM={1}, error={2}
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16061: Error when calling generation delegate for component KM {0}: {1}
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16062: Cannot create node variable binding map for component KM {0}: {1}
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16063: No target multi-connect IKM found when processing an AP node with a SQL multi-connect LKM assigned.
Cause: A multi-connect IKM could not be found for a target.
Action: Check the target IKM assignment.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16064: When processing an AP node with SQL multi-connect LKM assigned, the downstream target node does not have a multi-connect IKM assigned.
Cause: The IKM assigned to the target is not a multi-connect IKM. If an AP node uses a multi-connect LKM, a multi-connect IKM is required on the target.
Action: Assign a multi-connect IKM to the target.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16065: Cannot get an entity manager for the mapping object. The entity manager must be set for the owning mapping or reusable mapping by calling IODiEntityManager.persist() or Mapping.setEntityManager(), before this operation can be done. Mapping object= {0}
Cause: An mapping operation is being performed that requires the mapping to resolve a reference, but the mapping entity manager has not been set.
Action: Set the entity manager for the mapping, by calling IODiEntityManager.persist() or Mapping.setEntityManager().

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16066: Target datastore column {0} is a mandatory column and should be mapped.
Cause: Missing expression for mandatory target datastore column.
Action: Check target datastore mandatory column expression.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16067: The Sub select option may not be set for reusable mappings having no output signature.
Cause: The reusable mapping component setSubSelect method was called with a value of true, but sub select is not allowed if no output signature is present.
Action: Avoid calling the setSubSelect method or specify false for the value parameter.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16068: A parse error was encountered when parsing the expression: {0}. The default parser supports ANSI SQL delimiters. If a non-standard syntax is desired, use the free-form expression delimiters /%% and %%/ around the expression.
Cause: Expression is syntactically incorrect.
Action: Make sure the expression is well-formed.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16069: Technology {0} does not support the WHERE clause and cannot process the join.
Cause: Technology "Where" indicator is set to false.
Action: Check the technology setting or remove the join.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16070: Ordered joins are not supported in technology {0}.
Cause: Technology Join Support Ordered indicator is set to false.
Action: Set join to non-ordered (Generate ANSI syntax = false).

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16071: Cross joins are not supported in technology {0}.
Cause: Technology Cross Join indicator is set to false.
Action: Set join type to non-cross join.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16072: Natural joins are not supported in technology {0}.
Cause: Technology Natural Join indicator is set to false.
Action: Set join type to non-natural join.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16073: Non-ordered natural joins are not supported.
Cause: Natural Join is set to non-ordered (generate ANSI syntax = false).
Action: Set 'Generate ANSI syntax' to true.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16074: Non-ordered joins are not supported in technology {0}.
Cause: Join is set to non-ordered (generate ANSI syntax = false).
Action: Set join to ordered (Generate ANSI syntax = true).

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16075: Non-ordered outer joins are not supported in technology {0}.
Cause: Outer Join is set to non-ordered (generate ANSI syntax = false).
Action: Set 'Generate ANSI syntax' to true.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16076: Outer joins are not supported in technology {0}.
   Cause: Join is set to outer join.
   Action: Set join to non-outer join.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16077: Full outer joins are not supported in technology {0}.
   Cause: Join is set to full outer join.
   Action: Set join to non-full outer join.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16078: Inner joins are not supported in technology {0}.
   Cause: Join is set to inner join.
   Action: Set join to non-inner join.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16079: Reusable mapping {0} is not compatible with dataset {1}. A reusable mapping within a dataset must have no input signatures and exactly one output signature.
   Cause: An incompatible reusable mapping is being added to the dataset. The reusable mapping must have no input signatures and exactly one output signature.
   Action: Choose a different compatible reusable mapping or modify the reusable mapping to contain just a single output signature and no input signatures.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16080: Mapping component type {0} is not supported within a {1}.
   Cause: An unsupported component is being added to a mapping or composite component.
   Action: Use a supported component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic
ODI-16081: Physical Mapping Design {0} cannot be calculated with no optimization context.

Cause: The optimization context of the physical design is not set, or it becomes invalid because the referenced context is deleted.

Action: Check the optimization context of the physical design and specify an appropriate context.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16082: The physical node {0} cannot be supported by technology {1} on execution unit {2} of mapping {3}.

Cause: The physical node cannot be moved to the execution unit because its technology does not support the node.

Action: Do not move the physical node to this execution unit.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16083: Input Attribute {0} of reusable mapping component {1} does not have an expression to connect it to any source, but is referenced in the reusable mapping.

Cause: An input signature attribute in a reusable mapping is referenced by another component, but the input is not connected in the parent mapping.

Action: Assign an expression to the reusable mapping component input attribute.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16084: The proposed connection would create a circular graph.

Cause: The proposed connection would create a logical graph which contains a circular path, which connects a source component through some other components and back to itself.

Action: Fix the connections to get rid of the circular path.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16085: Cannot set an expression for attribute {0} because the attribute was not found. Available attributes: {1}.

Cause: SetAttributeExpressionText was called with an invalid attribute name.

Action: Specify a valid attribute name.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic
ODI-16086: Set component {0} input connector point {1}: set operator {2} is not valid for {3} technology.

Cause: The set operation chosen for the connector point is not valid for the technology.

Action: Choose a set operation valid for the technology.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16087: Generation of set component {0} failed because of an incompatibility with the technology.

Cause: The set operation chosen for the connector point is not valid for the technology.

Action: Choose a set operation valid for the technology.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16088: Map component {0}, attribute {1} contains an aggregate function.

Aggregate functions are only supported by the aggregate component.

Cause: An aggregate function is used in the expression of a datastore attribute. The Datastore component does not support aggregate functions and will not generate the required GROUP BY clause.

Action: Create an aggregate component to contain the aggregate function.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16089: "Cannot connect to component {0}, no input connector points are available."

Cause: An attempt was made to connect to the component, but no input connector points are available.

Action: Fix the connection graph.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16090: "Attempt connect a component to itself. from={0}, to= {1}"

Cause: An attempt was made to connect an output of the component back into an input of the same component.

Action: Do not connect a component to itself.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16091: Expression component {0} has no attributes.
Cause: An expression has no attributes. Expression components are projectors and must have attributes in order to be referenced by downstream components.

Action: Add one or more attributes to the expression component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16092: Datastore component {0}, attribute {1} is mandatory but not active.

Cause: A datastore attribute is mandatory, but has been tagged as non active.

Action: Set the mandatory attribute to active.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16093: The subselect option is not valid for reusable mapping component {0} because the reusable mapping contains an expression referencing a native sequence.

Cause: The reusable mapping has an expression referencing a native sequence, and the subselect option has been chosen for the reusable mapping component.

Action: Avoid using the subselect option for reusable mappings having expressions which reference native sequences.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16094: Physical node {0} is associated with logical schema {1}, but it is not mapped to a physical server in context {2}.

Cause: The physical schema of the physical node cannot be resolved, as its logical schema is not mapped in the execution context.

Action: Associate the logical schema with a physical schema in the context specified.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16095: "Scenario Generation failed for mapping {0} because no physical design was found."

Cause: No physical design was found during scenario generation for a mapping.

Action: Correct any errors preventing physical design generation.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16096: A mapping with name {0} already exists in folder {1}.

Cause: A mapping with the same name already exist in the same folder.

Action: Use a different name for the mapping.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16097: A reusable mapping with name {0} already exists in folder {1}.
Cause: A reusable mapping with the same name already exist in the same folder.
Action: Use a different name for the reusable mapping.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16098: A reusable mapping with name {0} already exists in global project.
Cause: A reusable mapping with the same name already exist in the global project.
Action: Use a different name for the reusable mapping.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16099: Name {0} already exists in {1} {2}.
Cause: The given name is already used. Object name needs to be unique with the parent object.
Action: Provide a different name for the object.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16100: Name cannot be an empty string.
Cause: Name of an object cannot be empty.
Action: Provide a name for the object.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16101: Name {0} contains invalid characters. Only letters, digits or underscore characters are allowed.
Cause: Proposed name contains invalid characters, such as space. Only letters, digits or underscore characters are allowed.
Action: Provide a different name for the object.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16102: Name {0} contains invalid characters. Only uppercase letters, digits or underscore characters are allowed, and the first character needs to be a letter.
Cause: Proposed name contains invalid characters, such as space. Only uppercase letters, digits or underscore characters are allowed, and the first character needs to be a letter.
Action: Provide a different name for the object.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16103: Name {0} is longer than {1} characters.
Cause: Proposed name is too long.
Action: Shorten the proposed name.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16104: The expression for attribute {0} cannot be resolved because it references an input signature which could not be redirected to an upstream expression. Input connector connections may be incorrect.
Cause: An expression references an input signature, but it could not be redirected to an expression upstream of the input signature. Invalid input connector point connections are the most common cause.
Action: Check all input connector points for correct upstream connections.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16105: Expression of attribute {0} does not refer to any upstream attribute.
Cause: The expression is not set or the input connector point is not properly connected.
Action: Verify the expression or the connection to the input connector point.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16106: No columns are set to update column in Target datastore {0}.
Cause: The update indicator is not set in target datastore.
Action: Verify the targetDatastore attribute and set the update indicator.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16107: The data type for datastore component {0}, attribute {1} is not defined.
Cause: The data type of the column to which the datastore attribute is bound is null. This may occur when reverse engineering an unknown data type.
Action: Add the data type to the technology and set the data type of the column.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16108: Preset Staging Location explicitly set to target location. This may result in the addition of another execution unit and decreased performance. Consider using the default Preset Staging Location, which is already set to use the target location.

Cause: The preset staging location has been explicitly set, instead of using the default value. When an explicit value is set, and execution unit will be created, even if the location is the same as the target location.

Action: Consider using the default value for the preset staging location.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16109: Encountered {0} at line {1} column {2}. Was expecting one of: {3}. The default parser supports ANSI SQL delimiters. If a non-standard syntax is desired, use the free-form expression delimiters /%\% and %\%/ around the expression.

Cause: A parser error was encountered when parsing the expression.

Action: Fix the syntax of the expression.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16110: Non-ANSI natural join for component: {0} is not supported.

Cause: Natural join is set to generate non-ANSI syntax.

Action: Check the box for "Generate ANSI Syntax" under Join properties.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16111: Cannot remove {0} connector point for component {1} due to minimum connector point count violation.

Cause: Removal of connector point will result in connector point count less than minimum count.

Action: Do not remove connector point.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16112: Reusable mapping component {0}, output connector point {1} is not connected.

Cause: An output connector point of a reusable mapping component is not connected.

Action: Check that connections from all output connector points are optional.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16113: Mapping component {0} has no input or output connections.
Causes: An mapping component has not been connected.
Action: Connect the component to a source and/or target component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16114: Error when ordering the components for physical design:{0}, component re-ordering is not valid. A skipped component was not able to be placed in an execution unit because of dependency errors.
Causes: When attempting to reorder the component nodes in the physical graph, an error was found.
Action: Do not reorder the component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16115: Cannot reorder an outer join node around another kind of node.
Causes: Cannot reorder an outer join node around another kind of node.
Action: Cannot reorder an outer join node around another kind of node.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16116: Cannot reorder a join around another join if one of the joins does not have at least 2 references in its join condition.
Causes: Illegal reordering.
Action: Do not reorder the component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16117: Cannot reorder a join around another join if one is generating ANSI and the other is not.
Causes: Illegal reordering.
Action: Do not reorder the component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16118: Cannot reorder a join around another join if one is a left or right outer join and the other is not the same type, for non-ANSI joins.
Cause: Illegal reordering.
Action: Do not reorder the component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16119: Cannot reorder a join around another join if either one is a left outer or right outer join, for ANSI joins.
Cause: Illegal reordering.
Action: Do not reorder the component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16120: Warning: Target Load Order -- Child component is ordered before parent component.
Cause: A datastore component with foreign key relationships is ordered before its parent datastore component.
Action: Change the load order to put parent component before child component or keep the load order knowing that it may result in error in loading due to missing primary record.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16121: Error: Target Load Order -- Load order is not consistent with processing graph from source to target. Please modify the graph or change the load order.
Cause: A target component is ordered before its source component.
Action: Change the load order to put source component before target component or change the mapping design.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16122: Cannot create physical design due to mapping validation errors: [0].
Cause: Validation errors.
Action: Fix the mapping.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16123: Node pushed upstream causes conflicts due to multiple upstream connections from different execution units. Pushed node=[0].
Cause: Illegal node push.
Action: Do not push the node to this location.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic
ODI-16124: Not allowed to reorder node {0}: {1}
  Cause: Illegal node push.
  Action: Do not push the node to this location.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic
ODI-16125: Not allowed to push node {0} past node {1}: {2}
  Cause: Illegal node push.
  Action: Do not push the node to this location.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic
ODI-16126: Physical graph re-ordering is causing a referencing problem for component: {0}.
  Cause: Illegal node push.
  Action: Do not push the node to this location.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic
ODI-16127: Cannot reorder component that is not a selector: {0}.
  Cause: Illegal node push.
  Action: Do not push the node to this location.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic
ODI-16128: Cannot reorder component that does not have at least one input and output connector point: {0}.
  Cause: Illegal node push.
  Action: Do not push the node to this location.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic
ODI-16129: Cannot reorder a component that has multiple downstream targets: {0}.
  Cause: Illegal node push.
  Action: Do not push the node to this location.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16130: Cannot reorder an outer join component: {0}.
   Cause: Illegal node push.
   Action: Do not push the node to this location.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16131: The node will not be moved.
   Cause: Illegal node push.
   Action: Do not push the node to this location.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16132: Cannot reorder node {0} downstream of {1}, since {1} has expression references to {0}.
   Cause: Illegal node push.
   Action: Do not push the node to this location.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16133: Cannot reorder node {0} upstream of {1}, since {0} has expression references to {1}.
   Cause: Illegal node push.
   Action: Do not push the node to this location.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16134: Cannot set journalizing for datastore component {0}, since its bound datastore is not journalized.
   Cause: Cannot set journalizing since the bound datastore is not journalized.
   Action: Make sure the bound datastore is CDC enabled.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16135: File technology has limited capability to serve as a staging area.
Consider switching the staging area to another technology, such as in-memory engine.
Cause: File technology unit set as staging area.
Action: Set staging area to non-file technology.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16136: Join {0} has type {1}, so its non-blank {2} will be ignored.
Cause: With Join Type CROSS or NATURAL, the Join Condition will be ignored.
Action: Check the Join Type. If correct, set the Join Condition to blank.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16137: IKM {0} is selected for physical node {1}, but the corresponding logical component {2} of reusable mapping {3} is not marked as derived sub-select.
Cause: An IKM is used for extraction of a physical node, but derived sub-select is not enabled.
Action: Change the KM selected for the physical node, or mark the logical component as derived sub-select.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16138: Internal error occurred during mapping metadata conversion. Please check the original 11g interface to see if it is complete and valid. Only interfaces that pass validation are supported during the upgrade process. If the 11g interface validates properly (in 11g) and then fails to upgrade cleanly, you should contact Oracle Support. The detailed exceptions information can be found in log file.
Cause: Internal error occurred or unexpected exception received during mapping metadata conversion.
Action: Make sure the original 11g interface is valid. If the 11g interface validates properly (in 11g) and then fails to upgrade cleanly, you should contact Oracle Support. The detailed exceptions information can be found in log file.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16139: Execution unit {0} does not have a location.
Cause: The execution unit does not have a logical schema selected for its location.
Action: Select a logical schema as the location of the execution unit.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic
ODI-16140: Mapping component [0] must have a connection for input connector point [1].
Cause: An input connector point is not connected to another map component.
Action: Connect the input connector point to a source component.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16141: Mapping component [0] must have a connection for output connector point [1].
Cause: An output connector point is not connected to another map component.
Action: Connect the output connector point to a downstream component.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16142: Cannot bind a datastore component to file model datastore [0], use a file component instead.
Cause: Attempt to bind a datastore component to a datastore with file technology.
Action: Use a file component instead, and bind the file object to it.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16143: Cannot bind a file component to non-file model datastore [0], use a datastore component instead.
Cause: Attempt to bind a file component to a datastore with non-file technology.
Action: Use a datastore component instead, and bind the file object to it.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16144: The expression cannot be pushed to execution unit [0] because its references would be out of scope.
Cause: Illegal push-to target execution unit for expression.
Action: Do not push the expression to this execution unit.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16145: The lookup match nth rows for lookup component [0] should be positive number.
Cause: The match nth row property has not been correctly configured for lookup component.
Action: Correct the match nth row property for lookup component.
Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16146: The join condition for component {0} contains a filter expression that does not reference a different schema on each side of the equality operator: {1}. Filter expressions may not behave as expected in joins.
Cause: The join condition contains a filter expression. Filter expressions may not be effective in joins, and are inherently problematic in outer joins.
Action: Move the extra filter condition to a separate filter component to eliminate interaction with the join.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16147: The join condition for component {0} does not contain an identifiable equality operator to join the input sources: {1}.
Cause: The join condition may be missing an equality operator needed to match rows when joining the input sources.
Action: Check the join expression for a valid equality operator.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16148: The size of map attribute {0} ({1}) is greater than the size of attribute {2} ({3}), to which it is mapped. Truncation or runtime errors are possible, depending on the technology.
Cause: A map attribute is mapped to an attribute of smaller size. This may result in data truncation or DML errors.
Action: Verify the size of both attributes and make any adjustments necessary to avoid truncation. Add an expression to explicitly truncate the data if necessary.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16149: For lookup component {0}, the option {1} for non matching rows may only be selected if option {2} is selected for multiple matching rows.
Cause: The no match rows property has not been correctly configured for lookup component. It may only be used if the multiple matching rows option specifies all rows.
Action: Correct the no match rows property for lookup component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16150: Multiple non-ANSI outer joins exist within a dataset for the same datastore {0}.
**Cause:** A datastore is outer joined to more than one datastore. This may result in execution errors.

**Action:** Create joins outside of datasets.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16151: The context value {0} for map component {1} does not map to a physical location.**

**Cause:** The forced context value of a data storage component, combined with the model and logical schema, does not map to a physical schema. A map physical design cannot be created.

**Action:** Use the logical schema editor or SDK to set a physical schema for the chosen component context.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16152: Error processing KM target expression for mapping: {0}, KM line: {1}, KM error: {2}**

**Cause:** An exception was thrown during KM processing of the target expression for a particular line.

**Action:** Review the KM line and error to determine the cause.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16153: Error processing KM source expression for mapping: {0}, KM line: {1}, KM error: {2}**

**Cause:** An exception was thrown during KM processing of the source expression for a particular line.

**Action:** Review the KM line and error to determine the cause.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16154: No expressions have been defined on the attributes for map component {0}.**

**Cause:** A target datastore is connected, but none of its attributes have expressions defined.

**Action:** Create expressions to map one or more attributes to a source.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic
ODI-16155: Join or Lookup component {0} is inactive. Components joining sources must be active.

Cause: A join or lookup component has been set to inactive. Components which join sources must be active because all sources will not be in scope without the join.

Action: Set the component to active.

Level: 32

Type: SET_AT_RUNTIME

Impact: Programmatic

ODI-16156: Join type {0} in {1} cannot be supported due to circular relationships in Dataset {2}.

Cause: If a circle of relationships exist in a Dataset, one of the joins must be reduced to a filter. The join type defined on it could be lost.

Action: Examine the logic in the Dataset and try to reduce the number of outer joins if possible as the currently specified logic in Dataset cannot be translated to a SQL query.

Level: 32

Type: SET_AT_RUNTIME

Impact: Programmatic

ODI-16157: Ambiguous expression reference due to split path. {0} Expression: {1}, Available paths: {2}

Cause: The connection path to the referenced attribute is split and the reference does not include a path specifier with a sufficient number of connector names to specify an unambiguous path.

Action: Add a path specifier qualifier to the expression reference.

Level: 32

Type: SET_AT_RUNTIME

Impact: Programmatic

ODI-16158: Component in path specifier has multiple output connector points. {0} Expression: {1}, Component={2}

Cause: A map component specified in the expression path specifier has multiple output connector points.

Action: A specific connector point must be specified in the path specifier.

Level: 32

Type: SET_AT_RUNTIME

Impact: Programmatic

ODI-16159: Path specifier contains nonexistent identifier. {0} Expression: {1}, Identifier={2}

Cause: An identifier specified in the expression path specifier is not found in the set of upstream components or connector points.

Action: Fix the path specifier in the expression.

Level: 32
ODI-16160: Path specifier contains out-of-scope identifier. {0} Expression: {1}, Identifier={2}  
Cause: An identifier specified in the expression path specifier is not found in the set of upstream components or connector points.  
Action: Fix the path specifier in the expression.

Level: 32

ODI-16161: No matching path can be found. {0} Expression: {1}  
Cause: A path specifier is included in the expression, but it does not match any actual path in the map.  
Action: Fix the path specifier in the expression.

Level: 32

ODI-16162: Final parsing of {0} command {0} failed with exception {1}.  
Cause: A final parsing of the command was performed and hit an error.  
Action: Report as an ODI bug.

Level: 32

ODI-16163: Cannot parse identifier "{0}" because there are multiple instances of "{1}" in the mapping.  
Cause: An identifier in the expression can not be parsed because it refers to multiple components.  
Action: Fix the identifier in the expression.

Level: 32

ODI-16164: Internal Error: Cannot find input query select item with matching path specifier for expression cross reference: {0}  
Cause: The code generator cannot generate code for the map expression cross reference because the upstream query does not include the referenced object, with a matching path specifier.  
Action: Fix the expression.

Level: 32
ODI-16165: An attribute input expression for a set component must reference upstream attributes through only one input connector point. Attribute: {0}.

Cause: An attribute input expression for a set component must reference upstream attributes through only one input connector point.

Action: Check input expressions for the set component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16166: Cannot parse the syntax of user defined function or language element {0}: {1}.

Cause: The syntax text of the user defined function or language element cannot be parsed by the code generator.

Action: Check the syntax text of the user defined function or language element.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16167: The function call {0} does not match the number of parameters defined for user defined function or language element {1}.

Cause: The function call in the expression text does not match the number of parameters of the user defined function or language element.

Action: Check the function call in the expression.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16168: Invalid parameter syntax in the syntax text of user defined function or language element {0}: {1}.

Cause: One of the parameters in the syntax text contains invalid parameter syntax.

Action: Check the syntax text of the user defined function or language element.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16169: Invalid parameter syntax in the implementation text of user defined function or language element {0}: {1}.

Cause: One of the parameters in the implementation text contains invalid parameter syntax.

Action: Check the implementation text of the user defined function or language element.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic
ODI-16170: Cannot locate calling parameter \{0\} in implementation text from the syntax text of user defined function or language element \{1\}.

**Cause:** The calling parameter in the implementation text does not match any parameters that are defined in the syntax of the user defined function or language element.

**Action:** Check the implementation text of the user defined function or language element.

**Level:** 32
**Type:** SET_AT_RUNTIME
**Impact:** Programmatic

ODI-16171: KM \{0\} is not valid for physical node \{1\}. The default KM is \{2\}.

**Cause:** The KM being set is not valid for the physical node.

**Action:** Set the KM using the default KM or another compatible KM.

**Level:** 32
**Type:** SET_AT_RUNTIME
**Impact:** Programmatic

ODI-16172: An expression in map component \{0\} cannot be resolved because it references an input signature which could not be redirected to an upstream expression. Input connector connections may be incorrect.

**Cause:** An expression references an input signature, but it could not be redirected to an expression upstream of the input signature. Invalid input connector point connections are the most common cause.

**Action:** Check all input connector points for correct upstream connections.

**Level:** 32
**Type:** SET_AT_RUNTIME
**Impact:** Programmatic

ODI-16173: Map component \{0\}, attribute \{1\} contains an expression which references a window function. Window functions are not valid for technology \{2\}.

**Cause:** An attribute expression references a window or analytical function, but the technology does not support window functions.

**Action:** Check the technology editor for window function support, and change the setting if the technology supports window functions. If not, the window function may not be used in the expression.

**Level:** 32
**Type:** SET_AT_RUNTIME
**Impact:** Programmatic

ODI-16174: Map component \{0\}, property \{1\} contains an expression which references a window function. Window functions are not valid for technology \{2\}.

**Cause:** A property expression references a window or analytical function, but the technology does not support window functions.
**Action:** Check the technology editor for window function support, and change the setting if the technology supports window functions. If not, the window function may not be used in the expression.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16175:** Aggregate component {0}, attribute {1} contains an expression which references a window function. Window functions used within an aggregate component may result in errors or unexpected results.  
**Cause:** An attribute expression in an aggregate component references a window or analytical function. Due to rowset cardinality differences between window functions and aggregate functions, window functions may be problematic in the context of an aggregation.  
**Action:** Use window functions within a separate expression component.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16176:** The filter condition for component {0} references a window function. Window function calls are not valid in filter conditions.  
**Cause:** A filter condition references a window or analytical function. Window functions are not valid in filter conditions.  
**Action:** Use window functions within a separate expression component upstream of the filter component.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16177:** The join condition for component {0} references a window function. Window function calls are not valid in join conditions.  
**Cause:** A join condition references a window or analytical function. Window functions are not valid in join conditions.  
**Action:** Use window functions within a separate expression component upstream of the join component.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16178:** The lookup condition for component {0} references a window function. Window function calls are not valid in lookup conditions.  
**Cause:** A lookup condition references a window or analytical function. Window functions are not valid in lookup conditions.  
**Action:** Use window functions within a separate expression component upstream of the lookup component.

**Level:** 32  
**Type:** SET_AT_RUNTIME
Impact: Programmatic

ODI-16179: The subquery filter condition for component {0} references a window function. Window function calls are not valid in subquery filter conditions.

Cause: A subquery filter condition references a window or analytical function. Window functions are not valid in subquery filter conditions.

Action: Use window functions within a separate expression component upstream of the subquery filter component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16180: The split condition for component {0}, output connector point {1} references a window function. Window function calls are not valid in split conditions.

Cause: A split condition references a window or analytical function. Window functions are not valid in split conditions.

Action: Use window functions within a separate expression component upstream of the split component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16181: The expression for attribute {0}, connector point {1}, references a window function. Window functions may not be referenced in the subquery part of a subquery filter.

Cause: An expression for an attribute that participates in the subquery part of a subquery filter references a window or analytical function. Window functions are not valid in expressions which are part of the filter in a subquery filter.

Action: Use window functions within a separate expression component upstream of the subquery filter component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16182: The expression for {0} references a native sequence, which is not supported for technology {1}.

Cause: An expression for an attribute or property references a native sequence, but the execution technology does not support native sequences.

Action: Remove the native sequence reference from the expression.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16183: Lookup component {0} specifies first, last, or nth row matching, but no order-by modifiers have been set on the attributes.

Cause: No order by modifiers have been set for the lookup attributes.

Action: Set an ASC or DESC order by modifier on one of the lookup attributes.
ODI-16184: Unable to fetch data from datastore {0}. The model {1} does not have a reverse-engineering context set.

**Cause:** Context associated with the logical schema does not exist.

**Action:** Check the context associated with the logical schema.

ODI-16185: {0} does not support single row selection from multiple matching rows.

**Cause:** The database technology does not support the analytical functions used to select a particular matching row.

**Action:** Select a lookup type which does not select a specified single row.

ODI-16186: Input attribute {0} has no expression, and no default value is defined in the corresponding input signature attribute. The input must have either a connected expression or a default value expression.

**Cause:** The input attribute expression is not set and has no default value defined in the input signature attribute.

**Action:** Verify the expression or add a default value in the input signature attribute expression.

ODI-16187: Dimension component {0} is not based on any dimension.

**Cause:** Dimension component is not based on any dimension.

**Action:** Dimension component should have base dimension.

ODI-16188: Dimension {1}, or its related structures on which component {0} is based, contains errors.

**Cause:** One or more errors were found in the dimension or related structures that this dimension component is based on. These errors must be resolved.

**Action:** Review the dimension and its related structures for possible errors.
**Impact:** Programmatic

ODI-16189: Dimension \{1\}, or its related structures on which component \{0\} is based, contains warnings.

**Cause:** One or more warnings were found in the dimension or related structures that this dimension component is based on.

**Action:** Review the dimension and its related structures for possible warnings.

**Level:** 32
**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

ODI-16190: In dimension component \{0\}, the parent natural key attribute \{2\} of level \{1\} does not have expression.

**Cause:** Parent natural key attribute does not have expression.

**Action:** Set the expressions for parent natural key attributes.

**Level:** 32
**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

ODI-16191: In dimension component \{0\}, the natural key attribute \{2\} of level \{1\} does not have expression.

**Cause:** Natural key attribute does not have expression.

**Action:** Set the expressions for natural key attributes.

**Level:** 32
**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

ODI-16192: In dimension component \{0\}, no updatable attributes for level \{1\} have an expression. An updatable attribute is a non key attribute.

**Cause:** No updatable attribute has an expression.

**Action:** Set the expressions for updatable attributes.

**Level:** 32
**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

ODI-16193: The value \{0\} for SCD type 2 gap is not valid.

**Cause:** The value for SCD type 2 gap is not valid.

**Action:** Set valid value for SCD type 2 gap.

**Level:** 32
**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

ODI-16194: The value \{0\} for SCD type 2 gap unit is not valid.

**Cause:** The value for SCD type 2 gap unit is not valid.

**Action:** Set valid value for SCD type 2 gap unit.
Level: 32
Type: SET_AT RUNTIME
Impact: Programmatic

ODI-16195: Cube component [0] is not based on any cube.
    Cause: A cube component must be based on a cube to be viable.
    Action: Associate the cube component to a cube.

Level: 32
Type: SET_AT RUNTIME
Impact: Programmatic

ODI-16196: Cube [0], or its related structures on which component [1] is based, contains errors.
    Cause: One or more errors were found in the cube or related structures (such as measures, dimensions, bound tables, etc.) that this cube component is based on. These errors must be resolved.
    Action: Review the cube and its related structures, such as dimensions and bound datastores, for possible errors.

Level: 32
Type: SET_AT RUNTIME
Impact: Programmatic

ODI-16197: Cube [0], or its related structures on which component [1] is based, contains warnings.
    Cause: One or more warnings were found in the cube or related structures (such as measures, dimensions, bound tables, etc.) that this cube component is based on.
    Action: Review the cube and its related structures, such as dimensions and bound datastores, for possible warnings.

Level: 32
Type: SET_AT RUNTIME
Impact: Programmatic

ODI-16198: The dimension key attribute [0] in cube component [1] does not have an expression.
    Cause: The dimension key attribute in the cube component must have an expression.
    Action: Set an expression on each dimension key attribute.

Level: 32
Type: SET_AT RUNTIME
Impact: Programmatic

ODI-16199: The null or invalid orphan policy for the base cube [0] is set to "default dimension record", but the "enable source aggregation" property on cube component [1] is set to false.
    Cause: The default dimension record orphan policy is set for the cube object, but source aggregation is not enabled on cube component.
**Action:** If the default dimension record orphan policy is set for the cube object then it is recommended that source aggregation also be enabled on cube component. Otherwise the orphan management processing may produce multiple fact rows with the same default dimension references, which will cause an "unstable rowset" execution error in the database, since the dimension references are used as update match attributes for updating the fact table.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16200:** At least one measure attribute in cube component {0} should have an expression.  
**Cause:** At least one measure attribute in the cube component should have an expression.  
**Action:** Set the expressions on the measure attributes.

**Level:** 32  
**Type:** SET_AT/Runtime  
**Impact:** Programmatic

**ODI-16201:** Not a known integration type for component {0}.  
**Cause:** The integration type for the cube component is invalid.  
**Action:** Set a valid integration type for the cube component.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16202:** Not a valid attribute of component {0} or the attribute is not a measure.  
**Cause:** The specified attribute is not owned by the cube component or the attribute is not a measure.  
**Action:** Choose a measure attribute of the cube component.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16203:** Not a valid attribute of component {0} or the attribute is not represented as a dimension natural key identifier.  
**Cause:** The specified attribute is not owned by the cube component or the attribute is not a dimension natural key identifier.  
**Action:** Choose a attribute of the cube component which is represented as a dimension natural key identifier.

**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Programmatic

**ODI-16204:** Dimension {0}, or its related structures on which component {1} is based, contains errors.
Cause: One or more errors were found in the dimension or related structures that this dimension component is based on. These errors must be resolved.

Action: Review the dimension and its related structures.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16205: The source aggregation function is not set for measure attribute: \{0\}, but the source aggregation is enabled on cube component \{1\}.

Cause: The source aggregation on the cube component is enabled, but no source aggregation function is specified on the measure attribute.

Action: Specify a source aggregation function on the measure attribute or disable the source aggregation on the cube component.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16207: Not a known integration type for component \{0\}.

Cause: Referencing a sequence from a different project is invalid.

Action: Reset the dimension to use a sequence owned by the same project or a global sequence.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16208: In dimension \{0\} level \{1\}, level attribute \{2\} is defined as surrogate key, but its type is not NUMERIC.

Cause: The level attribute is defined as surrogate key, but its datatype is not NUMERIC.

Action: If the level attribute is defined as surrogate key, its datatype should be NUMERIC.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic

ODI-16209: Dimension \{0\} has some levels that use surrogate key but some that do not.

Cause: The dimension has some levels that use surrogate key but some that do not.

Action: Surrogate key usage must be consistent within a dimension. Modify the dimension to ensure all levels have a surrogate key or no levels have a surrogate key.

Level: 32
Type: SET_AT_RUNTIME
Impact: Programmatic
ODI-16210: In dimension {0}, level {1} does not use surrogate key and the natural key has more attribute defined. This is not supported by the dimension loading pattern.

**Cause:** The level does not use surrogate key and the natural key has more than one attribute defined. This is currently not supported by the dimension loading pattern.

**Action:** If no surrogate key is defined, the natural key should have only one attribute defined. Update the level accordingly.

**Level:** 32
**Type:** SET_AT_RUNTIME
**Impact:** Programmatic

ODI-16211: Dimension {0} uses surrogate key but is not associated with a sequence.

**Cause:** The dimension uses a surrogate key but is not associated with a sequence.

**Action:** Associate the dimension with a sequence or do not use a surrogate key.

**Level:** 32
**Type:** SET_AT_RUNTIME
**Impact:** Programmatic

ODI-16212: In dimension component {0} no SCD2 trigger attributes in level {1} have assignment expressions.

**Cause:** In dimension component {0} no SCD2 trigger attributes in level {1} have assignment expressions.

**Action:** Ensure one or more SCD2 trigger attributes have assignment expressions.

**Level:** 32
**Type:** SET_AT_RUNTIME
**Impact:** Programmatic

ODI-16222: In dimension {0} level {1}, level attribute {2} set the surrogate key bound column the same with primary key.

**Cause:** The dimension level's surrogate key is bound to the primary key column. For this dimension pattern, that is not allowed.

**Action:** For this dimension pattern, a surrogatekey cannot be bound to a primary key column.

**Level:** 32
**Type:** SET_AT_RUNTIME
**Impact:** Programmatic

ODI-17500: Invalid old password.

**Cause:** Old password did not match current password.

**Action:** Provide the correct password.

**Level:** 32
**Type:** ERROR
**Impact:** Programmatic

ODI-17501: Temporary table has no column.
Cause: No column have been defined for the temporary table.
Action: Define a column mapping to the temporary table.

Level: 32
Type: ERROR
Impact: Other

ODI-17502: No next value returned.
Cause: No sequence next value was found for given context code.
Action: Verify sequence definition or context code.

Level: 32
Type: ERROR
Impact: Other

ODI-17503: Internal error: object ConnectConnection
Cause: Missed connection.
Action: Try reconnect.

Level: 32
Type: ERROR
Impact: Other

ODI-17504: An ordered join references the same table twice (directly or indirectly).
Cause: A same table was referenced twice by a join.
Action: Check interface definition.

Level: 32
Type: ERROR
Impact: Other

ODI-17505: An ordered join references the same table twice through another join.
Cause: A join was referencing the same table twice through another join.
Action: Check interface definition.

Level: 32
Type: ERROR
Impact: Other

ODI-17506: Variable has no value
Cause: Variable had no value.
Action: Provide value for variable.

Level: 32
Type: ERROR
Impact: Other

ODI-17507: Key does not exist
Cause: Key was unknown.
Action: Provide a known key.
Level: 32
Type: ERROR
Impact: Other

ODI-17508: No conversion for data type "[0]" from source technology "[1]" to destination technology "[2]"
Cause: No data type conversion between technology was found.
Action: Define corresponding data type conversion.

Level: 32
Type: ERROR
Impact: Other

ODI-17509: Query to access value for specific sequence [0] has failed. Query="[1]"
Cause: Query for sequence has failed.
Action: Check sequence definition.

Level: 32
Type: ERROR
Impact: Other

ODI-17510: Driver does not exist.
Cause: Driver was not found.
Action: Check repository.

Level: 32
Type: ERROR
Impact: Other

ODI-17511: No value to be set to variable "[0]".
Cause: No value was returned to be set to the variable.
Action: Check variable value.

Level: 32
Type: ERROR
Impact: Other

ODI-17512: Sequence is already locked
Cause: The sequence was already locked.
Action: Unlock the sequence.

Level: 32
Type: ERROR
Impact: Other

ODI-17513: Variable "[0]" does not exist.
Cause: Variable was not found.
Action: Check variable.

Level: 32
Type: ERROR
Impact: Other

ODI-17514: Unrecognized Oracle Data Integrator built-in function: {0}
Cause: Oracle Data Integrator built-in function was not recognized.
Action: Check function syntax.
Level: 32

Type: ERROR
Impact: Other

ODI-17515: Invalid loading command (INSERT,UPDATE...).
Cause: Loading command was invalid.
Action: Check loading command.
Level: 32

Type: ERROR
Impact: Other

ODI-17516: Internal error within the connection list
Cause: Internal error within the connection list.
Action: Try again.
Level: 32

Type: ERROR
Impact: Other

ODI-17517: Error during task interpretation. Task: {0} {1} Text: {2}.
Cause: A task interpretation error has occurred.
Action: Check tasks and try again.
Level: 32

Type: ERROR
Impact: Other

ODI-17518: Error while interpreting the user name.
Cause: User name interpretation has failed.
Action: Check user name.
Level: 32

Type: ERROR
Impact: Other

ODI-17519: Error while interpreting the URL
Cause: URL interpretation has failed
Action: Check URL.
Level: 32

Type: ERROR
Impact: Other
ODI-17520: Error while interpreting the password
  Cause: Password interpretation has failed.
  Action: Check password.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17521: Error while interpreting the driver
  Cause: Driver interpretation has failed.
  Action: Check driver.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17522: Empty column name are not allowed
  Cause: A empty column name was found.
  Action: Fill column name.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17523: There is no connection for this logical schema / context pair: {0} / {1}.
  Cause: No connection was found for this logical schema / context pair.
  Action: Check schema and context assignment.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17524: Cannot set an empty alias for a source table.
  Cause: Source table’s alias was empty.
  Action: Fill alias of source table.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17525: Cannot set an empty source set name.
  Cause: Source set name was empty.
  Action: Fill alias of a source table.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17526: Cannot set Longc value in a PopCol having a column
  Cause: Cannot set Longc value in a PopCol having a column.
Action: Check interface’s columns.
Level: 32
Type: ERROR
Impact: Other

ODI-17527: Cannot set SourceDt value in a PopCol having a column
Cause: Cannot set SourceDt value in a PopCol having a column.
Action: Check interface’s columns.
Level: 32
Type: ERROR
Impact: Other

ODI-17528: Cannot set Scalec value in a PopCol having a column
Cause: Cannot set Scalec value in a PopCol having a column.
Action: Check interface’s columns.
Level: 32
Type: ERROR
Impact: Other

ODI-17529: Reference check failure
Cause: Reference check has failed.
Action: Check control conditions.
Level: 32
Type: ERROR
Impact: Other

ODI-17530: Incomplete join may result in partial cross join
Cause: An incomplete join was found.
Action: Check joins.
Level: 32
Type: ERROR
Impact: Other

ODI-17531: KM already encrypted.
Cause: KM has been already encrypted.
Action: Skip encryption.
Level: 32
Type: ERROR
Impact: Other

ODI-17532: KM not encrypted.
Cause: KM was not encrypted.
Action: Check KM.
Level: 32
Type: ERROR
Impact: Other

ODI-17533: Clause set to cross join on a technology that does not support cross joins.
Cause: Technology did not support cross joins.
Action: Correct joins.

Level: 32
Type: ERROR
Impact: Other

ODI-17534: Clause set to full join on a technology that does not support full joins.
Cause: Technology did not support full joins.
Action: Correct joins.

Level: 32
Type: ERROR
Impact: Other

ODI-17535: Clause set to outer join on a technology that does not support left outer joins or right outer joins.
Cause: Technology did not support left outer joins.
Action: Correct joins.

Level: 32
Type: ERROR
Impact: Other

ODI-17536: Incomplete clause (Missing order number).
Cause: Order number was missing.
Action: Correct clause.

Level: 32
Type: ERROR
Impact: Other

ODI-17537: Incomplete clause (table1 and/or table2 must be set).
Cause: Table1 and/or table2 were undefined.
Action: Set clause’s table1 and/or table2 tables.

Level: 32
Type: ERROR
Impact: Other

ODI-17538: Filter is not properly set (The table must be defined)
Cause: The table must have been set.
Action: Set filter’s table.
Level: 32
Type: ERROR
Impact: Other
ODI-17539: Clause is ordered on a technology that does not support it
  Cause: Technology did not support ordering.
  Action: Remove ordering.

Level: 32
Type: ERROR
Impact: Other
ODI-17540: Connection is not set for this source set {0}.
  Cause: Source set’s connection was not set.
  Action: Set connection.

Level: 32
Type: ERROR
Impact: Other
ODI-17541: Method SnpTrt::getAllTrtOfTypeForTechnosAndProject requires not null parameters for technologies
  Cause: Method requires not null parameters
  Action: Specify correct parameters.

Level: 32
Type: ERROR
Impact: Other
ODI-17542: Sequence must be locked before using this function
  Cause: Sequence was not locked.
  Action: Lock sequence and try again.

Level: 32
Type: ERROR
Impact: Other
ODI-17543: Technology does not support joins
  Cause: Technology did not support joins.
  Action: Check technology and/or joins.

Level: 32
Type: ERROR
Impact: Other
ODI-17544: This Technology does not support the WHERE clause
  Cause: Technology did not support the WHERE clause
  Action: Check technology and/or clause.
Type: ERROR
Impact: Other

ODI-17545: Technology not set for this source set [0]
Cause: Source set’s technology was undefined.
Action: Set technology.

Level: 32

Type: ERROR
Impact: Other

ODI-17546: Specified variable not found in the Repository
Cause: Variable was not found in the Repository.
Action: Define variable and try again.

Level: 32

Type: ERROR
Impact: Other

ODI-17547: Data type "[0]" for the technology "[1]" does not exist.
Cause: Data type for the technology did not exist.
Action: Check data type and/or technology.

Level: 32

Type: ERROR
Impact: Other

ODI-17548: The file reverse-engineering is only possible for delimited files.
Cause: The file reverse-engineering was performed against a not delimited file.
Action: Use delimited files.

Level: 32

Type: ERROR
Impact: Other

ODI-17549: Source data type "[0]" for the technology "[1]" does not exist.
Cause: Source data type was not found.
Action: Check data type and/or technology.

Level: 32

Type: ERROR
Impact: Other

ODI-17550: Missing default Physical Schema for Data Server "[0]"
Cause: Default Physical Schema was undefined.

Level: 32

Type: ERROR
Impact: Other
ODI-17551: Duplicate clause order numbers
  Cause: Duplicated order numbers were found.
  Action: Check clause definition.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17552: Duplicate join order numbers
  Cause: Duplicated join order numbers were found.
  Action: Check join.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17553: Exceeded the maximum number of errors allowed.
  Cause: The maximum number of errors allowed were exceeded.
  Action: Check maximum error numbers.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17554: Agent "{0}" does not exist.
  Cause: Agent was not found.
  Action: Check agent definition.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17555: You cannot unlock this object. Only the lock owners and Supervisors can unlock objects.
  Cause: An attempt was made to unlock objects that were locked by another user.
  Action: Login as Supervisor or as the lock owners and try again.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17556: Error during decryption of text.
  Cause: Text decryption has failed.
  Action: Try again.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17557: No condition defined for this rule.
Cause: No condition have been defined for this rule.
Action: Define conditions.

Level: 32
Type: ERROR
Impact: Other

ODI-17558: The field for this rule is not specified.
Cause: The field was unspecified.
Action: Specify field for this rule.

Level: 32
Type: ERROR
Impact: Other

ODI-17559: The operator for this rule is not specified.
Cause: The operator was unspecified.
Action: Specify operator for this rule.

Level: 32
Type: ERROR
Impact: Other

ODI-17560: The value to test is not defined.
Cause: The value to test was not defined.
Action: Specify value.

Level: 32
Type: ERROR
Impact: Other

ODI-17561: This operator is not supported.
Cause: This operator was not supported.
Action: Correct operator.

Level: 32
Type: ERROR
Impact: Other

ODI-17562: This operator cannot be used with this field.
Cause: The operator could not be used with the given field.
Action: Correct operator.

Level: 32
Type: ERROR
Impact: Other

ODI-17563: There is no work repository matching the name "[0]".
Cause: Work repository was not found.
Action: Check work repository with the given name exists.
Level: 32
Type: ERROR
Impact: Other

ODI-17564: More than one work repository found with the name "[0]" for this master repository.
Cause: More than one work repository with the specified name was found for this master repository.
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-17565: Scenario has been already encrypted. No encryption was performed.
Cause: Scenario has been already encrypted.
Action: Decrypt and try again.

Level: 32
Type: ERROR
Impact: Other

ODI-17566: Scenario is not encrypted. No decryption was performed.
Cause: Scenario was not encrypted.
Action: Check Scenario.

Level: 32
Type: ERROR
Impact: Other

ODI-17567: A Scenario generated from a Variable cannot be encrypted or decrypted.
Cause: An attempt was made to encrypt or decrypt a Scenario generated from a Variable.
Action: Change Scenario's source component.

Level: 32
Type: ERROR
Impact: Other

ODI-17568: Could not connect to the database referenced by the context and the logical schema
Cause: Connection to the database failed.
Action: Check context and logical schema.

Level: 32
Type: ERROR
Impact: Network

ODI-17569: Unable to update sequence's next value.
Cause: Updating sequence was not possible.
Action: Check sequence definition.
Level: 32
Type: ERROR
Impact: Other

ODI-17570: Your text is too long. Please shorten it or choose the "LONG TEXT" datatype.
Cause: Text was too long.
Action: Shorten the text or choose the LONG TEXT data type.
Level: 32
Type: ERROR
Impact: Other

ODI-17571: Password does not respect the following rule: "[0]".
Cause: The password did not respect the rule.
Action: Choose another password.
Level: 32
Type: ERROR
Impact: Security

ODI-17572: This SnpFfValuee does not exist.
Cause: Value was not found.
Action: Check FlexField value.
Level: 32
Type: ERROR
Impact: Other

ODI-17573: This SnpFfValuem does not exist.
Cause: Value was not found.
Action: Check FlexField value.
Level: 32
Type: ERROR
Impact: Other

ODI-17574: This SnpFfValuew does not exist.
Cause: Value was not found.
Action: Check FlexField value.
Level: 32
Type: ERROR
Impact: Other

ODI-17575: SnpLicense does not exist.
Cause: SnpLicense was not found.
Action: Check License.
Level: 32  
Type: ERROR  
Impact: Other

ODI-17576: Unknown actual constraint type for an interface constraint.  
Cause: Interface constraint type was unknown.  
Action: Check constraint type.

Level: 32  
Type: ERROR  
Impact: Other

ODI-17577: Unknown variable data type.  
Cause: Variable data type was unknown.  
Action: Check variable data type.

Level: 32  
Type: ERROR  
Impact: Other

ODI-17578: Name "{0}" is already used.  
Cause: Name was already used.  
Action: Use another name or change mode of import.

Level: 32  
Type: ERROR  
Impact: Other

ODI-17579: Type of clause is not set.  
Cause: Type of clause was not set.  
Action: Set type of clause.

Level: 32  
Type: ERROR  
Impact: Other

ODI-17580: Type of join is not set.  
Cause: Type of join was not set.  
Action: Set type of join.

Level: 32  
Type: ERROR  
Impact: Other

ODI-17581: A non ordered clause is passed to the construction of ordered joins trees method.  
Cause: A non ordered clause was passed to the construction of ordered joins trees method.  
Action: Check clauses.
Level: 32
Type: ERROR
Impact: Other

ODI-17582: Missing order number for an ordered clause.
Cause: Clause order was not set.
Action: Set the clause order.

Level: 32
Type: ERROR
Impact: Other

ODI-17583: More than one unique constraint associated to an interface constraint.
Cause: More than one unique constraint associated to an interface constraint was found.
Action: Check constraints.

Level: 32
Type: ERROR
Impact: Other

ODI-17584: URL does not exist.
Cause: URL was not found.
Action: Check URL.

Level: 32
Type: ERROR
Impact: Other

ODI-17585: Key cannot be checked.
Cause: Key could not be checked.
Action: Check key definition.

Level: 32
Type: ERROR
Impact: Other

ODI-17586: Field separator is mandatory for a delimited file.
Cause: Field separator was missing.
Action: Check separator and/or file type.

Level: 32
Type: ERROR
Impact: Other

ODI-17587: Object name "[0]" is too long for the technology "[1]" (Logical schema : "[2]" ; Context Code : ":[3]"")
Cause: Object name was too long.
Action: Correct object name.
Level: 32
Type: ERROR
Impact: Other

ODI-17588: Unable to load work repository info.
Cause: Work repository was not found.
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-17589: Logical schema has not been specified for sequence "](0)"
Cause: Logical schema was not specified.
Action: Specify logical schema.

Level: 32
Type: ERROR
Impact: Other

ODI-17590: Code (0) for model "](1)" is already used by another model.
Cause: An already used code was assigned.
Action: Change code for model.

Level: 32
Type: ERROR
Impact: Other

ODI-17591: Name "](0)" is already used.
Cause: A name already used was assigned.
Action: Change name.

Level: 32
Type: ERROR
Impact: Other

ODI-17592: Object is not in execution work repository.
Cause: Object was not in execution work repository.
Action: Check object and/or repository.

Level: 32
Type: ERROR
Impact: Other

ODI-17593: Maximum number or source/target technologies exceeded. Current limit is (0).
Cause: Maximum number or source/target technologies was exceeded.
Action: Check limit and number of technologies.

Level: 32
Type: ERROR
Impact: Other

ODI-17594: Cannot encrypt already encrypted action.
Cause: This action has been already encrypted.
Action: Skip encryption.
Level: 32

ODI-17595: This action is not encrypted.
Cause: This action was not encrypted.
Action: Check parameters and try again.
Level: 32

ODI-17596: Query to retrieve value for native sequence "[0]" has failed Query="[1]"
Cause: Query has failed.
Action: Check query.
Level: 32

ODI-17597: Cannot mix ordered and non-ordered join syntax within a dataset for technology.
Cause: Mixed join not allowed within a dataset.
Action: Change all joins in dataset to same join syntax (either ordered or non-ordered).
Level: 32

ODI-17598: Non-ordered natural join is not supported.
Cause: Non-ordered natural join is not supported.
Action: Change natural join to use ordered syntax.
Level: 32

ODI-17599: Ordered inner join is not supported.
Cause: Ordered inner join is disabled for technology.
Action: Change join type.
Level: 32
Type: ERROR
Impact: Other
ODI-17600: Ordered left outer join is not supported.
  Cause: Ordered left outer join is disabled for technology.
  Action: Change join type.
  Level: 32
Type: ERROR
Impact: Other
ODI-17601: Ordered right outer join is not supported.
  Cause: Ordered right outer join is disabled for technology.
  Action: Change join type.
  Level: 32
Type: ERROR
Impact: Other
ODI-17602: Non-ordered full outer join is not supported.
  Cause: Non-ordered full outer join is not supported.
  Action: Change full outer join to use ordered syntax.
  Level: 32
Type: ERROR
Impact: Other
ODI-17603: Sql error checking a condition. {0}
  Cause: Sql error checking a condition.
  Action: Correct the Sql in the condition.
  Level: 32
Type: ERROR
Impact: Other
ODI-17604: Reference column isn't associated with this instance of reference.
  Cause: Reference column isn't associated with this instance of reference.
  Action: Check reference column.
  Level: 32
Type: ERROR
Impact: Programmatic
ODI-17605: Column is not associated to this datastore.
  Cause: Datastore doesn't have this column.
  Action: Check datastore and column.
  Level: 32
Type: ERROR
Impact: Programmatic
ODI-17606: [0] already belongs to another OdiDataStore.
   "Cause": Object belongs to another datastore.
   "Action": Check object and datastore.

   "Level": 32
   "Type": ERROR
   "Impact": Programmatic

ODI-17607: Parameter pReference is not an outbound reference for this OdiDataStore.
   "Cause": Parameter is not an outbound reference for OdiDataStore.
   "Action": Check parameter.

   "Level": 32
   "Type": ERROR
   "Impact": Programmatic

ODI-17608: Invalid technology for the given data type.
   "Cause": Invalid technology for the given data type.
   "Action": Check technology.

   "Level": 32
   "Type": ERROR
   "Impact": Other

ODI-17609: Invalid data type code.
   "Cause": Invalid data type code.
   "Action": Check data type code.

   "Level": 32
   "Type": ERROR
   "Impact": Programmatic

ODI-17610: Found NULL in STEP_TYPE.
   "Cause": Step type is null.
   "Action": Check step type.

   "Level": 32
   "Type": ERROR
   "Impact": Programmatic

ODI-17611: STEP_TYPE is not valid.
   "Cause": Step type isn't valid.
   "Action": Check step type.

   "Level": 32
   "Type": ERROR
   "Impact": Programmatic

ODI-17612: MultiConnectionSupported is not settable for [0].
**Cause:** MultiConnectionSupported is not settable.
**Action:** Check knowledge module.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-17613:** Cannot handle \{0\} of type \{1\}.
  **Cause:** Cannot handle object.
  **Action:** Check object's type.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-17614:** Unknown key type: \{0\}.
  **Cause:** Unknown key type.
  **Action:** Check key.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-17615:** The command is not an ODI Tool command.
  **Cause:** Wrong command.
  **Action:** Check command.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-17616:** No WorkTextOrig was found for ID: \{0\}.
  **Cause:** Invalid ID.
  **Action:** Check ID.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-17617:** Class descriptor for WorkTextOrig \{0\} is null.
  **Cause:** Descriptor is null.
  **Action:** Check class descriptors.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-17618:** Unable to deal with an AliasedColumnCrossRef with type \{0\}.
  **Cause:** Incorrect column type.
  **Action:** Check column type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17619: Unexpected CrossRef {0} type.
Cause: Incorrect CrossRef type.
Action: Check CrossRef.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17620: Object type is not valid.
Cause: Object type is not valid.
Action: Check object type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17621: Unable to manage crossRef for object from class [{0}].
Cause: Illegal object type.
Action: Check object type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17622: pSqlIndGroup is not a valid group type.
Cause: Invalid group type.
Action: Check type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17623: Too many parameters for function {0}, Object {1}, Language {2}.
Cause: Too many parameters.
Action: Check parameters count.

Level: 32
Type: ERROR
Impact: Other

ODI-17624: Missing parameter for function {0}, Object {1}, Language {2}.
Cause: Missing parameter.
Action: Check parameters count.

Level: 32
Type: ERROR
Impact: Other

ODI-17625: Only OdiColumns are currently supported for SnpsExpressionTag.
  Cause: Wrong column type.
  Action: Check column type.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17626: Cannot reassign a DataType.
  Cause: Technology has been assigned yet.
  Action: Check DataType
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17627: Inconsistent connection settings.
  Cause: Inconsistent connection settings.
  Action: Check connection settings type.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17628: Unknown IConnectionSettings implementation.
  Cause: Unknown IConnectionSettings implementation.
  Action: Check settings type.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17629: Connection Settings for repository server must be instanceof JdbcSettings.
  Cause: Wrong settings type.
  Action: Check settings type.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17630: Unknown OptionType.
  Cause: Unknown OptionType.
  Action: Check option type.
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-17631: The given class has no matching OverridenOptionOrig.
  Cause: The given class has no matching OverridenOptionOrig.
  Action: Check class.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17632: Unexpected variable type.
  Cause: Unexpected variable type.
  Action: Check variable type.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17633: {0} datatype is expected.
  Cause: Wrong value datatype.
  Action: Check value datatype.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17634: Parameter must have text; it must not be null or empty.
  Cause: Wrong parameter value.
  Action: Check parameter.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17635: Parameter must have text; it must not be null, empty, or blank.
  Cause: Wrong parameter value.
  Action: Check parameter.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17636: Parameter {0} must be false.
  Cause: Wrong parameter value.
  Action: Check parameter.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17637: Parameter must not be null.
  Cause: Wrong parameter value.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17638: Parameter [0] must be null.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17639: Parameter must be null.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17640: Parameter [0] must have text; it must not be null or empty.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17641: No [0] matches this IObject: {1}.
Cause: IObject is not matched.
Action: Check class.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17642: No Entity Class matches this Snp Class: {0}.
Cause: No Entity Class matches Snp Class.
Action: Check Entity Class.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17643: No Snp Class matches this Entity Class: {0}.
Cause: No Snp Class matches Entity Class.
Action: Check Snp Class.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17644: Unknown FlexFieldType.
Cause: Unknown FlexFieldType.
Action: Check FlexFieldType type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17645: Parameter must be instance of {0}.
Cause: Wrong parameter type.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17646: It is forbidden to use a variable of one project in a package of another project.
Cause: Variable and package have different parents.
Action: Check variable and package.

Level: 32
Type: ERROR
Impact: Other

ODI-17647: Unable to create the expression element, Object {0}, Language {1}.
Cause: Unable to create the expression element.
Action: Check expression parameters.

Level: 32
Type: ERROR
Impact: Other

ODI-17648: A mapping cannot be on the target.
Cause: A mapping cannot be on the target.
Action: Check execution location.

Level: 32
Type: ERROR
Impact: Other

ODI-17649: Can't create join between 2 source datastore from different DataSet.
Cause: Source datastores are from different DataSet.
Action: Correct join.

Level: 32
Type: ERROR
Impact: Other

ODI-17650: A {0} was expected as value since {1} is {2}.
  Cause: Wrong type.
  Action: Check type.
  Level: 32

Type: ERROR
Impact: Other

ODI-17651: Parameter {0} must be instance of [[1]].
  Cause: Wrong parameter class.
  Action: Check parameter class.
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-17652: Class {0} is not assignable to {1}.
  Cause: Inconsistent classes.
  Action: Check classes.
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-17653: {0} line isn't found.
  Cause: Missed line.
  Action: Check line count.
  Level: 32

Type: ERROR
Impact: Other

ODI-17654: Parameter {0} must not be null.
  Cause: Parameter must be not null.
  Action: Check parameter.
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-17655: Parameter {0} must be {1} characters long max.
  Cause: Parameter length is too long.
  Action: Check parameter length.
  Level: 32

Type: ERROR
Impact: Programmatic
ODI-17656: Can't define variable override for steps in exception tree.
   Cause: Step is in exception tree.
   Action: Check step and variable for consistency.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17657: Cannot add a reference column to an OdiReference with type [{0}].
   Cause: Reference type isn't ReferenceType.COMPLEX_REFERENCE.
   Action: Check reference type.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17658: Cannot change the target table because it's not a temporary datastore.
   Cause: Datastore isn't temporary.
   Action: Check target table and datastore.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17659: Cannot get the journalized columns of a non-journalized datastore.
   Cause: Datastore isn't journalized.
   Action: Check datastore.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-17660: Cannot set a clause on the target.
   Cause: Wrong execution location.
   Action: Check execution location.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17661: {0} is not supported for this Technology.
   Cause: Object is not supported for this Technology.
   Action: Check topology.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17662: Parameter {0} must have text; it must not be null, empty, or blank.
   Cause: Incorrect parameter.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17663: Parameter \{0\} must be uppercase.
Cause: Parameter is lower case.
Action: Check parameter case.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17664: Parameter \{0\} must not contain whitespaces.
Cause: Parameter contains whitespaces.
Action: Consider to replace whitespace with another symbol (e.g. underscore)

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17665: Column is not associated with this instance of OdiKey.
Cause: Column is not associated with instance of OdiKey.
Action: Check column and OdiKey.

Level: 32
Type: ERROR
Impact: Other

ODI-17666: Column is not present in the key.
Cause: Column is not present in the key.
Action: Check column and key.

Level: 32
Type: ERROR
Impact: Other

ODI-17667: Data type should be set before accessing value.
Cause: Illegal method usage.
Action: Set Data type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17668: Datastore already has a Primary Key.
Cause: Datastore already has a Primary Key.
Action: Remove the current primary key before adding a new one.
Level: 32
Type: ERROR
Impact: Other

ODI-17669: {0} must be set before calling method {1}.
  Cause: Illegal method usage.
  Action: Set actual value.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17670: Default implementation already exists.
  Cause: Default implementation already exists.
  Action: Check function implementation.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17671: {0} must not be negative.
  Cause: Wrong parameter value.
  Action: Set value to 0 or greater.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17672: FlexFields isn’t initialized.
  Cause: FlexFields isn’t initialized.
  Action: Call initFlexFields method first.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17673: Foreign key column's datastore must be equals to this reference's foreign datastore.
  Cause: Inconsistent datastores.
  Action: Check datastore.

Level: 32
Type: ERROR
Impact: Other

ODI-17674: IncrementValue is not set.
  Cause: IncrementValue is not set.
  Action: Set IncrementValue with setVariable method.

Level: 32
Type: ERROR
Impact: Programmatic

  Cause: Step status is not RUNNING.
  Action: Check step status.
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-17676: Invalid value type.
  Cause: Invalid value type.
  Action: Check value type.
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-17677: Cycle could be defined in {0} hierarchy.
  Cause: It is forbidden to define cycle in {0} hierarchy.
  Action: Check hierarchy.
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-17678: It is forbidden to fill a key with columns from another datastore.
  Cause: It is forbidden to fill a key with columns from another datastore.
  Action: Check datastore.
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-17679: It is forbidden to link two steps from different packages.
  Cause: Steps are from different packages.
  Action: Check steps and packages.
  Level: 32

Type: ERROR
Impact: Programmatic

ODI-17680: Line wasn't found.
  Cause: Line wasn't found.
  Action: Check procedure lines.
  Level: 32

Type: ERROR
Impact: Programmatic
ODI-17681: Maximum number of sessions must be positive.
  Cause: Wrong value.
  Action: Check maximum number.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17682: Method is not valid unless MultiConnectionSupported.
  Cause: MultiConnectionSupported is true.
  Action: Check procedure.

  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17683: Model must be in Customized mode.
  Cause: Wrong model mode.
  Action: Call setReverseType(ReverseType.CUSTOMIZED).

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17684: Name can't be set.
  Cause: Name is computed.
  Action: Check name.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17685: No {0} is defined for this model.
  Cause: Missed definition.
  Action: Define CKM for model.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17686: No valid {0} name was found from this qualified name.
  Cause: Valid name wasn't found.
  Action: Check qualified name.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-17687: No valid qualified name was provided.
  Cause: Name is invalid.
Action: Check qualified name.
Level: 32
Type: ERROR
Impact: Other

ODI-17688: OdiScenario is undefined.
   Cause: OdiScenario is undefined.
   Action: Check OdiScenario definition.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-17689: Option must be in the same procedure as line.
   Cause: Option procedure is inconsistent.
   Action: Check option procedure.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-17690: Package and procedure must be owned by the same project.
   Cause: Procedure parent is inconsistent.
   Action: Check procedure parent.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-17691: Primary key column's datastore must be equals to this reference's primary datastore.
   Cause: Column datastore is inconsistent.
   Action: Check datastores.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-17692: Reference column doesn't belong to this reference.
   Cause: Column is inconsistent.
   Action: Check column.

   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-17693: Reference's foreign datastore is not equal to this datastore.
   Cause: Datastores are inconsistent.
   Action: Check datastores.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17694: Steps can't be moved from one package to another.
Cause: Steps can't be moved from one package to another.
Action: Consider not to move steps.

Level: 32
Type: ERROR
Impact: Other

ODI-17695: The new position is not valid.
Cause: The new position is not valid.
Action: Check new position.

Level: 32
Type: ERROR
Impact: Other

ODI-17696: The option already exists.
Cause: The option already exists.
Action: Check option.

Level: 32
Type: ERROR
Impact: Other

ODI-17697: The option owner has already been set.
Cause: The option owner has already been set.
Action: Check option owner.

Level: 32
Type: ERROR
Impact: Other

ODI-17698: The reference type must be [ {0} ] in order to define a complex SQL expression.
Cause: Wrong reference type.
Action: Check reference type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17699: The reference type must be [ {0} ] in order to obtain the complex SQL expression.
Cause: Wrong reference type.
Action: Check reference type.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17700: The string value length should not exceed MAX_SHORT_TEXT_LENGTH since FlexFieldLong is SHORT_TEXT.
Cause: FlexFieldLong is SHORT_TEXT.
Action: Check FlexFieldLong and string value length.

Level: 32
Type: ERROR
Impact: Other

ODI-17701: This OdiLoadPlanInstanceRun is not ESS Job related.
Cause: OdiLoadPlanInstanceRun is not ESS Job related.
Action: Check OdiLoadPlanInstanceRun.

Level: 32
Type: ERROR
Impact: Other

ODI-17702: This session is not ESS Job related.
Cause: Session is not ESS Job related.
Action: Check session.

Level: 32
Type: ERROR
Impact: Other

ODI-17703: This OdiReference must be from type [{0}] in order to access the primary DataStore alias.
Cause: Wrong OdiReference type.
Action: Check OdiReference type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17704: This OdiReference must be from type [{0}] in order to set the primary DataStore alias.
Cause: Wrong OdiReference type.
Action: Check OdiReference type.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17705: This file descriptor is not consistent with the parent model's technology.
Cause: File descriptor is not consistent.
Action: Check file descriptor and parent technology.
Level: 32
Type: ERROR
Impact: Other

ODI-17706: This setVariable is used for increment.
   Cause: Increment value is set.
   Action: Use method getIncrementValue().

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17707: Unable to add an alien main partition.
   Cause: Main partition datastore is inconsistent.
   Action: Check main partition.

Level: 32
Type: ERROR
Impact: Other

ODI-17708: Unable to compute name.
   Cause: Name has been set on this physical schema.
   Action: Do not compute name.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17709: Parameter must be false.
   Cause: Wrong parameter value.
   Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17710: Parameter [0] must be true.
   Cause: Wrong parameter value.
   Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17711: Undefined ODI work repository name.
   Cause: Undefined repository name.
   Action: Check repository name.

Level: 32
Type: ERROR
Impact: Other

ODI-17712: Variable and Step should be defined in the same Load Plan.
  Cause: Variable and Step have different parent Load Plans.
  Action: Define variable and step in the same Load Plan.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17713: VariableDataType should be set before accessing DefaultValue.
  Cause: VariableDataType is undefined.
  Action: Set VariableDataType.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17714: You can only set KMs contained in the OdiProject containing of the OdiInterface.
  Cause: KM has different parent project than OdiInterface.
  Action: Check KM.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17715: Can't add a null variable to load plan.
  Cause: Variable is null.
  Action: Check variable value.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17716: DataTypes must be consistent.
  Cause: DataTypes is inconsistent.
  Action: Check DataTypes.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17717: Constraint is not a condition.
  Cause: Inconsistent constraint type.
  Action: Check parameter.
  Level: 32
  Type: ERROR
  Impact: Programmatic
ODI-17718: Constraint is not a key.
   Cause: Inconsistent constraint type.
   Action: Check constraint.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-17719: Option is not associated to this procedure.
   Cause: Option is not associated to this procedure.
   Action: Check option and procedure.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-17720: Constraint is not a reference.
   Cause: Inconsistent constraint type.
   Action: Check parameter.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-17721: Parameter {0} already belongs to {1}.
   Cause: Parameter has parent.
   Action: Check parameter.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-17722: Parameter {0} does not belong to this instance of {1}.
   Cause: Parameter has different parent.
   Action: Check parameter.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-17723: Parameter {0} must belong to this {1}.
   Cause: Parameter parent is inconsistent.
   Action: Check parameter.
   Level: 32
   Type: ERROR
   Impact: Programmatic

ODI-17724: Parameter {0} can't be moved to an other {1}.
   Cause: Parameter can't be moved.
Action: Do not move parameter.
Level: 32
Type: ERROR
Impact: Other

ODI-17725: Parameter {0} must start with {1} prefix.
Cause: Parameter has wrong prefix.
Action: Check parameter prefix.
Level: 32
Type: ERROR
Impact: Other

ODI-17726: Logical Agent {0} must be mapped to a Physical Agent in the ContextCode {1}.
Cause: Agent is null.
Action: Check agents.
Level: 32
Type: ERROR
Impact: Other

ODI-17727: pDataServiceContainer is not a data service.
Cause: pDataServiceContainer is not a data service.
Action: Check pDataServiceContainer.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17728: Package and interface must be owned by the same project.
Cause: Package and interface have different parents.
Action: Check package and interface.
Level: 32
Type: ERROR
Impact: Other

ODI-17729: Parameter must be true.
Cause: Wrong parameter value.
Action: Check parameter.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17730: Not legal for shortcut.
Cause: Object is shortcut.
Action: Use getShortcutBaseObject() to access the real object.
Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-17731: Not legal to construct a shortcut from a datastore in a model with a different technology.  
Cause: Inconsistent technologies.  
Action: Check model and datastore.  

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-17732: Odi object Must be shortcut after materialize.  
Cause: Object isn’t shortcut.  
Action: Check object.  

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-17733: Reference's primary datastore must be not null in order to define a ReferenceColumn.  
Cause: Primary DataStore is null.  
Action: Check DataStore.  

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-17734: pDataServiceContainer [0] has no technology defined.  
Cause: Data Service Container has no technology defined.  
Action: Define technology.  

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-17735: Reference's foreign datastore is not equals to this datastore.  
Cause: Reference’s foreign datastore is not equals to this datastore.  
Action: Check DataStores.  

Level: 32  
Type: ERROR  
Impact: Programmatic  

ODI-17736: You can only set global KMs or KMs contained in the OdiProject containing the OdiInterface.  
Cause: Wrong KM.  
Action: Check KM and project.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17737: StepLog and Variable don't belong to the same session.
  Cause: Inconsistent session.
  Action: Check Session value for StepLog and Variable.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17738: Unable to find '{0}' as variable used by the scenario '{1}' in version '{2}'.
  Cause: Variable is null.
  Action: Check variable name.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17739: Unable to override '{0}' variable for execution. It is marked as read-only for scenario '{1}' in version '{2}'.
  Cause: Variable is read-only.
  Action: Check variable.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17740: Error while connecting to the Application Server at URL {0}.
  Cause: Exception was thrown during connection.
  Action: Ensure that the Application Server is running and accepting requests.

Level: 32
Type: ERROR
Impact: Network

ODI-17741: Datastore isn't used as a lookup source.
  Cause: Datastore isn't used as a lookup source.
  Action: Check Datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17742: Parameter {0} must be greater or equal than {1} and less or equal than {2}.
  Cause: Wrong parameter value
  Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17743: Variable should be related to the same {0}.
Cause: Wrong parent for variable.
Action: Check variable.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17744: The status can only be switched from ERROR to DONE or from DONE to ERROR.
Cause: Wrong status
Action: Check status.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17745: Parameter {0} must be greater or equal than {1}.
Cause: Wrong parameter value.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17746: Parameter {0} must be greater than {1}.
Cause: Wrong parameter value.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17747: Array {0} must not be empty.
Cause: Array length is 0.
Action: Check array.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17748: Parameter {0} is not relevant to this schedule.
Cause: Wrong parameter.
Action: Check parameter.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17749: Invalid value was specified. Cannot create {0} with the value {1}.

  Cause: Invalid value was specified.
  Action: Check value.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17750: Parent folder already has the release tag set.

  Cause: Setting the release tag when the parent already has the release tag set.
  Action: Set the release tag in parent.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17751: Shortcut and the base object are under same folder.

  Cause: Cannot create shortcut {0} with the base object under same folder {1}.
  Action: Create shortcut in different folder.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17752: Shortcut and the base object are in different projects.

  Cause: Cannot create shortcut {0} in project {1} which is different from the project of the base object.
  Action: Create shortcut in same project as the base object.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17753: Shortcut with same reference object in same folder.

  Cause: There is other shortcut object with same reference object as {0} in the same folder.
  Action: Create shortcut in different folder.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17754: Shortcut and the base object are under same model.

  Cause: Cannot create shortcut {0} with the base object under same model {1}.
  Action: Create shortcut in different model.
  Level: 32
  Type: ERROR
Impact: Programmatic

ODI-17755: Shortcut with same reference object in same model.
  Cause: There is other shortcut object with same reference object as {0} in the same model.
  Action: Create shortcut in different model.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17756: Scenario "{0}", which is referenced by RunScenario step "{1}", has variable "{2}" but LoadPlan does not have variable with the same name.
  Cause: Missed variable in Load Plan
  Action: Check Load Plan’s variables.
  Level: 32
  Type: WARNING
  Impact: Programmatic

ODI-17757: Scenario "{0}", which is referenced by RunScenario step "{1}", has a newer version "{2}" in the repository
  Cause: Scenario has newer version.
  Action: Consider to use latest version.
  Level: 32
  Type: NOTIFICATION
  Impact: Programmatic

ODI-17758: LoadPlan Variable "{0}" SQL is different than the design repository Variable "{1}" SQL.
  Cause: Variable’s SQL was redefined.
  Action: Check LoadPlan’s variable.
  Level: 32
  Type: NOTIFICATION
  Impact: Programmatic

ODI-17759: LoadPlan Variable "{0}" LogicalSchema "{1}" is different than the design repository Variable "{2}" LogicalSchema "{3}".
  Cause: Variable's Logical Schema was redefined.
  Action: Check LoadPlan’s variable.
  Level: 32
  Type: NOTIFICATION
  Impact: Programmatic

ODI-17760: Exception "{0}" is not used in the Load Plan.
  Cause: Exception is not used.
  Action: Consider to delete or disable unused exception.
Level: 32
Type: NOTIFICATION
Impact: Programmatic

ODI-17761: LoadPlan Variable "(0)" is refreshed at step "(1)", but it has no SQL.
Cause: LoadPlan Variable doesn’t have refresh SQL.
Action: Check variable’s SQL or disable variable refreshing.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17762: Context is specified on a step "(0)", but it’s no longer present in the topology.
Cause: Context was removed.
Action: Check step’s context.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17763: Logical Agent is specified on a step "(0)", but it is no longer present in the topology
Cause: Logical Agent was removed.
Action: Check step’s Logical Agent.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17764: Context "(0)" and Logical agent "(1)" on a step "(2)" does not map to any physical agent.
Cause: Physical Agent doesn’t exist.
Action: Check agents’ mapping.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17765: Scenario variable "(0)" type and LoadPlan variable "(1)" type mismatch.
Cause: Variables have different datatype.
Action: Check variables.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17766: Scenario "(0)" wasn’t found.
Cause: Scenario doesn’t exist
Action: Check scenario and Load Plan step.
Level: 32
Type: WARNING
Impact: Programmatic

ODI-17767: LoadPlan has variable "(0)" but repository doesn't have variable with the same name.
Cause: Variable was deleted.
Action: Check variables.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17768: LoadPlan Variable "(0)" has SQL, which could not be validated.
Cause: OdiVariableTextGeneratorException during validation.
Action: Check variable and variable text generator.

Level: 32
Type: WARNING
Impact: Programmatic

ODI-17769: OdiRef: Internal ID (0) of IObjects (1) should not be used when the repository is 12c mode.
Cause: Internal ID is used in 12c mode.
Action: Use Global Id instead of internal id.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17770: Profile (0) is not assigned to role (1).
Cause: Profile is not assigned to role.
Action: Check role’s profiles.

Level: 32
Type: ERROR
Impact: Security

ODI-17771: Enterprise principal with unique ID/name (0) is not mapped to role (1).
Cause: Enterprise principal is not mapped to role.
Action: Check role’s mapped enterprise principals.

Level: 32
Type: ERROR
Impact: Security

ODI-17772: Parameter (0) should be (1) or (2).
Cause: Wrong parameter value.
Action: Check parameter value.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17773: Enterprise User or Role {0} does not exist.
Cause: Enterprise principal with such name could be found at LDAP server.
Action: Check principal name and LDAP server.

Level: 32
Type: ERROR
Impact: Security

ODI-17774: Maximum number of concurrent threads must be positive.
Cause: Wrong value.
Action: Check maximum number provided.

Level: 32
Type: ERROR
Impact: Other

ODI-17775: Maximum number of threads per session can not be negative.
Cause: Wrong value.
Action: Check maximum number provided.

Level: 32
Type: ERROR
Impact: Other

ODI-17776: Maximum number of concurrent threads must not be less than maximum session count.
Cause: Wrong value.
Action: Check maximum numbers provided.

Level: 32
Type: ERROR
Impact: Other

ODI-17777: Maximum number of concurrent threads must not be greater than maximum number of threads.
Cause: Wrong value.
Action: Check maximum numbers provided.

Level: 32
Type: ERROR
Impact: Other

ODI-17778: Maximum number of cache entries in Session Blueprint queue cannot be negative.
Cause: Wrong value.
Action: Check value.
ODI-17779: Maximum idle time for Session Blueprint in cache cannot be negative.
Cause: Wrong value.
Action: Check value.

ODI-17780: Package and mapping must be owned by the same project.
Cause: Package and mapping have different parents.
Action: Check package and mapping.

ODI-17781: Physical Mapping Design must be owned by the mapping.
Cause: Physical Mapping Design is not owned by mapping.
Action: Check mapping and physical design.

ODI-17782: OdiRef: Internal ID is retrieved in method {0}.{1} for 12c repository.
Cause: Internal ID is retrieved in 12c mode.
Action: Retrieve Global Id instead of internal id.

ODI-17783: Mapping metadata version mismatch. Expected {0}, but was {1}.
Cause: Mapping metadata version mismatch.
Action: Check the expected and actual Mapping metadata version.

ODI-17784: Reusable Mapping metadata version mismatch. Expected {0}, but was {1}.
Cause: Reusable Mapping metadata version mismatch.
Action: Check the expected and actual Reusable Mapping metadata version.
Type: ERROR
Impact: Other

ODI-17785: Option positions in knowledge module must be unique.
Cause: Option position undefined or multiple option in knowledge module has same position.
Action: Modify the position of options to be unique and not null.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17786: JKM is not Oracle Golden Gate JKM.
Cause: Model doesn't have JKM set or JKM is not Oracle Golden Gate JKM.
Action: Set Oracle Golden Gate JKM for the model.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17787: Extract and initial extract processes cannot be the same.
Cause: Extract and initial extract processes are the same.
Action: Choose another extract or initial extract process.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17788: Replicat and initial replicat processes cannot be the same.
Cause: Replicat and initial replicat processes are the same.
Action: Choose another replicat or initial replicat process.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17789: Positions must be set positive.
Cause: Position is not a positive integer.
Action: Set the position to be a positive integer.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17790: {0} should be {1}
Cause: Type is not correct
Action: Set the correct type.
Level: 32

Type: ERROR
Impact: Programmatic

ODI-17791: The option group already exists.
  Cause: The option group already exists.
  Action: Check option group.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17792: Option group is not associated to the same procedure
  Cause: Group is not associated to the same procedure
  Action: Check option group.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-17794: Count is larger than permissible value of Integer. Use method : {0}
  Cause: Return value is larger than permissible value of Integer
  Action: Use method : {0}
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17795: {0} parameter is not valid
  Cause: Parameter is not correct
  Action: Set the correct parameter.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17796: {0} is not a valid technology.
  Cause: Technology is not correct.
  Action: Set the correct technology.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17797: Logical Agent "[0]" type and Physical Agent "[1]" type mismatch.
  Cause: Logical Agent and Physical Agent are of different type.
  Action: Check the type of Logical and Physical Agents.
  Level: 32
  Type: ERROR
  Impact: Programmatic

ODI-17798: {0} parameter format is not valid.
Cause: Parameter format is not correct.
Action: Set the parameter with correct format.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17799: Level attribute {0} bound column: {1} is owned by table {2}, but the level is bound to table {3}
Cause: The bound column parent table does not match the bound table for the level or dimension
Action: Reset the column binding to a column of the bound level table.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17800: Level attribute {0} bound error column: {1} is owned by table {2}, but the level is bound to error table {3}
Cause: The bound error column parent table does not match the bound error table for the level or dimension
Action: Reset the error column binding to a column of the bound level error table.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17801: Level attribute {0} bound staging column: {1} is owned by table {2}, but the level is bound to staging table {3}
Cause: The bound staging column parent table does not match the bound staging table for the level or dimension
Action: Reset the staging column binding to a column of the bound level staging table.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17803: The dimension has an invalid cyclical parent/child level relationship involving {0}.
Cause: One of the parent/child relationships reverses the order of another parent/child relationship, this is not allowed.
Action: Fix the parent/child relationships for the dimension.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17804: The dimension hierarchy member uses parent ref {0}, which points to a level that is not included in the hierarchy.
**Cause:** A dimension hierarchy must use parent references that allow navigation of the levels that are included in the hierarchy.

**Action:** Fix the hierarchy member to use a different parent ref, or add a level to the hierarchy.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-17805: An invalid dimension key for this key reference.**

**Cause:** The key reference must point to a dimension key which is belonged to the referenced dimension.

**Action:** Use the dimension key belonged to the referenced dimension.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-17806: The dimension key is already used by another key reference.**

**Cause:** Each dimension key can only be used by one key reference.

**Action:** Set another dimension key that has not been used by any key reference.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-17807: A non-transparent LKM must have a processing type of BOTH.**

**Cause:** The setProcessingType method was called for a LKM, and specified and incorrect type. A non-transparent LKM must have processing type of BOTH.

**Action:** Change the call to set the correct type.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-17808: Sql join parameter combination is not correct for technology {0}.**

**Cause:** Sql Join parameters combination is not correct.

**Action:** Set the correct sql join parameter combination.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-17809: When data server contains multiple schemas with same table and column names, physical schema must specify a schema name.**

**Cause:** Schema name is not specified while creating the physical schema.

**Action:** Please specify the schema name in corresponding physical schema.

**Level:** 32  
**Type:** ERROR
Impact: Other

ODI-17810: Error during BeanShell evaluation: {0}, Pre-execution code: {1}
Cause: Error occurs during BeanShell evaluation of procedure or KM task code.
Action: Please check the procedure or KM task code in the error message.
Level: 32
Type: ERROR
Impact: Other

ODI-17811: Supplied value {1} for flex field {0} is not a valid format.
Cause: Flex field value is not a valid format
Action: Please provide the correct format.
Level: 32
Type: ERROR
Impact: Other

ODI-17900: Cube {0} does not reference any dimensions.
Cause: A cube must reference at least one dimension to be viable.
Action: Add dimension references to the cube.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17901: Cube {0} does not have any measures.
Cause: A cube must have at least one measure to be viable.
Action: Define measures for this cube.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17902: A dimension reference of cube {0} is not associated with a level.
Cause: A cube reference to a dimension must be associated with a level to be viable.
Action: Ensure each dimension reference of the cube is associated with a level.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17903: Dimension {1} referenced by cube {0} is invalid.
Cause: The cube references an invalid dimension.
Action: Validate the dimensions which are referenced by this cube.
Level: 32
Type: ERROR
Impact: Programmatic
ODI-17904: Cube {0} has multiple references to dimension {1} with no unique role qualifiers.
   
   **Cause:** Role qualifiers are missing or not unique when a cube has multiple references to a dimension.
   
   **Action:** Set role qualifiers on the dimension references of the cube and ensure role qualifiers are unique.
   
   **Level:** 32
   
   **Type:** ERROR
   
   **Impact:** Programmatic

ODI-17905: Cube {0} is not bound to a datastore.

   **Cause:** A cube must be bound to a datastore to be viable.
   
   **Action:** Bind the cube to a datastore.
   
   **Level:** 32
   
   **Type:** ERROR
   
   **Impact:** Programmatic

ODI-17906: Cube {0} with orphan management enabled is not bound to an error datastore.

   **Cause:** A cube must be bound to an error datastore to be viable when orphan management is enabled.
   
   **Action:** Bind the cube to an error datastore.
   
   **Level:** 32
   
   **Type:** ERROR
   
   **Impact:** Programmatic

ODI-17907: In cube {0}, measure {1} is not bound to a column of the cube bound datastore.

   **Cause:** The measure must be bound to a column of the cube bound datastore.
   
   **Action:** Bind each measure to a column of the cube bound datastore.
   
   **Level:** 32
   
   **Type:** ERROR
   
   **Impact:** Programmatic

ODI-17908: In cube {0}, measure {1} is not bound to an error column of the cube bound error datastore when orphan management is enabled.

   **Cause:** The measure must be bound to an error column of the cube bound error datastore when orphan management is enabled.
   
   **Action:** Bind each measure to an error column of the cube bound error datastore.
   
   **Level:** 32
   
   **Type:** ERROR
   
   **Impact:** Programmatic

ODI-17909: Cube {0} is bound to datastore {1}, but measure {2} is bound to column {3} which is owned by datastore {4}.
**Cause:** The measure is bound to a column which is owned by a different datastore to the one bound to the cube.

**Action:** Bind each measure to a column which is owned by the cube bound datastore.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17910:** Cube {0} is bound to error datastore {1}, but measure {2} is bound to error column {3} which is owned by datastore {4}.

**Cause:** The measure is bound to an error column which is owned by a different error datastore to the one bound to the cube.

**Action:** Bind each measure to an error column which is owned by the cube bound error datastore.

**Level:** 32

**Type:** SET_AT_RUNTIME

**Impact:** Programmatic

**ODI-17911:** Cube {0} reference to dimension {1} does not have a key reference.

**Cause:** The cube is missing a key reference for one of the dimensions.

**Action:** Ensure the cube references the key for each dimension.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17912:** Cube {0} reference to dimension {1}, level {2} has a surrogate key, but the key reference does not point to this surrogate key.

**Cause:** The cube has a key reference that does not point to the surrogate key of the dimension level.

**Action:** Ensure the cube references the surrogate key if the dimension level has a surrogate key.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17913:** In cube {0}, the key reference for dimension {1} is not bound to a column of the cube bound datastore.

**Cause:** The key reference for a dimension must be bound to a column of the cube bound datastore.

**Action:** Bind each key reference to a column of the cube bound datastore.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17914:** In cube {0}, the key reference for dimension {1} is not bound to an error column of the cube bound error datastore when orphan management is enabled.
**Cause:** The key reference for a dimension must be bound to an error column of the cube bound error datastore when orphan management is enabled.

**Action:** Bind each key reference to an error column of the cube bound error datastore.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17915:** Cube {0} is bound to datastore {1}, but key reference for dimension {2} is bound to column {3} which is owned by datastore {4}.

**Cause:** The key reference for a dimension is bound to a column which is owned by a different datastore to the one bound to the cube.

**Action:** Ensure each key reference is bound to a column of the cube bound datastore.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17916:** Cube {0} is bound to an error datastore {1}, but key reference for dimension {2} is bound to an error column {3} which is owned by datastore {4}.

**Cause:** The key reference for a dimension is bound to an error column which is owned by a different datastore to the one bound to the cube.

**Action:** Ensure each key reference is bound to an error column of the cube error bound datastore.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17917:** In cube {0}, multiple dimension key references or measures are bound to the same column {1} of the cube bound datastore.

**Cause:** Multiple dimension key references or measures of the cube are bound to a same column of the cube bound datastore.

**Action:** Ensure each dimension key reference and each measure is bound to a separate column of the cube bound datastore.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17918:** In cube {0}, multiple dimension key references or measures are bound to the same error column {1} of the cube bound error datastore.

**Cause:** Multiple dimension key references or measures of the cube are bound to a same error column of the cube bound error datastore.

**Action:** Ensure each dimension key reference and each measure is bound to a separate error column of the cube bound error datastore.

**Level:** 32

**Type:** ERROR
Impact: Programmatic

ODI-17919: There is no primary key to foreign key constraint defined in ODI between the cube table {0} and the dimension table {1}.
Cause: ODI looks for primary key and foreign key references between dimension tables and cube tables. For cube table there is no foreign key to the dimension table.
Action: Define a foreign key on the cube table that references the primary key on the dimension table.

Level: 32
Type: WARNING
Impact: Programmatic

ODI-17920: Dimension {0} does not have any levels.
Cause: The dimension does not have any levels.
Action: Create one or more levels for this dimension.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17921: In Dimension {0}, level {1} does not have any level attributes.
Cause: The level does not have level attributes.
Action: Create one or more level attributes for this level.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17923: In Dimension {0}, hierarchy {1} contains either only one level or no levels.
Cause: The hierarchy contains only one level or no levels.
Action: The hierarchy should contain two or more levels.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17924: Dimension {0} has more than one level but no hierarchy defined.
Cause: The dimension has more than one level but no hierarchy defined.
Action: The dimension can have a single level with no hierarchies or all levels must be contained in at least one hierarchy.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17925: In Dimension {0}, level {1} does not have any natural key.
Cause: The level does not have any natural key.
Action: Create a natural key for this level.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17927: In dimension [0], level [1] does not have any updatable attributes. An updatable attribute is defined as level attribute that is not surrogate key or natural key.
Cause: The level does not have any updatable attributes.
Action: Define one or more updatable attributes for this level.

Level: 32
Type: WARNING
Impact: Programmatic

ODI-17929: Dimension [0] flagged as a star implementation is not bound to a datastore.
Cause: The dimension flagged as a star implementation must be bound to a datastore.
Action: Bind the dimension to a datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17930: Dimension [0] is flagged as a snowflake implementation, but level [1] is not bound to a datastore.
Cause: The dimension is flagged as a snowflake implementation, but the level is not bound to a datastore.
Action: Bind the level to a datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17931: In dimension [0], level [1] is not bound to a staging datastore.
Cause: The dimension level is not bound to a staging datastore.
Action: Bind the level to a staging datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17932: Dimension [0] is flagged as a star implementation and the orphan management is enabled, but the dimension is not bound to an error datastore.
Cause: The dimension is flagged as a star implementation and the orphan management is enabled, but the dimension is not bound to an error datastore.
Action: Bind the dimension to an error datastore.
Impact: Programmatic

ODI-17933: Dimension {0} is flagged as a snowflake implementation and the orphan management is enabled, but level {1} is not bound to an error datastore.
Cause: The dimension is flagged as a snowflake implementation and the orphan management is enabled, but the level is not bound to an error datastore.
Action: Bind the level to an error datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17934: In dimension {0} level {1}, level attribute {2} is not bound to a column of the bound datastore.
Cause: The level attribute is not bound to a column of the bound datastore.
Action: Bind the level attribute to a column of the bound datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17935: In dimension {0} level {1}, level attribute {2} is not bound to a staging column of the bound staging datastore.
Cause: The level attribute is not bound to a staging column of the bound staging datastore.
Action: Bind the level attribute to a staging column of the bound staging datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17936: In dimension {0} level {1}, level attribute {2} is not bound to an error column of the bound error datastore.
Cause: The level attribute is not bound to an error column of the bound error datastore.
Action: Bind the level attribute to an error column of the bound error datastore.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17937: In dimension {0}, level {1} is bound to datastore {2}, but level attribute {3} is bound to column {4} which is owned by datastore {5}.
Cause: The level is bound to a datastore, but a level attribute is bound to a column which is owned by another datastore.
Action: Bind the level attribute to a column which is owned by the datastore that is bound to the level.

Level: 32
Type: ERROR
**Impact:** Programmatic

**ODI-17938:** In dimension {0}, level {1} is bound to staging datastore {2}, but level attribute {3} is bound to staging column {4} which is owned by datastore {5}.

**Cause:** The level is bound to a staging datastore, but a level attribute is bound to a staging column which is owned by another datastore.

**Action:** Bind the level attribute to a staging column which is owned by the staging datastore that is bound to the level.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17939:** In dimension {0}, level {1} is bound to error datastore {2}, but level attribute {3} is bound to error column {4} which is owned by datastore {5}.

**Cause:** The level is bound to an error datastore, but a level attribute is bound to an error column which is owned by another datastore.

**Action:** Bind the level attribute to an error column which is owned by the error datastore that is bound to the level.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17941:** Dimension {0} uses surrogate key but bound datastore {1} does not have primary key constraint.

**Cause:** The dimension uses a surrogate key, but the datastore that is bound to the dimension does not have a primary key constraint.

**Action:** Define a primary key constraint for the datastore that is bound to the dimension.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17942:** Dimension {0} uses surrogate key but bound datastore {1} of level {2} does not have primary key constraint.

**Cause:** The dimension uses a surrogate key, but the datastore that is bound to the level does not have a primary key constraint.

**Action:** Define a primary key constraint for the datastore that is bound to the level.

**Level:** 32

**Type:** WARNING

**Impact:** Programmatic

**ODI-17943:** In dimension {0} level {1}, parent reference member {2} is not bound to a column.

**Cause:** In the dimension, the parent ref member is not bound to a column.

**Action:** Bind the parent reference member to a column.

**Level:** 32
Type: ERROR
Impact: Programmatic

ODI-17944: In dimension {0} level {1}, parent reference member {2} is not bound to a staging column.
Cause: In dimension, the parent ref member is not bound to a staging column.
Action: Bind the parent reference member to a staging column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17945: In dimension {0} level {1}, parent reference member {2} is not bound to an error column.
Cause: In dimension, the parent ref member is not bound to an error column.
Action: Bind the parent reference member to an error column.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17946: In dimension {0} level {1} is bound to datastore {2}, but parent reference member {3} is bound to staging column {4} which is owned by datastore {5}.
Cause: The level is bound to a datastore, but a parent reference member is bound to a column which is owned by another datastore.
Action: Bind the parent reference member to a column which is owned by the datastore that is bound to the level.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17947: In dimension {0} level {1} is bound to staging datastore {2}, but parent reference member {3} is bound to column {4} which is owned by datastore {5}.
Cause: The level is bound to a staging datastore, but a parent reference member is bound to a staging column which is owned by another datastore.
Action: Bind the parent reference member to a staging column which is owned by the staging datastore that is bound to the level.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17948: In dimension {0} level {1} is bound to error datastore {2}, but parent reference member {3} is bound to error column {4} which is owned by datastore {5}.
Cause: The level is bound to an error datastore, but a parent reference member is bound to an error column which is owned by another datastore.
Action: Bind the parent reference member to an error column which is owned by the error datastore that is bound to the level.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17949: Dimension [0] is flagged as a snowflake implementation, in level [1], the bound column of parent reference member [2] does not have foreign key constraint.
Cause: The dimension is flagged as a snowflake implementation, in the level, the bound column of a parent reference member [2] does not have a foreign key constraint.
Action: Define foreign key constraints for the columns that are bound to the parent reference members.

Level: 32
Type: WARNING
Impact: Programmatic

Cause: For the parent reference member, the datatype of the referenced level attribute does not match with that of the bound column.
Action: The datatype of the referenced level attribute should match with that of the bound datastore column.

Level: 32
Type: WARNING
Impact: Programmatic

Cause: For the parent reference member, the datatype of the referenced level attribute does not match with that of the bound staging column.
Action: The datatype of the referenced level attribute should match with that of the bound staging datastore column.

Level: 32
Type: WARNING
Impact: Programmatic

Cause: For the parent reference member, the datatype of the referenced level attribute does not match with that of the bound error column.
Action: The datatype of the referenced level attribute should match with that of the bound error datastore column.

Level: 32
Type: WARNING
Impact: Programmatic
ODI-17959: Dimension {0} has an invalid cyclical parent/child level relationship involving parent reference {1}.
Cause: One of the parent/child relationships reverses the order of another parent/child relationship, this is not allowed.
Action: Fix the parent/child relationships for the dimension.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17960: In dimension {0} hierarchy {1}, the hierarchy member for level {2} uses parent reference {3}, which points to level {4} that is not included in this hierarchy.
Cause: The hierarchy member uses the parent reference which points to the level that is not included in hierarchy.
Action: Fix the hierarchy member to use a different parent reference or add a level to the hierarchy.
Level: 32
Type: ERROR
Impact: Programmatic

ODI-17961: In dimension {0} level {1}, the datatype {3} of level attribute {2} is does not match with the datatype {5} of bound column {4}.
Cause: The datatype of the level attribute does not match with that of the bound column.
Action: The datatype of the level attribute should match with that of the bound datastore column.
Level: 32
Type: WARNING
Impact: Programmatic

ODI-17964: In dimension {0} level {1}, the datatype {3} of level attribute {2} does not match with the datatype {5} of bound staging column {4}.
Cause: The datatype of the level attribute does not match with that of the bound staging column.
Action: The datatype of the level attribute should match with that of the bound staging datastore column.
Level: 32
Type: WARNING
Impact: Programmatic

ODI-17967: In dimension {0} level {1}, the datatype {3} of level attribute {2} does not match with the datatype {5} of bound error column {4}.
Cause: The datatype of the level attribute does not match with that of the bound error column.
Action: The datatype of the level attribute should match with that of the bound error datastore column.
Level: 32
Type: WARNING
Impact: Programmatic

ODI-17970: Dimension [0] is flagged as a star implementation, but parent reference [1] member [2] is not bound to the same column [3] as the matching parent level key attribute [4].
Cause: The dimension is star implementation, but one or more parent reference members is not bound to the same column as the matching parent level key attribute.
Action: Bind the parent reference member to the column which is also bound to the matching parent level key attribute.

Level: 32
Type: WARNING
Impact: Programmatic

ODI-17971: In dimension [0] level [1], a key attribute [2] is flagged as role playing(date or trigger, etc.). This is not allowed.
Cause: In SCD type 2, a key attribute cannot be flagged as a date or trigger attribute.
Action: Do not define a key attribute as an SCD2 flag(e.g. date or trigger).

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17972: In dimension [0], if any of SCD2 trigger history, SCD2 effective time or SCD2 expiration time is set for a level [1], then all of them must be set.
Cause: In the dimension, if any of SCD2 trigger history, SCD2 effective time or SCD2 expiration time is set for a level, then all of them must be set.
Action: Set SCD2 trigger history, SCD2 effective time and SCD2 expiration time for the level.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17973: In dimension [0], SCD2 is enabled, but surrogate key is not used.
Cause: In the dimension, SCD2 is enabled, but surrogate key is not used.
Action: The dimension should use surrogate key if SCD2 is enabled.

Level: 32
Type: ERROR
Impact: Programmatic

ODI-17974: In dimension [0], SCD2 is enabled for non-leaf level [1], but hierarchy versioning is not enabled between level [1] and [2]. The versioning of non-leaf level [1] will not result in the versioning of its corresponding child records in level [2].
Cause: In the dimension, SCD2 is enabled for non-leaf level, but hierarchy versioning is not enabled.
**Action:** Enable hierarchy versioning, otherwise the versioning of non-leaf level will not result in the versioning of its corresponding child records.

**Level:** 32  
**Type:** WARNING  
**Impact:** Programmatic

**ODI-17975:** In dimension {0} level {1}, a key attribute {2} is flagged as role playing(date or trigger, etc.). This is not allowed.  
**Cause:** In SCD type 3, a key attribute cannot be flagged as a date or trigger attribute.  
**Action:** Do not define a key attribute as an SCD3 flag(e.g. date or trigger).

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-17976:** In dimension {0} level {1}, the datatype {3} of level attribute {2} does not match with the datatype {5} of SCD3 previous attribute {4}.  
**Cause:** In the dimension, the datatype of the level attribute does not match with that of the SCD3 previous attribute.  
**Action:** The datatype of the level attribute should match with that of the SCD3 previous attribute.

**Level:** 32  
**Type:** WARNING  
**Impact:** Programmatic

**ODI-17979:** Parameter {0} already exists  
**Cause:** Parameter {0} already exists  
**Action:** Use setValue() method to update the existing Parameter

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-17980:** An operation with the name "{0}" already exists in "{1}".  
**Cause:** REST operation with same name.  
**Action:** Check REST operation name.

**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

**ODI-17981:** REST operation with the name "{0}" does not exists in "{1}".  
**Cause:** REST operation does not exist.  
**Action:** Check REST operation name.
**Impact:** Programmatic

**ODI-17982: Base KM type is incorrect.**

**Cause:** Base KM type is incorrect.

**Action:** Set the Base KM with the correct type.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17983: It is not allowed for line defined in {0} referencing {1} line.**

**Cause:** Either line type is not same or the lines are self referencing.

**Action:** Set the correct line.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17984: Line type is null.**

**Cause:** KM line type is null.

**Action:** Set the correct line type.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17985: In dimension {0} level {1}, the attribute {2} is defined as part of the natural key, it cannot also be of type SCD3 at the same time.**

**Cause:** In the dimension, a level attribute is set as both natural key and SCD3 at the same time.

**Action:** Either remove the SCD3 setting or remove this attribute from the natural key.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17986: In dimension {0} level {1}, level attribute {2} can not be flagged as an SCD3 previous value for more than one attribute nor as both a previous value and an effective date.**

**Cause:** In the dimension, a level attribute is set as an SCD3 previous value for more than one attribute or as both a previous value and as an effective date.

**Action:** Correct the multiple SCD3 role uses of this attribute.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17987: In dimension {0} level {1}, level attribute {2} can not have both a SCD2 setting (date or trigger, etc.) and be used in an SCD3 role (previous value or effective date).**
**Cause:** In the dimension, a level attribute has both an SCD2 setting and is used in an SCD3 role.

**Action:** Either remove this attribute's SCD2 setting or its uses as an SCD3 role.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17988:** In dimension {0} level {1}, level attribute {2} can not have an SCD2 setting (date or trigger, etc.) and have SCD3 type attributes (previous value or effective date) set for it.

**Cause:** In the dimension, a level attribute has an SCD2 setting and has SCD3 type attributes set for it.

**Action:** Either remove this attribute's SCD3 type attributes or remove its SCD2 setting.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17989:** In dimension {0} level {1}, level attribute {2} can not be used as an SCD3 role attribute (previous value or effective date) and have SCD3 type attributes at the same time.

**Cause:** In the dimension, a level attribute is used as an SCD3 role attribute and has SCD3 type attributes at the same time.

**Action:** Either remove this attribute's SCD3 role usages or the SCD3 type attributes.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17990:** In dimension {0}, level {1}, for level attribute {2} if the SCD3 effective date is set, the previous value must also be set.

**Cause:** In the dimension, a level attribute has the SCD3 effective date set but has no previous value set.

**Action:** Either remove this attribute's SCD3 effective date or add the SCD3 previous value.

**Level:** 32

**Type:** ERROR

**Impact:** Programmatic

**ODI-17991:** In dimension {0} level {1}, level attribute {2} is set as both the surrogate key and the natural key.

**Cause:** In the dimension, can not set one attribute to surrogate key and natural key both.

**Action:** Reset either the surrogate key or the natural key.

**Level:** 32

**Type:** ERROR
Impact: Programmatic

ODI-17992: Model {0} is not a Generic Model
Cause: Cannot map a Non-Generic Model to a Non-Generic Model
Action: Provide a Generic Model to map

Type: ERROR
Impact: Programmatic

ODI-17998: Knowledge Module Line not found {0}
Cause: KM Line with the given name not found
Action: Provide a valid KM Line name
Level: 32
Type: ERROR
Impact: Programmatic

ODI-20001: ODI-20001: Cannot check the key because the Datastore does not exist in the database.
Cause: The Datastore referenced by this key did not exist in the database.
Action: Ensure the Datastore refers to an existing database table.
Level: 32
Type: ERROR
Impact: Other

ODI-20002: ODI-20002: The selected file is not a valid key file.
Cause: An invalid encryption key file was selected.
Action: Select a valid encryption key file.
Level: 32
Type: ERROR
Impact: Other

ODI-20003: ODI-20003: Cannot edit the condition
Cause: General Exception invoking editor.
Action: This is an internal error with no recommended user action.
Level: 32
Type: ERROR
Impact: Other

ODI-20004: ODI-20004: Cannot edit the reference
Cause: General Exception invoking editor.
Action: This is an internal error with no recommended user action.
Level: 32
Type: ERROR
Impact: Other

ODI-20005: ODI-20005: Cannot edit the variable
Cause: General Exception invoking editor.
Action: This is an internal error with no recommended user action.
Level: 32
Type: ERROR
Impact: Other

ODI-20006: ODI-20006: Cannot display table's data. Data is probably already displayed.
Cause: General Exception invoking editor.
Action: This is an internal error with no recommended user action.
Level: 32
Type: ERROR
Impact: Other

ODI-20007: Cannot display table's data.
Cause: General Exception invoking editor.
Action: This is an internal error with no recommended user action.
Level: 32
Type: ERROR
Impact: Other

ODI-20008: You cannot Display this Attribute Data. Data is probably already displayed
Cause: General Exception invoking editor.
Action: This is an internal error with no recommended user action.
Level: 32
Type: ERROR
Impact: Other

ODI-20009: Cannot display data. The datastore resource name is {0} characters long which is longer than allowed by the technology ({1}). Please review the technology settings in Topology.
Cause: The datastore resource name exceeded the limit allowed by its technology.
Action: Ensure the maximum table name length setting in the corresponding technology is correct. Consider changing the datastore resource name to comply.
Level: 32
Type: ERROR
Impact: Other

ODI-20010: Cannot display this Attribute Data
Cause: General Exception invoking editor.
Action: This is an internal error with no recommended user action.
Level: 32
Type: ERROR
Impact: Other

ODI-20011: Cannot perform this action: a Column of this Datastore is currently being edited
Cause: Another user may be editing this datastore.
Action: Wait for the other editing session to be committed.
Level: 32
Type: ERROR
Impact: Other

ODI-20012: ODI-20012: Cannot perform this action: the Datastore containing this Column is currently being modified
Cause: Another user may be editing this datastore.
Action: Wait for the other editing session to be committed.

Level: 32
Type: ERROR
Impact: Other

ODI-20013: ODI-20013: Unable to perform the action because the package is currently being modified
Cause: Another user may be editing this package.
Action: Wait for the other editing session to be committed.

Level: 32
Type: ERROR
Impact: Other

ODI-20014: ODI-20014: Cannot encrypt the Procedure: it is currently being modified
Cause: Another user may be editing this procedure.
Action: Wait for the other editing session to be committed.

Level: 32
Type: ERROR
Impact: Other

ODI-20015: ODI-20015: Cannot initialize the Flexfields values
Cause: Another user may be editing the flexfield values.
Action: Wait for the other editing session to be committed.

Level: 32
Type: ERROR
Impact: Other

ODI-20016: ODI-20016: Unable to add project user functions
Cause: An unsupported action was attempted.
Action: No action required as Project user functions are not a valid selection to be added to a label.

Level: 32
Type: ERROR
Impact: Other

ODI-20017: ODI-20017: Unable to add project sequences
Cause: An unsupported action was attempted.
Action: No action required as Project sequences are not a valid selection to be added to a label.

Level: 32
Type: ERROR
Impact: Other

ODI-20018: ODI-20018: Unable to add project variables
Cause: An unsupported action was attempted.
Action: No action required as Project variables are not a valid selection to be added to a label.
Level: 32
Type: ERROR
Impact: Other

ODI-20019: ODI-20019: Unable to get GBO object
Cause: Internal error.
Action: No action required.
Level: 32
Type: ERROR
Impact: Other

ODI-20020: ODI-20020: Cannot change CKM
Cause: Only one CKM is available.
Action: Import additional CKMs.
Level: 32
Type: ERROR
Impact: Other

ODI-20021: ODI-20021: Cannot change the order of this Command because you do not have 'Edit' privileges on this Object
Cause: Insufficient privileges to edit the object.
Action: Assign additional privileges to edit the object.
Level: 32
Type: ERROR
Impact: Other

ODI-20022: ODI-20022: Could not change the KM
Cause: Additional KMs may not be available or installed for the current technology.
Action: Import additional KMs.
Level: 32
Type: ERROR
Impact: Other

ODI-20024: ODI-20024: Cannot create the cross reference for the condition
Cause: Internal error creating cross references for a condition.
Action: No action required.
Level: 32
Type: ERROR
Impact: Other

ODI-20025: ODI-20025: Cannot create the cross references for the reference
Cause: Internal error.
Action: No action required.
Level: 32

Type: ERROR
Impact: Other

ODI-20026: ODI-20026: Cannot view this Datastore: one of its Columns is currently being edited
Cause: The data store is being edited in another session.
Action: Wait for the other editing session to end.
Level: 32

Type: ERROR
Impact: Other

ODI-20027: ODI-20027: Cannot view this Column: its Datastore is currently being edited
Cause: A package step is being edited in another session.
Action: Wait for the other session to end.
Level: 32

Type: ERROR
Impact: Other

ODI-20028: ODI-20028: Cannot start execution.
Cause: Execution cannot be started due to an internal error.
Action: No required action.
Level: 32

Type: ERROR
Impact: Other

ODI-20029: ODI-20029: Cannot move a line
Cause: Internal error.
Action: No action required.
Level: 32

Type: ERROR
Impact: Other

ODI-20030: ODI-20030: Cannot start the generation. The file is probably already open.
Cause: Attempt to open report file for output failed.
Action: Ensure the specified file is not currently open and the file permissions allow for write access before retrying the operation. Consider choosing a different file for output.
Level: 32
Type: ERROR
Impact: Other

ODI-20031: Cannot Delete a Command being Edited.
Cause: An attempt was made to delete a command being edited.
Action: Save the edit before deleting.

Level: 32
Type: ERROR
Impact: Other

ODI-20032: Cannot Delete a Command
Cause: Internal error.
Action: No required action

Level: 32
Type: ERROR
Impact: Other

ODI-20033: Cannot find the KM description
Cause: Internal error.
Action: No action required.

Level: 32
Type: ERROR
Impact: Other

ODI-20034: Cannot find the Options list for a Command
Cause: Internal error.
Action: No action required.

Level: 32
Type: ERROR
Impact: Other

ODI-20035: Could not find a description for the KM
Cause: Internal error.
Action: No action required.

Level: 32
Type: ERROR
Impact: Other

ODI-20036: Impossible to find the technology name, please check your privileges.
Cause: The ODI security permissions were insufficient to allow access to the specified technology.
Action: Ensure the ODI user security permissions are correct.
Error Messages

Level: 32
Type: ERROR
Impact: Other

ODI-20037: Cannot find data transferred by the Drag'n'Drop
Cause: Internal error.
Action: No action required.

Level: 32
Type: ERROR
Impact: Other

ODI-20038: Could not connect
Cause: A connection was not established to the selected Logical Schema.
Action: Ensure the connection data for the Physical Schema of the selected Logical Schema is valid.

Level: 32
Type: ERROR
Impact: Other

ODI-20039: Incorrect context
Cause: A context was not chosen for execution.
Action: Select an execution context.

Level: 32
Type: ERROR
Impact: Other

ODI-20040: Problem encountered when determining the context
Cause: Internal error.
Action: No action required.

Level: 32
Type: ERROR
Impact: Other

ODI-20041: No candidate datastore was found. Please create a mapping which loads data into this datastore.
Cause: There were no datastores in the current model usable as candidates for generating OUT mappings.
Action: Consider creating a mapping to load data into a datastore of the current model.

Level: 32
Type: ERROR
Impact: Other

ODI-20042: Property key is empty
Cause: The Property key for one of the specified Data Server's properties was not specified.
Action: Ensure a non-empty key value is supplied or remove the property with this key.
Level: 32
Type: ERROR
Impact: Other

ODI-20043: ODI-20043: Invalid property key entered. Property key maximum length is 250 characters
Cause: The Property key for one of the specified Data Server's properties had a length greater than 250 characters.
Action: Ensure a key value with the valid length is supplied or remove the property with this key.
Level: 32
Type: ERROR
Impact: Other

ODI-20044: ODI-20044: Invalid property value entered. Property value maximum length is 250 characters
Cause: The Property value for one of this Data Server's properties had a length greater than 250 characters.
Action: Ensure a value with the valid length is supplied or remove the property with this value.
Level: 32
Type: ERROR
Impact: Other

ODI-20046: ODI-20046: Unable to change an open object
Cause: An object is already open in another editor and cannot be modified.
Action: Close any other editors which may be locking the object.
Level: 32
Type: ERROR
Impact: Other

ODI-20047: ODI-20047: Unable to change Value
Cause: Internal error.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20048: ODI-20048: Invalid Value entered. Value maximum length is 250 characters
Cause: The Value for one of this object's Flexfields had a length greater than 250 characters.
Action: Ensure the value supplied has a valid length.

Level: 32
Type: ERROR
Impact: Other

ODI-20049: ODI-20049: You cannot copy a folder into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Folders cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20050: ODI-20050: You cannot copy a knowledge module into another project.
Cause: An unsupported operation was attempted.
Action: Knowledge modules cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20051: ODI-20051: You cannot copy a package into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Packages cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20052: ODI-20052: You cannot copy an interface into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Interfaces cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20053: ODI-20053: You cannot copy a procedure into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other
ODI-20054: You cannot move a folder into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Folders cannot be moved into hierarchy of another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20055: You cannot move a knowledge module into another project.
Cause: An unsupported operation was attempted.
Action: Knowledge modules cannot be moved into hierarchy of another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20056: You cannot move a package into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Packages cannot be moved into hierarchy of another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20057: You cannot move an interface into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Interfaces cannot be moved into hierarchy of another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20058: You cannot move a procedure into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be moved into hierarchy of another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20059: You cannot copy a knowledge module into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Knowledge modules cannot be copied into packages from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20060: ODI-20060: You cannot copy an interface into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Interfaces cannot be copied into packages from another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20061: ODI-20061: You cannot copy a procedure into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be copied into packages from another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20062: ODI-20062: You cannot move a knowledge module into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Knowledge modules cannot be moved into packages from another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20063: ODI-20063: You cannot move an interface into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Interfaces cannot be moved into packages from another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20064: ODI-20064: You cannot move a step into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Package steps cannot be moved into packages from another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20065: ODI-20065: You cannot move a procedure into a package belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be moved into packages from another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20066: You cannot copy a folder into another project.
Cause: An unsupported operation was attempted.
Action: Folders cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20067: You cannot copy a procedure into another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20068: You cannot copy a variable into another project.
Cause: An unsupported operation was attempted.
Action: Variables cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20069: You cannot move a folder into another project.
Cause: An unsupported operation was attempted.
Action: Folders cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20070: You cannot move a sequence into another project. Copy the sequence instead.
Cause: An unsupported operation was attempted.
Action: Sequences cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20071: You cannot move a procedure into another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20072: ODI-20072: You cannot move a variable into another project.
Cause: An unsupported operation was attempted.
Action: Variables cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20073: ODI-20073: You cannot copy a schedule into a scenario belonging to another project.
Cause: An unsupported operation was attempted.
Action: Schedules cannot be copied into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20074: ODI-20074: You cannot move a schedule into a scenario belonging to another project.
Cause: An unsupported operation was attempted.
Action: Schedules cannot be moved into hierarchy of another projects.

Level: 32
Type: ERROR
Impact: Other

ODI-20075: ODI-20075: You cannot move a folder into one of its subfolders.
Cause: An unsupported operation was attempted.
Action: Folders cannot be moved into their subfolders.

Level: 32
Type: ERROR
Impact: Other

ODI-20076: ODI-20076: You cannot copy a knowledge module into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Knowledge modules cannot be copied into package steps from another projects.

Level: 32
Type: ERROR
Impact: Other
ODI-20077: You cannot copy an interface into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Interfaces cannot be copied into package steps from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20078: You cannot copy a procedure into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be copied into package steps from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20079: You cannot move a knowledge module into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Knowledge modules cannot be moved into package steps from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20080: You cannot move an interface into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Interfaces cannot be moved into package steps from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20081: You cannot move a step into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Steps cannot be moved into package steps from another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20082: You cannot move a procedure into a package step belonging to another project.
Cause: An unsupported operation was attempted.
Action: Procedures cannot be moved into package steps from another projects.
Level: 32
Type: ERROR
Impact: Other
ODI-20083: ODI-20083: Unable to perform the operation. {0} is being edited.
Cause: An object is being edited, preventing other operations.
Action: Save or cancel editing of the object.

Level: 32
Type: ERROR
Impact: Other
ODI-20084: ODI-20084: Only variables from the same project can be placed in a package.
Cause: An unsupported operation was attempted.
Action: Variables from another projects cannot be placed in packages.

Level: 32
Type: ERROR
Impact: Other
ODI-20085: ODI-20085: Only mappings from the same project can be placed in a package.
Cause: An unsupported operation was attempted.
Action: Mappings from another project cannot be placed in packages.

Level: 32
Type: ERROR
Impact: Other
ODI-20086: ODI-20086: Only procedures from the same project can be placed in a package.
Cause: An unsupported operation was attempted.
Action: Procedures from another projects cannot be placed in packages.

Level: 32
Type: ERROR
Impact: Other
ODI-20087: ODI-20087: Error while duplicating
Cause: Internal error.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other
ODI-20088: ODI-20088: Error while generating the scenario
Cause: Internal error.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20089: Error during parameter initialization
  Cause: Internal error.
  Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20090: Error while duplicating
  Cause: Internal error.
  Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20091: An unexpected error occurred.
  Cause: Internal error.
  Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20092: An error occurred while replacing the version.
  Cause: Internal error.
  Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20093: Scenario generation is not allowed for non-saved object
  Cause: Scenario generation could not be performed because the source object was not saved.
  Action: Ensure the source object is saved before attempting scenario generation for it.

Level: 32
Type: ERROR
Impact: Other

ODI-20094: Specify the object name to generate Scenario
  Cause: Scenario generation could not be performed because the source object's name was not specified.
Action: Ensure the source object's name is specified before attempting scenario generation for it.

Level: 32
Type: ERROR
Impact: Other

ODI-20095: ODI-20095: Marker Group save was cancelled
Cause: Marker group save was cancelled by a user.
Action: No action required.

Level: 32
Type: ERROR
Impact: Other

ODI-20096: ODI-20096: Unable to edit the action line.
Cause: Internal error.
Action: No action required.

Level: 32
Type: ERROR
Impact: Other

ODI-20097: ODI-20097: The line Name is mandatory
Cause: A value for the Action Line Name field was not specified.
Action: Enter a non-empty value for the Action Line Name field.

Level: 32
Type: ERROR
Impact: Other

ODI-20098: ODI-20098: Some Datatype Conversions between current and new Technologies are absent
Cause: Changing the selected Model's Technology failed because the Physical Architecture did not provide datatype conversion rules for datatypes used by attributes of datastores belonging to the selected model.
Action: Ensure datatype conversion rules exist for all datatypes used by attributes of datastores belonging to the selected model or do not use datatypes that cannot be converted.

Level: 32
Type: ERROR
Impact: Other

ODI-20099: ODI-20099: Unable to create execution window
Cause: Internal error.
Action: No action required.

Level: 32
Type: ERROR
**Impact:** Other

**ODI-20100: ODI-20100: Unable to access a join or a filter**
**Cause:** Access to a join or filter failed due to insufficient ODI security permissions.
**Action:** Ensure the ODI user security permissions are correct for the join or filter object.
**Level:** 32
**Type:** ERROR

**ODI-20101: ODI-20101: Unable to find mapping alias**
**Cause:** Access to the target mapping failed due to insufficient ODI security permissions.
**Action:** Ensure the ODI user security permissions are correct for the target mapping.
**Level:** 32
**Type:** ERROR

**ODI-20102: ODI-20102: Unable to find source table alias**
**Cause:** Access to the source table failed due to insufficient ODI security permissions.
**Action:** Ensure the ODI user security permissions are correct for the source table.
**Level:** 32
**Type:** ERROR

**ODI-20103: ODI-20103: Unable to access a target column**
**Cause:** Access to the target column failed due to insufficient ODI security permissions.
**Action:** Ensure the ODI user security permissions are correct for the target column.
**Level:** 32
**Type:** ERROR

**ODI-20105: ODI-20105: "Schema", "Table", "Column" and "Filter" are mandatory fields.**
**Cause:** Values for the mandatory "Schema", "Table", "Column" and "Filter" fields were not supplied.
**Action:** Ensure values are supplied for these mandatory fields.
**Level:** 32
**Type:** ERROR

**ODI-20106: ODI-20106: Schema and Native sequence name are mandatory fields**
**Cause:** Values for the mandatory Schema and Native sequence name fields were not supplied.
**Action:** Ensure values are supplied for these mandatory fields.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20107:** ODI-20107: A project sequence with the name "{0}" already exists in the project "{1}"

**Cause:** Saving the project sequence failed because the Sequence name was not unique within the Project.
**Action:** Ensure the sequence name entered is unique.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20108:** ODI-20108: A global sequence with the name "{0}" already exists

**Cause:** Saving the Global sequence failed because the Global Sequence name was not unique.
**Action:** Ensure the sequence name entered is unique.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20109:** ODI-20109: Error while restoring the version

**Cause:** Internal error.
**Action:** No action required.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20110:** ODI-20110: No version of this element exist.

**Cause:** The selected version of this object was not found in version repository.
**Action:** Create or restore the selected version of the object.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20111:** ODI-20111: Sub-model code cannot be empty.

**Cause:** A value of the mandatory Sub-model code field was not supplied.
**Action:** Enter a non-empty value for the Sub-model code field.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other
ODI-20112: ODI-20112: The path defined in the logical schema is incorrect.
Cause: Incorrect path was specified in physical schema which is linked to the logical schema of this datastore in the current context.
Action: Ensure the path specified in physical schema is correct.
Level: 32
Type: ERROR
Impact: Other

ODI-20113: ODI-20113: The GUID that was supplied does not match the GUID for this user in the external identity store. Please retrieve the correct GUID before saving.
Cause: The supplied GUID did not match GUID from external identity store.
Action: Provide a valid GUID.
Level: 32
Type: ERROR
Impact: Other

ODI-20114: ODI-20114: Error while subscribing
Cause: An unexpected error occurred while trying to subscribe a datastore for CDC.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20115: ODI-20115: Error while stopping journalizing
Cause: An unexpected error occurred while trying to stop journalizing.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20116: ODI-20116: Aliases are specified and are not unique.
Cause: Duplicate Alises were detected.
Action: Change the name of the join key alias.
Level: 32
Type: ERROR
Impact: Other

ODI-20117: ODI-20117: Error while executing command line.
Cause: An unexpected error occurred while trying to open the Report.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20118: Error while building the menu.
Cause: An unexpected error occurred while building a menu.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20119: Error during generation.
Cause: An unexpected error occurred during the report generation.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20120: Error while journalizing
Cause: An unexpected error occurred during journalizing.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20121: Error while saving the diagram
Cause: An unexpected error occurred during the saving the diagram.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20122: Error while unsubscribing
Cause: An unexpected error occurred during the unsubscribing action.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20123: Error while executing query
Cause: An unexpected error occurred during query execution.
Action: Check the error details for further actions.
Level: 32
Type: ERROR
Impact: Other

ODI-20124: Operation cancelled by user.
Cause: Operation cancelled by user
Action: Review the other messages for further actions.
Level: 32
Type: WARNING
Impact: Other

ODI-20126: ODI-20126: TreeTableColumn cannot be added
Cause: TreeTableColumn with this order number already exists
Action: Contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

ODI-20127: ODI-20127: This TreeTableColumn cannot be removed.
Cause: TreeTableColumn does not exist.
Action: Contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

Cause: An error occurred during rollback operation.
Action: Review other messages for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20129: ODI-20129: Exception occurred.
Cause: An unexpected error occurred.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20130: ODI-20130: You must select a folder.
Cause: A folder was not selected.
Action: Select a folder before attempting this action.
Level: 32
Type: ERROR
Impact: Other

ODI-20131: ODI-20131: Cannot retrieve the table list
Cause: An error occurred while trying to retrieve a list of tables.
**Action:** Review the message log for more information. If problem persists contact Oracle Support Services.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20132: ODI-20132: An interface cannot be moved to another project**  
**Cause:** An unsupported drag and drop operation was attempted.  
**Action:** No action required.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20133: ODI-20133: A procedure cannot be moved to another project**  
**Cause:** An unsupported drag and drop operation was attempted.  
**Action:** No action required.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20134: ODI-20134: A variable cannot be moved to another project**  
**Cause:** An unsupported drag and drop operation was attempted.  
**Action:** No action required

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20135: ODI-20135: A step cannot be moved to another package**  
**Cause:** An unsupported drag and drop operation was attempted.  
**Action:** No action required

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20138: ODI-20138: An error occurred during: dragGesture**  
**Cause:** An unexpected error occurred while dragging an object.  
**Action:** Review the message log for more information. If problem persists contact Oracle Support Services.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20139: ODI-20139: An error occurred during: dragEnter**  
**Cause:** An unexpected error occurred during a drag operation.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20140: ODI-20140: An error occurred during: Drop
Cause: An unexpected error occurred while dropping an object.
Action: Review the message log for more information. If problem persists contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-20141: ODI-20141: Login Creation Error
Cause: An unexpected error occurred while creating a new Login.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20142: ODI-20142: Popup Menu Creation Error
Cause: An unexpected error occurred while creating a popup menu.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20144: ODI-20144: Error while Deleting
Cause: An unexpected error occurred while deleting a tree object.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20145: ODI-20145: Error while Opening splitframe.
Cause: An unexpected error occurred opening a frame.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20146: ODI-20146: Error occurred during duplication
Cause: An unexpected error occurred while duplicating an object.
Action: Review the error details and message log for more information.
Level: 32
Type: ERROR
Impact: Other

**ODI-20148: ODI-20148: An error occurred during: drag over the object**
**Cause:** An unexpected error occurred while dragging an object over another object.
**Action:** Review the error details and message log for more information.

Level: 32
Type: ERROR
Impact: Other

**ODI-20149: ODI-20149: Logical schema can't be undefined**
**Cause:** A Logical schema was not defined.
**Action:** Define a Logical schema.

Level: 32
Type: ERROR
Impact: Other

**ODI-20150: ODI-20150: KM or Procedure already encrypted. No encryption was performed.**
**Cause:** The requested object has already been encrypted.
**Action:** No action required.

Level: 32
Type: ERROR
Impact: Other

**ODI-20151: ODI-20151: File is not found. Invalid file location**
**Cause:** The specified file could not be located in the file system.
**Action:** Ensure file location specified is valid and accessible.

Level: 32
Type: ERROR
Impact: Other

**ODI-20152: ODI-20152: Object cannot be deleted**
**Cause:** The specified object could not be deleted.
**Action:** Ensure the specified object exists and the security permissions permit deletion.

Level: 32
Type: ERROR
Impact: Other

**ODI-20153: ODI-20153: The following field is missing: Syntax**
**Cause:** User function syntax has not been specified.
**Action:** Specify the function syntax.
Level: 32  
Type: ERROR  
Impact: Other  

ODI-20155: ODI-20155: Changing the Logical Schema may require a re-generation of your Mappings. It may be better to modify the Topology information instead.  
Cause:  
Action:  

Level: 32  
Type: WARNING  
Impact: Other  

Cause: An error occurred during the datastore distribution process.  
Action: Review the message details and message log for more information. If problem persists contact Oracle Support Services.  

Level: 32  
Type: ERROR  
Impact: Other  

ODI-20159: ODI-20159: The Attribute \{0\} is used as a Reference  
Cause: An attempt was made to delete an attribute referenced by another object.  
Action: Delete the object which references this attribute then retry deleting this attribute.  

Level: 32  
Type: ERROR  
Impact: Other  

ODI-20160: ODI-20160: The table \{0\} does not exist.  
Cause: An error occurred while executing the SQL request  
Action: Review the message details for more information. If problem persists contact Oracle Support Services.  

Level: 32  
Type: ERROR  
Impact: Other  

Cause: An error occurred during the standard reverse-engineering process.  
Action: Ensure the technology or driver supports standard reverse-engineering. Otherwise choose Customized Reverse and select an appropriate RKM for the technology.  

Level: 32  
Type: ERROR  
Impact: Other  

ODI-20162: ODI-20162: The context is not valid.
Cause: A Context was not specified.
Action: Specify a Context.
Level: 32
Type: ERROR
Impact: Other

ODI-20163: ODI-20163: Unable to add object
Cause: An error occurred while dragging and dropping an object.
Action: Review the message details and message log for more information.
Level: 32
Type: ERROR
Impact: Other

ODI-20164: ODI-20164: The line Name is mandatory
Cause: A name was not specified.
Action: Specify a Line name.
Level: 32
Type: ERROR
Impact: Other

ODI-20165: ODI-20165: The project name {0} is a reserved word.
Cause: A reserved word was used as the name of a project.
Action: Enter a different project name.
Level: 32
Type: ERROR
Impact: Other

ODI-20166: ODI-20166: The project code {0} is a reserved word.
Cause: A reserved word was used as the project code.
Action: Enter a different project code.
Level: 32
Type: ERROR
Impact: Other

ODI-20167: ODI-20167: Logical schema is not set for the current context
Cause: A Logical schema was not set for the current context.
Action: Ensure the Logical Schema is not set to "Undefined" in the Context editor.
Level: 32
Type: ERROR
Impact: Other

ODI-20168: ODI-20168: Logical schema is not set for the current context
Cause: A Logical schema was not set for the current context.
Action: Ensure the Logical Schema is not set to "Undefined" in the Context editor.
Level: 32
Type: ERROR
Impact: Other

ODI-20169: ODI-20169: The field [0] is mandatory.
Cause: A mandatory field was not specified.
Action: Enter a value for this field.

Level: 32
Type: ERROR
Impact: Other

ODI-20170: ODI-20170: You are trying to insert this versioned object but the version was deleted. Please re-create a version for this object.
Cause: The requested version of the object did not exist in the repository.
Action: Recreate the required version of this object.

Level: 32
Type: ERROR
Impact: Other

ODI-20171: ODI-20171: The label already contains a child of [0]. To add [1] to the label, you should delete [2] [3]. It is advised to use the button "synchronize" later to check the label's coherence.
Cause: The label already contained the specified object as a child.
Action: Delete the child object from the label before retrying the addition. Consider using the synchronize option to verify the label's coherence.

Level: 32
Type: ERROR
Impact: Other

ODI-20172: ODI-20172: The label already contains a parent of [0]. To add [1] to the label, you should delete [2] [3]. It is advised to use the button "synchronize" later to check the label's coherence.
Cause: The label has already contained the specified object as a parent of [0].
Action: Delete the parent object from the label before retrying the addition. Consider using the synchronize option to verify the label's coherence.

Level: 32
Type: ERROR
Impact: Other

ODI-20173: ODI-20173: An error occurred while generating the procedure
Cause: An unexpected error occurred while generating a procedure.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other
ODI-20174: Folder \(0\) already contains an mapping named \(1\)

**Cause:** An mapping of the same name already existed in the specified folder.

**Action:** Specify another name for the mapping.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20175: You cannot give an empty name to an mapping

**Cause:** The Mapping’s name was not specified.

**Action:** Enter a non-empty value for the mapping’s name.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20176: You cannot create multiple mappings with the same name

**Cause:** An mapping of the same name already existed.

**Action:** Specify a different name for the mapping.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20177: You must select a generation folder

**Cause:** The Generation folder was not selected.

**Action:** Select a generation folder.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20180: You cannot choose an expiration date in the past.

**Cause:** Entered expiration date was in the past.

**Action:** Enter valid expiration date.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20181: You cannot set an expiration date if there is no password.

**Cause:** No password was entered.

**Action:** Enter a password before setting an expiration date.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-20182: Error while opening window

**Cause:** An unexpected error occurred while opening a window.
**ODI-20183: ODI-20183: Error while refreshing Label**

**Cause:** An unexpected error occurred while refreshing a label.

**Action:** Review the error details for further information.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20184: ODI-20184: The request to retrieve the sequence list has not been defined on the technology.**

**Cause:** The query for retrieving sequences has not been defined for the technology.

**Action:** Update the technology with the sequence query syntax.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20185: ODI-20185: Error while opening window**

**Cause:** An unexpected error occurred while opening a window.

**Action:** Review the error details for further information.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20186: ODI-20186: Error while saving**

**Cause:** An unexpected error occurred while saving an object.

**Action:** Review the error details for further information.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20187: ODI-20187: Error while adding the marker**

**Cause:** An unexpected error occurred while adding a marker.

**Action:** Review the error details for further information.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20188: ODI-20188: This object is locked by another user. You cannot edit its markers.**

**Cause:** The object was locked by another user.
Action: Wait until the object is unlocked. Consider contacting the user who has the object locked.

Level: 32
Type: ERROR
Impact: Other

ODI-20189: ODI-20189: You do not have the sufficient privileges to reverse-engineer a model
Cause: The model could not be reverse-engineered due to insufficient privileges.
Action: Ensure the SUPERVISOR or owner of model grants the appropriate permissions.

Level: 32
Type: ERROR
Impact: Other

ODI-20190: ODI-20190: You cannot reverse engineer a model in 'Standard' mode: the model technology assumes RKM to be selected.
Cause: No RKM was specified for this model.
Action: Select an RKM for this model.

Level: 32
Type: ERROR
Impact: Other

ODI-20191: ODI-20191: The model you want to reverse-engineer references a logical schema that no longer exists.
Cause: The referenced Logical Schema for the Model was not found.
Action: Ensure a valid Logical Schema is assigned for the Model.

Level: 32
Type: ERROR
Impact: Other

ODI-20192: ODI-20192: Error while replacing versioned object
Cause: An unexpected error occurred while replacing a versioned object.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20193: ODI-20193: An error occurred during the versioning operation.
Cause: An unexpected error occurred during versioning.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other
ODI-20194: Your license does not allow Versioning operations.
   **Cause:** The license does not include versioning.
   **Action:** Upgrade the license.

   **Level:** 32
   **Type:** ERROR
   **Impact:** Other

ODI-20195: Unable to unlock this object
   **Cause:** An unexpected error occurred while unlocking an object.
   **Action:** Review the error details for further information.

   **Level:** 32
   **Type:** ERROR
   **Impact:** Other

ODI-20196: You must select an object version
   **Cause:** No version selected for checkout.
   **Action:** Select version for checkout.

   **Level:** 32
   **Type:** ERROR
   **Impact:** Other

ODI-20197: Your license does not allow Versioning operations.
   **Cause:** The current license does not include versioning.
   **Action:** Upgrade the license to include versioning.

   **Level:** 32
   **Type:** ERROR
   **Impact:** Other

ODI-20198: Error while creating the version.
   **Cause:** An unexpected error occurred while creating a version.
   **Action:** Review the error details for further information.

   **Level:** 32
   **Type:** ERROR
   **Impact:** Other

ODI-20199: Your license does not allow Versioning operations.
   **Cause:** The license does not include versioning.
   **Action:** Upgrade your license.

   **Level:** 32
   **Type:** ERROR
   **Impact:** Other

ODI-20200: An error happened while comparing the versions
   **Cause:** An unexpected error occurred while comparing versions.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20201: ODI-20201: Error while refreshing.
Cause: An unexpected error occurred while refreshing.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20202: ODI-20202: Synchronisation was stopped by the user.
Cause: Synchronization was stopped by the user.
Action: No action is required.
Level: 32
Type: ERROR
Impact: Other

ODI-20203: ODI-20203: The current version for this object no longer exists. Please create a new version for this object.
Cause: The current version for this object was not found in the repository.
Action: Create a new version for this object.
Level: 32
Type: ERROR
Impact: Other

ODI-20205: ODI-20205: Could not delete object. This object is being used.
Cause: The object deletion failed because it was already in use.
Action: Remove the usage of the selected object before retrying the deletion.
Level: 32
Type: ERROR
Impact: Other

ODI-20206: ODI-20206: Could not delete object. This object is being displayed.
Cause: The object deletion failed because it was being displayed.
Action: Close object before retrying the deletion.
Level: 32
Type: ERROR
Impact: Other

ODI-20208: ODI-20208: A code was duplicated:
Cause: A Flex field with the same code already existed.
Action: Enter another Flex field code.
Level: 32
Type: ERROR
Impact: Other

ODI-20209: ODI-20209: An error occurred.
Causes: An unexpected error occurred.
Action: Review the error details for further information.

Type: ERROR
Impact: Other

ODI-20226: ODI-20226: Error while applying the changes
Cause: An unexpected error occurred while saving changes.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-20227: ODI-20227: You cannot copy this attribute. Attribute name already in use.
Cause: Attribute copy failed because the Datastore already contained an attribute with the same name.
Action: Select another attribute to drop to datastore.
Level: 32
Type: ERROR
Impact: Other
ODI-20228: ODI-20228: Error while creating the popup menu

Cause: Retrieval of the Available Methods for the column failed.
Action: Ensure the repository database connection is not broken and the ODI Security permissions are correct.

Level: 32
Type: ERROR
Impact: Other

ODI-20229: ODI-20229: Unable to create condition.

Cause: The editor for the Condition could not be opened.
Action: Ensure the repository database connection is not broken and the ODI Security permissions are correct.

Level: 32
Type: ERROR
Impact: Other

ODI-20230: ODI-20230: Error while creating the popup menu

Cause: Retrieval of the Available Methods for the Condition failed.
Action: Ensure the repository database connection is not broken and the ODI Security permissions are correct.

Level: 32
Type: ERROR
Impact: Other

ODI-20231: ODI-20231: Unable to create a synonym for this table.

Cause: An unexpected error occurred while creating a synonym.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20232: ODI-20232: Error while deleting attributes

Cause: An unexpected error occurred while deleting attributes.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20233: ODI-20233: Error during the drag-and-drop operation

Cause: An unexpected error occurred during a drag and drop operation.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other
ODI-20234: You do not have the sufficient privileges to add this object.
  Cause: The operation failed due to insufficient ODI security on Attribute.
  Action: Ensure the ODI user security permissions are correct specifically the Attribute Duplication setting.

Level: 32
Type: ERROR
Impact: Other

ODI-20235: Error during the drag-and-drop operation
  Cause: An unexpected error occurred during a drag and drop operation
  Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-20236: You do not have the sufficient privileges to add this object.
  Cause: The operation failed due to insufficient ODI security on Datastore.
  Action: Ensure the ODI user security permissions are correct.

Level: 32
Type: ERROR
Impact: Other

ODI-20237: Unable to duplicate the attribute.
  Cause: An unexpected error occurred while duplicating an attribute.
  Action: Review the error details for further information. Ensure that the repository connection is still valid.

Level: 32
Type: ERROR
Impact: Other

ODI-20238: Unable to duplicate the table.
  Cause: An unexpected error occurred while duplicating a table.
  Action: Review the error details for further information. Ensure that the repository connection is still valid.

Level: 32
Type: ERROR
Impact: Other

ODI-20239: Error during the action
  Cause: An unexpected error occurred during a user action.
  Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other
ODI-20240: Error while deleting
  Cause: An unexpected error occurred during a delete operation.
  Action: Review the error details for further information. Ensure that the repository connection is valid.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20241: Unable to apply changes.
  Cause: The changes to the filter could not be applied.
  Action: Save the object before retrying to apply the filter.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20242: Error while creating the popup menu
  Cause: Retrieval of the Available Methods for the filter failed.
  Action: Ensure the repository database connection is not broken and the ODI Security permissions are correct.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20243: Unable to add an attribute.
  Cause: An unexpected error occurred while adding an attribute.
  Action: Review the error details for further information. Ensure that the repository connection is open.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20244: Unable to add reference
  Cause: An unexpected error occurred while adding a reference.
  Action: Review the error details for further information. Ensure that the repository connection is open.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20245: Unable to add table
  Cause: An unexpected error occurred while adding a table.
  Action: Review the error details for further information. Ensure that the repository connection is open.
  Level: 32
Type: ERROR
Impact: Other

**ODI-20246: ODI-20246: Error while applying the changes**

*Cause:* The reference to the Model could not be created.

*Action:* Ensure the repository database connection is not broken and the ODI Security permissions are correct.

*Level:* 32
*Type:* ERROR
*Impact:* Other

**ODI-20247: ODI-20247: Unable to add key.**

*Cause:* An unexpected error occurred while adding a key.

*Action:* Review the error details for further information.

*Type:* ERROR
*Impact:* Other

**ODI-20250: ODI-20250: Error while**

*Cause:* Internal error.

*Action:* Review the error details for further information.

*Level:* 32
*Type:* ERROR
*Impact:* Other

**ODI-20251: ODI-20251: An unexpected error has occurred**

*Cause:* Unable to acess the Security Authorization settings.

*Action:* Ensure the repository database connection is not broken and the ODI Security permissions are correct.

*Level:* 32
Type: ERROR
Impact: Other
ODI-20252: ODI-20252: Unable to apply changes.
  Cause: Saving the model condition failed.
  Action: Ensure the repository database connection is not broken and the ODI Security permissions are correct.
  Level: 32
Type: ERROR
Impact: Other
ODI-20253: ODI-20253: The object was deleted by another user
  Cause: The operation could not be performed because the specified object could not found.
  Action: Refresh the view and retry the operation.
  Level: 32
Type: ERROR
Impact: Other
ODI-20254: ODI-20254: The marker was deleted by another user
  Cause: The operation could not be performed because the specified Marker object was in an Inconsistent state.
  Action: Refresh the view and retry the operation.
  Level: 32
Type: ERROR
Impact: Other
ODI-20255: ODI-20255: Marker name is mandatory
  Cause: Marker could not be saved because the mandatory Name field was not entered.
  Action: Enter a value in the Marker name field.
  Level: 32
Type: ERROR
Impact: Other
ODI-20256: ODI-20256: You do not have the sufficient privileges to change the marker
  Cause: Modification of the Marker failed due to insufficient ODI security privileges.
  Action: Ensure the ODI user security permissions are correct.
  Level: 32
Type: ERROR
Impact: Other
ODI-20257: ODI-20257: The Where text is mandatory when the Filter is active for a static control.
**Cause:** The WHERE clause was null or empty.
**Action:** Ensure the WHERE clause is valid.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20258:** ODI-20258: It is not possible to check the expression due to DBMS connection failure  
**Cause:** Connection to the DBMS failed.  
**Action:** Ensure the DBMS is available and the connection information to it is correctly specified.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20259:** ODI-20259: cannot show the data since the join points to different connections  
**Cause:** Unable to retrieve data due to a conflict between the physical schemas involved.  
**Action:** Ensure the Topology or Context settings are correct and multiple data stores in the same Source Set are not connected using different Physical Schemas.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20260:** ODI-20260: Name and Code columns of the FlexField cannot be empty.  
** Cause:** FlexField name or code were found to be empty or null.  
**Action:** Enter a name and a code for the FlexField.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20261:** ODI-20261: The "Procedure Name" is mandatory.  
**Cause:** The "Procedure Name" field value was not specified.  
**Action:** Enter a value for the "Procedure Name" field.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-20262:** ODI-20262: Logical Schema is not selected.  
**Cause:** There is no Logical Schema selected for this variable.  
**Action:** Select a Logical Schema.

**Level:** 32  
**Type:** ERROR
Impact: Other

ODI-20263: ODI-20263: Please enter the duration in a format such as 5s (seconds), 10m (minutes), 1d (days), 1y (years).
Cause: Duration is specified in an invalid format
Action: Please change duration such that it comprises an integer followed by a time indicator, for example 10s, 30d, 1y
Level: 32
Type: ERROR
Impact: Other

ODI-20300: ODI-20300: Error while printing the diagram
Cause: An unexpected condition has occurred in the print system.
Action: Check the printer settings and physical printer.
Level: 32
Type: ERROR
Impact: Other

ODI-20301: ODI-20301: Error while saving the diagram
Cause: The save file could not be created.
Action: Check the destination folder is writable and that there is sufficient disk space.
Level: 32
Type: ERROR
Impact: Other

ODI-20310: Unsupported Flavor
Cause: An attempt was made to drag and drop an object into an unsupported area of the canvas.
Action: Drag a different object type or drop the object into a valid area.
Level: 32
Type: ERROR
Impact: Other

ODI-20311: ODI-20311: An unexpected exception occurred while reading or writing a text in a business object.
Cause: An unexpected exception occurred while reading or writing text.
Action: Review the console output or logs for additional information.
Level: 32
Type: ERROR
Impact: Other

ODI-20312: ODI-20312: An error occurred while printing.
Cause: An error occurred while printing.
Action: Ensure that the printer is configured properly.
Level: 32
Type: ERROR
Impact: Other

**ODI-20313: ODI-20313: Could not double click**
*Cause:* An unexpected error has occurred.
*Action:* Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

**ODI-20315: ODI-20315: Invalid Password**
*Cause:* The Password is incorrect.
*Action:* Correct the password and try again.

Level: 32
Type: ERROR
Impact: Other

**ODI-20316: ODI-20316: A timeout occurred while trying to establish a connection.**
*Cause:* A timeout error occurred while connecting to the database.
*Action:* Verify that the Database Connection details are correct and the database is available.

Level: 32
Type: ERROR
Impact: Other

**ODI-20317: ODI-20317: The field "{0}" is mandatory.**
*Cause:* A value has not been provided for a required field.
*Action:* Enter a value for the named field.

Level: 32
Type: ERROR
Impact: Other

**ODI-20318: ODI-20318: The icon {0} cannot be found.**
*Cause:* An unexpected error has occurred.
*Action:* Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

**ODI-20319: ODI-20319: {0} is not a valid date for field {1}. The format is: {2}**
*Cause:* The format of the date does not match the required format.
*Action:* Enter a valid date using the correct date format.

Level: 32
Type: ERROR
Impact: Other

ODI-20320: ODI-20320: Error when applying changes.
Cause: An unexpected error has occurred.
Action: Contact Oracle Support Services.

Level: 32

Type: ERROR
Impact: Other

ODI-20321: ODI-20321: Error when initializing the panel.
Cause: An unexpected error has occurred.
Action: Contact Oracle Support Services.

Level: 32

Type: ERROR
Impact: Other

ODI-20322: ODI-20322: Unable to add a Step.
Cause: An unexpected error has occurred.
Action: Contact Oracle Support Services.

Level: 32

Type: ERROR
Impact: Other

ODI-20323: ODI-20323: Unable to execute the step
Cause: An unexpected error has occurred.
Action: Contact Oracle Support Services.

Level: 32

Type: ERROR
Impact: Other

ODI-20324: ODI-20324: Cannot execute the Package
Cause: An unexpected error has occurred.
Action: Contact Oracle Support Services.

Level: 32

Type: ERROR
Impact: Other

ODI-20325: ODI-20325: Unable to open the linked object.
Cause: An unexpected error has occurred.
Action: Contact Oracle Support Services.

Level: 32

Type: ERROR
Impact: Other
ODI-20326: Unable to edit the text
  Cause: An unexpected error has occurred.
  Action: Contact Oracle Support Services.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20327: Unable to modify the value.
  Cause: An unexpected error has occurred.
  Action: Contact Oracle Support Services.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20328: Unable to define the next Step.
  Cause: An unexpected error has occurred.
  Action: Contact Oracle Support Services.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20329: Unable to delete Steps(s). You do not have Edit privileges.
  Cause: An error occurred while attempting to delete one or more package steps.
  Action: Update security settings to allow step editing privileges.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20330: Unable to delete Link(s). You do not have Edit privileges.
  Cause: You must have Edit privilege on each steps of the link.
  Action: Review the Security settings for the steps and ensure that you have the correct permissions.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-20331: The Step diagram is not be accessible.
  Cause: You do not have permission to access this step.
  Action: Check the diagram security settings and verify that you have permission to access the diagram.
  Level: 32
  Type: ERROR
  Impact: Other
ODI-20332: Cannot change the position of this object
  Cause: An unexpected error has occurred.
  Action: Contact Oracle Support Services.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-20333: Cannot view this Step because the Package is being edited
  Cause: A package step cannot be viewed while the parent package is being edited.
  Action: Close the package editor.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-20335: Printing Options not accessible.
  Cause: An unexpected error occurred while printing a package.
  Action: Review the log file for additional info about the exception.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-20336: Unknown event sent to the Package event manager.
  Cause: An unexpected error has occurred.
  Action: Contact Oracle Support Services.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-20337: A Knowledge Module cannot be added as a Step.
  Cause: Only a DataStore,Model,Sub Model,Interface,Procedure or Variable can be added as a Step.
  Action: Use a valid object type for your step creation.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-20338: A starting Step must be defined.
  Cause: A Starting step has been defined.
  Action: Select the first step in the package and mark it as the starting step.

  Level: 32
  Type: ERROR
  Impact: Other
ODI-20339: ODI-20339: One or more Steps are not linked.
   Cause: All steps must be linked.
   Action: Ensure that all steps are linked.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-20340: ODI-20340: Only one starting Step can be defined.
   Cause: A package must have one and only one starting steps.
   Action: Ensure that you have only one starting step defined.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-20341: ODI-20341: You do not have the appropriate privileges to edit a package step.
   Cause: An attempt was made to edit or view a package step, but the user does not have privileges to access the step.
   Action: Update security settings for the user to allow package and step access.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-20342: ODI-20342: Cannot open the Expression Editor
   Cause: An unexpected error has occured.
   Action: Contact Oracle Support Services.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-20343: ODI-20343: There are errors in your diagram
   Cause: The diagram may contain objects that are not connected, or objects that are not completely defined.
   Action: Check the diagram and ensure that all objects are connected and fully defined.

   Level: 32
   Type: ERROR
   Impact: Other

ODI-20344: ODI-20344: Cannot launch the editor for this expression
   Cause: An error occured while retrieving the language for the expression. This may be due to an unexpected exception, or the language may not be available for the schema’s technology.
   Action: Review the message log for additional errors. Ensure that the schema has a valid technology for which the language is set.
Level: 32
Type: ERROR
Impact: Other

ODI-20345: ODI-20345: Cannot change the clause position
Cause: An unexpected internal exception has occurred.
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-20346: ODI-20346: Cannot get the boolean value of an option
Cause: The boolean value of the option could not be retrieved due to a security error.
Action: Review the message log and contact Oracle Support Services for further assistance.

Level: 32
Type: ERROR
Impact: Other

ODI-20347: ODI-20347: Error during data transfer for drag and drop
Cause: An internal error occurred while dropping the object into the diagram.
Action: Review the message log for additional information and contact Oracle Support Services for further assistance.

Level: 32
Type: ERROR
Impact: Other

ODI-20348: ODI-20348: An interface with the same name already exists in this folder. Please change the name of the new interface.
Cause: An interface with the specified name exists in the folder. The interface name must be unique within a folder.
Action: Enter a new interface name that is unique within the folder.

Level: 32
Type: ERROR
Impact: Other

ODI-20349: ODI-20349: Unknown event detected by the event manager. Please contact Oracle Support Services.
Cause: The Package Event Manager was called to action an unknown event.
Action: Contact Oracle Support Services for further assistance.

Level: 32
Type: ERROR
Impact: Other
ODI-20350: Your diagram contains one or more FATAL/CRITICAL errors preventing display of the Flow Editor
Cause: The diagram is incomplete or contains errors that prevent the Flow Editor being displayed.
Action: Return to the diagram tab and review the error messages using the errors and warnings button in the toolbar. Fix the errors in order to access the Flow Editor.

Level: 32
Type: ERROR
Impact: Other

ODI-20351: Error adding source to Quick Edit source table.
Cause: An internal error occurred which prevented the source being added.
Action: Contact Oracle Support Services for further assistance.

Level: 32
Type: ERROR
Impact: Other

ODI-20352: Error adding target datastore to Quick Edit mapping table.
Cause: An internal error occurred which prevented the target being added.
Action: Contact Oracle Support Services for further assistance.

Level: 32
Type: ERROR
Impact: Other

ODI-20353: Only a single column may be pasted into a Quick Edit table.
Cause: The clipboard contains multiple columns. Quick Edit only supports pasting a single cell into a table.
Action: Select the cells to be copied and paste them one at a time.

Level: 32
Type: ERROR
Impact: Other

ODI-20354: Paste targets must be in the same column as the previous copy. This does not apply to Expression columns (Lookup Expression, Join Expression, Filter Expression, and Mapping Expression).
Cause: You have selected a value from one column, and tried to paste it into a different column. This is only supported for Expression Columns.
Action: Please enter the values into the cell manually.

Level: 32
Type: ERROR
Impact: Other

ODI-20355: Duplicate value is not supported on this column.
Cause: The paste operation is not permitted in the Alias and Target Column Name fields as these fields must contain a unique value.
**Action:** Please enter the Alias or Name field manually.

**Level:** 32
**Type:** ERROR
**Impact:** Other

**ODI-20356: ODI-20356:** Can not perform paste into a read-only column.
**Cause:** The Paste operation is not permitted on read-only columns.
**Action:** You may not update this value in the table.

**Level:** 32
**Type:** ERROR
**Impact:** Other

**ODI-20357: ODI-20357:** Can not perform deletion because the target datastore is not temporary.
**Cause:** An attempt was made to delete a row in the target, but the target datastore is not a temporary table. Only rows in a temporary target table may be deleted.
**Action:** You cannot delete the row.

**Level:** 32
**Type:** ERROR
**Impact:** Other

**ODI-20358:** ODI-20358: Interface cannot be saved because it has a fatal error: {0}.
**Cause:** The Interface could not be saved because it contains a fatal error which must be resolved.
**Action:** Review the errors in the Diagram tab and resolve the fatal errors.

**Level:** 32
**Type:** ERROR
**Impact:** Other

**ODI-20359: ODI-20359:** Only one cell can be copied one at a time.
**Cause:** More than one cell was selected. Quick Edit only supports copying a single cell.
**Action:** Select and copy a single cell.

**Level:** 32
**Type:** SET_AT_RUNTIME
**Impact:** Other

**ODI-20360:** ODI-20360: Only Expression columns support Copy and Paste from other applications. For all other columns, please perform a copy first on that column before pasting.
**Cause:** Only values from other applications may be copied into Expression columns.
**Action:** For all other columns, perform a copy first on that column before pasting.

**Level:** 32
**Type:** SET_AT_RUNTIME
Impact: Other

Cause: Values may not be copied between tables in Quick Edit, apart from between Expression columns.
Action: Please enter the values manually.

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-20362: ODI-20362: Couldn't connect to Web Service
Cause: An error occurred while creating a connection to the Web Service.
Action: Ensure that the Web Service is accessible and WSDL URL is correct.

Level: 32
Type: ERROR
Impact: Other

ODI-20363: ODI-20363: Error while exporting request
Cause: The request could not be exported
Action: Check that there is sufficient disk space and that the target directory is accessible.

Level: 32
Type: ERROR
Impact: Other

ODI-20364: ODI-20364: Error while parsing the XML file
Cause: An error occurred while parsing the XML file
Action: Ensure that the correct XML file is specified and that it is correctly structured

Level: 32
Type: ERROR
Impact: Other

ODI-20365: ODI-20365: There is no port with SOAP binding defined on this service
Cause: The referenced service does not support the specified port
Action: Specify a valid port for the service

Level: 32
Type: ERROR
Impact: Other

ODI-20366: ODI-20366: The timeout must be an integer value.
Cause: The value entered for the timeout is not a valid integer
Action: Enter a valid integer value
Level: 32
Type: ERROR
Impact: Other

ODI-20367: Export directory {0} does not exist.
Cause: The specified directory does not exist
Action: Create the directory and repeat the operation

Level: 32
Type: ERROR
Impact: Other

ODI-20368: WSDL URL is null or empty, ODI can not initialize the current request.
Cause: WSDL URL is null
Action: Set the WSDL URL or remove the soap request.

Level: 32
Type: ERROR
Impact: Other

ODI-20370: Shortcuts within a project can only refer to objects that belong to that same project
Cause: Shortcuts within a project can only refer to objects that belong to that same project
Action: Try another folder destination

Level: 32
Type: ERROR
Impact: Other

ODI-20371: No two shortcut objects within a folder may refer to the same base object
Cause: No two shortcut objects within a folder may refer to the same base object
Action: Try another folder destination or fix folder contents

Level: 32
Type: ERROR
Impact: Other

ODI-20372: The source and destination models must be defined with the same Technology
Cause: The source and destination models must be defined with the same Technology
Action: Try another model destination or fix model properties.

Level: 32
Type: ERROR
Impact: Other
ODI-20373: ODI-20373: No two shortcuts within a model may contain the same base object

**Cause:** No two shortcuts within a model may contain the same base object

**Action:** Try another folder destination or fix model contents.

**Level:** 32

**Type:** ERROR

**Impact:** Other

---

ODI-20374: ODI-20374: A model cannot contain a datastore and a datastore shortcut to another datastore with the same datastore name

**Cause:** A model cannot contain a datastore and a shortcut to another datastore with the same datastore name

**Action:** Try another folder destination or fix model contents.

**Level:** 32

**Type:** ERROR

**Impact:** Other

---

ODI-20701: ODI-20701: The Name field is mandatory.

**Cause:** The Name field was not entered.

**Action:** Enter a name for the Load Plan.

**Level:** 32

**Type:** ERROR

**Impact:** Other

---

ODI-20702: ODI-20702: The name given for the Load Plan is already used by another load plan. Please provide another name.

**Cause:** The name provided for the Load Plan was not unique.

**Action:** Enter a unique name for the Load Plan.

**Level:** 32

**Type:** ERROR

**Impact:** Other

---

ODI-20703: ODI-20703: Variable "{{0}}" is not found.

**Cause:** The variable could not be found.

**Action:** Provide another name for the variable.

**Level:** 32

**Type:** ERROR

**Impact:** Other

---

ODI-20704: ODI-20704: Datatype of variable "{{0}}" has been changed.

**Cause:** The datatype of the original variable is different to the datatype of the load plan variable.

**Action:** Verify the datatype of the variable and ensure that the types of the original and load plan variables match.

**Level:** 32
Type: ERROR
Impact: Other

ODI-20705: ODI-20705: This variable is used in one or more case steps. Removing it will trigger deletion of those case steps, and all of their child steps. Do you want to continue?
Cause: An attempt was made to remove a variable which is used in one or more case steps.
Action: To remove the variable and its associated case steps, click Yes. Otherwise, click No, and nothing will be removed.
Level: 32

Type: WARNING
Impact: Other

ODI-20706: ODI-20706: The Step Name is mandatory.
Cause: The Step Name field was not entered.
Action: Enter a name for the Step.
Level: 32

Type: ERROR
Impact: Other

ODI-20707: ODI-20707: The Variable is mandatory.
Cause: A Variable was not selected.
Action: Select a variable.
Level: 32

Type: ERROR
Impact: Other

ODI-20708: ODI-20708: The Scenario is mandatory.
Cause: A Scenario was not selected.
Action: Select a Scenario.
Level: 32

Type: ERROR
Impact: Other

ODI-20709: ODI-20709: The Value is mandatory.
Cause: A Value was not provided.
Action: Enter a Value.
Level: 32

Type: ERROR
Impact: Other

ODI-20710: ODI-20710: The Value format is not valid.
Cause: An incorrect format was given for the Value.
Action: Check the format of the Value and correct it.
Level: 32
Type: ERROR
Impact: Other

ODI-20711: ODI-20711: The Step Name is mandatory.
  Cause: The Step Name field was not entered.
  Action: Provide the name of the Step.

Level: 32
Type: ERROR
Impact: Other

ODI-20712: ODI-20712: The Variable is mandatory.
  Cause: A Variable was not selected.
  Action: Select a Variable.

Level: 32
Type: ERROR
Impact: Other

ODI-20713: ODI-20713: The Scenario is mandatory.
  Cause: A Scenario was not selected.
  Action: Select a Scenario.

Level: 32
Type: ERROR
Impact: Other

  Cause: A Context was not selected for execution.
  Action: Select an execution Context.

Level: 32
Type: ERROR
Impact: Other

ODI-20715: ODI-20715: The Logical Agent is mandatory.
  Cause: A Logical Agent was not selected for execution.
  Action: Select a Logical Agent.

Level: 32
Type: ERROR
Impact: Other

ODI-20716: ODI-20716: No Physical Agent is defined for the selected Logical Agent and Context. Edit Logical Agent "[0]", and define a Physical Agent for Context "[1]."
  Cause: There was no Physical Agent associated with this Logical Agent in the specified context.
  Action: Associate a Physical Agent with the Logical Agent in the selected context.
Level: 32
Type: ERROR
Impact: Other

ODI-20717: ODI-20717: No Physical Agents are running. A Physical Agent must be running in order to Restart a Load Plan.
Cause: There were no Physical Agents running.
Action: Start a Physical Agent before restarting the Load Plan.

Level: 32
Type: ERROR
Impact: Other

ODI-20718: ODI-20718: No Physical Agents are running. A Physical Agent must be running in order to Stop a Load Plan.
Cause: There were no Physical Agents running.
Action: Start the Agent before executing the Load Plan.

Level: 32
Type: ERROR
Impact: Other

ODI-20719: ODI-20719: Scenario "{}" is not found.
Cause: The scenario was not found.
Action: Specify an existing scenario.

Level: 32
Type: ERROR
Impact: Other

ODI-20720: ODI-20720: Physical Agent "{}" - which is defined in Logical Agent "{}" to be used for Context "{}" - is not responding. Verify that Physical Agent "{}" has been started.
Cause: The Physical Agent was not reachable.
Action: Check the Physical Agent and start it.

Level: 32
Type: ERROR
Impact: Other

ODI-20721: ODI-20721: Interface contains one or more errors. You should correct the errors before attempting to execute it
Cause: The interface contains errors which prevent it from being executed.
Action: Review the errors shown in the interface editor and update the interface to fix the problems.

Level: 32
Type: ERROR
Impact: Other
ODI-20722: Cannot display data. Source alias is [0] characters long which is longer than allowed by the technology ([1]). Please review the technology settings in Topology.

**Cause:** Source alias exceeded the limit allowed by its technology.

**Action:** Ensure the maximum table name length setting in the corresponding technology is correct. Consider changing source alias to comply.

- **Level:** 32
- **Type:** ERROR
- **Impact:** Other

ODI-20723: There is no any version of scenario [0] found. A scenario of the step [1] cannot be refreshed.

**Cause:** The scenario of step was not found.

**Action:** Check if specified scenario for this step is correct.

- **Level:** 32
- **Type:** WARNING
- **Impact:** Other

ODI-20724: Journalized data not found. Journal data view: [0]

**Cause:** Journal is not started or is stopped.

**Action:** Ensure the journal is started: select Changed Data Capture > Journal Data.

- **Level:** 32
- **Type:** ERROR
- **Impact:** Other

ODI-20726: The Step Name is mandatory.

**Cause:** The Step Name field was not entered.

**Action:** Enter a name for the Step.

- **Level:** 32
- **Type:** WARNING
- **Impact:** Other

ODI-20727: Scenario "[0]" parent is not found.

**Cause:** The Scenario source object does not exist.

**Action:** Check if the source object, from which the Scenario was generated, does exist.

- **Level:** 32
- **Type:** ERROR
- **Impact:** Other

ODI-20728: The attribute name is mandatory

**Cause:** The datastore attribute could not be saved because the mandatory Name field was not entered.

**Action:** Enter a value in the attribute name field.

- **Level:** 32
Type: ERROR
Impact: Other

ODI-20729: ODI-20729: {0} is a dependant object of the following object(s) {1} and cannot be removed
Cause: Selected object for removal is a dependent object.
Action: Remove the dependent object first.

Level: 32
Type: ERROR
Impact: Other

ODI-20731: ODI-20731: The parent from which this scenario is generated does not exist anymore so the editor couldn't show the parent related information.
Cause: The editor couldn't show the parent related information because the scenario parent does not exist anymore. This could happen, for example, if you imported the scenario, but didn’t import it’s parent object.
Action: Try to figure out, why the scenario parent object does not exist. Try to restore the parent.

Level: 32
Type: ERROR
Impact: Other

ODI-20732: ODI-20732: You cannot move a submodel into another model.
Cause: An unsupported operation was attempted.
Action: Submodels cannot be moved into hierarchy of another models.

Level: 32
Type: ERROR
Impact: Other

ODI-20733: ODI-20733: You cannot copy a submodel into another model.
Cause: An unsupported operation was attempted.
Action: Submodels cannot be copied into hierarchy of another models.

Level: 32
Type: ERROR
Impact: Other

ODI-20734: ODI-20734: Changing the name of a user function only impacts the user function itself; Users need to manually change object(s) which reference the old user function name.
Cause: The user function name has been updated
Action: It is the user’s responsibility to determine where the user function is referenced and to manually change the name of the user function in those places

Level: 32
Type: WARNING
Impact: Other
ODI-20735: The name given for the Physical Agent is already used by another agent. Please provide another name.

**Cause:** The name provided for the Physical Agent was not unique.

**Action:** Enter a unique name for the Physical Agent.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20736: The Name field is mandatory.

**Cause:** The value for the Name field was not specified.

**Action:** Enter a name for the Object.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20737: Could not build WSDL Model.

**Cause:** An unexpected error occurred while building a WSDL model.

**Action:** Review the error details for further information.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20741: This is not a valid Cobol Copybook.

**Cause:** The file chosen in the Reverse Engineering Cobol Copybook process is not a valid Cobol Copybook.

**Action:** Ensure the file is a valid Cobol Copybook.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20742: You cannot copy a mapping into a folder belonging to another project.

**Cause:** An unsupported operation was attempted.

**Action:** Mappings cannot be copied into hierarchy of another projects.

**Level:** 32

**Type:** ERROR

**Impact:** Other

ODI-20743: You cannot copy a reusable mapping into a folder belonging to another project.

**Cause:** An unsupported operation was attempted.

**Action:** Reusable mappings cannot be copied into hierarchy of another projects.

**Level:** 32

**Type:** ERROR
Impact: Other

ODI-20744: ODI-20744: You cannot move a mapping into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Mappings cannot be moved into hierarchy of another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20745: ODI-20745: You cannot move a reusable mapping into a folder belonging to another project.
Cause: An unsupported operation was attempted.
Action: Reusable mappings cannot be moved into hierarchy of another projects.
Level: 32
Type: ERROR
Impact: Other

ODI-20746: ODI-20746: You cannot move a global reusable mapping into a folder.
Cause: An unsupported operation was attempted.
Action: Global Reusable mappings cannot be moved into a folder.
Level: 32
Type: ERROR
Impact: Other

ODI-20747: ODI-20747: You cannot copy a global reusable mapping into a folder.
Cause: An unsupported operation was attempted.
Action: Global Reusable mappings cannot be copied into a folder.
Level: 32
Type: ERROR
Impact: Other

ODI-20748: ODI-20748: Open is not valid for this node.
Cause: The editor is not applicable for this node.
Action: Editor cannot be opened for this node.
Level: 32
Type: ERROR
Impact: Other

ODI-20749: ODI-20749: Selected Capture/Initial Load Capture process is associated with another model. This may cause conflicts during 'Start Journal' action, if the logical process instance selected uses the same physical process instance.
Cause: Selected Goldengate Capture/Initial Load Capture process is used in a different model.
Action: Select a different set of process instances for this model.
Level: 32
Type: ERROR
Impact: Other

**ODI-20750**: ODI-20750: Selected Delivery/Initial Load Delivery process is associated with another model. This may cause conflicts during 'Start Journal' action, if the logical process instance selected uses the same physical process instance.

**Cause**: Selected Goldengate Delivery/Initial Load Delivery process is used in a different model.

**Action**: Select a different set of process instances for this model.

Level: 32
Type: ERROR
Impact: Other

**ODI-20751**: ODI-20751: Load Plan Debugging is not supported: {0}.

**Cause**: An unsupported operation was attempted.

**Action**: Load Plan can't be debug.

Level: 32
Type: ERROR
Impact: Other

**ODI-20752**: ODI-20752: Format can not be empty for File datastore's Date type column

**Cause**: Column added for the File datastore has Date as type but Format is not given

**Action**: Ensure the Format is entered for File datastore's column of type Date.

Level: 32
Type: ERROR
Impact: Other

**ODI-20753**: ODI-20753 : Shortcuts in a Model can not be moved

**Cause**: Shortcuts in a Model can not be moved to another Model

**Action**: Please get the base object of the shortcut first and then try to move

Level: 32
Type: ERROR
Impact: Other

**ODI-20754**: ODI-20754 : Driver name cannot be empty

**Cause**: Driver is not assigned for the Data Server

**Action**: Please choose the appropriate driver for the datastore.

Level: 32
Type: ERROR
Impact: Other

**ODI-20755**: ODI-20755: A Data Server with the name {0} already exists. Please provide another name.
Cause: The name provided for the Data Server is not unique.
Action: Enter a unique name for the Data Server.

Level: 32
Type: ERROR
Impact: Other

ODI-20756: ODI-20756: A Logical Schema with the name {0} already exists. Please provide another name.
Cause: The name provided for the Logical Schema is not unique.
Action: Enter a unique name for the Data Server.

Level: 32
Type: ERROR
Impact: Other

ODI-20757: ODI-20757: If logical schema is specified, WSDL URL can not differ from physical schema's WSDL URL.
Cause: You have specified different WSDL URL compared to physical schema WSDL URL.
Action: WSDL URL and physical schema WSDL URL should be same when logical schema is specified.

Level: 32
Type: ERROR
Impact: Other

ODI-20758: ODI-20758: If logical schema is specified, HTTP User can not differ from physical schema's/data server's HTTP User.
Cause: You have specified different user compared to physical schema/data server HTTP user.
Action: User and physical schema/data server HTTP user should be same when logical schema is specified.

Level: 32
Type: ERROR
Impact: Other

ODI-20759: ODI-20759: If logical schema is specified, Port Type can not differ from physical schema's port type.
Cause: You have specified different port type compared to physical schema port type.
Action: Port type and physical schema port type should be same when logical schema is specified.

Level: 32
Type: ERROR
Impact: Other

ODI-20760: ODI-20760: Choice names should be unique.
Cause: You have added duplicate choice names.
Action: Ensure only unique choice names are used.
Level: 32
Type: ERROR
Impact: Other

ODI-20761: ODI-20761: An Option Group with the name [0] already exists. Please provide another name.
Cause: The name provided for the Option Group is not unique.
Action: Enter a unique name for the Option Group.
Level: 32
Type: ERROR
Impact: Other

ODI-20763: ODI-20763: Maximum number of login attempts reached. ODI User will be locked.
Cause: You have exceeded the maximum number of login attempts.
Action: A Supervisor user must unlock this user.
Level: 32
Type: ERROR
Impact: Other

ODI-20764: ODI-20764: Error occurred while creating version for regenerated Scenario.
Cause: Auto versioning failed for the regenerated Scenario
Action: Please check log for more information
Level: 32
Type: ERROR
Impact: Other

Cause: ODI Agent request invocation failed.
Action: Ensure Agent is in correct state.
Level: 32
Type: ERROR
Impact: Other

ODI-20766: ODI-20766: ODI does not support View Data for Non-JDBC datastore
Cause: ODI does not support View Data for Non-JDBC datastore
Action: View Data for Non-JDBC datastore is not supported
Level: 32
Type: ERROR
Impact: Other

ODI-23001: ODI-23001: The import process failed
Cause: The work repository export file specified could not be imported.
**Error Messages**

**Action:** Ensure the specified file is readable and is a valid work repository export file.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-23006: ODI-23006: Agent Test failed**  
**Cause:** Agent could not be contacted using the specified connection details.  
**Action:** Ensure the Agent connection details are correct and the Agent is running.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-23007: ODI-23007: Data Source already exists for "{0}".**  
**Cause:** The Data Source has already been associated with this Agent.  
**Action:** No action is necessary as the Data Source is already associated with this Agent. Consider removing the Data Source from this Agent and retrying this action.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-23010: ODI-23010: Please enter first a name, an expression and a help text for this language element.**  
**Cause:** The Name, Expression or Help Text parameter values for this Language Element were not entered in the Definition panel. These are mandatory parameters.  
**Action:** Return to the Definition panel and ensure the Name, Expression and Help Text parameters have valid values.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-23011: ODI-23011: Name is empty**  
**Cause:** A value for the Name parameter of the Language Element Implementation was not entered. This is a mandatory parameter.  
**Action:** Enter a valid value for the Name parameter before saving this Language Element.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-23012: ODI-23012: Expression is empty**  
**Cause:** A value for the Expression parameter of the Language Element Implementation was not entered. This is a mandatory parameter.
Action: Enter a valid value for the Expression parameter before saving this Language Element.

Level: 32
Type: ERROR
Impact: Other

ODI-23013: ODI-23013: Help is undefined

Cause: A value for the Help Text parameter of the Language Element Implementation was not entered. This is a mandatory parameter.

Action: Enter a value for the Help Text parameter before saving this Language Element.

Level: 32
Type: ERROR
Impact: Other

ODI-23014: ODI-23014: Technology is undefined

Cause: A value for the Technology parameter of the Language Element Implementation was not entered. This is a mandatory parameter.

Action: Enter a value for the Technology parameter before saving this Language Element.

Level: 32
Type: ERROR
Impact: Other

ODI-23015: ODI-23015: Logical Schema {0} is already linked to a physical schema in context {1}.

Cause: A Physical Schema has already been defined for this Context and Logical Schema combination.

Action: Remove the Context and Logical Schema combination from the Context editor, then retry saving the Physical Schema.

Level: 32
Type: ERROR
Impact: Other

ODI-23016: ODI-23016: The context is either invalid or no longer exists in the database.

Cause: One of the Contexts used by the Physical Schema is invalid or no longer exists in the Master Repository.

Action: Ensure the Context for the Physical Schema is correct by either selecting a valid Context for the Physical Schema or recreating the missing Context.

Level: 32
Type: ERROR
Impact: Other

ODI-23017: ODI-23017: This Physical Schema already exists for this data server.
Cause: A Physical Schema referencing this Data Server has already been defined in the Master Repository.

Action: Specify the correct Physical Schema for this Data Server to use.

Level: 32
Type: ERROR
Impact: Other

ODI-23018: ODI-23018: Unable to connect to Work Repository

Cause: The Work Repository could not be accessed using the connection details defined for it. This may be due to the database or host not being available, or the password could have changed.

Action: Ensure the Work Repository host and database are active. Using the Work Repository editor, ensure the connection details for it are correct.

Level: 32
Type: ERROR
Impact: Other

Cause: The repository installation process was unable to connect to the repository database.

Action: Correct any errors identified in the installation log and retry the installation. If the problem persists then contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

Cause: The ODI Supervisor credentials supplied did not match the credentials held in the External Password Store.

Action: Retry the installation, ensuring the Supervisor user name and password match those held in the external store.

Level: 32
Type: ERROR
Impact: Other

Cause: A connection to the External Authentication Store could not be established.

Action: Ensure the External Authentication Store is available and the connection details specified in the JPS configuration file are valid.

Level: 32
Type: ERROR
Impact: Other
ODI-23022: An error occurred during the generation of the Data Service.
   Cause: An unexpected error occurred while generating data services.
   Action: Review the error details for further information.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-23023: The Schema path ((0)) is not supported
   Cause: The Model's Physical Schema attempted to define the Schema path using an unsupported protocol (ftp, http or file).
   Action: Change the Physical Schema to not use ftp, http or file protocol to reference the file.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-23024: The URL is mandatory.
   Cause: The URL field has not been entered and is a mandatory parameter.
   Action: Enter the URL parameter. A template chosen from the drop down list may help to ensure the syntax is correct.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-23025: The ID is mandatory.
   Cause: The Repository ID parameter has not been entered and is a mandatory parameter.
   Action: Enter an integer value for the Repository ID parameter.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-23026: The ID must be an integer value.
   Cause: The value entered for the Repository ID is not a valid integer.
   Action: Enter an integer value for the Repository ID parameter.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-23027: The driver is mandatory.
   Cause: A JDBC Driver was not specified and is a mandatory parameter.
   Action: Select a JDBC Driver from the list of values.
   Level: 32
   Type: ERROR
Impact: Other

ODI-23028: ODI-23028: The password is mandatory.
Cause: The Supervisor user’s Password parameter was not specified.
Action: Enter the Supervisor password.
Level: 32
Type: ERROR
Impact: Other

ODI-23029: ODI-23029: The confirm password is mandatory.
Cause: The Supervisor user’s Confirm Password parameter was not specified.
Action: Enter the Supervisor user's password in the Confirm Password parameter.
Level: 32
Type: ERROR
Impact: Other

ODI-23030: ODI-23030: Password and Confirm Password are different
Cause: The Password and Confirm Password parameters are not the same.
Action: Ensure the same value is entered for both the Password and Confirm Password parameters.
Level: 32
Type: ERROR
Impact: Other

ODI-23031: ODI-23031: The Supervisor username is mandatory.
Cause: The Supervisor User parameter was not entered.
Action: Enter a value for the Supervisor User parameter ensuring it matches a user in the external enterprise identify store, or switch to ODI Authentication.
Level: 32
Type: ERROR
Impact: Other

ODI-23032: ODI-23032: Maximum number of sessions cannot be less or equal to 0.
Cause: The Maximum Number of Sessions parameter value was specified as 0.
Action: Change the Maximum Number of Sessions parameter in the Agent Definition tab to a value greater than 0.
Level: 32
Type: ERROR
Impact: Other

ODI-23033: ODI-23033: The file reverse-engineering is only possible for delimited files.
Cause: The file format for the specified file was not delimited.
Action: Select a delimited format file and retry the reverse-engineering action.
Level: 32
Type: ERROR
Impact: Other

ODI-23035: ODI-23035: Can not update the scheduling - This agent may not be running
Cause: The Update Scheduling action could not be performed because the ODI Client could not connect to the Agent.
Action: Check that the Agent connection details are correct and that the agent is running. Use the Agent Test button to check the connection details.

Level: 32
Type: ERROR
Impact: Other

ODI-23036: ODI-23036: Logical Schema not set for this Context
Cause: A Logical Schema entry in the Physical Schema’s Context was specified as <Undefined>.
Action: Ensure none of the Logical Schemas on the Physical Schema’s Context tab are set to <Undefined>.

Level: 32
Type: ERROR
Impact: Other

ODI-23037: ODI-23037: To use scheduling please associate a Logical Agent to a Physical Agent via the Logical Architecture Accordion in the Topology Navigator
Cause: There are no logical agents available to use for scheduling.
Action: Associate a logical agent with a physical agent using the Topology Navigator and then resubmit your schedule request.

Level: 32
Type: ERROR
Impact: Other

ODI-23038: ODI-23038: Cannot resolve the table name. Check the masks defined for this physical schema.
Cause: The table and schema format could not be calculated. This is because the object mask has not been set for the Physical Schema that contains this table.
Action: From the Topology Navigator edit the Physical Schema containing this table and ensure the Masks parameter value is valid for the schema based on its technology (for example ”%SCHEMA.%OBJECT”).

Level: 32
Type: ERROR
Impact: Other

ODI-23039: ODI-23039: You cannot carry out this type of export.
Cause: The export type specified is not supported.
Action: Retry the export. If the problem persists then contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

ODI-23040: ODI-23040: Import file "[0]" error
Cause: An error occurred during the import file process.
Action: Correct any errors identified in the error log and retry the import process. If the problem persists then contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-23042: ODI-23042: An error occurred while changing the repository number.
Cause: An error occurred while changing the repository number.
Action: Correct any errors identified in the message log and retry the action. If the problem persists then contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-23043: ODI-23043: The Repository ID must be numeric.
Cause: The value specified for the Repository ID parameter was not a valid numeric value.
Action: Enter a valid numeric value for the Repository ID parameter.

Level: 32
Type: ERROR
Impact: Other

ODI-23044: ODI-23044: The new ID you have chosen is already in use as a table "[0]" primary key. The renumbering has been aborted. No changes have been made.
Cause: The Repository ID specified is already used by an existing object.
Action: Enter a different value for the Repository ID parameter ensuring it is unique within the repository.

Level: 32
Type: ERROR
Impact: Other

ODI-23045: ODI-23045: You may not renumber a repository before version 11. Please upgrade your repository first.
Cause: The renumber functionality is not supported for ODI Repository versions prior to version 11.
Action: Upgrade the repository to version 11 (or higher) and then renumber it.

Level: 32
Type: ERROR
Impact: Other
ODI-23046: ODI-23046: An error was encountered during the test.
Cause: An attempt to connect a Work Repository failed.
Action: Correct any errors identified in the message log. Ensure the Work Repositories are available and the connection information is correctly specified in the Master Repository. Retry the test.
Level: 32
Type: ERROR
Impact: Other

ODI-23047: ODI-23047: Could not connect to the work repository. The renumbering process has been aborted. No changes have been made.
Cause: An attempt to connect a Work Repository failed.
Action: Correct any errors identified in the message log. Ensure the Work Repositories are available and the connection information is correctly specified in the Master Repository. Retry the test.
Level: 32
Type: ERROR
Impact: Other

ODI-23048: ODI-23048: Import report generation error
Cause: The import was performed, but there was an unexpected error while opening the Import Report.
Action: Contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

ODI-23049: ODI-23049: Error Detected during Repository Installation
Cause: An error occured during the creation or import of the Master Repository.
Action: Correct any errors described in the message log and retry the installation process. If the problem persists then contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

ODI-23050: ODI-23050: The password you entered doesn't match the actual password
Cause: The password you entered doesn't match the actual password
Action: Ensure that the password entered matches the actual password
Level: 32
Type: ERROR
Impact: Other

ODI-23051: ODI-23051: Maximum number of threads must be greater than zero.
Cause: Values for maximum number of threads is not valid
Action: Enter valid value for maximum number of threads
Level: 32
Type: ERROR
Impact: Other

ODI-23052: ODI-23052: Maximum number of thread per session cannot be less than 0.
  Cause: Values for maximum number of thread per session is not valid
  Action: Enter valid value for maximum number of threads per session

Level: 32
Type: ERROR
Impact: Other

ODI-23053: ODI-23053: Maximum number of threads cannot be less than maximum number of threads per session.
  Cause: Maximum number of threads less than maximum number of threads per session
  Action: Enter valid values for maximum number of threads and maximum number of threads per session

Level: 32
Type: ERROR
Impact: Other

ODI-23054: ODI-23054: Maximum number of cache entries cannot be less than zero.
  Cause: Values for maximum number of cache entries is not valid
  Action: Enter valid values for maximum number of cache entries

Level: 32
Type: ERROR
Impact: Other

ODI-23055: ODI-23055: Session Blueprint Lifetime cannot be less than zero.
  Cause: Value for session blueprint lifetime is not valid
  Action: Enter valid values for session blueprint lifetime

Level: 32
Type: ERROR
Impact: Other

ODI-23056: ODI-23056: Syntax of condition "[0]" is not valid.
  Cause: The entered condition has invalid syntax.
  Action: Specify the valid condition expression.

Level: 32
Type: ERROR
Impact: Other

ODI-23057: ODI-23057: The Registry Database is mandatory for MySQL Technology.
Cause: The Registry Database was not specified for MySQL Technology.
Action: Enter the Registry Database for MySQL Technology.

Level: 32
Type: ERROR
Impact: Other

ODI-23058: ODI-23058: This Technology does not support multiple schemas.
Cause: Attempt to create multiple Physical Schemas for Technologies that support only one Schema.
Action: The solution for Technologies that do not support multiple Physical Schemas is to create separate Data Dervers from the Physical Schemas.

Level: 32
Type: ERROR
Impact: Other

ODI-23059: ODI-23059: No Agent selected
Cause: No Agent has been selected for the selected DataSource.
Action: Make sure an Agent is selected for the DataSource.

Level: 32
Type: ERROR
Impact: Other

ODI-23060: ODI-23060: Update Import Modes are not valid for Interfaces
Cause: An invalid import mode of Update is selected for an Interface export file.
Action: Use an import mode other than Update or alternatively only import Mapping export files

Level: 32
Type: ERROR
Impact: Other

ODI-23061: ODI-23061: Syntax of expression "{0}" is not valid.
Cause: The entered expression has invalid syntax.
Action: Specify the valid expression.

Level: 32
Type: ERROR
Impact: Other

ODI-23062: ODI-23062: Maximum number of threads cannot be less then the maximum number of sessions.
Cause: Value for maximum number of threads is less than the maximum number of sessions
Action: Ensure that maximum number of threads is equal to or greater than the maximum number of sessions

Level: 32
Type: ERROR
Impact: Other

ODI-23064: ODI-23064 Language Name must be specified
Cause: Language name is not specified.
Action: Enter Language name on the Languages table.
Level: 32

Type: ERROR
Impact: Other

ODI-23065: ODI-23065 Parameter Key names not unique
Cause: Invalid values.
Action: Parameter values need to be valid including uniquenames for keys.
Level: 32

Type: ERROR
Impact: Other

ODI-23066: ODI-23066: Letter used in the icon input "{0}" is not valid. No Special Characters are allowed to be entered.
Cause: The entered input is invalid.
Action: Enter the valid value.
Level: 32

Type: ERROR
Impact: Other

ODI-23068: ODI-23068: Degree Of Parallelism For Target has to be in the range of 1 to 99.
Cause: Value entered for Degree Of Parallelism is not in the range 1-99.
Action: Please choose the appropriate Degree Of Parallelism For Target.
Level: 32

Type: ERROR
Impact: Other

ODI-23069: ODI-23069: Web Application Context must be provided
Cause: No value entered for the Web Application Context.
Action: Please enter value for the Web Application Context.
Level: 32

Type: ERROR
Impact: Other

ODI-23070: ODI-23070: Port number must be an integer between 0 and 65535.
Cause: The value for the Port Number was not valid.
Action: Enter a valid integer value between 0 and 65535 for the Port Number.
Level: 32
Type: ERROR
Impact: Other

ODI-23071: ODI-23071: Invalid Override Endpoint URL.
Cause: Override Endpoint URL entered is invalid.
Action: Please enter a valid Override Endpoint URL.

Level: 32
Type: ERROR
Impact: Other

ODI-23072: ODI-23072: Invalid WSDL URL.
Cause: WSDL URL entered is invalid.
Action: Please enter a valid WSDL URL.

Level: 32
Type: ERROR
Impact: Other

ODI-23073: ODI-23073: Duplicate Operation Names exist.
Cause: Duplicate Operation Names exist.
Action: Please ensure that operation names are unique.

Level: 32
Type: ERROR
Impact: Other

ODI-24004: ODI-24004: There are no supervisor accounts in the ODI repository with matching entries in the identity store. Please provide a suitable supervisor account. Or you may also want to double check your JPS configuration file e.g. jps-config-jse.xml regarding the identity store configuration on properties such as [0].
Cause: The ODI repository does not have any supervisor account that matches the entries in the identity store based on the identity store configuration from JPS configuration file.
Action: Create a supervisor account in the ODI repository that matches an entry in the identity store. Or you may also want to double check your JPS configuration file e.g. jps-config-jse.xml file regarding the identity store configuration on properties such as username.attr, groupname.attr, user.search.bases, group.search.bases.

Level: 32
Type: ERROR
Impact: Other

ODI-24005: ODI-24005: An error occurred while checking the status of the master repository.
Cause: An unexpected error occurred.
Action: Check the exception to see if it gives details about the error and contact Oracle Support Services for further assistance.

Level: 32
Type: ERROR
Impact: Other

ODI-24006: ODI-24006: An error occurred while switching the authentication mode for the master repository.
Cause: An unexpected error occurred.
Action: Check the exception to see if it gives details about the error and contact Oracle Support Services for further assistance.

Level: 32
Type: ERROR
Impact: Other

ODI-24007: ODI-24007: Rules should not have empty conditions.
Cause: Rules associated with policy have empty conditions.
Action: Create rules with conditions associated with them.

Level: 32
Type: ERROR
Impact: Other

ODI-25001: ODI-25001: Unable to input a larger element
Cause: The total length of all keywords exceeds the maximum length.
Action: Remove one or more of the keywords, or decrease their lengths.

Level: 32
Type: ERROR
Impact: Other

ODI-25002: ODI-25002: The end date cannot be before the start date.
Cause: The end date is before the start date.
Action: Set the end date to be after the start date.

Level: 32
Type: ERROR
Impact: Other

ODI-25003: ODI-25003: Error while starting session
Cause: An unexpected error occurred while starting the session.
Action: Check the error details for further information and contact Oracle Support Services for further assistance.

Level: 32
Type: ERROR
Impact: Other

ODI-25004: ODI-25004: Date Format Not Valid
Cause: One of the Date fields is invalid. This may be the From or To Date.
Action: Click the button to the right of the field to invoke a dialog for entering a valid Time and Date.
Level: 32
Type: ERROR
Impact: Other

ODI-25005: ODI-25005: Incorrect date format. The format is {0}.
Cause: The date format is incorrect.
Action: Use the format that is presented in the error message.

Level: 32
Type: ERROR
Impact: Other

ODI-25006: ODI-25006: At least one agent must be selected.
Cause: Agent selection is mandatory.
Action: Select at least one agent to clean stale sessions.

Level: 32
Type: ERROR
Impact: Other

ODI-25007: ODI-25007: At least one work repository must be selected.
Cause: Work repository selection is mandatory.
Action: Select at least one work repository to clean stale sessions.

Level: 32
Type: ERROR
Impact: Other

ODI-25008: ODI-25008: You are not allowed to delete session variable.
Cause: User attempt to delete session variable.
Action: Cancel deleting session variable.

Level: 32
Type: ERROR
Impact: Other

ODI-25009: ODI-25009: You are not allowed to delete scenario variable.
Cause: User attempt to delete scenario variable.
Action: Cancel deleting scenario variable.

Level: 32
Type: ERROR
Impact: Other

ODI-26001: ODI-26001: Boolean does not correspond to the Field Update Object Layer.
Cause: The repository contained an invalid value of the Field Update property for a checkbox or radio group.
Action: Ensure the repository value is a boolean for checkbox or a valid action command for a radio group.
Level: 32
Type: ERROR
Impact: Other

**ODI-26002: ODI-26002**: This object is referenced by another object. View the details for more information. You may also see where this object is used in the hierarchy.
**Cause**: The specified object could not be used because it is referenced by another object.
**Action**: Remove references to this object. The "Uses" hierarchy may be useful in finding objects references.

Level: 32
Type: ERROR
Impact: Other

**ODI-26003: ODI-26003**: This object cannot be removed: it is referenced by another object.
**Cause**: The specified object could not be deleted because it is referenced by another object.
**Action**: Remove references to this object before deleting it. The "Uses" hierarchy may be useful in finding objects references.

Level: 32
Type: ERROR
Impact: Other

**ODI-26004: ODI-26004**: Action denied:
**Cause**: The current license may not allow use of the designer.
**Action**: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

**ODI-26005: ODI-26005**: You are importing an object from another repository with the same identifier. It is forbidden.
**Cause**: An object in the import file has an identifier which already exists in the repository.
**Action**: Consider manually changing the "com.sunopsis.dwg.dwgobj.SnpImportRep" object section of the import XML file to use a unique identifier.

Level: 32
Type: ERROR
Impact: Other

**ODI-26006: ODI-26006**: The specified encryption key is invalid.
**Cause**: The encryption key specified was found to be invalid during the decrypting phase.
**Action**: Ensure a valid encryption key is utilized.
Level: 32
Type: ERROR
Impact: Other

ODI-26007: ODI-26007: KM or Procedure not encrypted. No decryption was performed.
Cause: Decryption was requested for a non-encrypted KM or Procedure.
Action: Do not attempt to decrypt a non-encrypted KM or Procedure.

Level: 32
Type: ERROR
Impact: Other

ODI-26008: ODI-26008: Scenario not encrypted. No decryption was performed.
Cause: Decryption was requested for a non-encrypted Scenario.
Action: Do not attempt to decrypt a non-encrypted Scenario.

Level: 32
Type: ERROR
Impact: Other

ODI-26009: ODI-26009: Action not encrypted. No decryption was performed.
Cause: Decryption was requested for a non-encrypted Action.
Action: Do not attempt to decrypt a non-encrypted Action.

Level: 32
Type: ERROR
Impact: Other

ODI-26010: ODI-26010: Decryption failed due to incompatible key.
Cause: The key provided to decrypt was an invalid key.
Action: Ensure the decryption key is correctly specified.

Level: 32
Type: ERROR
Impact: Other

ODI-26011: ODI-26011: unable to find specified encryption API
Cause: The specified cryptographic algorithm requested was not available in the environment.
Action: Ensure the environment can access the DES/ECB/PKCS5Padding algorithms and padding.

Level: 32
Type: ERROR
Impact: Other

ODI-26012: ODI-26012: invalid encrypted data.
Cause: The BASE64 content may be invalid or the zip file contents may be corrupted.
**Action:** Ensure the encrypted data is correct and the decryption key is correctly specified.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-26013: ODI-26013: Your security parameters are insufficient to perform this action.**

**Cause:** The ODI user security parameters do not specifically permit the user to perform this particular action.

**Action:** Ensure this ODI user is granted the security access to perform this action.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-26014: ODI-26014: The code of your \{0\} is already used by another \{1\}. Please give another code to save this \{2\}.**

**Cause:** The value entered for code must be unique for the entire work repository.

**Action:** Ensure the a unique value is entered.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-26015: ODI-26015: You do not have sufficient privileges to perform this operation.**

**Cause:** The ODI user security parameters do not specifically permit the user to perform this particular operation.

**Action:** Ensure this ODI user is granted the security access to perform this operation.

**Level:** 32

**Type:** ERROR

**Impact:** Security

**ODI-26016: ODI-26016: The requested operation cannot succeed. The object no longer exists.**

**Cause:** The specified ODI object cannot be accessed because it no longer exists in the repository (it may have been deleted by another ODI user).

**Action:** Recreate the specified ODI object. Consider importing the object from a backup.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-26017: ODI-26017: Error.**

**Cause:** Internal error.

**Action:** Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-26018: ODI-26018: Key Error.
Cause: An unexpected error occurred.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

Cause: An unexpected error occurred.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

Cause: Retrieve method is incorrect. Must be "set" or "get".
Action: Please change the retrieve method to "set" or "get".

Level: 32
Type: ERROR
Impact: Other

ODI-26021: ODI-26021: Object initialization denied.
Cause: A component could not be initialized.
Action: Ensure that the user has security permissions to create the object.

Level: 32
Type: ERROR
Impact: Other

Cause: The object could not be saved. This is possibly due to a repository connection error, or inconsistent data values supplied. It’s also possible that the object was modified by another user.
Action: Ensure the repository database is available and the data values supplied are valid. Try to save changed data, then refresh edited object and apply changed data again.

Level: 32
Type: ERROR
Impact: Other

ODI-26023: ODI-26023: Cannot create object.
Cause: An unexpected error occurred during the object creation process.
Action: Contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

ODI-26024: ODI-26024: Cannot stop update operation.
Cause: An unexpected error occurred during the update operation.
Action: Contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

ODI-26025: ODI-26025: Display Initialization denied.
Cause: An unexpected error occurred during the display initialization process.
Action: Contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

Cause: An unexpected error occurred during the refresh process.
Action: Contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

ODI-26027: ODI-26027: Security not set for the instance. The instance will not be added to the tree.
Cause: Instance security permissions "By repository" were chosen but a concrete repository is not specified.
Action: Ensure a repository is specified.
Level: 32
Type: ERROR
Impact: Security

ODI-26028: ODI-26028: Cannot save your modifications.
Cause: Internal error.
Action: No action required.
Level: 32
Type: ERROR
Impact: Other

ODI-26029: ODI-26029: Could not deploy the datasource automatically.
Cause: Weblogic Administration server is not up and running, the server connection parameters are wrong.
**Action:** Please check Weblogic Administration server connection parameters and the server state.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26030:** The new password does not meet the password policy. Your change could not be saved.  
**Cause:** The new password does not meet the password policy.  
**Action:** Please verify that the new password meets the password policy (go to the "Security Navigator -> Password policies...").

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26031:** You may not delete work repository \{0\} because you are connected to it. To delete this repository, reconnect to a different work repository or use a master repository only connection.  
**Cause:** Deletion of a work repository which is currently connected is not supported.  
**Action:** Disconnect from the repository and then connect utilizing a Master Repository Only connection or a different work repository before attempting to delete the specified work repository.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26032:** This object was modified by \{0\} on \{1\} at \{2\}. Your changes cannot be saved.  
**Cause:** The object was changed in the repository after the editor was opened for this object.  
**Action:** Close the editor without saving changes. Open the editor again and reapply the edits and save. Note: consider using the lock object facility to disallow current modifications to an object.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26033:** You cannot edit this object because it is locked by another user \((0)\). You can only view it.  
**Cause:** The ODI object opened for editing is locked by another user. Other ODI users can only view such objects.  
**Action:** Try to edit the object later.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other
ODI-26034: ODI-26034: An error occurred while deleting executions.
Cause: The specified executions could not be deleted. This is possibly caused by the repository database connection problems.
Action: Retry to delete the executions. If problem persists, contact Oracle Support Services.
Level: 32
Type: ERROR
Impact: Other

Cause: Internal error.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-26036: ODI-26036: Error while encrypting.
Cause: A general error occurred during the encrypting process, possibly caused by repository database access problems, lack of security permissions, or encryption engine failures,
Action: Retry the encrypt action again.
Level: 32
Type: ERROR
Impact: Other

ODI-26037: ODI-26037: Encryption key is not valid.
Cause: An invalid encryption key was entered causing an encryption engine failure.
Action: Enter a valid encryption key and retry the action.
Level: 32
Type: ERROR
Impact: Other

ODI-26038: ODI-26038: Unable to execute, the selected Logical Agent is not associated to a Physical Agent in the desired Context.
Cause: A Logical Agent was not associated with this Physical Agent in this Context.
Action: Ensure a valid "Logical Agent - Physical Agent" association exists in the desired Context.
Level: 32
Type: ERROR
Impact: Other

Cause: The attempt to connect to the repository failed. This may be due to one or more of the following: invalid connection parameters specified, database problems, network problems.

Action: Ensure the repository database is available and accessible and the repository connection parameters are correct.

Level: 32
Type: ERROR
Impact: Other

ODI-26040: ODI-26040: error while updating
Cause: Failed to update the ODI logins file: snps_login_work.xml.
Action: Ensure write-access is granted to the ODI logins file: snps_login_work.xml.

Level: 32
Type: ERROR
Impact: Other

ODI-26041: ODI-26041: Error while attempting to get FieldData from ObjectDisplay.
Cause: An unexpected error occurred obtaining FieldData from ObjectDisplay.
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-26042: ODI-26042: Error while attempting to set FieldUpdate from ObjectUpdate.
Cause: An unexpected error occurred updating FieldUpdate from ObjectUpdate.
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-26043: ODI-26043: Window closing cancelled by the User.
Cause: User asked to close the parent window where child lines were modified.
Action: No action performed on that.

Level: 32
Type: ERROR
Impact: Other

Cause: An unexpected error occurred searching for a host variable.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-26045: ODI-26045: Unable to perform the drop operation.
   Cause: Dropped entity is invalid.
   Action: Check whether the dropped entity is valid and perform the drag-n-drop action again.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-26046: ODI-26046: MethodGetter was not found
   Cause: An unexpected error occurred obtaining the getter method.
   Action: Contact Oracle Support Services.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-26047: ODI-26047: Object on method setObjectDisplay(Object pObjectDisplay) is not an array.
   Cause: This is caused by programmatic error.
   Action: ODI users should normally never see this message.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-26048: ODI-26048: Object on method setObjectDisplay(Object pObjectDisplay) is not a vector.
   Cause: This is caused by programmatic error.
   Action: ODI users should normally never see this message.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-26049: ODI-26049: Parameters not valid.
   Cause: An unexpected error occurred due to an invalid parameter value.
   Action: Contact Oracle Support Services.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-26050: ODI-26050: Master repository not installed on this connection.
   Cause: This is caused by programmatic error.
   Action: ODI users should normally never see this message.
   Level: 32
   Type: ERROR
Impact: Other

Cause: An error occurred during the creation of the XML Export file.
Action: Ensure the repository is accessible and the export file and its directory are writable.
Level: 32
Type: ERROR
Impact: Other

Cause: An unexpected error occurred while importing an XML document.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-26053: ODI-26053: An error occurred during initialization.
Cause: Initialization failed possibly due a repository access failure or insufficient ODI security permissions.
Action: Ensure the repository database is available, and the ODI user security permissions permit connection.
Level: 32
Type: ERROR
Impact: Other

ODI-26054: ODI-26054: Page not available.
Cause: The selected page number was invalid.
Action: Ensure the page number entered is greater than 0 and less than the total number of pages.
Level: 32
Type: ERROR
Impact: Other

ODI-26056: ODI-26056: Error while disconnecting.
Cause: This error is occurred while closing the repository database connection after "Test query" action completed.
Action: This error may be ignored.
Level: 32
Type: ERROR
Impact: Other

ODI-26057: ODI-26057: Unable to connect the agent. The agent is probably not started.
Cause: The connection request to the agent failed.
Action: Ensure the agent is started and available. Ensure the connection information is valid.

Level: 32
Type: ERROR
Impact: Other

ODI-26058: ODI-26058: Unable to connect the agent. The agent URL cannot be found.
Cause: The connection request to the agent failed using the given URL.
Action: Ensure the agent is started and available. Ensure the connection URL information is valid.

Level: 32
Type: ERROR
Impact: Other

ODI-26059: ODI-26059: Object on method setObjectDisplay(Object pObjectDisplay) is not a List.
Cause: An unexpected error occurred setting ObjectData.
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

Cause: The values entered for Password and Confirmation Password did not match.
Action: Enter the same value for Password and Confirmation Password.

Level: 32
Type: ERROR
Impact: Other

ODI-26061: ODI-26061: The minimum password length is {0} characters.
Cause: The length of the Password entered is less than specified in password policy rule.
Action: Enter a Password whose length is greater than or equal to the specified minimum length.

Level: 32
Type: ERROR
Impact: Other

ODI-26062: ODI-26062: The password violates the following rule: "{0}". Select another password.
Cause: The password supplied was invalid.
Action: Enter a valid password.

Level: 32
Type: ERROR
Impact: Other

Cause: The password supplied was invalid.
Action: Enter a valid password.

Level: 32

Type: ERROR
Impact: Other

ODI-26064: ODI-26064: Error while exporting.
Cause: An error occurred during the creation of the Export file.
Action: Ensure the repository is accessible and the export file and its directory are writable.

Level: 32

Type: ERROR
Impact: Other

ODI-26065: ODI-26065: You must specify all the options.
Cause: This is caused by programmatic error.
Action: ODI users should normally never see this message.

Level: 32

Type: ERROR
Impact: Other

ODI-26066: ODI-26066: An unexpected error has occurred.
Cause: An unexpected error occurred this process.
Action: Retry action. If problem persists then contact Oracle Support Services.

Level: 32

Type: ERROR
Impact: Other

ODI-26067: ODI-26067: mandatory field "Java charset" not entered
Cause: A value for the "Java character set" field was not entered.
Action: Enter a value for the "Java character set" field.

Level: 32

Type: ERROR
Impact: Other

ODI-26068: ODI-26068: unable to load export list in the module: {0}
Cause: The contents of the export file list was not formatted correctly.
Action: Correct the format of the export list file specified.

Level: 32

Type: ERROR
Impact: Other

ODI-26069: ODI-26069: The specified export directory does not exist.

Cause: The specified export directory is invalid.

Action: Ensure the specified export directory exists and is writable.

Level: 32
Type: ERROR
Impact: Other

ODI-26070: ODI-26070: The Open Tool class name must not begin with "Snp" or "Odi".

Cause: The Open Tool class name begins with "Snp" or "Odi".

Action: Ensure the Open Tool class name does not begin with "Snp" or "Odi".

Level: 32
Type: ERROR
Impact: Other

ODI-26071: ODI-26071: Open Tool not activated. Your Open Tool references a class which not found.

Cause: The class name specified in this Open Tool was not found.

Action: Ensure the Open Tool class name specified is valid and available in the class path.

Level: 32
Type: ERROR
Impact: Other

ODI-26072: ODI-26072: Your Open Tool has been installed. You can now use it in a procedure or package.

Cause: Installation of the Open Tool has been completed.

Action: No action is required.

Level: 32
Type: ERROR
Impact: Other

ODI-26073: ODI-26073: Could not activate Open Tool. Check that it is in the "oracledi/userlib" directory.

Cause: The Open Tool references a class which was not found.

Action: Ensure the Open Tool class exists in the "oracledi/userlib" directory.

Level: 32
Type: ERROR
Impact: Other

ODI-26074: ODI-26074: Policy "Name" is a mandatory field.

Cause: A value for the Policy "Name" field value was not entered.

Action: Enter a value for the Policy "Name" field.
Level: 32  
Type: ERROR  
Impact: Other  

ODI-26075: ODI-26075: Policy "Name" must be unique.  
Cause: A Policy with the same name already exists.  
Action: Enter a unique value in Policy "Name" field.  

Level: 32  
Type: ERROR  
Impact: Other  

ODI-26076: ODI-26076: You do not have enough memory to generate this report. Increase the maximum Java heap size value (-Xmx).  
Cause: There was not enough memory allocated to generate the report.  
Action: Increase the maximum Java heap size value by using the "-Xmx" JVM option.  

Level: 32  
Type: ERROR  
Impact: Other  

ODI-26077: ODI-26077: Target file name is not specified.  
Cause: The Target file name is mandatory and was not specified.  
Action: Enter a value for the target file name.  

Level: 32  
Type: ERROR  
Impact: Other  

ODI-26078: ODI-26078: Error while creating the version  
Cause: An unexpected error occurred while versioning an object.  
Action: Review the error details for further information.  

Level: 32  
Type: ERROR  
Impact: Other  

Cause: A version with the specified version number already exists.  
Action: Enter a unique version number.  

Level: 32  
Type: ERROR  
Impact: Other  

ODI-26080: ODI-26080: Unable to delete version {0} for {1} {2}. It is referenced by label {3}  
Cause: Deletion of a version of an object referenced by a Solution was attempted.
Action: Delete the label referencing the object version. Then retry deleting the object version.

Level: 32
Type: ERROR
Impact: Other

Cause: An object version cannot be deleted because it is referenced.
Action: If an object version must be deleted, remove all references first.

Level: 32
Type: ERROR
Impact: Other

ODI-26082: ODI-26082: No difference found
Cause: No difference was found between two object versions.
Action: No action is required.

Level: 32
Type: ERROR
Impact: Other

ODI-26083: ODI-26083: No difference found.
Cause: No difference was found between object versions.
Action: No action is required.

Level: 32
Type: ERROR
Impact: Other

ODI-26084: ODI-26084: Could not compare versions of different objects.
Cause: Objects of different types were selected for comparison.
Action: Select objects of the same type before performing comparison.

Level: 32
Type: ERROR
Impact: Other

ODI-26085: ODI-26085: You cannot restore several versions of the same object.
Cause: Multiple versions were selected for restoring.
Action: Select a single version when performing this action.

Level: 32
Type: ERROR
Impact: Other

ODI-26086: ODI-26086: You cannot select more than one version at the same time.
Cause: Multiple version were selected for this action.
Action: Select a single version when performing this action.
Level: 32
Type: ERROR
Impact: Other

ODI-26087: ODI-26087: You must select a version.
Cause: A version was not selected.
Action: Select a version before performing this action.
Level: 32
Type: ERROR
Impact: Other

ODI-26088: ODI-26088: You must select the version to restore.
Cause: A version to restore was not selected.
Action: Select a version to restore.
Level: 32
Type: ERROR
Impact: Other

ODI-26089: ODI-26089: This object is currently locked by user: {0}. Version restoration cancelled.
Cause: The object selected for restoration was locked by another user.
Action: Ensure the selected object is not locked by another user before retrying the operation.
Level: 32
Type: ERROR
Impact: Other

ODI-26090: ODI-26090: Object version list is empty.
Cause: The object selected was not versioned.
Action: Select a versioned object before retrying the operation.
Level: 32
Type: ERROR
Impact: Other

ODI-26091: ODI-26091: An array with an invalid size was passed to SnpsObjectTableColumnTextIntrospectMapper.createMapFromArrayOfArrays.
Cause: An array with an invalid size was passed to SnpsObjectTableColumnTextIntrospectMapper.createMapFromArrayOfArrays.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-26092: ODI-26092: Table Model must have at least one Column.
Cause: The Model for this Table did not contain any Columns.
Action: Add at least one Column to the Table's Model.
Level: 32
Type: ERROR
Impact: Other

ODI-26093: ODI-26093: Unable to open window.
Cause: An unexpected error occurred while opening a window.
Action: Review the error details for further information.
Level: 32
Type: ERROR
Impact: Other

ODI-26094: ODI-26094: Your license does not allow Changed Data Capture operations.
Cause: The current license does not include change data capture.
Action: Upgrade the license to include change data capture.
Level: 32
Type: ERROR
Impact: Other

ODI-26095: ODI-26095: This object is locked by {0}. You cannot edit it unless it is unlocked.
Cause: Object could not be opened for write access because it was already locked by another user.
Action: Ensure the selected object is not locked by another user before retrying the operation.
Level: 32
Type: ERROR
Impact: Other

Cause: The file specified did not contain correctly formed XML.
Action: Ensure the XML in the specified file is valid before retrying the operation.
Level: 32
Type: ERROR
Impact: Other

ODI-26097: ODI-26097: Replace failed due to an SQL exception.
Cause: The file used to replace this object is not a valid XML format.
Action: Select a valid XML file format before performing this replace object action.
Level: 32
Type: ERROR
Impact: Other
ODI-26098: You must specify an Export Path or File.
   Cause: Either the Export Path or File was not specified.
   Action: Specify a value for either the Export Path or File.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-26099: You don't have the appropriate license to use this KM
   Cause: The current license does not include usage of the specified KM.
   Action: Select another compatible KM or upgrade the license.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-26100: You don't have the appropriate privileges on Step objects.
   Cause: Package Steps operation failed due to insufficient ODI security permissions.
   Action: Ensure the ODI user security permissions are correct for the Package Steps object.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-26101: The Data Check cannot be performed. A CKM is not selected on the Model.
   Cause: No CKM was assigned to the Model.
   Action: Enter a CKM for the Model before performing the Data Check. Consider using the Model editor to make this entry.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-26102: The Service cannot be generated. An Application Server is not selected on the Model.
   Cause: No Application Server was assigned to the Model.
   Action: Enter an Application Server for the Model before performing Generate Service. Consider using the Model editor to make entry.
   Level: 32
   Type: ERROR
   Impact: Other

ODI-26103: You must specify a connection parameter
   Cause: Repository connection parameters have not been specified.
   Action: Enter all required repository connection parameters.
   Level: 32
ODI-26104: ODI-26104: You must specify a query parameter
   Cause: A query parameter is missing for retrieving a level.
   Action: Supply the missing parameter.

   Level: 32

ODI-26105: ODI-26105: Test failed
   Cause: The value of Schema, Table, Column or Filter was invalid.
   Action: Ensure the Schema, Table, Column and Filter are valid. Consult the details for additional information.

   Level: 32

ODI-26106: ODI-26106: Decryption failed. Data has been restored.
   Cause: The Decryption process failed.
   Action: Consult the details for additional information.

   Level: 32

ODI-26107: ODI-26107: Cannot find this [0] icon
   Cause: An unexpected error occurred while searching for an icon.
   Action: Review the error details for further information.

   Level: 32

ODI-26108: ODI-26108: The specified path is not valid.
   Cause: The specified path was invalid or was not found on the file system.
   Action: Ensure a valid file system path is entered.

   Level: 32

ODI-26109: ODI-26109: Error while reading the search criteria. Invalid file
   Cause: The selected file did not contain search criteria in a valid format.
   Action: Ensure the selected file is one exported from the ODI search UI and contains correctly formatted search criteria information.

   Level: 32
Type: ERROR
Impact: Other

ODI-26110: An error occurred while saving.
Cause: An unexpected error occurred during a save operation.
Action: Review the error details for further information. Ensure that the repository connection is open.

Level: 32
Type: ERROR
Impact: Other

ODI-26111: Error while accessing the file
Cause: The specified file could not be opened.
Action: Ensure the specified file exists and is accessible.

Level: 32
Type: ERROR
Impact: Other

ODI-26112: Error while performing the search
Cause: An unexpected error occurred while searching for an object.
Action: Review the error details for additional information.

Level: 32
Type: ERROR
Impact: Other

ODI-26113: XML parser configuration error
Cause: The selected file is not a valid search criteria file format.
Action: Select a valid search criteria file exported from the ODI search UI.

Level: 32
Type: ERROR
Impact: Other

ODI-26114: Host cannot be empty.
Cause: The Host field is mandatory and was not specified.
Action: Enter a valid Host name.

Level: 32
Type: ERROR
Impact: Other

ODI-26115: Port number must be an integer between 1024 and 65535.
Cause: The value for Port Number was not valid.
Action: Enter a valid integer value between 1024 and 65535 for Port Number.

Level: 32
Type: ERROR
ODI-26116: User cannot be empty.
   Cause: The User field is mandatory and was not supplied.
   Action: Enter a valid User Name.

Level: 32
Type: ERROR
Impact: Other

ODI-26117: Connection failed. Reason:
   Cause: Could not connect to a repository with the specified connection details.
   Action: Ensure the repository database is available and valid connection details are supplied.

Level: 32
Type: ERROR
Impact: Other

ODI-26118: External password storage connection test failed.
   Cause: Could not connect to the external password storage with the specified connection details.
   Action: Ensure the external password storage is available and valid connection details are supplied.

Level: 32
Type: ERROR
Impact: Other

ODI-26119: Exception when computing the value
   Cause: An unexpected error occurred while comparing tables.
   Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-26120: Fields compared are not the same
   Cause: An unexpected error occurred while comparing fields.
   Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-26121: Error while exploring version
   Cause: An unexpected error occurred while checking the version.
   Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-26122: Exception when getting the children list
Cause: An unexpected error occurred while getting a list of child elements.
Action: Review the error details for further information.

Level: 32
Type: ERROR
Impact: Other

ODI-26123: Cannot connect to the repository with the provided login information.
Cause: Could not connect to a repository with the specified connection details.
Action: Ensure the repository database is available and valid connection details are supplied.

Level: 32
Type: ERROR
Impact: Other

ODI-26124: Exception during connection to the repository with the provided login information:
Cause: Could not connect to a repository with the specified connection details.
Action: Ensure the repository database is available and valid connection details are supplied.

Level: 32
Type: ERROR
Impact: Other

ODI-26125: The configured external password storage is still accessible. Instead, use the Password Storage Switch service to change the configuration.
Cause: Could not connect to the external password storage with the specified connection details.
Action: Ensure the external password storage is available and valid connection details are supplied. Consider using the Password Storage Switch service to change the configuration.

Level: 32
Type: ERROR
Impact: Other

ODI-26126: Error while opening window.
Cause: An unexpected error occurred while opening window.
Action: Contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-26127: The selected master repository configured to use internal password storage. Recovery is possible only for external storages.
**Cause:** Recovery was attempted for a master repository configured to use internal password storage.

**Action:** Select a master repository not configured to use internal password storage.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26128: ODI-26128: Unable to open Editor**

**Cause:** An unexpected error occurred while opening an editor.

**Action:** Review the error details for further information.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26129: ODI-26129: Unable to open Editor: Technology could not be opened twice**

**Cause:** Technology editor is already open.

**Action:** Close the other editor before opening a new technology editor.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26130: ODI-26130: Could not connect to repository**

**Cause:** Could not connect to a repository with the specified connection details.

**Action:** Ensure the repository database is available and valid connection details are supplied.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26131: ODI-26131: Specify Import Path**

**Cause:** A value for Import Path is a mandatory and it was not supplied.

**Action:** Enter the correct value for the Import Path.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26132: ODI-26132: Repository id [0] or Repository name [1] is already used in your master repository.**

**Cause:** The ID or Name specified for the master repository were already used.

**Action:** Enter valid unique values for Repository ID and Repository name.

**Level:** 32  
**Type:** ERROR
Impact: Other

**ODI-26134: ODI-26134: Invalid number format for port number.**

**Cause:** The value specified for Port Number was not in a valid format and number range.

**Action:** Enter a valid Port Number. See SQL*Net documentation for additional information regarding format and range.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-26135: ODI-26135: The Network Adapter could not establish the connection.**

**Cause:** Connection via the Network Adapter could not be established.

**Action:** Ensure the network resource is available and the connection details in the Network Adapter are correct.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-26136: ODI-26136: The specified character set is not supported.**

**Cause:** The specified character set was not supported.

**Action:** Select a supported character set.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-26137: ODI-26137: The context or type are incorrect.**

**Cause:** The selected ODI context is invalid: it was probably removed from the repository database.

**Action:** Reopen Execution dialog again so that the list of ODI contexts will be reloaded.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-26138: ODI-26138: Server initialization failed.**

**Cause:** The attempt to initialize the server failed. This may be due to one or more of the following: invalid connection parameters specified, database problems, network problems.

**Action:** Ensure the server is available and accessible and the connection parameters are correct.

**Level:** 32

**Type:** ERROR

**Impact:** Other

**ODI-26139: ODI-26139: Oozie Engine initialization failed.**
Cause: The attempt to initialize the Oozie engine failed. This may be due to one or more of the following: invalid connection parameters specified, database problems, network problems.

Action: Ensure the Oozie engine is available and accessible and the connection parameters are correct.

Level: 32
Type: ERROR
Impact: Other

Cause: The attempt to initialize the Oozie engine failed. This may be due to one or more of the following: invalid connection parameters specified, database problems, network problems.

Action: Ensure the Oozie engine is available and accessible and the connection parameters are correct.

Level: 32
Type: ERROR
Impact: Other

Cause: A valid Context was not specified.

Action: Select a Context from the list. If none are available then create one from the Topology Navigator.

Level: 32
Type: ERROR
Impact: Other

ODI-26153: ODI-26153: Connection failed; JDBC Error

Cause: An unexpected JDBC error was encountered during the connection process.

Action: Ensure the resource referenced is available and the connection information is correct.

Level: 32
Type: ERROR
Impact: Other

ODI-26155: ODI-26155: No Master Repository on this connection

Cause: A connection to the Master Repository could not be established.

Action: Ensure the Master Repository is available and valid connection details are provided.

Level: 32
Type: ERROR
Impact: Other

ODI-26156: ODI-26156: Designer cannot connect to an Execution repository. The operation will be canceled.
Cause: Unable to establish a connection to the Execution repository.
Action: Ensure the Execution repository is available and the connection details are correct.

Level: 32
Type: ERROR
Impact: Other

ODI-26157: ODI-26157: Connection Error
Cause: A connection to the Master Repository could not be established.
Action: Ensure the Master Repository is available and valid connection details are provided.

Level: 32
Type: ERROR
Impact: Other

ODI-26158: ODI-26158: Work Repository Attachment Error
Cause: A connection to the Work Repository could not be established.
Action: Ensure the Work Repository is available and valid connection details are provided.

Level: 32
Type: ERROR
Impact: Other

ODI-26159: ODI-26159: Error while creating Work Repository
Cause: An unexpected error occurred while creating the Work Repository.
Action: Correct any issues described in the error details.

Level: 32
Type: ERROR
Impact: Other

ODI-26160: ODI-26160: URL not referenced in the list.
Cause: The URL is not valid for the driver.
Action: Ensure that the URL parameters are correct and in the proper format.

Level: 32
Type: ERROR
Impact: Other

ODI-26161: ODI-26161: File Not Found
Cause: The XML file for the driver or URL format list is missing.
Action: Review the exception for the missing file. Those files should be included with the installation.

Level: 32
Type: ERROR
Impact: Other
ODI-26162: ODI-26162: Connection failure
  Cause: A connection to the repository could not be established.
  Action: Ensure the repository is available and valid connection details are provided.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26163: ODI-26163: Access Denied
  Cause: A connection to the repository could not be established because of insufficient user privilege.
  Action: Ensure the ODI user has sufficient privilege to connect to the specified repository.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26164: ODI-26164: The reverse cannot be executed. Your Model will be created.
  Cause: The specified technology or driver did not support standard reverse-engineering.
  Action: Ensure the technology or driver supports standard reverse-engineering. Otherwise choose Customized Reverse and select an appropriate RKM for the technology.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26165: ODI-26165: This driver has no match in the URL list
  Cause: A match could not be made between the driver and the list of URLs.
  Action: Ensure that the correct driver has been selected.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26166: ODI-26166: The template was not generated: {0}
  Cause: The WLS Template could not be generated.
  Action: Correct any errors identified in the error log and retry the operation.
  Level: 32
  Type: ERROR
  Impact: Other

ODI-26167: ODI-26167: File System Error: {0}
  Cause: Creation of the Server Template file failed due to an error detected by the file system.
  Action: Correct any errors identified in the error log. Ensure the file system location is accessible and retry the operation.
Level: 32
Type: ERROR
Impact: Other

ODI-26168: ODI-26168: Client requires a repository with version {0} but the repository version found is {1}
Cause: Could not connect to the repository due to the old repository version.
Action: Update repository to the latest version.

Level: 32
Type: ERROR
Impact: Other

ODI-26169: ODI-26169: JDBC driver is mandatory.
Cause: JDBC driver was not entered.
Action: Provide JDBC driver for database connection.

Level: 32
Type: ERROR
Impact: Other

ODI-26170: ODI-26170: JDBC URL is mandatory.
Cause: JDBC URL was not entered.
Action: Provide JDBC URL for database connection.

Level: 32
Type: ERROR
Impact: Other

ODI-26171: ODI-26171: User is mandatory.
Cause: User was not entered.
Action: Provide user for database connection.

Level: 32
Type: ERROR
Impact: Other

ODI-26172: ODI-26172: Id is mandatory.
Cause: Id was not entered.
Action: Provide work repository ID.

Level: 32
Type: ERROR
Impact: Other

ODI-26173: ODI-26173: Name is mandatory.
Cause: Name was not entered.
Action: Provide work repository name.

Level: 32
Type: ERROR
Impact: Other

ODI-26174: ODI-26174: Database connection is not available.
  Cause: Connection error occurred while connecting to the database.
  Action: Verify that the Database Connection details are correct and the database is available.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-26175: ODI-26175: Import folder does not exist or not a valid folder.
  Cause: Non-existing or invalid folder was specified.
  Action: Ensure the specified folder path is correct and refers to an existing folder.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-26176: ODI-26176: Import file does not exist or not a valid file.
  Cause: Non-existing or invalid file was specified.
  Action: Ensure the specified file path is correct and refers to an existing file.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-26177: ODI-26177: Unable to connect to the DBA user.
  Cause: Unable to connect to the DBA account.
  Action: Check that the DBA username and password are correct.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-26178: ODI-26178: Unable to connect to the Repository user.
  Cause: Unable to connect to the Repository account.
  Action: Check that the Repository connection details are correct.

  Level: 32
  Type: ERROR
  Impact: Other

ODI-26179: ODI-26179: Invalid Date Format
  Cause: An Invalid Date format was entered in the date filter.
  Action: Ensure the date entered is of the required format.

  Level: 32
  Type: ERROR
Impact: Other

ODI-26180: Changing the name of a sequence only impacts the sequence itself; Users need to manually change object(s) which reference the old sequence name.

Cause:

Action:

Level: 32
Type: WARNING
Impact: Other

ODI-26181: Unable to add a Project knowledge module

Cause: An unsupported action was attempted.

Action: No action required as Project knowledge modules are not a valid selection to be added to a solution.

Level: 32
Type: ERROR
Impact: Other

ODI-26182: Object was modified by another user and cannot be saved.

Cause: The object could not be saved. It's possible that the object was modified by another user.

Action: Try to save changed data, then refresh edited object and apply changed data again.

Level: 32
Type: ERROR
Impact: Other

ODI-26183: The maximum password length is {0} characters.

Cause: The entered work repository password length is greater than allowed.

Action: Provide a shorter password.

Level: 32
Type: ERROR
Impact: Other

ODI-26184: SQL error occurred. See error details for more information.

Cause: SQL error occurred while performing UI action.

Action: If this error is not expected, contact Oracle Support Services.

Level: 32
Type: ERROR
Impact: Other

ODI-26185: File does not exist or cannot be created. See error details for more information.

Cause: UI action tried to open a file which did not exist, or create a file which could not be created due to some reasons.
**Action:** Make sure the file path is typed correctly. Make sure application has enough file system permissions in order to create a file at the specified path.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26186: ODI-26186: Character set is not supported. See error details for more information.**  
**Cause:** UI action tried to use character encoding which is not supported.  
**Action:** Make sure character set is typed correctly.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26187: ODI-26187: Unexpected I/O error occurred. See error details for more information.**  
**Cause:** UI action caused unexpected I/O error.  
**Action:** Contact Oracle Support Services.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26188: ODI-26188: There is no enough memory to perform this UI action. Increase the maximum Java heap size value (-Xmx).**  
**Cause:** UI action requires more memory than available at the current moment.  
**Action:** Increase the maximum Java heap size value by using the "-Xmx" JVM option.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26189: ODI-26189: Unexpected report generation error occurred. See error details for more information.**  
**Cause:** UI action caused unexpected report generation error.  
**Action:** Contact Oracle Support Services.

**Level:** 32  
**Type:** ERROR  
**Impact:** Other

**ODI-26190: ODI-26190: A user with same name \{0\} already exists in ODI. Note: LDAP user name is case insensitive. You have to first drop that user prior to registering or changing this one.**  
**Cause:** Due to LDAP user name is case insensitive so ODI will follow same rule in external authentication mode.  
**Action:** Please drop the existing user with same name (ignoring case) first prior to registering this one.
Level: 32
Type: ERROR
Impact: Other

ODI-26191: You cannot move this object because it is locked by another user. 

Cause: This object was locked by another user.
Action: Wait until object is unlocked.

Level: 32
Type: ERROR
Impact: Other

ODI-26192: You cannot drag & drop this object because it is locked by another user.

Cause: This object was locked by another user.
Action: Wait until object is unlocked.

Level: 32
Type: ERROR
Impact: Other

ODI-26193: You are not allowed to delete master repository.

Cause: User attempt to delete master repository.
Action: Cancel deleting master repository.

Level: 32
Type: ERROR
Impact: Other

ODI-26194: Database Connection User is mandatory.

Cause: Database Connection User was not entered.
Action: Provide Database Connection User.

Level: 32
Type: ERROR
Impact: Other

ODI-26195: Database Connection Password is mandatory.

Cause: Database Connection Password was not entered.
Action: Provide Database Connection Password.

Level: 32
Type: ERROR
Impact: Other

ODI-26196: Failed to migrate login information to new format.

Cause: ODI was not able to migrate login information from old format into the new format.
Action: Make sure that directory %ODI_HOME%/oracledi has write permissions. Try manually copying %ODI_HOME%/oracledi/snps_login_work.xml into %ODI_HOME%/oracledi/snps_login_work_12.xml file.

Level: 32
Type: ERROR
Impact: Other

Cause: ODI was not able to delete old login information after migration from old format into the new format.
Action: Make sure that directory %ODI_HOME%/oracledi and file %ODI_HOME%/oracledi/snps_login_work.xml have write permissions. Try manually removing %ODI_HOME%/oracledi/snps_login_work.xml file.

Level: 32
Type: ERROR
Impact: Other

Cause: Password confirmation doesn't match the entered password.
Action: Make sure that password and password confirmation are the same.

Level: 32
Type: ERROR
Impact: Other

ODI-26199: ODI-26199: User {0} is not authorized to grant object {1}.
Cause: Current user is not authorized to grant generic object privileges
Action: Assign generic object privileges to user.

Level: 32
Type: ERROR
Impact: Security

ODI-26200: ODI-26200: User {0} is not authorized to grant method {1}.
Cause: Current user is not authorized to grant generic method privileges
Action: Assign generic method privileges to user.

Level: 32
Type: ERROR
Impact: Security

ODI-26201: ODI-26201: Invalid Export Key. Export Key must have a minimum length of eight characters and maximum length of 100 characters, contain at least one alphabetic (lower/upper case) character, at least one numeric-digit or a special characters (@ # $ % + / =).
Cause: Export Key must have a minimum length of eight characters and maximum length of 100 characters, contain at least one alphabetic (lower/upper case) character, at least one numeric-digit or a special characters (@ # $ % + / =).
Action: Provide a valid Export Key
Level: 32
Type: ERROR
Impact: Other

ODI-26202: The Export Key and the confirmed Export Key are not the same.
Cause: Export Key confirmation doesn't match the entered Export Key.
Action: Make sure that the Export Key and confirmed Export Key are the same.

Level: 32
Type: ERROR
Impact: Other

ODI-26203: The provided Export Key is not correct for the selected file.
Cause: The provided Export Key is not the same as the Export Key of this selected file.
Action: Provide a correct Export Key

Level: 32
Type: ERROR
Impact: Other

ODI-26204: The incorrect Export Key is entered three times. The Export Key field will be disabled now. You can Import this file without an Export Key (the cipher data will not be imported) or Cancel import.
Cause: The incorrect Export Key entered 3 times.
Action: Continue import this file without importing cipher data or Cancel import.

Level: 32
Type: ERROR
Impact: Other

ODI-26205: The incorrect Export Key is entered three times. The Export Key field will be disabled now. Please consider other options or Cancel import.
Cause: The incorrect Export Key entered 3 times.
Action: Continue import this file or all files without importing cipher data, or Skip the file, or Cancel import.

Level: 32
Type: ERROR
Impact: Other

ODI-26206: Unable to connect Registry Database to the DBA user.
Cause: Unable to connect Registry Database by DBA Account.
Action: Check Registry Database and the DBA username and password are correct.

Level: 32
Type: ERROR
Impact: Other
ODI-26207: ODI-26207: An Option with the name {0} already exists. Please provide another name.
Cause: The name provided for the Option is not unique.
Action: Enter a unique name for the Option.

Level: 32
Type: ERROR
Impact: Other

ODI-26208: ODI-26208: Unable to perform move because {0} already exists in folder {1}.
Cause: A folder already consists a such type of object with the same name as a moving object.
Action: Rename an object, which you want to move, or rename, or delete an existing object from a folder.

Level: 32
Type: ERROR
Impact: Other

ODI-26209: ODI-26209: Repository Seeding Version Mismatch
Cause: A client of an older version is used to connect to a repository that already contains newer map component and KM definitions.
Action: Update the current client by downloading and installing the latest patch. Insure other clients that connect to the same repository are also at the same patch version.

Level: 32
Type: WARNING
Impact: Other

ODI-26210: ODI-26210: The repository contains map component and KM definitions that are older than the ones supported by the current client version. Clicking Yes will continue the login and the map component definitions will be updated. Clicking No will disconnect from the repository without updating. Do you want to continue?
Cause: The current client contains map component and KM definitions that are newer than the ones recorded in the repository.
Action: Continuing the connection will update the repository with map component and KM definitions at the same version as the client. Check and update other clients that connect to the same repository to the same patch version as the current client.

Level: 32
Type: WARNING
Impact: Other

ODI-26211: Mapping name is not unique.
Cause: Duplicate mapping name. Mapping with the same name already exists in this folder.
Action: Choose another mapping name.
ODI-26212: Reusable mapping name is not unique.

**Cause:** Duplicate reusable mapping name. Reusable mapping with the same name already exists in this folder, or there is another global reusable mapping with the same name.

**Action:** Choose another reusable mapping name.

---

ODI-26213: Cannot create connection from \{0\} to \{1\}. Connections can only be made within the same component owner.

**Cause:** Cannot make a connection between two components that are contained in different component owners, for example a connection from a component that is inside a dataset to another component outside the dataset.

**Action:** Connect to a component that is contained by the same component owner.

---

ODI-26214: Cannot find appropriate Knowledge Module for node:0

**Cause:** Cannot find a KM to assign to this node.

**Action:** Set appropriate KM for physical nodes.

---

ODI-26215: Error when attempting to set the Loading Knowledge Module to AP node:0

**Cause:** Cannot find a LKM to assign to this node.

**Action:** Set appropriate LKM for AP nodes.

---

ODI-26216: Error when attempting to set the Extract Knowledge Module to physical node:0

**Cause:** Cannot find a XKM to assign to this node.

**Action:** Set appropriate XKM for physical nodes.
ODI-26217: Cannot enable Streaming on Map Physical Design  
**Cause:** Map Physical Design does not contain any Execution Unit that supports Streaming  
**Action:** Set appropriate Streaming value  
**Level:** 32  
**Type:** ERROR  
**Impact:** Programmatic

ODI-26300: ODI-26300: Following Flexfields are found missing, which are required to persist this object properly: {0} You can use Security Navigator to define Flexfields for this object type.  
**Cause:** There are some required flexfields missing in the editor opened. Without the mentioned flexfields the given object will not persist properly.  
**Action:** User can use Security Navigator to define Flexfields for this object type.  
**Level:** 32  
**Type:** WARNING  
**Impact:** Other

ODI-26301: ODI-26301: The incorrect Export Key is entered three times. The Export Key field will be disabled now. Please consider other options or cancel the Compare.  
**Cause:** The incorrect Export Key entered 3 times.  
**Action:** Continue comparing this file without cipher data or cancel the Compare.  
**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-26310: ODI-26310: Could not delete the Open Tool {0}. It is used within steps in the following packages: {1}  
**Cause:** The Open Tool is used within package steps and cannot be deleted.  
**Action:** Delete the corresponding steps from the referencing package before deleting the Open Tool.  
**Level:** 32  
**Type:** ERROR  
**Impact:** Other

ODI-30000: Error while parsing request file.  
**Cause:**  
**Action:**  
**Level:** 32  
**Type:** SET_AT_RUNTIME  
**Impact:** Files

ODI-30001: One of the following parameters: {0} or {1} must be defined.  
**Cause:**  
**Action:**
Level: 32
Type: SET_AT_RUNTIME
Impact: Configuration

ODI-30002: Parameters {0} and {1} cannot be set at the same time.
Cause:

  Impact: Other

ODI-40911: One pending element was not found: {0}
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other

ODI-40912: Simple type {0} has a restriction on a type {1}
  Cause:
  Action:
  Level: 32
  Type: SET_AT_RUNTIME
  Impact: Other
ODI-40913: The object of type {0} is missing type {1} but don't know how to deal with it.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40914: Element {0} is missing but is referenced
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40915: Type {0} is missing but is needed.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40916: Element {0} has no type.
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40917: One pending element's namespace was not found: {0}
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40918: One pending element has an ambiguous name: {0}
Cause:
Action:
Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40919: Cannot add element {0} to type {1} because it doesn't handle references.
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40920: An attribute must have a simple type
Cause:
Action:

Level: 32
Type: SET_AT_RUNTIME
Impact: Other

ODI-40921: Could not find the root element that we've just set.
Cause:
Action:

Level: 32

  Impact: Programmatic
ODL-52001: deleting log file: {0}, size: {1} bytes
  
  **Cause:** A log file was deleted because of the rules defined in the current configuration.
  
  **Action:** This is an information message, no action is needed.
  
  **Level:** 16
  **Type:** NOTIFICATION
  **Impact:** Logging

ODL-52002: invalid value for parameter {0}: {1}. Value must be greater than zero.
  
  **Cause:** An invalid value was assigned to a numeric parameter that requires a positive value.
  
  **Action:** Use a value that is greater than zero value for the parameter.
  
  **Level:** 1
  **Type:** ERROR
  **Impact:** Logging

ODL-52003: invalid value for parameter maxLogSize: {0}. Value must be greater than the value of maxFileSize: {1}.
  
  **Cause:** The value used for the maxLogSize parameter is smaller than the value used for the maxFileSize parameter, which is not valid.
  
  **Action:** Enter a value for the maxLogSize parameter that is greater than the value of the maxFileSize parameter.
  
  **Level:** 1
  **Type:** ERROR
  **Impact:** Logging

ODL-52004: invalid encoding: {0}
  
  **Cause:** The value used for encoding parameter is not valid.
  
  **Action:** Enter a valid encoding value.
  
  **Level:** 1
  **Type:** ERROR
  **Impact:** Logging
ODL-52005: invalid path: {0}. This path is already being used by another log writer instance of a different type.
Cause: There was an attempt to create a log using a path that is already being used by another log, but the two logs are of different types.
Action: Contact Oracle support services.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52006: Path cannot be null.
Cause: A null value was used for the log file path.
Action: Enter a non-null value for the path.

Level: 1
Type: ERROR
Impact: Logging

ODL-52007: The log path is not a directory: {0}.
Cause: The value used for the log path is not a directory. Some log types require that the log path be a directory, not a file, because the log file name is fixed.
Action: Enter a directory path instead of a file path.

Level: 1
Type: ERROR
Impact: Logging

ODL-52008: unable to create log directory: {0}
Cause: One or more directories that were used in the log path could not be created.
Action: Make sure that the process has permission to create the directories, or enter a different path. It may also be possible to create the directories manually.

Level: 1
Type: ERROR
Impact: Logging

ODL-52009: The log directory is not writable: {0}.
Cause: The process could not write to the log directory.
Action: Make sure that the process has permission to write to the log directory, or enter a different path.

Level: 1
Type: ERROR
Impact: Logging

ODL-52010: no permission to access log directory: {0}
Cause: The process could not access the log directory.
Action: Make sure that the process has permission to access the log directory, or enter a different path.
Level: 1
Type: ERROR
Impact: Logging

ODL-52011: attempting to operate on a closed LogWriter
Causedue to an attempt to perform an operation on a log writer that is already closed.
Action: This is possibly a programming error. Contact Oracle Support Services. If the problem occurs during process shut down, it is possible that some component is attempting to log a message after the logging system has already shut down.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52012: attempting to write to a closed LogWriter
Causedue to an attempt to write a message to a log writer that is already closed.
Action: This is possibly a programming error. Contact Oracle Support Services. If the problem occurs during process shut down, it is possible that some component is attempting to log a message after the logging system has already shut down.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52013: attempting to flush a closed LogWriter.
Causedue to an attempt to flush a log writer that is already closed.
Action: This is possibly a programming error. Contact Oracle Support Services. If the problem occurs during process shut down, it is possible that some component is attempting to log a message after the logging system has already shut down.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52014: Maximum log size is reached.
Causedue to the maximum log size for the log defined in the configuration was reached and the current configuration does not enable automated removal of older log messages.
Action: Review the logging configuration. It may be necessary to increase the maxLogSize parameter, or enable a policy for the automatic removal of older messages.

Level: 1
Type: ERROR
Impact: Logging

ODL-52015: unable to delete old archived file
Causedue to an attempt to delete an old log file, but the file could not be deleted.
Action: Check that the process has permission to delete the log file.

Level: 1
Type: ERROR
Impact: Logging

ODL-52016: failure to rotate log file: 0
Cause: There was an attempt to rename a log file, but the operation failed.
Action: Check that the process has permission to rename files.

Level: 1
Type: ERROR
Impact: Logging

ODL-52017: out of log file names
Cause: There was an attempt to rename a log file, but there are no more names that can be used.
Action: Remove some or all of the archived files.

Level: 1
Type: ERROR
Impact: Logging

ODL-52018: unable to write to log "0": 1
Cause: There was an error when writing messages to a log file.
Action: See the error message for the root cause.

Level: 1
Type: ERROR
Impact: Logging

ODL-52019: unable to close log "0": 1
Cause: There was an error when closing a log file.
Action: See the error message for the root cause.

Level: 1
Type: ERROR
Impact: Logging

ODL-52020: failed to get a lock on file "0" after 1 milliseconds
Cause: A log file lock could not be acquired within the specified time period, and the log write operation has time-out.
Action: Check that other processes are not holding a lock to the log file.

Level: 1
Type: ERROR
Impact: Logging

ODL-52021: thread interrupted while waiting to lock file "0"
Cause: The thread was interrupted while waiting to acquire a lock on a lock file.
Action: Check that other processes are not holding a lock to the log file.

Level: 1
Type: ERROR
Impact: Logging

ODL-52029: recursive logging detected that exceeds the recursion depth limit of {0}. The handler will not log the message.
Cause: The handler detect recursive logging calls that exceed that maximum configured recursion depth limit.
Action: Review the source code to eliminate logging calls within code that may be called while formatting a log message.

Level: 1
Type: ERROR
Impact: Logging

ODL-52030: invalid property name: {0}
Cause: An invalid property name was used in the logging configuration.
Action: Review the configuration and enter a valid property name.

Level: 1
Type: ERROR
Impact: Logging

ODL-52031: required property "{0}" is not found
Cause: A required property was not present in the configuration of a log handler.
Action: Review the configuration and add the required property.

Level: 1
Type: ERROR
Impact: Logging

ODL-52032: invalid format: {0}. Valid formats are: {1}.
Cause: An invalid value for the 'format' property was used in the configuration of an ODLHandler.
Action: Review the configuration and add a valid value for the format property.

Level: 1
Type: ERROR
Impact: Logging

ODL-52033: invalid value for property {0}: {1}.
Cause: An invalid value for used for an ODLHandler property.
Action: Review the configuration and add a valid value for the property.

Level: 1
Type: ERROR
Impact: Logging

ODL-52034: Configuration is invalid: {0} cannot be less than {1}. 
Cause: An invalid value for used for a size property in an ODLHandler configuration.

Action: Review the configuration and make sure that the value of the 'maxFileSize' property is not greater than the value of the 'maxLogSize' property.

Level: 1
Type: ERROR
Impact: Logging

ODL-52035: failure to create ODLHandler: {0}
Cause: An ODLHandler instance could not be created.
Action: Check the error message for the root cause.

Level: 1
Type: ERROR
Impact: Logging

ODL-52036: invalid level: {0}. Check spelling and verify that the value is a valid ODL or Java level.
Cause: An invalid level was used in the configuration of a logger or handler.
Action: Review the configuration and enter a valid level.

Level: 1
Type: ERROR
Impact: Logging

ODL-52040: failure to initialize class {0}: property {1} must be defined.
Cause: A required system property was not defined.
Action: Review the process configuration and make sure that the required system property is defined.

Level: 1
Type: ERROR
Impact: Logging

ODL-52041: Use of {0} in logging configuration is deprecated; replacing it with {1}. (File: {2}).
Cause: A deprecated property was used in the logging configuration.
Action: Review the logging configuration and consider replacing the deprecated property. While the configuration may be valid, use of deprecated properties should be avoided.

Level: 1
Type: WARNING
Impact: Logging

ODL-52042: undefined property: {0}.
Cause: An undefined property was used in the logging configuration.
Action: Review the logging and process configuration and either replace the invalid property in the logging configuration, or define a value for the property.
Level: 1  
Type: ERROR  
Impact: Logging  

ODL-52043: expecting one element of type "{0}"  
Cause: The logging configuration contained more than one XML element of a given type, when only one was expected.  
Action: Review the logging configuration and remove the extra XML elements.

Level: 1  
Type: ERROR  
Impact: Logging  

ODL-52044: cannot find handler: {0}  
Cause: The logging configuration assigned a handler to one or more loggers, but the handler was not defined.  
Action: Review the logging configuration and either add the missing handler, or remove any references to the handler.

Level: 1  
Type: ERROR  
Impact: Logging  

ODL-52045: invalid class: {0}  
Cause: The logging configuration defined an invalid class for a handler.  
Action: Review the logging configuration and make sure that the handler class is valid. The handler class must be either a subclass of java.util.logging.Handler, or implement the oracle.core.ojdl.logging.HandlerFactory interface.

Level: 1  
Type: ERROR  
Impact: Logging  

ODL-52046: cannot find class: {0}  
Cause: The logging configuration defined a handler, filter, or error manager class, but that class could not be found.  
Action: Review the logging and process configuration and make sure that the class is available in the system classpath, or that the class is visible to the classloader that loads the ODL configuration classes.

Level: 1  
Type: ERROR  
Impact: Logging  

ODL-52047: cannot load or link class "{0}": {1}  
Cause: The logging configuration defined a handler, filter, or error manager class, but that class could not be loaded due to a linkage error.  
Action: Review the logging and process configuration and make sure that the class is available in the system classpath, or that the class is visible to the classloader that loads the ODL configuration classes, or that the correct version of the class is being used.
Level: 1
Type: ERROR
Impact: Logging

ODL-52048: Class "(0)" is not of expected type "{1}".
Cause: The logging configuration defined a handler, filter, or error manager class, but that class is not a handler, filter or error manager instance.
Action: Review the logging and process configuration and make sure that the class is of the correct type.

Level: 1
Type: ERROR
Impact: Logging

ODL-52049: cannot create instance of class "(0)": {1}
Cause: The logging configuration defined a handler, filter, or error manager class, but an instance of that class could not be created.
Action: Review the error message for the root cause.

Level: 1
Type: ERROR
Impact: Logging

ODL-52050: unable to process file "(0)", XML parse exception (line: {1}, column: {2}): {3}
Cause: The logging configuration could not be processed due to an XML error in the configuration file.
Action: Review the error message for a description of the XML error, and correct the problem in the configuration file.

Level: 1
Type: ERROR
Impact: Logging

ODL-52051: unable to process file "(0)"; exception: {1}
Cause: The logging configuration could not be processed due to a unexpected XML parser error.
Action: Review the error message for a description of the root cause.

Level: 1
Type: ERROR
Impact: Logging

ODL-52052: unable to find resource: {0}
Cause: The logging configuration could not be processed due to a missing XML schema or DTD.
Action: Contact Oracle Support Services.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52053: unable to create handler instance using class "(0)"; exception: (1)
  Cause: The creation of a handler instance failed because the handler factory threw an exception.
  Action: Review the error message for the root cause.

  Level: 1
  Type: INCIDENT_ERROR
  Impact: Logging

ODL-52054: The logger "(0)" is already defined.
  Cause: There was an attempt to add a new logger to the configuration file, but the logger is already defined.
  Action: Verify that the logger name is correct.

  Level: 1
  Type: ERROR
  Impact: Logging

ODL-52055: The handler "(0)" is already defined.
  Cause: There was an attempt to add a new handler to the configuration file, but a handler is already defined.
  Action: Verify that the handler name is correct.

  Level: 1
  Type: ERROR
  Impact: Logging

ODL-52056: The logger "(0)" is not defined.
  Cause: There was an attempt to access a logger in the logging configuration but the logger is not defined.
  Action: Verify if the logger name is correct.

  Level: 1
  Type: ERROR
  Impact: Logging

ODL-52057: The handler "(0)" is not defined.
  Cause: There was an attempt to access a handler in the logging configuration but the handler is not defined.
  Action: Verify if the handler name is correct.

  Level: 1
  Type: ERROR
  Impact: Logging

ODL-52058: The handler "(0)" cannot be removed because it is being used by logger "(1)".
  Cause: There was an attempt to remove a handler from the logging configuration, but the handler could not be removed because it is being used by a logger.
**Action:** Verify that the handler name is correct, or remove the handler from all the loggers first before attempting to remove the handler.

**Level:** 1

**Type:** ERROR

**Impact:** Logging

**ODL-52059:** The logger "{0}" already has handler "{1}".

**Cause:** There was an attempt to add a handler to a logger but the logger already has the given handler.

**Action:** Verify if the logger and handler names are correct.

**Level:** 1

**Type:** ERROR

**Impact:** Logging

**ODL-52060:** The logger "{0}" does not have handler "{1}".

**Cause:** There was an attempt to remove a handler from a logger, but the logger does not contain the given handler.

**Action:** Verify if the logger and handler names are correct.

**Level:** 1

**Type:** ERROR

**Impact:** Logging

**ODL-52061:** The handler "{0}" does not have property "{1}".

**Cause:** There was an attempt to remove a property from a handler, but the handler does not have a property with the given name.

**Action:** Verify if the handler and property are correct.

**Level:** 1

**Type:** ERROR

**Impact:** Logging

**ODL-52062:** Illegal value for "{0}": {1}

**Cause:** There was an attempt to set a property for a handler or logger, but the value of the property is not valid.

**Action:** Verify if the handler or loggers properties are valid.

**Level:** 1

**Type:** ERROR

**Impact:** Logging

**ODL-52063:** Unable to load logging configuration from "{0}"; exception: {1}

**Cause:** There was an error while loading the logging configuration file.

**Action:** Review the error message for the root cause.

**Level:** 1

**Type:** ERROR

**Impact:** Logging
ODL-52064: The handler "[0]" is already defined in the target logging configuration document.

**Cause:** There was an attempt to add a handler to a logging configuration file, but a handler with the given name already exists in the target file.

**Action:** Review the definition of the new handler.

**Level:** 1

**Type:** ERROR

**Impact:** Logging

ODL-52065: The logger "[0]" or a descendant is already defined in the target logging configuration document.

**Cause:** There was an attempt to add a logger to a logging configuration file, but the logger or one of its descendants is already defined in target logging configuration.

**Action:** Review the definition of the new logger.

**Level:** 1

**Type:** ERROR

**Impact:** Logging

ODL-52080: Reading logging configuration from "[0]".

**Cause:**

**Action:**

**Level:** 1

**Type:** NOTIFICATION

**Impact:** Logging

ODL-52081: unable to read logging configuration from file "[0]"; exception: {1}

**Cause:** There was an error reading the logging configuration from the given file.

**Action:** Review the error message for the root cause.

**Level:** 1

**Type:** INCIDENT_ERROR

**Impact:** Logging

ODL-52082: unable to register logging runtime MBean; exception: [0]

**Cause:**

**Action:**

**Level:** 1

**Type:** ERROR

**Impact:** Logging

ODL-52083: unable to register log dump; exception: [0]

**Cause:** There was an error registering the log dump with the FMW Diagnostics Framework.

**Action:** Review the error message for the root cause. The system may still work, but the log dump will not be available.
Level: 1
Type: WARNING
Impact: Logging

ODL-52084: unable to initialize ODL; exception: {0}
Cause: There was an error initializing Oracle Diagnostic Logging (ODL).
Action: Review the error message for the root cause. Oracle Diagnostic Logging is not properly configured in this system.

Level: 1
Type: ERROR
Impact: Logging

ODL-52085: Reloading logging configuration from "(0)".
Cause:
Action:

Level: 1
Type: NOTIFICATION
Impact: Logging

ODL-52086: unable to reload logging configuration from file "(0)"; exception: {1}
Cause: There was an error reloading the logging configuration from the given file.
Action: Review the error message for the root cause.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52087: suspicious logging configuration reload. The original configuration was read from file "(0)", but the new configuration is being read from "(1)".
Cause: The logging configuration is being reloaded, but the configuration file is different from the configuration file used for the initial configuration.
Action: This is probably an error, there should only be one configuration file.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52088: The java.util.logging configuration was reloaded.
Cause: The java.util.logging configuration was reloaded, probably via the invocation of LogManager.readConfiguration.
Action: The java.util.logging configuration should not be reloaded programmatically, as this can override the ODL configuration.

Level: 1
Type: INCIDENT_ERROR
Impact: Logging

ODL-52501: Unable to get OPMN connection for instance "(0)"; check that the instance name is valid and that OPMN is running.
**Cause:** There was an attempt to invoke an operation on a OPMN managed target, but a connection to that target could not be created.

**Action:** Check the target argument and make sure that the instance and component names are valid, and that OPMN is running.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52502:** Invalid target. The server name "{0}" is not a valid server name, the server is not running, or JRF is not enabled on the server.

**Cause:** There was an attempt to invoke an operation on a Java EE server target, but the target does not exist or is not valid for the operation.

**Action:** Check the target argument and make sure that the server name is correct, the server is running, and that JRF is enabled on the server.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52801:** There is already an active trace with ID "{0}". Use a different trace ID or stop the active trace first before starting a new trace with the same ID.

**Cause:** There was an attempt to start a trace using an ID value that is already being used by another active trace.

**Action:** Use a different trace ID or disable the existing active trace first before starting a new one with the same ID.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52802:** There is already an active trace for attribute "{0}" with value "{1}". The existing active trace must be disabled first before a new one can be started for the same attribute value.

**Cause:** There was an attempt to start a trace using an attribute value that is already used by an active trace.

**Action:** Use a different attribute value or disable the existing active trace first before starting a new one with the same attribute value.

**Level:** 1  
**Type:** ERROR  
**Impact:** Logging

**ODL-52803:** Unable to complete the start tracing operation. The operation failed on target "{0}"; cause: {1}

**Cause:** The start tracing operation cannot be completed because one or more servres are unable to complete the operation.

**Action:** See the error message for more information on the cause of the server failure.

**Level:** 1
**Type:** ERROR  
**Impact:** Logging

**ODL-52804: The start tracing operation failed for provider ":0"; cause: \{1\}

*Cause:* The start tracing operation cannot be completed because a trace provider is unable to complete the operation. See the error message for more information on the cause for the provider failure.

*Action:* See the error message for more information on the cause of the provider failure. You may try to disable the failing provider to obtain trace data from the other trace providers.

*Level:* 1

**Type:** ERROR  
**Impact:** Logging

**ODL-52805: Unable to complete the start tracing operation. The operation failed for one or more providers and could not be rolled back. The tracing configuration may be in an inconsistent state. Disable all active traces or restart the servers to reset the selective tracing configuration.

*Cause:* The start tracing operation failed for one or more providers or servers but could not be rolled back on all servers or providers.

*Action:* The tracing system may be on an inconsistent state. Disable all active traces or restart the servers to reset the selective tracing configuration.

*Level:* 1

**Type:** ERROR  
**Impact:** Logging

**ODL-52806: The stop tracing operation failed for provider ":0"; cause: \{1\}

*Cause:* The stop tracing operation cannot be completed because a trace provider is unable to complete the operation. See the error message for more information on the reason for the provider failure.

*Action:* See the error message for more information on the cause of the provider failure.

*Level:* 1

**Type:** ERROR  
**Impact:** Logging

**ODL-52807: Unable to create incident for trace with ID ":0"; cause: \{1\}

*Cause:* A trace was stopped but an incident could not be created for the trace data.

*Action:* See the error message for more information on the root cause of the incident creation failure.

*Level:* 1

**Type:** ERROR  
**Impact:** Logging

**ODL-52808: Invalid expression: \{0\}

*Cause:* An invalid expression was passed as a parameter to the startTracing operation.
Action: Review the list of active traces and disable some of the duplicate traces.

Level: 1
Type: ERROR
Impact: Logging

ODL-52809: Multiple active traces match the current request. The request is already being traced with ID "[0]" and it will not be traced with ID "[1]".
Cause: There are multiple active traces that can be started for the current request, but the request can only be associated with one trace. One or more traces will not be started.
Action: Review the expression and check for incorrect spelling or syntax. See the documentation for details on the expression syntax.

Level: 1
Type: WARNING
Impact: Logging

ODL-52810: A new trace cannot be started because there are too many traces currently active in the system.
Cause: A new trace cannot be started because there are too many traces currently active in the system. There are multiple active traces that can be started for the current request.
Action: Wait until some of the other traces are stopped before trying to start a new one. Contact your system administrator for more information.

Level: 1
Type: ERROR
Impact: Logging

ODL-52811: A new trace cannot be started or stopped for the current HTTP session because there is no current HTTP session.
Cause: A request to start or stop tracing the current HTTP session cannot be executed because there is no HTTP session associated with the current request.
Action: The HTTP session must be already active before tracing operations can be executed for the session.

Level: 1
Type: ERROR
Impact: Logging

ODL-52812: A new trace cannot be started for the current HTTP session because the session is already being traced.
Cause: A request to start tracing the current HTTP session cannot be executed because the session is already being traced.
Action: Stop the active trace before starting a new trace for the same session.

Level: 1
Type: ERROR
Impact: Logging
ODL-52813: A request to stop tracing an HTTP request cannot be executed because the request is not being traced.

Cause: A request to stop tracing an HTTP request cannot be executed because the request is not being traced.

Action: Check if the HTTP request is being traced before trying to stop tracing.

Level: 1

Type: ERROR

Impact: Logging

ODL-52814: Unable to send notification for start tracing event. Tracing will continue on the local server, but may not be enabled on other servers. Cause: {0}

Cause: A JMX notification for a start tracing event could not be sent due to an unexpected exception.

Action: See the error message for more information on the root cause.

Level: 1

Type: WARNING

Impact: Logging

ODL-52815: Unable to send notification for stop tracing event. Tracing is stopped on the local server, but may not be stopped on other servers. Cause: {0}

Cause: A JMX notification for a stop tracing event could not be sent due to an unexpected exception.

Action: See the error message for more information on the root cause.

Level: 1

Type: WARNING

Impact: Logging

ODL-52816: Unable to propagate a {0} event; cause: {0}

Cause: A selective tracing event originating from one server could not be propagated to other servers.

Action: See the error message for more information on the root cause.

   Action: Ensure the passphrase is specified in the password file
   Level: 1

OSB-74900: Error importing OSB resources
   Cause: [probable] The passphrase file specified is not same as the one specified during "copyConfig" operation
   Action: [probable] Specify the same passphrase as the one used during "copyConfig"
   Level: 1

OSB-74901: Error applying the OSB configuration plan (1): {0}
   Cause: The OSB configuration plan file ((1)) is not valid
   Action: Check the OSB configuration plan file, and apply it again using the OSB console
OSB-74902: Error getting the passphrase to export OSB resources
Cause: The value specified for the additionalParameter "[0]" is not a password file: [1]
Action: Contact Oracle Support Services

OSB-74903: Error getting the passphrase to import OSB resources
Cause: The value specified for the configProperty "[0]" is not a password file: [1]
Action: Specify a valid password file for configProperty "[0]", OR ensure that "[1]" is a password file, OR do not specify a value for this configProperty (in which case resources will be imported assuming no protection)

OSB-74904: Error encountered during determining if wsm-pm application is active or not: [0]
Cause: wsm-pm application may not be targeted to any server.
Action: Contact Oracle Support Services

OSB-74905: Error in starting managed server
Cause: This is due to: [0]
Action: Please fix the issue

OSB-74906: Error in stopping managed server
Cause: This is due to: [0]
Action: Please fix the issue

OSB-74907: Error encountered during determining the installation of wsm-pm application: [0]
Cause: wsm-pm application may not be installed.
Action: Contact Oracle Support Services

Level: 1
Type: ERROR
Impact: Other

OSB-75050: Missing parameter: parentClassLoader
Cause: The OSB OVAB Plugin has not been configured correctly.
Action: Ensure that all required parameters are configured.

Level: 1
Type: ERROR
Impact: Other

OSB-75051: Missing parameter: mwHome
Cause: The OSB OVAB Plugin has not been configured correctly.
Action: Ensure that all required parameters are configured.

Level: 1
Type: ERROR
Impact: Other

OSB-75052: Missing parameter: mbeanServerType
Cause: The OSB OVAB Plugin has not been configured correctly.
Action: Ensure that all required parameters are configured.

Level: 1
Type: ERROR
Impact: Other

OSB-75053: Missing parameter: username
Cause: The OSB OVAB Plugin has not been configured correctly.
Action: Ensure that all required parameters are configured.

Level: 1
Type: ERROR
Impact: Other

OSB-75054: Missing parameter: password
Cause: The OSB OVAB Plugin has not been configured correctly.
Action: Ensure that all required parameters are configured.

Level: 1
Type: ERROR
Impact: Other

OSB-75055: Missing parameter: inputName
Cause: The OSB OVAB Plugin has not been configured correctly.
Action: Ensure that all required parameters are configured.
Level: 1  
Type: ERROR  
Impact: Other  

OSB-75056: Missing parameter: address  
Cause: The OSB OVAB Plugin has not been configured correctly.  
Action: Ensure that all required parameters are configured.

Level: 1  
Type: ERROR  
Impact: Other  

OSB-75057: Missing parameter: protocol  
Cause: The OSB OVAB Plugin has not been configured correctly.  
Action: Ensure that all required parameters are configured.

Level: 1  
Type: ERROR  
Impact: Other  

OSB-75058: Missing parameter: port  
Cause: The OSB OVAB Plugin has not been configured correctly.  
Action: Ensure that all required parameters are configured.

Level: 1  
Type: ERROR  
Impact: Other  

OSB-75059: No channel supporting a JMX protocol found in appliance  
Cause: Unable to find a suitable channel supporting a JMX protocol.  
Action: Ensure that the appliance is configured with a suitable channel.

Level: 1  
Type: ERROR  
Impact: Other  

OSB-75060: MBeanServerConnection already closed  
Cause: Something has already closed the MBeanServerConnection. This should not happen.  
Action: Contact Oracle Support Services

Level: 1  
Type: ERROR  
Impact: Other  

OSB-75061: Importing of some (or all) OSB resources failed  
Cause: Importing of some (or all) OSB resources failed. The log file should contain more detail.  
Action: Check the log file for more details and correct the errors.
Level: 1
Type: ERROR
Impact: Other

**OSB-75062: Importing the configuration plan failed: {0}**

*Cause:* Importing the configuration plan failed. The error message will provide more details.

*Action:* Correct the error described.

Level: 1
Type: ERROR
Impact: Other

**OSB-380000: General runtime error: {0}**

*Cause:* A generic runtime error has occurred in OSB transport subsystem while processing the message. There should be a specific message that describes specific cause of the problem. This error typically occurs when an exception is thrown during the outbound call, but it can also be explicitly raised by the outbound transport implementation, in which case, it may have a customized message associated with it.

*Action:* If this is an unexpected error happening on a customized transport, check for unchecked exceptions in outbound call implementation. For other transports, check the documentation corresponding to this error code. Contact Oracle Support Services when this is an OSB runtime internal error.

Level: 1
Type: ERROR
Impact: Other

**OSB-380001: Application error: {0}**

*Cause:* An application error has occurred in OSB transport subsystem while processing the message. There should be a specific message that describes specific cause of the problem. Only transports that explicitly declare support for application errors can return such errors. This error is explicitly raised by the transport implementation and usually has a customized message associated with it. It is used by OSB to prevent unnecessary retries.

*Action:* Check in the transport documentation describing application errors.

Level: 1
Type: ERROR
Impact: Other

**OSB-380002: Connection error: {0}**

*Cause:* A connection error has occurred in OSB transport subsystem while processing the message. There should be a specific message that describes specific cause of the problem. This error is raised by the transport implementation and usually has a customized message associated with it. It is used by OSB to put a URI offline.

*Action:* Check in the transport documentation describing connection errors.

Level: 1
Type: ERROR
Impact: Other

OSB-380003: Exception on {0}, {1}
Cause: An unexpected runtime error has occurred in OSB transport subsystem while processing the message. There should be a specific message that describes specific cause of the problem
Action: Contact Oracle Support Services
Level: 1

OSB-380004: Version mismatch for service {0}
Cause: The processing of the response message has failed in OSB transport subsystem due to the fact that the configuration for the business service is in flux. This service is unable to send an outbound message until the configuration stabilizes.
Action: Wait until the configuration of OSB server stabilizes and retry sending the request.
Level: 1

OSB-380006: No transport provider registered with ID: {0}
Cause: There is no transport provider deployed on the OSB server for the specified ID
Action: Verify that the transport provider application for that specified ID was correctly deployed on the OSB server. If this happens during server start up, it is also possible that the transport is registered too late. If so, try lowering its deployment order.
Level: 1

OSB-380008: Provider with ID {0} does not support proxy service endpoints
Cause: The transport provider configuration does not support inbound endpoints, but somehow the configuration framework tried to create or update an inbound endpoint for that provider
Action: If this is a custom provider, verify that transport provider XML configuration is consistent with the generated endpoint configuration. Otherwise, contact Oracle Support Services
Level: 1

OSB-380009: Provider with ID {0} does not support business service endpoints
**Cause:** The transport provider configuration does not support outbound endpoints, but somehow the configuration framework tried to create or update an outbound endpoint for that provider

**Action:** If this is a custom provider, verify that the transport provider XML configuration is consistent with the generated endpoint configuration. Otherwise, contact Oracle Support Services

---

**OSB-380010: Invalid endpoint configuration: provider specific configuration is missing**

**Cause:** The provider for that endpoint declares a provider specific XML Schema Type but the endpoint configuration contains no provider specific configuration

**Action:** If this is a custom provider, verify that the provider specific definition is correctly set in the implementation. Otherwise, contact Oracle Support Services

---

**OSB-380011: Invalid endpoint configuration: provider specific configuration is not valid**

**Cause:** The endpoint configuration contains a provider specific configuration but the provider for that endpoint does not declare any provider specific XML Schema Type

**Action:** If this is a custom provider, check that its implementation returns the appropriate schema type corresponding to the provider specific configuration. Otherwise, contact Oracle Support Services

---

**OSB-380012: Proxy Service configuration requires exactly one URI**

**Cause:** Proxy Service configuration requires exactly one URI

**Action:** If this is a custom provider, verify the proxy service configuration is correctly initialized. Otherwise, contact Oracle Support Services

---

**OSB-380013: Business Service configuration requires at least one URI**

**Cause:** Business Service configuration requires at least one URI

**Action:** If this is a custom provider, verify the business service configuration is correctly initialized. Otherwise, contact Oracle Support Services
Impact: Configuration

OSB-380014: Invalid endpoint configuration: Provider with ID {0} does not declare application errors
Cause: The endpoint supports application errors but the provider for that endpoint does not
Action: If this is a custom provider, verify that transport provider XML configuration is consistent with the generated endpoint configuration. Otherwise, contact Oracle Support Services

Level: 1
Type: ERROR
Impact: Configuration

OSB-380015: Business Service do not support duplicate URIs. Service {0} found with duplicate URI {1}.
Cause: This error happens during configuration update: the URI of one of the updated Business Service is already used
Action: Delete Business Service or use a different URI

Level: 1
Type: ERROR
Impact: Configuration

OSB-380016: None of the URIs are online for Business service {0}
Cause: The Business service is configured to put URIs offline upon connection errors and there is no online URIs left to route messages sent to this service
Action: Check the service configuration and the server connections

Level: 1
Type: ERROR
Impact: Requests/Responses

OSB-380017: Transport configuration xml file is invalid: {0} : {1}
Cause: The transport provider configuration xml file is either syntactically or semantically incorrect. The message body should include the error description and the invalid XML snippet
Action: Correct the configuration

Level: 1
Type: ERROR
Impact: Configuration

OSB-380018: Configured service type is not supported by the transport ({0}).
Cause: The configured service type is not supported by the transport ({0}).
Action: If you are trying to import a config jar, your service definition is corrupted, or the current OSB version no longer support the binding defined in the config jar, re-create the service with the new supported binding. For any other reasons, contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Data

OSB-380019: Service transport configuration is in flux: (0).
Cause: The service transport configuration is in flux: (0).
Action: If you modified your service transport configuration, messages received after the change is committed will be processed normally. For any other reasons, contact Oracle Support Services.
Level: 1
Type: ERROR
Impact: Configuration

OSB-380020: Service (0) has been disabled.
Cause: The service (0) has been disabled.
Action: Enable the service, messages received after the change is committed will be processed normally. For any other reasons, contact Oracle Support Services.
Level: 1
Type: ERROR
Impact: Configuration

OSB-380103: An unexpected throttling error occurred while processing message sent to business service (0): (1)
Cause: An internal error occurred in the throttling sub-system. The message body should include the throttled service on which the error occurred and the message describing the problem: this error can be due to a transactional error, interrupted thread exception, timeout or an invalid runtime state
Action: If this is due to an invalid runtime state, contact Oracle Support Services
Level: 1
Type: ERROR
Impact: Requests/Responses

OSB-380500: Exception in (0), (1)
Cause: An unexpected exception has occurred in OSB Transport subsystem. There should be an error message that points to cause of the problem
Action: Contact Oracle Support Services
Level: 1
Type: ERROR
Impact: Other

OSB-380501: Target not found: (0)
Cause: An unexpected error has occured while deploying or un-deploying a WLS artifact for the specified service. The deployment target (0) is not in the known list of available targets for OSB domain.
Action: Contact Oracle Support Services
Level: 1
Type: ERROR
Impact: Deployment
OSB-381001: Error encountered while creating the endpoint {0}: {1}
  Cause: An unexpected exception occurred in OSB Email transport while creating the endpoint. There should be an error message that points to the cause of the problem.
  Action: Check that the endpoint configuration is formed properly.
  Level: 1
  Type: ERROR
  Impact: Deployment

OSB-381002: Unable to find file path {0} for the service endpoint {1}. Current Process may not have access to this file or the file doesn't exist: {2}
  Cause: Unable to find the intermediary file path while processing the message. This error may not be fatal and can appear even if the message is successfully processed once. This typically happens if the server is restarted while processing Email transport messages.
  Action: Make sure that current user has read, write permission for the given file path location.
  Level: 1
  Type: ERROR
  Impact: Files

OSB-381003: Initialization Error.
  Cause: An unexpected exception occurred while initializing the Email Transport Provider.
  Action: Contact technical support.
  Level: 1
  Type: ERROR
  Impact: Deployment

OSB-381004: Error while parsing or reading the service configuration.
  Cause: Service configuration may have been corrupted.
  Action: Check that the endpoint configuration is formed properly.
  Level: 1
  Type: ERROR
  Impact: Configuration

OSB-381005: Could not create or find the file with the path {0} while saving email attachments at location {1}
  Cause: File could not be created at this location. current user may not have read, write permission at the given file path location.
  Action: Make sure that current user has read, write permission for the given file path location. Please check that file location is valid.
  Level: 1
  Type: ERROR
  Impact: Files
OSB-381006: Error encountered while saving the Email attachments for the email Part with file name {0} at location {1}: {2}
Cause: Email attachments could not be saved due to an unexpected error. There should be an error message that points to the cause of the problem.
Action: Error message may point to the cause of the problem.
Level: 1
Type: ERROR
Impact: Files

OSB-381007: In address {0}, the port is not a number.
Cause: Port is not a positive integer.
Action: Make sure that port is an integer greater than 0.
Level: 1
Type: ERROR
Impact: Configuration

OSB-381008: Error encountered while creating Internet email address from address, personal name and header encoding as {0}, {1} and {2} respectively: {3}
Cause: An unexpected exception has occurred in Email service endpoint while creating the address. There should be an error message that points to the cause of the problem.
Action: Error message may point to the cause of the problem.
Level: 1
Type: ERROR
Impact: Configuration

OSB-381009: Error encountered while creating Internet email address from address and header encoding as {0} and {1} respectively: {2}
Cause: An unexpected exception has occurred in Email service endpoint while creating the address. There should be an error message that points to the cause of the problem.
Action: Error message may point to the cause of the problem.
Level: 1
Type: ERROR
Impact: Configuration

OSB-381010: Could not connect to remote Email server {0} for the service endpoint {1}
Cause: Email proxy service could not connect to the remote email server. Server address may be incorrect or server may be down currently.
Action: Make sure that the service endpoint URI points to the correct Email server address.
Level: 1
Type: ERROR
Impact: Requests/Responses
OSB-381011: Error occurred for the service endpoint {0}: {1}

Cause: An unexpected general purpose exception has occurred in OSB Email transport. There should be an error message that points to cause of the problem.

Action: Contact Oracle Support Services

Level: 1
Type: ERROR
Impact: Other

OSB-381012: Could not delete temporary file {0} for Email Proxy Service: {1}

Cause: File could not be deleted from this location. Current user may not have read, write permission at the given file path location.

Action: Make sure that current user has read, write permission for the given file path location. Please check that file location is valid.

Level: 1
Type: ERROR
Impact: Files

OSB-381013: Error encountered while processing the Inbox messages for Email Proxy Service {0}: {1}

Cause: Error encountered while processing the message after the pipeline is invoked. Post processing may involve moving the message to a different folder or archiving the file.

Action: There should be an error message that points to the cause of the problem.

Level: 1
Type: ERROR
Impact: Requests/Responses

OSB-381014: URI {0} for this proxy service is already used by another proxy service: {1} with same service account.

Cause: An error had occurred while registering a new Email proxy service: The URI configured for this proxy service is already used by another Email proxy service. Each Email proxy service has to have a unique URI if the service account is same.

Action: Check the transport configuration for Email proxy service and make sure that combination of URI and the service account is unique.

Level: 1
Type: ERROR
Impact: Configuration

OSB-381015: Error while parsing or reading the Email Endpoint configuration.

Cause: Endpoint configuration may have been corrupted.

Action: Check that the endpoint configuration is formed properly.

Level: 1
Type: ERROR
Impact: Configuration
OSB-381016: Exception cause {0}: {1}

Cause: An unexpected exception occurred.
Action: Contact Oracle Support Services. There should be an error message that points to the cause of the problem.

Level: 1
Type: ERROR
Impact: Other

OSB-381017: Invalid pass by reference is set, it can only be true when the message type is of type XML.
Cause: Pass by reference is configured with non-xml message type Email proxy service.
Action: If Pass by reference is true, Email proxy service should be configured with xml message types.

Level: 1
Type: ERROR
Impact: Configuration

OSB-381018: Given service account {0} is not of static type. Only static service accounts are supported with Email proxy and business services.
Cause: Service account is not of static type.
Action: Make sure that the service account configured in Email proxy or business service is a static service account.

Level: 1
Type: ERROR
Impact: Configuration

OSB-381019: Service account does not exist.
Cause: Service account does not exist.
Action: Make sure that service account with the configured name exists in the OSB project.

Level: 1
Type: ERROR
Impact: Configuration

OSB-381020: Exception encountered while upgrade. There should be an error message that points to the cause of the problem.
Cause: There should be an error message that points to the cause of the problem.
Action: Contact Oracle Support Services

Level: 1
Type: ERROR
Impact: Deployment

OSB-381021: Invalid read limit {0}, it should be greater than or equal to zero.
Cause: Read limit is the number of email messages polled by the Email proxy service in a polling cycle. It should always be greater than or equal to zero.
**Action:** Make sure that read limit is greater than or equal to zero.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**OSB-381022: Invalid polling interval \(0\), it should be greater than zero.**  
**Cause:** Email Server is polled for new email messages by the Email proxy service after every poll interval. It should be greater than zero.  
**Action:** Make sure that the polling interval is greater than zero.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**OSB-381023: Invalid mail protocol \(0\)**  
**Cause:** Mail protocols supported by Email proxy service are POP3 and IMAP.  
**Action:** Make sure that mail protocol is either POP3 or IMAP.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**OSB-381024: Folder name is missing for the service configured with IMAP and post read action as Move.**  
**Cause:** Folder name is missing for the service configured with IMAP and post read action as Move.  
**Action:** Make sure that folder name is specified in case Email proxy service is configured with IMAP transfer protocol and the post read action as Move.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**OSB-381025: Download directory is missing.**  
**Cause:** Download directory is a required configuration parameter. Email messages are first staged in the download directory before invoking the pipeline.  
**Action:** Make sure that download directory is specified.

**Level:** 1  
**Type:** ERROR  
**Impact:** Configuration

**OSB-381026: Error directory is missing.**  
**Cause:** Error directory is a required configuration parameter. Email messages are moved to this directory in case of processing errors.  
**Action:** Make sure that error directory is specified.

**Level:** 1  
**Type:** ERROR
Impact: Configuration

OSB-381027: Archive directory is missing.
  Cause: Archive directory is required in case pass by reference or pass attachments 
  by reference is true.
  Action: Make sure that archive directory is specified.
  Level: 1
  Type: ERROR
  Impact: Configuration

OSB-381028: Invalid PostRead option: {0}
  Cause: Invalid post read option.
  Action: Contact Oracle Support Services
  Level: 1
  Type: ERROR
  Impact: Configuration

OSB-381029: Given encoding is invalid: {0}
  Cause: Encoding name is incorrect or the particular encoding is not supported by 
  the Java virtual machine.
  Action: Make sure that the Email proxy service is configured with supported 
  encoding.
  Level: 1
  Type: ERROR
  Impact: Configuration

OSB-381030: Neither SMTP resource nor mail session configured.
  Cause: Either SMTP resource or mail session should be configured for the Email 
  business service. It must be provided either in transport configuration or as the uri 
  parameter.
  Action: Contact Oracle Support Services
  Level: 1
  Type: ERROR
  Impact: Configuration

OSB-381031: Connection timeout can not be negative: {0}.
  Cause: Connection timeout is negative.
  Action: Make sure that connection timeout is greater than or equal to zero.
  Level: 1
  Type: ERROR
  Impact: Configuration

OSB-381032: Reply to address can not be empty if reply to name is specified.
  Cause: Reply to address is empty though reply to name is specified.
  Action: Make sure that both Reply To Name and Reply to Address fields are 
  defined.
OSB-381033: From address can not be empty if from name is specified.
  Cause: From address is empty though from name is specified.
  Action: Make sure that both From Address and From Name fields are defined.

OSB-381034: URI {0} is not valid.
  Cause: URI is not formed properly.
  Action: Make sure that the URI follows the correct syntax.

OSB-381035: Mail session with the jndi name {0} does not exist in the weblogic server instance.
  Cause: Service should be configured with the mail session which exists in the weblogic server instance.
  Action: Make sure that the mail session exists in the weblogic server instance.

OSB-381036: SMTP Ref {0} does not exist.
  Cause: SMTP Ref mentioned in URI does exist in OSB
  Action: Create the mentioned SMTP ref in OSB

OSB-381037: Both Mail session and SMTP server cannot be configured
  Cause: Either mail session or smtp server may be configured.
  Action: Remove either or mail session or smtp server from the configuration

OSB-381038: Invalid parameter in uri : {0}
  Cause: Invalid parameter in the URI. Only mail session and SMTP are valid parameters.
  Action: Provide the correct parameter in the uri.
Level: 1
Type: ERROR
Impact: Configuration

OSB-381039: Error while initializing the SSL: \{0\}
Cause: Error while initializing the SSL
Action: There should be an error message that points to the cause of the problem.

Level: 1
Type: ERROR
Impact: Security

OSB-381040: Destination URI does not exist in resource \{0\}
Cause: Destination URI does not exist.
Action: Destination URI does not exist in the target resource.

Level: 1
Type: ERROR
Impact: Configuration

OSB-381041: Socket I/O timeout can not be negative: \{0\}.
Cause: Socket I/O timeout is negative.
Action: Make sure that Socket I/O timeout is greater than or equal to zero.

Level: 1
Type: ERROR
Impact: Configuration

OSB-381042: Email Server connection failed with SSL enabled: \{0\} Trying to connect using TLS
Cause: Either Email Server doesn’t support SSL or it may down
Action: Make sure that Email Server Support SSL and it is running

Level: 1
Type: ERROR
Impact: Security

OSB-381043: Failed to establish a TLS Connection: \{0\} This may be because of trust certificate was not found. Please refer to the documentation for a list of valid locations to store the trust certification
Cause: Either Email Server doesn’t support TLS or it may down
Action: Make sure that Email Server Support TLS and it is running

Level: 1
Type: ERROR
Impact: Security

OSB-381044: Read timeout can not be negative: \{0\}
Cause: Read timeout is negative
Action: Make sure that read connection timeout is greater than or equal to zero
Level: 1
Type: ERROR
Impact: Configuration

**OSB-381101: Error encountered while creating the endpoint \{0\}: \{1\}**

**Cause:** An unexpected exception has occurred in OSB FTP transport while creating the endpoint. There should be an error message that points to the cause of the problem.

**Action:** Check that the endpoint configuration is formed properly.

Level: 1
Type: ERROR
Impact: Deployment

**OSB-381102: Service Account Reference is missing in the FTP service configuration.**

**Cause:** Service Account Reference is missing in the FTP service configuration.

**Action:** Make sure that service account is specified in the FTP service configuration.

Level: 1
Type: ERROR
Impact: Configuration

**OSB-381103: Invalid polling interval \{0\}, it should be greater than zero.**

**Cause:** FTP Server is polled for new files by the Ftp proxy service after every poll interval. It should be greater than zero.

**Action:** Make sure that the polling interval is greater than zero.

Level: 1
Type: ERROR
Impact: Configuration

**OSB-381104: Error while parsing or reading the Ftp Endpoint configuration.**

**Cause:** Error while parsing or reading the Ftp Endpoint configuration.

**Action:** Check that the endpoint configuration is formed properly.

Level: 1
Type: ERROR
Impact: Configuration

**OSB-381105: Error occurred for the service endpoint: \{0\}**

**Cause:** An unexpected general purpose exception has occurred in OSB Ftp transport. There should be an error message that points to the cause of the problem.

**Action:** Contact Oracle Support Services.

Level: 1
Type: ERROR
Impact: Other

**OSB-381106: Unable to get file \{0\} on attempt number \{1\}: \{2\}**
**Cause:** Could not retrieve the file.
**Action:** Contact Oracle Support Services
**Level:** 1
**Type:** ERROR
**Impact:** Files

**OSB-381107: Credential not found for alias {0}: {1}**
**Cause:** Credentials could not be retrieved.
**Action:** Make sure that the credentials with the given name exists in the OSB domain.
**Level:** 1
**Type:** ERROR
**Impact:** Configuration

**OSB-381109: File: {0} was read from the remote FTP server: {1} but could not be deleted after processing.**
**Cause:** File read through FTP proxy service could not be deleted. Current user may not have read, write permission.
**Action:** Make sure that Ftp proxy service has exclusive access to the remote file. Also the current user should have read, write permission.
**Level:** 1
**Type:** ERROR
**Impact:** Files

**OSB-381111: URI Syntax error for the path {0}: {1}**
**Cause:** URI is not formed properly.
**Action:** Make sure that the URI follows the correct syntax.
**Level:** 1
**Type:** ERROR
**Impact:** Configuration

**OSB-381112: Unable to rename file {1} on the remote host {0} for the service endpoint {2}**
**Cause:** Remote FTP file could not be renamed. Current user may not have read, write permission.
**Action:** Make sure that Ftp proxy service has exclusive access to the remote file. Also the current user should have read, write permission.
**Level:** 1
**Type:** ERROR
**Impact:** Files

**OSB-381114: File {1} could not be renamed to {2} on the remote host {0} for the service endpoint {3}: {4}**
**Cause:** Exception encountered while executing renaming the file on the remote FTP server.
**Action:** Make sure that Ftp proxy service has exclusive access to the remote file. Also the current user should have read, write permission.

**Level:** 1
**Type:** ERROR
**Impact:** Files

**OSB-381115:** File {1} could not be deleted on the remote host {0} for the Ftp proxy service {2}
**Cause:** Exception encountered while deleting the file on the remote FTP server.
**Action:** Make sure that Ftp proxy service has exclusive access to the remote file. Also the current user should have read, write permission.

**Level:** 1
**Type:** ERROR
**Impact:** Files

**OSB-381116:** URI {0} for this proxy service is already used by another proxy service: {1} with same file mask.
**Cause:** An error had occured while registering a new Ftp proxy service: The URI configured for this proxy service is already used by another Ftp proxy service. Each Ftp proxy service has to have a unique URI if the file mask is same.
**Action:** Check the transport configuration for Ftp proxy service and make sure that the combination of URI and the file mask is unique.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

**OSB-381117:** Exception in {0}: {1}
**Cause:** Exception encountered while executing this method. There should be an error message that points to the cause of the problem.
**Action:** Error message may point to the cause of the problem.

**Level:** 1
**Type:** ERROR
**Impact:** Other

**OSB-381118:** Invalid pass by reference is set, it can only be true when the message type is of type XML.
**Cause:** Pass by reference is configured with non-xml message type Ftp proxy service.
**Action:** If Pass by reference is true, Ftp proxy service should be configured with xml message types.

**Level:** 1
**Type:** ERROR
**Impact:** Configuration

**OSB-381119:** Given service account {0} is not of static type. Only static service accounts are supported with FTP proxy and business services.
Cause: Configured service account is not of static type.
Action: Make sure that the service account configured in FTP proxy or business service is a static service account.

Level: 1
Type: ERROR
Impact: Configuration

**OSB-381120: Service account \{0\} does not exist.**
Cause: Configured service account does not exist.
Action: Make sure that service account with the configured name exists in the OSB project.

Level: 1
Type: ERROR
Impact: Configuration

**OSB-381121: Given encoding \{0\} is invalid**
Cause: Encoding name is incorrect or the particular encoding is not supported by the Java virtual machine.
Action: Make sure that the Ftp proxy service is configured with supported encoding.

Level: 1
Type: ERROR
Impact: Configuration

**OSB-381122: Retry count \{0\} should be greater than zero.**
Cause: At the time of polling the FTP server for new files, FTP connection failures are tried for the number of times as specified by retry Count. It should be greater than zero.
Action: Make sure that retry count is greater than zero.

Level: 1
Type: ERROR
Impact: Configuration
