

Oracle® Fusion Middleware

RESTful Edit Reference for Oracle WebLogic Server

12c (12.2.1.3.0)

E80384-01

August 2017

This reference describes the RESTful edit resources that are used to manage WebLogic Server.

Copyright © 2015, 2017, Oracle and/or its affiliates. All rights reserved.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

This preface describes the document accessibility features and conventions used in this guide, *RESTful Edit Reference for Oracle WebLogic Server*.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Resources

This documentation describes the Oracle WebLogic Server RESTful edit resources that are used to view and modify the domain configuration.

For a complete listing of the WLS REST reference documents and descriptions of their use, see *Administering Oracle WebLogic Server with RESTful Management Services*.

/management/weblogic

This resource is used to access the different versions of the resources in this domain.

The latest version is 12.2.1.3.0. The other versions, which are deprecated, are 12.2.1.0.0, 12.2.1.1.0, 12.2.1.2.0.

For future releases, `latest` always refers to the most recent release.

All new and non-deprecated MBean features are available in all versions. Any MBean features that were deprecated in a version will not be available in that version or later versions, but will still be available using earlier versions.

To always use the latest resources, use `latest` in the URLs. Note that this might require updating a client when moving to a newer version of WebLogic Server. To fix the version so that an update is not required, use `12.2.1.3.0` in the URLs.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.rest.bean.model.Version](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.rest.bean.model.Version](#) entities.

This method can return the following links:

- **uri=/management/weblogic rel=canonical**
This resource.
- **uri=/management/weblogic/12.2.1.3.0 rel=current**
Access the latest version of the WLS resources in the this domain.
- **uri=/management/weblogic rel=self**
This resource.

Example

Example 1 View the versions collection.

This example uses the GET method to display the version instances in this collection.

Example Request

```
curl -v \  
--user admin:admin123 \  
-H X-Requested-By:MyClient \  
-H Accept:application/json \  
-X GET http://localhost:7001/management/weblogic
```

Example Response

```
HTTP/1.1 200 OK
```

Response Body:

```
{  
  "links": [  
    {  
      "rel": "self",  
      "href": "http://localhost:7001/management/weblogic"

  }  
  ]  
}
```

/management/weblogic/{version}

This resource describes the resource trees that are used to manage a WebLogic Server domain and its managed servers. The resource trees mimic the bean trees in WLST and allow you to view and edit configuration and monitor runtime behavior.

The resource supports the following methods:

- [GET](#)

GET

Get this [weblogic.management.rest.bean.model.Version](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.rest.bean.model.Version](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/currentUser](#) **rel**=currentUser
- **uri**=[/management/weblogic/{version}/domainConfig](#) **rel**=domainConfig
- **uri**=[/management/weblogic/{version}/domainRuntime](#) **rel**=domainRuntime
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=edit
- **uri**=[/management/weblogic](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}](#) **rel**=self
This resource.
- **uri**=[/management/weblogic/{version}/serverConfig](#) **rel**=serverConfig
- **uri**=[/management/weblogic/{version}/serverRuntime](#) **rel**=serverRuntime

Example

Example 1 View the latest version.

This example uses the GET method to display the latest version.

Example Request

```
curl -v \
--user admin:admin123 \
-H X-Requested-By:MyClient \
-H Accept:application/json \
-X GET http://localhost:7001/management/weblogic/latest
```

Example Response

HTTP/1.1 200 OK

Response Body:

```
{
  "links": [
    {
      "rel": "parent",
      "href": "http://localhost:7001/management/weblogic"

    }
],
"version": "12.2.1.3.0",
"isLatest": true,
"lifecycle": "active"
}

```

Example 2 View a specific version.

This example uses the GET method to display a specific version.

Example Request

```

curl -v \
--user admin:admin123 \
-H X-Requested-By:MyClient \
-H Accept:application/json \
-X GET http://localhost:7001/management/weblogic/12.2.1.3.0

```

Example Response

HTTP/1.1 200 OK

Response Body:

```

{
  "links": [

```

```
{
  "rel": "parent",
  "href": "http://localhost:7001/management/weblogic"
},
{
  "rel": "self",
  "href": "http://localhost:7001/management/weblogic/12.2.1.3.0"

"version": "12.2.1.3.0",
"isLatest": true,
"lifecycle": "active"
}
```

/management/weblogic/{version}/currentUser

This resource represents an authenticated user in the domain.

The resource supports the following methods:

- [GET](#)

GET

Get this [weblogic.management.rest.bean.model.CurrentUser](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.rest.bean.model.CurrentUser](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/currentUser](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/currentUser](#) **rel**=self
This resource.

Example

Example 1 Viewing the [weblogic.management.rest.bean.model.CurrentUser](#) Instance

This example uses the GET method to view this [weblogic.management.rest.bean.model.CurrentUser](#) instance.

Example Request

```
curl -v \  
--user admin:admin123 \  
-H X-Requested-By:MyClient \  
-H Accept:application/json \  
-X GET http://localhost:7001/management/weblogic/latest/currentUser
```

Example Response

```
HTTP/1.1 200 OK
```

```
Response Body:
```

```
{  
  "links": [  
    {  
      "rel": "parent",  
      "href": "http://localhost:7001/management/weblogic/latest"  
    },  
    {  
      "rel": "self",  
      "href":  
"http://localhost:7001/management/weblogic/latest/currentUser"  
    },  
    {  
      "rel": "canonical",  
      "href":  
"http://localhost:7001/management/weblogic/latest/currentUser"
```

```
    }  
  ],  
  "partitionId": "0",  
  "partitionName": "DOMAIN",  
  "user": "admin"  
}
```

/management/weblogic/{version}/edit

This resource is used to edit the WebLogic Server configuration.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.DomainMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.DomainMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JDBCStoreCreateForm](#)
rel=JDBCStoreCreateForm
The create form resource for this resource's JDBCStores collection resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCStores](#) **rel**=JDBCStores
This resource's JDBCStores collection resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResourceCreateForm](#)
rel=JDBCSystemResourceCreateForm
The create form resource for this resource's JDBCSystemResources collection resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResources](#)
rel=JDBCSystemResources
This resource's JDBCSystemResources collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSBridgeDestinationCreateForm](#)
rel=JMSBridgeDestinationCreateForm
The create form resource for this resource's JMSBridgeDestinations collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSBridgeDestinations](#)
rel=JMSBridgeDestinations
This resource's JMSBridgeDestinations collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModuleCreateForm](#)
rel=JMSInteropModuleCreateForm
The create form resource for this resource's JMSInteropModules collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules](#)
rel=JMSInteropModules
This resource's JMSInteropModules collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSServerCreateForm](#)
rel=JMSServerCreateForm
The create form resource for this resource's JMSServers collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSServers](#) **rel**=JMSServers
This resource's JMSServers collection resource.

- **uri=/management/weblogic/{version}/edit/JMSSystemResourceCreateForm**
rel=JMSSystemResourceCreateForm
The create form resource for this resource's JMSSystemResources collection resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources**

This resource's JMSSystemResources collection resource.
- **uri=/management/weblogic/{version}/edit/JMX** **rel=JMX**
This resource's JMX singleton resource.
- **uri=/management/weblogic/{version}/edit/JPA** **rel=JPA**
This resource's JPA singleton resource.
- **uri=/management/weblogic/{version}/edit/JTA** **rel=JTA**
This resource's JTA singleton resource.
- **uri=/management/weblogic/{version}/edit/SAFAgentCreateForm**
rel=SAFAgentCreateForm
The create form resource for this resource's SAFAgents collection resource.
- **uri=/management/weblogic/{version}/edit/SAFAgents** **rel=SAFAgents**
This resource's SAFAgents collection resource.
- **uri=/management/weblogic/{version}/edit/SNMPAgent** **rel=SNMPAgent**
This resource's SNMPAgent singleton resource.
- **uri=/management/weblogic/{version}/edit/SNMPAgentDeploymentCreateForm**
rel=SNMPAgentDeploymentCreateForm
The create form resource for this resource's SNMPAgentDeployments collection resource.
- **uri=/management/weblogic/{version}/edit/SNMPAgentDeployments**
rel=SNMPAgentDeployments
This resource's SNMPAgentDeployments collection resource.
- **uri=/management/weblogic/{version}/edit/WLDFSystemResourceCreateForm**
rel=WLDFSystemResourceCreateForm
The create form resource for this resource's WLDFSystemResources collection resource.
- **uri=/management/weblogic/{version}/edit/WLDFSystemResources**
rel=WLDFSystemResources
This resource's WLDFSystemResources collection resource.
- **uri=/management/weblogic/{version}/edit/WSReliableDeliveryPolicies**
rel=WSReliableDeliveryPolicies
This resource's WSReliableDeliveryPolicies collection resource.
- **uri=/management/weblogic/{version}/edit/WSReliableDeliveryPolicyCreateForm**
rel=WSReliableDeliveryPolicyCreateForm
The create form resource for this resource's WSReliableDeliveryPolicies collection resource.

- **uri**=[/management/weblogic/{version}/edit/WTCServerCreateForm](#)
rel=WTCServerCreateForm
The create form resource for this resource's WTCServers collection resource.
- **uri**=[/management/weblogic/{version}/edit/WTCServers](#) **rel**=WTCServers
This resource's WTCServers collection resource.
- **uri**=[/management/weblogic/{version}/edit/XMLEntityCacheCreateForm](#)
rel=XMLEntityCacheCreateForm
The create form resource for this resource's XMLEntityCaches collection resource.
- **uri**=[/management/weblogic/{version}/edit/XMLEntityCaches](#)
rel=XMLEntityCaches
This resource's XMLEntityCaches collection resource.
- **uri**=[/management/weblogic/{version}/edit/XMLRegistries](#) **rel**=XMLRegistries
This resource's XMLRegistries collection resource.
- **uri**=[/management/weblogic/{version}/edit/XMLRegistryCreateForm](#)
rel=XMLRegistryCreateForm
The create form resource for this resource's XMLRegistries collection resource.
- **uri**=[/management/weblogic/{version}/edit/arePartitionsPresent](#) **rel**=action
title=arePartitionsPresent
This resource's arePartitionsPresent action resource.
- **uri**=[/management/weblogic/{version}/edit/findConfigBeansWithTags](#)
rel=action **title**=findConfigBeansWithTags
This resource's findConfigBeansWithTags action resource.
- **uri**=[/management/weblogic/{version}/edit/findPartitionByID](#) **rel**=action
title=findPartitionByID
This resource's findPartitionByID action resource.
- **uri**=[/management/weblogic/{version}/edit/listTags](#) **rel**=action **title**=listTags
This resource's listTags action resource.
- **uri**=[/management/weblogic/{version}/edit/lookupSystemResource](#) **rel**=action
title=lookupSystemResource
This resource's lookupSystemResource action resource.
- **uri**=[/management/weblogic/{version}/edit/lookupTarget](#) **rel**=action
title=lookupTarget
This resource's lookupTarget action resource.
- **uri**=[/management/weblogic/{version}/edit/adminConsole](#) **rel**=adminConsole
This resource's adminConsole singleton resource.
- **uri**=[/management/weblogic/{version}/edit/appDeployments](#)
rel=appDeployments
This resource's appDeployments collection resource.
- **uri**=[/management/weblogic/{version}/edit/batchConfig](#) **rel**=batchConfig
This resource's batchConfig singleton resource.

- **uri=/management/weblogic/{version}/edit rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/cdiContainer rel=cdiContainer**
This resource's cdiContainer singleton resource.
- **uri=/management/weblogic/{version}/edit/changeManager rel=changeManager**
This resource's changeManager resource.
- **uri=/management/weblogic/{version}/edit/clustercreateForm rel=clustercreateForm**
The create form resource for this resource's clusters collection resource.
- **uri=/management/weblogic/{version}/edit/clusters rel=clusters**
This resource's clusters collection resource.
- **uri=/management/weblogic/{version}/edit/coherenceClusterSystemResourceCreateForm rel=coherenceClusterSystemResourceCreateForm**
The create form resource for this resource's coherenceClusterSystemResources collection resource.
- **uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources rel=coherenceClusterSystemResources**
This resource's coherenceClusterSystemResources collection resource.
- **uri=/management/weblogic/{version}/edit/coherenceManagementClustercreateForm rel=coherenceManagementClustercreateForm**
The create form resource for this resource's coherenceManagementClusters collection resource.
- **uri=/management/weblogic/{version}/edit/coherenceManagementClusters rel=coherenceManagementClusters**
This resource's coherenceManagementClusters collection resource.
- **uri=/management/weblogic/{version}/edit/coherenceServercreateForm rel=coherenceServercreateForm**
The create form resource for this resource's coherenceServers collection resource.
- **uri=/management/weblogic/{version}/edit/coherenceServers rel=coherenceServers**
This resource's coherenceServers collection resource.
- **uri=/management/weblogic/{version}/edit/configurationProperties rel=configurationProperties**
This resource's configurationProperties collection resource.
- **uri=/management/weblogic/{version}/edit/configurationPropertycreateForm rel=configurationPropertycreateForm**
The create form resource for this resource's configurationProperties collection resource.
- **uri=/management/weblogic/{version}/edit/customResourcecreateForm rel=customResourcecreateForm**
The create form resource for this resource's customResources collection resource.

- **uri**=/management/weblogic/{version}/edit/customResources
rel=customResources
This resource's customResources collection resource.
- **uri**=/management/weblogic/{version}/edit/debugPatches **rel**=debugPatches
This resource's debugPatches singleton resource.
- **uri**=/management/weblogic/{version}/edit/deploymentConfiguration
rel=deploymentConfiguration
This resource's deploymentConfiguration singleton resource.
- **uri**=/management/weblogic/{version}/edit/embeddedLDAP
rel=embeddedLDAP
This resource's embeddedLDAP singleton resource.
- **uri**=/management/weblogic/{version}/edit/fileStoreCreateForm
rel=fileStoreCreateForm
The create form resource for this resource's fileStores collection resource.
- **uri**=/management/weblogic/{version}/edit/fileStores **rel**=fileStores
This resource's fileStores collection resource.
- **uri**=/management/weblogic/{version}/edit/foreignJNDIProviderCreateForm
rel=foreignJNDIProviderCreateForm
The create form resource for this resource's foreignJNDIProviders collection resource.
- **uri**=/management/weblogic/{version}/edit/foreignJNDIProviders
rel=foreignJNDIProviders
This resource's foreignJNDIProviders collection resource.
- **uri**=/management/weblogic/{version}/edit/interceptors **rel**=interceptors
This resource's interceptors singleton resource.
- **uri**=/management/weblogic/{version}/edit/internalAppDeployments
rel=internalAppDeployments
This resource's internalAppDeployments collection resource.
- **uri**=/management/weblogic/{version}/edit/internalLibraries
rel=internalLibraries
This resource's internalLibraries collection resource.
- **uri**=/management/weblogic/{version}/edit/joltConnectionPoolCreateForm
rel=joltConnectionPoolCreateForm
The create form resource for this resource's joltConnectionPools collection resource.
- **uri**=/management/weblogic/{version}/edit/joltConnectionPools
rel=joltConnectionPools
This resource's joltConnectionPools collection resource.
- **uri**=/management/weblogic/{version}/edit/libraries **rel**=libraries
This resource's libraries collection resource.

- **uri**=/management/weblogic/{version}/edit/lifecycleManagerConfig
rel=lifecycleManagerConfig

This resource's lifecycleManagerConfig singleton resource.
- **uri**=/management/weblogic/{version}/edit/log **rel**=log

This resource's log singleton resource.
- **uri**=/management/weblogic/{version}/edit/logFilterCreateForm
rel=logFilterCreateForm

The create form resource for this resource's logFilters collection resource.
- **uri**=/management/weblogic/{version}/edit/logFilters **rel**=logFilters

This resource's logFilters collection resource.
- **uri**=/management/weblogic/{version}/edit/machineCreateForm
rel=machineCreateForm

The create form resource for this resource's machines collection resource.
- **uri**=/management/weblogic/{version}/edit/machines **rel**=machines

This resource's machines collection resource.
- **uri**=/management/weblogic/{version}/edit/mailSessionCreateForm
rel=mailSessionCreateForm

The create form resource for this resource's mailSessions collection resource.
- **uri**=/management/weblogic/{version}/edit/mailSessions **rel**=mailSessions

This resource's mailSessions collection resource.
- **uri**=/management/weblogic/{version}/edit/managedExecutorServiceCreateForm
rel=managedExecutorServiceCreateForm

The create form resource for this resource's managedExecutorServices collection resource.
- **uri**=/management/weblogic/{version}/edit/managedExecutorServiceTemplateCreateForm **rel**=managedExecutorServiceTemplateCreateForm

The create form resource for this resource's managedExecutorServiceTemplates collection resource.
- **uri**=/management/weblogic/{version}/edit/managedExecutorServiceTemplates
rel=managedExecutorServiceTemplates

This resource's managedExecutorServiceTemplates collection resource.
- **uri**=/management/weblogic/{version}/edit/managedExecutorServices
rel=managedExecutorServices

This resource's managedExecutorServices collection resource.
- **uri**=/management/weblogic/{version}/edit/managedScheduledExecutorServiceCreateForm **rel**=managedScheduledExecutorServiceCreateForm

The create form resource for this resource's managedScheduledExecutorServices collection resource.
- **uri**=/management/weblogic/{version}/edit/managedScheduledExecutorServiceTemplateCreateForm **rel**=managedScheduledExecutorServiceTemplateCreateForm

The create form resource for this resource's managedScheduledExecutorServiceTemplates collection resource.

- **uri**=/management/weblogic/{version}/edit/managedScheduledExecutorServiceTemplates **rel**=managedScheduledExecutorServiceTemplates
This resource's managedScheduledExecutorServiceTemplates collection resource.
- **uri**=/management/weblogic/{version}/edit/managedScheduledExecutorServices **rel**=managedScheduledExecutorServices
This resource's managedScheduledExecutorServices collection resource.
- **uri**=/management/weblogic/{version}/edit/managedThreadFactories **rel**=managedThreadFactories
This resource's managedThreadFactories collection resource.
- **uri**=/management/weblogic/{version}/edit/managedThreadFactoryCreateForm **rel**=managedThreadFactoryCreateForm
The create form resource for this resource's managedThreadFactories collection resource.
- **uri**=/management/weblogic/{version}/edit/managedThreadFactoryTemplateCreateForm **rel**=managedThreadFactoryTemplateCreateForm
The create form resource for this resource's managedThreadFactoryTemplates collection resource.
- **uri**=/management/weblogic/{version}/edit/managedThreadFactoryTemplates **rel**=managedThreadFactoryTemplates
This resource's managedThreadFactoryTemplates collection resource.
- **uri**=/management/weblogic/{version}/edit/messagingBridgeCreateForm **rel**=messagingBridgeCreateForm
The create form resource for this resource's messagingBridges collection resource.
- **uri**=/management/weblogic/{version}/edit/messagingBridges **rel**=messagingBridges
This resource's messagingBridges collection resource.
- **uri**=/management/weblogic/{version}/edit/migratableTargetCreateForm **rel**=migratableTargetCreateForm
The create form resource for this resource's migratableTargets collection resource.
- **uri**=/management/weblogic/{version}/edit/migratableTargets **rel**=migratableTargets
This resource's migratableTargets collection resource.
- **uri**=/management/weblogic/{version}/edit/optionalFeatureDeployment **rel**=optionalFeatureDeployment
This resource's optionalFeatureDeployment singleton resource.
- **uri**=/management/weblogic/{version}/edit/osgiFrameworkCreateForm **rel**=osgiFrameworkCreateForm
The create form resource for this resource's osgiFrameworks collection resource.
- **uri**=/management/weblogic/{version}/edit/osgiFrameworks **rel**=osgiFrameworks
This resource's osgiFrameworks collection resource.
- **uri**=/management/weblogic/{version} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitionCreateForm
rel=partitionCreateForm

The create form resource for this resource's partitions collection resource.

- **uri**=/management/weblogic/{version}/edit/partitionWorkManagerCreateForm
rel=partitionWorkManagerCreateForm

The create form resource for this resource's partitionWorkManagers collection resource.

- **uri**=/management/weblogic/{version}/edit/partitionWorkManagers
rel=partitionWorkManagers

This resource's partitionWorkManagers collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions **rel**=partitions

This resource's partitions collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroupCreateForm
rel=resourceGroupCreateForm

The create form resource for this resource's resourceGroups collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroupTemplateCreateForm
rel=resourceGroupTemplateCreateForm

The create form resource for this resource's resourceGroupTemplates collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroupTemplates
rel=resourceGroupTemplates

This resource's resourceGroupTemplates collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups **rel**=resourceGroups

This resource's resourceGroups collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceManagement
rel=resourceManagement

This resource's resourceManagement singleton resource.

- **uri**=/management/weblogic/{version}/edit/restfulManagementServices
rel=restfulManagementServices

This resource's restfulManagementServices singleton resource.

- **uri**=/management/weblogic/{version}/edit/search **rel**=search

This resource's search resource.

- **uri**=/management/weblogic/{version}/edit/securityConfiguration
rel=securityConfiguration

This resource's securityConfiguration singleton resource.

- **uri**=/management/weblogic/{version}/edit **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/selfTuning **rel**=selfTuning

This resource's selfTuning singleton resource.

- **uri**=/management/weblogic/{version}/edit/serverCreateForm
rel=serverCreateForm
The create form resource for this resource's servers collection resource.
- **uri**=/management/weblogic/{version}/edit/serverTemplateCreateForm
rel=serverTemplateCreateForm
The create form resource for this resource's serverTemplates collection resource.
- **uri**=/management/weblogic/{version}/edit/serverTemplates
rel=serverTemplates
This resource's serverTemplates collection resource.
- **uri**=/management/weblogic/{version}/edit/servers **rel**=servers
This resource's servers collection resource.
- **uri**=/management/weblogic/{version}/edit/shutdownClassCreateForm
rel=shutdownClassCreateForm
The create form resource for this resource's shutdownClasses collection resource.
- **uri**=/management/weblogic/{version}/edit/shutdownClasses
rel=shutdownClasses
This resource's shutdownClasses collection resource.
- **uri**=/management/weblogic/{version}/edit/singletonServiceCreateForm
rel=singletonServiceCreateForm
The create form resource for this resource's singletonServices collection resource.
- **uri**=/management/weblogic/{version}/edit/singletonServices
rel=singletonServices
This resource's singletonServices collection resource.
- **uri**=/management/weblogic/{version}/edit/startupClassCreateForm
rel=startupClassCreateForm
The create form resource for this resource's startupClasses collection resource.
- **uri**=/management/weblogic/{version}/edit/startupClasses **rel**=startupClasses
This resource's startupClasses collection resource.
- **uri**=/management/weblogic/{version}/edit/systemComponentConfigurationCreateForm **rel**=systemComponentConfigurationCreateForm
The create form resource for this resource's systemComponentConfigurations collection resource.
- **uri**=/management/weblogic/{version}/edit/systemComponentConfigurations
rel=systemComponentConfigurations
This resource's systemComponentConfigurations collection resource.
- **uri**=/management/weblogic/{version}/edit/systemComponentCreateForm
rel=systemComponentCreateForm
The create form resource for this resource's systemComponents collection resource.
- **uri**=/management/weblogic/{version}/edit/systemComponents
rel=systemComponents
This resource's systemComponents collection resource.

- **uri**=/management/weblogic/{version}/edit/virtualHostCreateForm
rel=virtualHostCreateForm
The create form resource for this resource's virtualHosts collection resource.
- **uri**=/management/weblogic/{version}/edit/virtualHosts **rel**=virtualHosts
This resource's virtualHosts collection resource.
- **uri**=/management/weblogic/{version}/edit/virtualTargetCreateForm
rel=virtualTargetCreateForm
The create form resource for this resource's virtualTargets collection resource.
- **uri**=/management/weblogic/{version}/edit/virtualTargets **rel**=virtualTargets
This resource's virtualTargets collection resource.
- **uri**=/management/weblogic/{version}/edit/webAppContainer
rel=webAppContainer
This resource's webAppContainer singleton resource.
- **uri**=/management/weblogic/{version}/edit/webserviceSecurities
rel=webserviceSecurities
This resource's webserviceSecurities collection resource.
- **uri**=/management/weblogic/{version}/edit/webserviceSecurityCreateForm
rel=webserviceSecurityCreateForm
The create form resource for this resource's webserviceSecurities collection resource.
- **uri**=/management/weblogic/{version}/edit/webserviceTestpage
rel=webserviceTestpage
This resource's webserviceTestpage singleton resource.

Example

Example 1 Viewing the weblogic.management.configuration.DomainMBean Instance

This example uses the GET method to view this weblogic.management.configuration.DomainMBean instance.

Example Request

```
curl -v \
--user admin:admin123 \
-H X-Requested-By:MyClient \
-H Accept:application/json \
-X GET
http://localhost:7001/management/weblogic/latest/edit?fields=administrationProtocol,productionModeEnabled&links=self
```

Example Response

HTTP/1.1 200 OK

Response Body:

```
{
  "links": [{
    "rel": "self",
    "href": "http://localhost:7001/management/weblogic/latest/edit"
```

```
  },  
  "administrationProtocol": "t3s",  
  "productionModeEnabled": false  
}
```

POST

Update this [weblogic.management.configuration.DomainMBean](#) instance.

Request Body

Must contain a [weblogic.management.configuration.DomainMBean](#) entity.

/management/weblogic/{version}/edit/adminConsole

This resource manages a [weblogic.management.configuration.AdminConsoleMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.AdminConsoleMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.AdminConsoleMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/adminConsole](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/adminConsole](#) **rel**=self
This resource.

POST

POST

Update this [weblogic.management.configuration.AdminConsoleMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.AdminConsoleMBean](#) entity.

/management/weblogic/{version}/edit/appDeployments

This resource manages a collection of [weblogic.management.configuration.AppDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.AppDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.AppDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/appDeployments](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/appDeployments](#) **rel**=self
This resource.

POST

The resource supports the following methods:

- [POST accepting application/json](#)
- [POST accepting multipart/form-data](#)

POST accepting application/json

This resource deploys is used to deploy applications that are already on the administration server. The application must be a supported package type (for example, an EAR or WAR module).

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.AppDeploymentMBean](#) entity.

To deploy an application you must provide the name of the application, the path to the source of the deployable unit on the administration server, and the targets to which the application will be deployed.

If the source path is relative, it is resolved relative to *InstallDir/app* if *InstallDir* is not null; otherwise, it is resolved relative to the domain root.

Example

Example 1 Synchronously Create the weblogic.management.configuration.AppDeploymentMBean Instance

This example uses the POST method to synchronously create a new [weblogic.management.configuration.AppDeploymentMBean](#) instance in this collection.

Example Request

```
curl -v \
--user admin:admin123 \
-H X-Requested-By:MyClient \
-H Accept:application/json \
-H Content-Type:application/json \
-d "{
  name: 'fairShare',
  sourcePath: '/deployments/fairShare.war',
  targets: [
    { identity: [ 'servers', 'AdminServer' ] },
    { identity: [ 'clusters', 'Cluster-0' ] }
  ]
}" \
-X POST
http://localhost:7001/management/weblogic/latest/edit/appDeployments?links=job,abort&fields=completed,progress,error,state,operationType,applicationName
```

Example Response

HTTP/1.1 201 Created

Location:

<http://localhost:7001/management/weblogic/latest/edit/appDeployments/fairShare>

Response Body:

```
{
  "links": [{
    "rel": "job",
    "href":
"http://localhost:7001/management/weblogic/latest/domainRuntime/deploymentManager
/deploymentProgressObjects/fairShare"
  }],
  "operationType": 3,
  "state": "STATE_COMPLETED",
  "applicationName": "fairShare",
  "progress": "success",
  "completed": true
}
```

Example 2 Asynchronously Create the `weblogic.management.configuration.AppDeploymentMBean` Instance

This example uses the POST method to asynchronously create a new `weblogic.management.configuration.AppDeploymentMBean` instance in this collection.

Example Request

```
curl -v \
--user admin:admin123 \
-H X-Requested-By:MyClient \
-H Accept:application/json \
-H Content-Type:application/json \
-d "{
  name: 'fairShare',
  sourcePath: '/deployments/fairShare.war',
  targets: [
    { identity: [ 'servers', 'AdminServer' ] },
    { identity: [ 'clusters', 'Cluster-0' ] }
  ]
}" \
-H "Prefer:respond-async" \
-X POST
http://localhost:7001/management/weblogic/latest/edit/appDeployments?links=job,abort&fields=completed,progress,error,state,operationType,applicationName
```

Example Response

HTTP/1.1 202 Accepted

Location:

<http://localhost:7001/management/weblogic/latest/domainRuntime/deploymentManager/deploymentProgressObjects/fairShare>

Response Body:

```
{
  "links": [{
```

```

        "rel": "job",
        "href":
"http://localhost:7001/management/weblogic/latest/domainRuntime/deploymentManager
/deploymentProgressObjects/fairShare"
    }],
    "operationType": 3,
    "state": "STATE_RUNNING",
    "applicationName": "fairShare",
    "progress": "processing",
    "completed": false
}

```

POST accepting multipart/form-data

Use the multi-part form to upload an application from the client to the server and then deploy it.

- `sourcePath`: the deployment to upload (required)
- `planPath`: the deployment plan to upload (optional)
- `model`: `JSONObject` containing an `AppDeploymentMBean` entity that contains the rest of the deployment information (however, deployment/plan information is ignored) (required)

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See About Synchronous and Asynchronous Operations.

Roles

Admin, Deployer

Request Body

Use the multi-part form to deploy an application.

- `sourcePath`: the deployment to upload (required)
- `planPath`: the deployment plan to upload (optional)
- `model`: `JSONObject` containing an `AppDeploymentMBean` entity that contains the rest of the deployment information. However, deployment/plan information is ignored. (required)

Example

Example 1 Synchronously Create the `weblogic.management.configuration.AppDeploymentMBean` Instance

This example uses the POST method to synchronously create a new `weblogic.management.configuration.AppDeploymentMBean` instance in this collection.

Example Request

```

curl -v \
--user admin:admin123 \
-H X-Requested-By:MyClient \
-H Accept:application/json \
-H Content-Type:multipart/form-data \

```

```
-F "model={
  name: 'myapp',
  targets: [ { identity: [ 'servers', 'AdminServer' ] } ]
}" \
-F "sourcePath=@/deployments/MyApp/app/MyApp.ear" \
-X POST
http://localhost:7001/management/weblogic/latest/edit/appDeployments?links=job,abort&fields=completed,progress,error,state,operationType,applicationName
```

Example Response

HTTP/1.1 100 Continue HTTP/1.1 201 Created

Location:

http://localhost:7001/management/weblogic/latest/edit/appDeployments/myapp

Response Body:

```
{
  "links": [{
    "rel": "job",
    "href":
"http://localhost:7001/management/weblogic/latest/domainRuntime/deploymentManager
/deploymentProgressObjects/myapp"
  }],
  "operationType": 3,
  "state": "STATE_COMPLETED",
  "applicationName": "myapp",
  "progress": "success",
  "completed": true
}
```

Example 2 Asynchronously Create the weblogic.management.configuration.AppDeploymentMBean Instance

This example uses the POST method to asynchronously create a new weblogic.management.configuration.AppDeploymentMBean instance in this collection.

Example Request

```
curl -v \
--user admin:admin123 \
-H X-Requested-By:MyClient \
-H Accept:application/json \
-H Content-Type:multipart/form-data \
-F "model={
  name: 'myapp',
  targets: [ { identity: [ 'servers', 'AdminServer' ] } ]
}" \
-F "sourcePath=@/deployments/MyApp/app/MyApp.ear" \
-H "Prefer:respond-async" \
-X POST
http://localhost:7001/management/weblogic/latest/edit/appDeployments?links=job,abort&fields=completed,progress,error,state,operationType,applicationName
```

Example Response

HTTP/1.1 100 Continue HTTP/1.1 202 Accepted

Location:

http://localhost:7001/management/weblogic/latest/domainRuntime/deploymentManager/d

ploymentProgressObjects/myapp

Response Body:

```
{
  "links": [{
    "rel": "job",
    "href":
"http://localhost:7001/management/weblogic/latest/domainRuntime/deploymentManager
/deploymentProgressObjects/myapp"
  }],
  "operationType": 3,
  "state": "STATE_RUNNING",
  "applicationName": "myapp",
  "progress": "processing",
  "completed": false
}
```

/management/weblogic/{version}/edit/appDeployments/{name}

This resource manages a [weblogic.management.configuration.AppDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Undeploy an application.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See About Synchronous and Asynchronous Operations.

Roles

Admin, Deployer

Example

Example 1 Synchronously Delete the weblogic.management.configuration.AppDeploymentMBean Instance

This example uses the DELETE method to synchronously remove a weblogic.management.configuration.AppDeploymentMBean instance.

Example Request

```
curl -v \  
--user admin:admin123 \  
-H X-Requested-By:MyClient \  
-H Accept:application/json \  
-X DELETE  
http://localhost:7001/management/weblogic/latest/edit/appDeployments/fairShare?links=job,abort&fields=completed,progress,error,state,operationType,applicationName
```

Example Response

HTTP/1.1 200 OK

Response Body:

```
{  
  "links": [{  
    "rel": "job",  
    "href":  
"http://localhost:7001/management/weblogic/latest/domainRuntime/deploymentManager/  
deploymentProgressObjects/fairShare"  
  }],  
  "operationType": 5,  
  "state": "STATE_COMPLETED",  
  "applicationName": "fairShare",  
  "progress": "success",  
  "completed": true  
}
```

Example 2 Asynchronously Delete the weblogic.management.configuration.AppDeploymentMBean Instance

This example uses the DELETE method to asynchronously remove a weblogic.management.configuration.AppDeploymentMBean instance.

Example Request

```
curl -v \  
--user admin:admin123 \  
-H X-Requested-By:MyClient \  
-X DELETE
```

DELETE

```
-H Accept:application/json \  
-H "Prefer:respond-async" \  
-X DELETE  
http://localhost:7001/management/weblogic/latest/edit/appDeployments/fairShare?links=job,abort&fields=completed,progress,error,state,operationType,applicationName
```

Example Response

HTTP/1.1 202 Accepted

Location:

http://localhost:7001/management/weblogic/latest/domainRuntime/deploymentManager/deploymentProgressObjects/fairShare

Response Body:

```
{  
  "links": [{  
    "rel": "job",  
    "href":  
"http://localhost:7001/management/weblogic/latest/domainRuntime/deploymentManager/  
/deploymentProgressObjects/fairShare"  
  }],  
  "operationType": 5,  
  "state": "STATE_RUNNING",  
  "applicationName": "fairShare",  
  "progress": "processing",  
  "completed": false  
}
```

GET

Get this [weblogic.management.configuration.AppDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.AppDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/appDeployments/{name}/createPlan
rel=action **title**=createPlan
This resource's createPlan action resource.
- **uri**=/management/weblogic/{version}/edit/appDeployments/{name}
rel=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/appDeployments **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/appDeployments/{name}/redeploy
rel=redeploy
This resource's redeploy resource.
- **uri**=/management/weblogic/{version}/edit/appDeployments/{name} **rel**=self
This resource.
- **uri**=/management/weblogic/{version}/edit/appDeployments/{name}/subDeploymentCreateForm **rel**=subDeploymentCreateForm
The create form resource for this resource's subDeployments collection resource.
- **uri**=/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments **rel**=subDeployments
This resource's subDeployments collection resource.
- **uri**=/management/weblogic/{version}/edit/appDeployments/{name}/update
rel=update
This resource's update resource.

Example

Example 1 Viewing the [weblogic.management.configuration.AppDeploymentMBean](#) Instance

This example uses the GET method to view this [weblogic.management.configuration.AppDeploymentMBean](#) instance.

Example Request

```
curl -v \  
--user admin:admin123 \  
-H X-Requested-By:MyClient \  

```

```
-H Accept:application/json \  
-X GET  
http://localhost:7001/management/weblogic/latest/edit/appDeployments/fairShare?links=none&fields=name,versionIdentifier,targets
```

Example Response

HTTP/1.1 200 OK

Response Body:

```
{  
  "versionIdentifier": null,  
  "name": "fairShare",  
  "targets": [  
    {"identity": [  
      "servers",  
      "AdminServer"  
    ]},  
    {"identity": [  
      "clusters",  
      "Cluster-0"  
    ]}  
  ]  
}
```

POST

Update this [weblogic.management.configuration.AppDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.AppDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/appDeployments/{name}/createPlan

The resource supports the following methods:

- [POST](#)

POST

The resource supports the following methods:

- [POST](#)
- [POST](#)

POST

Create a deployment plan in the specified directory.

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

planPath

planPath

Type: string

Response Body

Contains a JSON object with a string return field.

POST

Create a deployment plan in a default directory

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/appDeployments/{name}/redeploy

The resource supports the following methods:

- [POST](#)

POST

Use the multi-part form to redeploy this application.

- `sourcePath`: the deployment to upload (required)
- `planPath`: the deployment plan to upload (optional)
- `model`: JSONObject containing an `AppDeploymentMBean` entity that contains the rest of the deployment information. However, `deployment/plan` information is ignored. (required)

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

Example

Example 1 Synchronously Invoke the redeploy Action

This example uses the POST method to synchronously invoke the redeploy action.

Example Request

```
curl -v \  
--user admin:admin123 \  
-H X-Requested-By:MyClient \  
-H Accept:application/json \  
-H Content-Type:application/json \  
-d "{}" \  
-X POST  
http://localhost:7001/management/weblogic/latest/edit/appDeployments/fairShare/red  
eploy?links=job,abort&fields=completed,progress,error,state,operationType,applicat  
ionName
```

Example Response

HTTP/1.1 200 OK

Response Body:

```
{  
  "links": [{  
    "rel": "job",  
    "href":  
"http://localhost:7001/management/weblogic/latest/domainRuntime/deploymentManager  
/deploymentProgressObjects/fairShare"  
  }],  
  "operationType": 4,  
  "state": "STATE_COMPLETED",  
  "applicationName": "fairShare",  
  "progress": "success",  
  "completed": true  
}
```

Example 2 Asynchronously Invoke the redeploy Action

This example uses the POST method to asynchronously invoke the redeploy action.

Example Request

```
curl -v \  
--user admin:admin123 \  
-H X-Requested-By:MyClient \  
-H Accept:application/json \  
-H Content-Type:application/json \  
-d "{}" \  
-H "Prefer:respond-async" \  
-X POST  
http://localhost:7001/management/weblogic/latest/edit/appDeployments/fairShare/red  
eploy?links=job,abort&fields=completed,progress,error,state,operationType,applicat  
ionName
```

Example Response

HTTP/1.1 202 Accepted

Location:

http://localhost:7001/management/weblogic/latest/domainRuntime/deploymentManager/d
eploymentProgressObjects/fairShare

Response Body:

```
{  
  "links": [{  
    "rel": "job",  
    "href":  
"http://localhost:7001/management/weblogic/latest/domainRuntime/deploymentManager  
/deploymentProgressObjects/fairShare"  
  }],  
  "operationType": 4,  
  "state": "STATE_RUNNING",  
  "applicationName": "fairShare",  
  "progress": "processing",  
  "completed": false  
}
```

/management/weblogic/{version}/edit/appDeployments/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/appDeployments/{name}/subDeploymentCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/appDeployments/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/appDeployments/{name}/subDeploymentCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/appDeployments/{name}/subDeploymentCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit/appDeployments/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments/{name}](#) **rel=self**

This resource.

- [uri=/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel=subDeployments**

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel=self**

This resource.

- [uri=/management/weblogic/{version}/edit/appDeployments/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel=subDeployments**

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/appDeployments/{name}/update

The resource supports the following methods:

- [POST](#)

POST

Update this application.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

/management/weblogic/{version}/edit/arePartitionsPresent

The resource supports the following methods:

- [POST](#)

POST

Specifies whether at least one partition has been configured.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a JSON object with a boolean return field.

/management/weblogic/{version}/edit/batchConfig

This resource manages a [weblogic.management.configuration.BatchConfigMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.BatchConfigMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.BatchConfigMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/batchConfig](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/batchConfig](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.BatchConfigMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.BatchConfigMBean](#) entity.

/management/weblogic/{version}/edit/cdiContainer

This resource manages a [weblogic.management.configuration.CdiContainerMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.CdiContainerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CdiContainerMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/cdiContainer](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/cdiContainer](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.CdiContainerMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CdiContainerMBean](#) entity.

/management/weblogic/{version}/edit/changeManager

The changeManager resource returns information about edit sessions. Use this resource to explicitly manage an edit session:

- Use the changeManager to start an edit session.
- Use other resources to make any number of configuration changes, such as configuring data sources and deploying applications.
- Use the changeManager to either cancel all the changes in the edit session or activate them.

This strategy batches all the changes together which is typically most useful in a production environment when a number of configuration changes need to be made together before they are ready to be exposed to clients.

With implicit edit sessions, instead of using the changeManager, just use other resources to change the configuration (for example, create a data source). Each REST call to change the configuration will start its own edit session, make the change, and then activate the change. This is useful for small tweaks to the configuration as typically performed in development environments.

The resource supports the following methods:

- [GET](#)

GET

Get this [weblogic.management.rest.bean.model.ChangeManager](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.rest.bean.model.ChangeManager](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/changeManager/activate](#)
rel=activate
- **uri**=[/management/weblogic/{version}/edit/changeManager/cancelEdit](#)
rel=cancelEdit
- **uri**=[/management/weblogic/{version}/edit/changeManager](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/changeManager/forceResolve](#)
rel=forceResolve
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/changeManager/safeResolve](#)
rel=safeResolve
- **uri**=[/management/weblogic/{version}/edit/changeManager](#) **rel**=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/changeManager/startEdit](#)
rel=startEdit

/management/weblogic/{version}/edit/changeManager/activate

The resource supports the following methods:

- [POST](#)

POST

POST

This resource saves and activates the changes to the current edit session

Roles

Admin, Deployer

/management/weblogic/{version}/edit/changeManager/cancelEdit

The resource supports the following methods:

- [POST](#)

POST

POST

This resource cancels the current edit session.

Roles

Admin, Deployer

/management/weblogic/{version}/edit/changeManager/forceResolve

The resource supports the following methods:

- [POST](#)

POST

This edit session forcibly resolves all changes between the default edit session and the global configuration.

Roles

Admin, Deployer

/management/weblogic/{version}/edit/changeManager/safeResolve

The resource supports the following methods:

- [POST](#)

POST

This edit session resolves non-conflicting changes between the default edit session and the global configuration.

Roles

Admin, Deployer

/management/weblogic/{version}/edit/changeManager/startEdit

The resource supports the following methods:

- [POST](#)

POST

POST

This resource starts an edit session.

Roles

Admin, Deployer

/management/weblogic/{version}/edit/clustercreateForm

This resource manages the create forms for the clusters collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ClusterMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the clusters collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ClusterMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/clustercreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/clusters](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/clustercreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/clusters

This resource manages a collection of [weblogic.management.configuration.ClusterMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ClusterMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ClusterMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/clusters](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/clustercreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/clusters](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.ClusterMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ClusterMBean](#) entity.

/management/weblogic/{version}/edit/clusters/{name}

This resource manages a [weblogic.management.configuration.ClusterMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ClusterMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ClusterMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ClusterMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/JTACluster](#)
rel=JTACluster
This resource's JTACluster singleton resource.
- **uri**=[/management/weblogic/{version}/edit/clusters/{name}](#) **rel**=canonical
This resource.
- **rel**=coherenceClusterSystemResource
This resource's coherenceClusterSystemResource reference to a [weblogic.management.configuration.CoherenceClusterSystemResourceMBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/coherenceTier](#)
rel=coherenceTier
This resource's coherenceTier singleton resource.
- **rel**=dataSourceForAutomaticMigration
This resource's dataSourceForAutomaticMigration reference to a [weblogic.management.configuration.JDBCSystemResourceMBean](#) resource.
- **rel**=dataSourceForJobScheduler
This resource's dataSourceForJobScheduler reference to a [weblogic.management.configuration.JDBCSystemResourceMBean](#) resource.
- **rel**=dataSourceForSessionPersistence
This resource's dataSourceForSessionPersistence reference to a [weblogic.management.configuration.JDBCSystemResourceMBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/databaseLessLeasingBasis](#) **rel**=databaseLessLeasingBasis
This resource's databaseLessLeasingBasis singleton resource.
- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/dynamicServers](#)
rel=dynamicServers
This resource's dynamicServers singleton resource.
- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/overloadProtection](#)
rel=overloadProtection
This resource's overloadProtection singleton resource.
- **uri**=[/management/weblogic/{version}/edit/clusters](#) **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/clusters/{name} **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.ClusterMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ClusterMBean](#) entity.

/management/weblogic/{version}/edit/clusters/{name}/coherenceTier

This resource manages a [weblogic.management.configuration.CoherenceTierMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.CoherenceTierMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherenceTierMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/coherenceTier](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/clusters/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/coherenceTier](#)
rel=self
This resource.

POST

Update this [weblogic.management.configuration.CoherenceTierMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CoherenceTierMBean](#) entity.

/management/weblogic/{version}/edit/clusters/{name}/databaseLessLeasingBasis

This resource manages a [weblogic.management.configuration.DatabaseLessLeasingBasisMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.DatabaseLessLeasingBasisMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.DatabaseLessLeasingBasisMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/databaseLessLeasingBasis](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/clusters/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/databaseLessLeasingBasis](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.DatabaseLessLeasingBasisMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.DatabaseLessLeasingBasisMBean](#) entity.

/management/weblogic/{version}/edit/clusters/{name}/dynamicServers

This resource manages a [weblogic.management.configuration.DynamicServersMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.DynamicServersMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.DynamicServersMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/dynamicServers](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/dynamicServers](#)
rel=self

This resource.

- **rel**=serverTemplate

This resource's serverTemplate reference to a [weblogic.management.configuration.ServerTemplateMBean](#) resource.

POST

Update this [weblogic.management.configuration.DynamicServersMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.DynamicServersMBean](#) entity.

/management/weblogic/{version}/edit/clusters/{name}/JTACluster

This resource manages a [weblogic.management.configuration.JTAClusterMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.JTAClusterMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JTAClusterMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/JTACluster](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/clusters/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/JTACluster](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.JTAClusterMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.JTAClusterMBean](#) entity.

/management/weblogic/{version}/edit/clusters/{name}/overloadProtection

This resource manages a [weblogic.management.configuration.OverloadProtectionMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.OverloadProtectionMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.OverloadProtectionMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/overloadProtection](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/overloadProtection](#)
rel=self

This resource.

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/overloadProtection/serverFailureTrigger](#) **rel**=serverFailureTrigger

This resource's serverFailureTrigger singleton resource.

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/overloadProtection/serverFailureTriggerCreateForm](#) **rel**=serverFailureTriggerCreateForm

The create form resource for this resource's serverFailureTrigger optional singleton resource.

POST

Update this [weblogic.management.configuration.OverloadProtectionMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.OverloadProtectionMBean](#) entity.

/management/weblogic/{version}/edit/clusters/{name}/overloadProtection/serverFailureTrigger

This resource manages a [weblogic.management.configuration.ServerFailureTriggerMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ServerFailureTriggerMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ServerFailureTriggerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ServerFailureTriggerMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/overloadProtection/serverFailureTrigger](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/overloadProtection/serverFailureTriggerCreateForm](#) **rel**=create-form

The create form resource for this optional singleton resource.

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/overloadProtection](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/clusters/{name}/overloadProtection/serverFailureTrigger](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.ServerFailureTriggerMBean](#) instance if it exists; otherwise, create it.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ServerFailureTriggerMBean](#) entity.

/management/weblogic/{version}/edit/clusters/{name}/overloadProtection/serverFailureTriggerCreateForm

This resource manages the create forms for the serverFailureTrigger optional singleton instance.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ServerFailureTriggerMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [serverFailureTrigger](#) optional singleton resource to create a new instance if it currently does not exist.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ServerFailureTriggerMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/clusters/{name}/overloadProtection/serverFailureTriggerCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/clusters/{name}/overloadProtection/serverFailureTriggerCreateForm](#) **rel=create**

The optional singleton resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/clusters/{name}/overloadProtection](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/clusters/{name}/overloadProtection/serverFailureTriggerCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/coherenceClusterSystemResourceCreateForm

This resource manages the create forms for the coherenceClusterSystemResources collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.CoherenceClusterSystemResourceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the coherenceClusterSystemResources collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherenceClusterSystemResourceMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResourceCreateForm rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources rel=create](#)
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResourceCreateForm rel=self](#)
This resource.

/management/weblogic/{version}/edit/coherenceClusterSystemResources

This resource manages a collection of [weblogic.management.configuration.CoherenceClusterSystemResourceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.CoherenceClusterSystemResourceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.CoherenceClusterSystemResourceMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResourceCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources](#)
rel=self
This resource.

POST

Add a new [weblogic.management.configuration.CoherenceClusterSystemResourceMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CoherenceClusterSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}

This resource manages a [weblogic.management.configuration.CoherenceClusterSystemResourceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.CoherenceClusterSystemResourceMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.CoherenceClusterSystemResourceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherenceClusterSystemResourceMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/importCustomClusterConfigurationFile](#) **rel=action**
title=importCustomClusterConfigurationFile
This resource's importCustomClusterConfigurationFile action resource.
- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigCreateForm](#) **rel=coherenceCacheConfigCreateForm**
The create form resource for this resource's coherenceCacheConfigs collection resource.
- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigs](#) **rel=coherenceCacheConfigs**
This resource's coherenceCacheConfigs collection resource.
- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource](#) **rel=coherenceClusterResource**
This resource's coherenceClusterResource singleton resource.
- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources](#) **rel=parent**
The parent resource of this resource.
- **rel=resource**
This resource's resource reference to a weblogic.descriptor.DescriptorBean resource.
- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}](#) **rel=self**
This resource.
- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeploymentCreateForm](#) **rel=subDeploymentCreateForm**
The create form resource for this resource's subDeployments collection resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments **rel**=subDeployments

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.CoherenceClusterSystemResourceMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.CoherenceClusterSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigCreateForm

This resource manages the create forms for the coherenceCacheConfigs collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.CoherenceCacheConfigMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the coherenceCacheConfigs collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherenceCacheConfigMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigs **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigs

This resource manages a collection of [weblogic.management.configuration.CoherenceCacheConfigMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.CoherenceCacheConfigMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.CoherenceCacheConfigMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigs](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigs](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.CoherenceCacheConfigMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.CoherenceCacheConfigMBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigs/{name}

This resource manages a [weblogic.management.configuration.CoherenceCacheConfigMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.CoherenceCacheConfigMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.CoherenceCacheConfigMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherenceCacheConfigMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigs/{name}/importCacheConfigurationFile **rel**=action
title=importCacheConfigurationFile

This resource's importCacheConfigurationFile action resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigs/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigs **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigs/{name} **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.CoherenceCacheConfigMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.CoherenceCacheConfigMBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceCacheConfigs/{name}/importCacheConfigurationFile

The resource supports the following methods:

- [POST](#)

POST

The resource supports the following methods:

- [POST](#)
- [POST](#)

POST

Imports the file to be used as the cache configuration file from the resource `getCacheConfigurationFile()`.

Roles

Admin, Deployer

Response Body

Contains an empty JSON object.

POST

Imports the file to be used as the cache configuration file.

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

file
the name of the file

Type: string

Response Body

Contains an empty JSON object.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource

This resource manages a [weblogic.coherence.descriptor.wl.WeblogicCoherenceBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.coherence.descriptor.wl.WeblogicCoherenceBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.WeblogicCoherenceBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders **rel**=coherenceAddressProviders

This resource's coherenceAddressProviders singleton resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams **rel**=coherenceClusterParams

This resource's coherenceClusterParams singleton resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceFederationParams **rel**=coherenceFederationParams

This resource's coherenceFederationParams singleton resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceLoggingParams **rel**=coherenceLoggingParams

This resource's coherenceLoggingParams singleton resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherencePersistenceParams **rel**=coherencePersistenceParams

This resource's coherencePersistenceParams singleton resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource **rel**=self

This resource.

POST

Update this [weblogic.coherence.descriptor.wl.WeblogicCoherenceBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.WeblogicCoherenceBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders

This resource manages a [weblogic.coherence.descriptor.wl.CoherenceAddressProvidersBean](#) instance.

The resource supports the following methods:

- [GET](#)

GET

Get this [weblogic.coherence.descriptor.wl.CoherenceAddressProvidersBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceAddressProvidersBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviderCreateForm](#) **rel=coherenceAddressProviderCreateForm**

The create form resource for this resource's coherenceAddressProviders collection resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders](#) **rel=coherenceAddressProviders**

This resource's coherenceAddressProviders collection resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviderCreateForm

This resource manages the create forms for the coherenceAddressProviders collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.coherence.descriptor.wl.CoherenceAddressProviderBean](#) entity populated with default values that can be customized then posted (using the POST method) to the coherenceAddressProviders collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceAddressProviderBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviderCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviderCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders

This resource manages a collection of [weblogic.coherence.descriptor.wl.CoherenceAddressProviderBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.coherence.descriptor.wl.CoherenceAddressProviderBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.coherence.descriptor.wl.CoherenceAddressProviderBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviderCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders](#) **rel=self**

This resource.

POST

Add a new [weblogic.coherence.descriptor.wl.CoherenceAddressProviderBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceAddressProviderBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name}

This resource manages a [weblogic.coherence.descriptor.wl.CoherenceAddressProviderBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)

DELETE

Delete this [weblogic.coherence.descriptor.wl.CoherenceAddressProviderBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.coherence.descriptor.wl.CoherenceAddressProviderBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceAddressProviderBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name}/coherenceSocketAddressCreateForm](#) **rel=coherenceSocketAddressCreateForm**

The create form resource for this resource's coherenceSocketAddresses collection resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name}/coherenceSocketAddresses](#) **rel=coherenceSocketAddresses**

This resource's coherenceSocketAddresses collection resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name}](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name}/coherenceSocketAddressCreateForm

This resource manages the create forms for the coherenceSocketAddresses collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.coherence.descriptor.wl.CoherenceSocketAddressBean](#) entity populated with default values that can be customized then posted (using the POST method) to the coherenceSocketAddresses collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceSocketAddressBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name}/coherenceSocketAddressCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name}/coherenceSocketAddresses](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name}/coherenceSocketAddressCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name}/coherenceSocketAddresses

This resource manages a collection of [weblogic.coherence.descriptor.wl.CoherenceSocketAddressBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.coherence.descriptor.wl.CoherenceSocketAddressBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.coherence.descriptor.wl.CoherenceSocketAddressBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name}/coherenceSocketAddresses **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name}/coherenceSocketAddressCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name}/coherenceSocketAddresses **rel**=self

This resource.

POST

Add a new [weblogic.coherence.descriptor.wl.CoherenceSocketAddressBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceSocketAddressBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/coherenceAddressProviders/{name}/coherenceSocketAddresses/{name}

This resource manages a [weblogic.coherence.descriptor.wl.CoherenceSocketAddressBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.coherence.descriptor.wl.CoherenceSocketAddressBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.coherence.descriptor.wl.CoherenceSocketAddressBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceSocketAddressBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/{name}/coherenceSocketAddresses/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/{name}/coherenceSocketAddresses **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceAddressProviders/{name}/coherenceSocketAddresses/{name} **rel**=self

This resource.

POST

POST

Update this [weblogic.coherence.descriptor.wl.CoherenceSocketAddressBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceSocketAddressBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams

This resource manages a [weblogic.coherence.descriptor.wl.CoherenceClusterParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.coherence.descriptor.wl.CoherenceClusterParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceClusterParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceCacheCreateForm](#) **rel=coherenceCacheCreateForm**

The create form resource for this resource's coherenceCaches collection resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceCaches](#) **rel=coherenceCaches**

This resource's coherenceCaches collection resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses](#) **rel=coherenceClusterWellKnownAddresses**

This resource's coherenceClusterWellKnownAddresses singleton resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAssertter](#) **rel=coherenceIdentityAssertter**

This resource's coherenceIdentityAssertter singleton resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceKeystoreParams](#) **rel=coherenceKeystoreParams**

This resource's coherenceKeystoreParams singleton resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceServiceCreateForm](#) **rel=coherenceServiceCreateForm**

The create form resource for this resource's coherenceServices collection resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceServices](#) **rel=coherenceServices**

This resource's coherenceServices collection resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource](#) **rel=parent**

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams **rel**=self

This resource.

POST

POST

Update this [weblogic.coherence.descriptor.wl.CoherenceClusterParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceClusterParamsBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceCacheCreateForm

This resource manages the create forms for the coherenceCaches collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.coherence.descriptor.wl.CoherenceCacheBean](#) entity populated with default values that can be customized then posted (using the POST method) to the coherenceCaches collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceCacheBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceCacheCreateForm rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceCaches rel=create](#)

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceCacheCreateForm rel=self](#)

This resource.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceCaches

This resource manages a collection of [weblogic.coherence.descriptor.wl.CoherenceCacheBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.coherence.descriptor.wl.CoherenceCacheBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.coherence.descriptor.wl.CoherenceCacheBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceCaches](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceCacheCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceCaches](#)
rel=self

This resource.

POST

Add a new [weblogic.coherence.descriptor.wl.CoherenceCacheBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceCacheBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceCaches/{name}

This resource manages a [weblogic.coherence.descriptor.wl.CoherenceCacheBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.coherence.descriptor.wl.CoherenceCacheBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.coherence.descriptor.wl.CoherenceCacheBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceCacheBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceCaches/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceCaches](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceCaches/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.coherence.descriptor.wl.CoherenceCacheBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceCacheBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses

This resource manages a [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressesBean](#) instance.

The resource supports the following methods:

- [GET](#)

GET

Get this [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressesBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses/coherenceClusterWellKnownAddressCreateForm](#) **rel=coherenceClusterWellKnownAddressCreateForm**

The create form resource for this resource's coherenceClusterWellKnownAddresses collection resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses/coherenceClusterWellKnownAddresses](#) **rel=coherenceClusterWellKnownAddresses**

This resource's coherenceClusterWellKnownAddresses collection resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses/coherenceClusterWellKnownAddressCreateForm

This resource manages the create forms for the coherenceClusterWellKnownAddresses collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [coherenceClusterWellKnownAddresses](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses/coherenceClusterWellKnownAddressCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses/coherenceClusterWellKnownAddresses](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses/coherenceClusterWellKnownAddressCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses/coherenceClusterWellKnownAddresses

This resource manages a collection of [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses/coherenceClusterWellKnownAddresses **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses/coherenceClusterWellKnownAddressCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses/coherenceClusterWellKnownAddresses **rel**=self

This resource.

POST

Add a new [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses/coherenceClusterWellKnownAddresses/{name}

This resource manages a [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses/coherenceClusterWellKnownAddresses/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses/coherenceClusterWellKnownAddresses **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceClusterWellKnownAddresses/coherenceClusterWellKnownAddresses/{name} **rel**=self

This resource.

POST

Update this [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceClusterWellKnownAddressBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter

This resource manages a [weblogic.coherence.descriptor.wl.CoherenceIdentityAsserterBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.coherence.descriptor.wl.CoherenceIdentityAsserterBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceIdentityAsserterBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter/coherenceInitParamCreateForm](#) **rel**=coherenceInitParamCreateForm

The create form resource for this resource's coherenceInitParams collection resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter/coherenceInitParams](#) **rel**=coherenceInitParams

This resource's coherenceInitParams collection resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter](#) **rel**=self

This resource.

POST

Update this [weblogic.coherence.descriptor.wl.CoherenceIdentityAsserterBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceIdentityAsserterBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter/coherenceInitParamCreateForm

This resource manages the create forms for the coherenceInitParams collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.coherence.descriptor.wl.CoherenceInitParamBean](#) entity populated with default values that can be customized then posted (using the POST method) to the coherenceInitParams collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceInitParamBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter/coherenceInitParamCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter/coherenceInitParams](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter/coherenceInitParamCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter/coherenceInitParams

This resource manages a collection of [weblogic.coherence.descriptor.wl.CoherenceInitParamBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.coherence.descriptor.wl.CoherenceInitParamBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.coherence.descriptor.wl.CoherenceInitParamBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter/coherenceInitParams](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter/coherenceInitParamCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter/coherenceInitParams](#) **rel=self**

This resource.

POST

Add a new [weblogic.coherence.descriptor.wl.CoherenceInitParamBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceInitParamBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter/coherenceInitParams/{name}

This resource manages a [weblogic.coherence.descriptor.wl.CoherenceInitParamBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.coherence.descriptor.wl.CoherenceInitParamBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.coherence.descriptor.wl.CoherenceInitParamBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceInitParamBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter/coherenceInitParams/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter/coherenceInitParams **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceIdentityAsserter/coherenceInitParams/{name} **rel**=self

This resource.

POST

Update this [weblogic.coherence.descriptor.wl.CoherenceInitParamBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceInitParamBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceKeystoreParams

This resource manages a [weblogic.coherence.descriptor.wl.CoherenceKeystoreParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.coherence.descriptor.wl.CoherenceKeystoreParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceKeystoreParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceKeystoreParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceKeystoreParams](#) **rel**=self

This resource.

POST

Update this [weblogic.coherence.descriptor.wl.CoherenceKeystoreParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceKeystoreParamsBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceServiceC reateForm

This resource manages the create forms for the coherenceServices collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.coherence.descriptor.wl.CoherenceServiceBean](#) entity populated with default values that can be customized then posted (using the POST method) to the coherenceServices collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceServiceBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceServiceCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceServices](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceServiceCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceServices

This resource manages a collection of [weblogic.coherence.descriptor.wl.CoherenceServiceBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.coherence.descriptor.wl.CoherenceServiceBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.coherence.descriptor.wl.CoherenceServiceBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceServices](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceServiceCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceServices](#)
rel=self

This resource.

POST

Add a new [weblogic.coherence.descriptor.wl.CoherenceServiceBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceServiceBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceServices/{name}

This resource manages a [weblogic.coherence.descriptor.wl.CoherenceServiceBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.coherence.descriptor.wl.CoherenceServiceBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.coherence.descriptor.wl.CoherenceServiceBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceServiceBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceServices/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceServices **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceClusterParams/coherenceServices/{name} **rel**=self

This resource.

POST

Update this [weblogic.coherence.descriptor.wl.CoherenceServiceBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceServiceBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceFederationParams

This resource manages a [weblogic.coherence.descriptor.wl.CoherenceFederationParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.coherence.descriptor.wl.CoherenceFederationParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceFederationParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceFederationParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceFederationParams](#) **rel**=self

This resource.

POST

Update this [weblogic.coherence.descriptor.wl.CoherenceFederationParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceFederationParamsBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceLoggingParams

This resource manages a [weblogic.coherence.descriptor.wl.CoherenceLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.coherence.descriptor.wl.CoherenceLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherenceLoggingParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceLoggingParams](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherenceLoggingParams](#) **rel=self**
This resource.

POST

Update this [weblogic.coherence.descriptor.wl.CoherenceLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherenceLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherencePersistenceParams

This resource manages a [weblogic.coherence.descriptor.wl.CoherencePersistenceParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.coherence.descriptor.wl.CoherencePersistenceParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.coherence.descriptor.wl.CoherencePersistenceParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherencePersistenceParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/coherenceClusterResource/coherencePersistenceParams](#) **rel**=self

This resource.

POST

Update this [weblogic.coherence.descriptor.wl.CoherencePersistenceParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.coherence.descriptor.wl.CoherencePersistenceParamsBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/importCustomClusterConfigurationFile

The resource supports the following methods:

- [POST](#)

POST

Allows you to specify a custom Coherence cluster configuration file. The file must be present locally on the Administration Server.

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

file

Absolute path to the custom Coherence cluster configuration file

Type: string

Response Body

Contains an empty JSON object.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeploymentCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeploymentCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeploymentCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments/{name} **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel**=self

This resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceClusterSystemResources/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel**=subDeployments

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/coherenceManagementClusterCreateForm

This resource manages the create forms for the coherenceManagementClusters collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.CoherenceManagementClusterMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the coherenceManagementClusters collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherenceManagementClusterMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/coherenceManagementClusterCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/coherenceManagementClusters](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/coherenceManagementClusterCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/coherenceManagementClusters

This resource manages a collection of [weblogic.management.configuration.CoherenceManagementClusterMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.CoherenceManagementClusterMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.CoherenceManagementClusterMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusters](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusterCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusters](#)
rel=self
This resource.

POST

POST

Add a new [weblogic.management.configuration.CoherenceManagementClusterMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CoherenceManagementClusterMBean](#) entity.

/management/weblogic/{version}/edit/coherenceManagementClusters/{name}

This resource manages a [weblogic.management.configuration.CoherenceManagementClusterMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.CoherenceManagementClusterMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.CoherenceManagementClusterMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherenceManagementClusterMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusters/{name}](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusters/{name}/coherenceManagementAddressProviderCreateForm](#)
rel=coherenceManagementAddressProviderCreateForm

The create form resource for this resource's coherenceManagementAddressProviders collection resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusters/{name}/coherenceManagementAddressProviders](#)
rel=coherenceManagementAddressProviders

This resource's coherenceManagementAddressProviders collection resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusters](#)
rel=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusters/{name}](#)
rel=self

This resource.

POST

POST

Update this [weblogic.management.configuration.CoherenceManagementClusterMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.CoherenceManagementClusterMBean](#) entity.

/management/weblogic/{version}/edit/coherenceManagementClusters/{name}/coherenceManagementAddressProviderCreateForm

This resource manages the create forms for the coherenceManagementAddressProviders collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.CoherenceManagementAddressProviderMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `coherenceManagementAddressProviders` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherenceManagementAddressProviderMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusters/{name}/coherenceManagementAddressProviderCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusters/{name}/coherenceManagementAddressProviders](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusters/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusters/{name}/coherenceManagementAddressProviderCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/coherenceManagementClusters/{name}/coherenceManagementAddressProviders

This resource manages a collection of [weblogic.management.configuration.CoherenceManagementAddressProviderMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.CoherenceManagementAddressProviderMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.CoherenceManagementAddressProviderMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusters/{name}/coherenceManagementAddressProviders](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusters/{name}/coherenceManagementAddressProviderCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusters/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/coherenceManagementClusters/{name}/coherenceManagementAddressProviders](#) **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.CoherenceManagementAddressProviderMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.CoherenceManagementAddressProviderMBean](#) entity.

/management/weblogic/{version}/edit/coherenceManagementClusters/{name}/coherenceManagementAddressProviders/{name}

This resource manages a [weblogic.management.configuration.CoherenceManagementAddressProviderMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this

[weblogic.management.configuration.CoherenceManagementAddressProviderMBean](#)
instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.CoherenceManagementAddressProviderMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherenceManagementAddressProviderMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/coherenceManagementClusters/{name}/coherenceManagementAddressProviders/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/coherenceManagementClusters/{name}/coherenceManagementAddressProviders **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/coherenceManagementClusters/{name}/coherenceManagementAddressProviders/{name} **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.CoherenceManagementAddressProviderMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CoherenceManagementAddressProviderMBean](#) entity.

/management/weblogic/{version}/edit/coherenceServerCreateForm

This resource manages the create forms for the coherenceServers collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.CoherenceServerMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the coherenceServers collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherenceServerMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceServerCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceServers](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceServerCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/coherenceServers

This resource manages a collection of [weblogic.management.configuration.CoherenceServerMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.CoherenceServerMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.CoherenceServerMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceServers](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceServerCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceServers](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.CoherenceServerMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CoherenceServerMBean](#) entity.

/management/weblogic/{version}/edit/coherenceServers/{name}

This resource manages a [weblogic.management.configuration.CoherenceServerMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.management.configuration.CoherenceServerMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.CoherenceServerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherenceServerMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceServers/{name}](#)
rel=canonical
This resource.
- **rel**=coherenceClusterSystemResource
This resource's coherenceClusterSystemResource reference to a [weblogic.management.configuration.CoherenceClusterSystemResourceMBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceServers/{name}/coherenceServerStart](#) **rel**=coherenceServerStart
This resource's coherenceServerStart singleton resource.
- **rel**=machine
This resource's machine reference to a [weblogic.management.configuration.MachineMBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceServers](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceServers/{name}](#) **rel**=self
This resource.

POST

POST

Update this [weblogic.management.configuration.CoherenceServerMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CoherenceServerMBean](#) entity.

/management/weblogic/{version}/edit/coherenceServers/{name}/coherenceServerStart

This resource manages a [weblogic.management.configuration.CoherenceServerStartMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.CoherenceServerStartMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherenceServerStartMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/coherenceServers/{name}/coherenceServerStart](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceServers/{name}](#)
rel=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/coherenceServers/{name}/coherenceServerStart](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.CoherenceServerStartMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CoherenceServerStartMBean](#) entity.

/management/weblogic/{version}/edit/configurationProperties

This resource manages a collection of [weblogic.management.configuration.ConfigurationPropertyMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ConfigurationPropertyMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ConfigurationPropertyMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/configurationProperties](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/configurationPropertyCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/configurationProperties](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.ConfigurationPropertyMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ConfigurationPropertyMBean](#) entity.

/management/weblogic/{version}/edit/configurationProperties/{name}

This resource manages a [weblogic.management.configuration.ConfigurationPropertyMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ConfigurationPropertyMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ConfigurationPropertyMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ConfigurationPropertyMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/configurationProperties/{name}](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/configurationProperties](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/configurationProperties/{name}](#)
rel=self

This resource.

POST

Update this [weblogic.management.configuration.ConfigurationPropertyMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ConfigurationPropertyMBean](#) entity.

/management/weblogic/{version}/edit/configurationPropertyCreateForm

This resource manages the create forms for the configurationProperties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ConfigurationPropertyMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the configurationProperties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ConfigurationPropertyMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/configurationPropertyCreateForm](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/configurationProperties](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/configurationPropertyCreateForm](#)
rel=self

This resource.

/management/weblogic/{version}/edit/customResourceCreateForm

This resource manages the create forms for the customResources collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.CustomResourceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the customResources collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CustomResourceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/customResourceCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/customResources](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/customResourceCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/customResources

This resource manages a collection of [weblogic.management.configuration.CustomResourceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.CustomResourceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.CustomResourceMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/customResources](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/customResourceCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/customResources](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.CustomResourceMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CustomResourceMBean](#) entity.

/management/weblogic/{version}/edit/customResources/{name}

This resource manages a [weblogic.management.configuration.CustomResourceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.CustomResourceMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.CustomResourceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CustomResourceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/customResources/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/customResources/{name}/customResource](#) **rel**=customResource
This resource's customResource singleton resource.
- **uri**=[/management/weblogic/{version}/edit/customResources](#) **rel**=parent
The parent resource of this resource.
- **rel**=resource
This resource's resource reference to a [weblogic.descriptor.DescriptorBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/customResources/{name}](#) **rel**=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/customResources/{name}/subDeploymentCreateForm](#) **rel**=subDeploymentCreateForm
The create form resource for this resource's subDeployments collection resource.
- **uri**=[/management/weblogic/{version}/edit/customResources/{name}/subDeployments](#) **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.CustomResourceMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CustomResourceMBean](#) entity.

/management/weblogic/{version}/edit/customResources/{name}/customResource

This resource manages a `weblogic.descriptor.DescriptorBean` instance.

The resource supports the following methods:

- [GET](#)

GET

Get this weblogic.descriptor.DescriptorBean instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a weblogic.descriptor.DescriptorBean entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/customResources/{name}/customResource **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/customResources/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/customResources/{name}/customResource **rel**=self
This resource.

/management/weblogic/{version}/edit/customResources/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/customResources/{name}/subDeploymentCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/customResources/{name}/subDeployments](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/customResources/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/customResources/{name}/subDeploymentCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/customResources/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/customResources/{name}/subDeployments](#) [rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/customResources/{name}/subDeploymentCreateForm](#) [rel=create-form](#)
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/customResources/{name}](#) [rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/customResources/{name}/subDeployments](#) [rel=self](#)
This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/customResources/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/customResources/{name}/subDeployments/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/customResources/{name}/subDeployments](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/customResources/{name}/subDeployments/{name}](#) **rel**=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/customResources/{name}/subDeployments/{name}/subDeployments](#) **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/customResources/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/customResources/{name}/subDeployments/{name}/subDeployments](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/customResources/{name}/subDeployments/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/customResources/{name}/subDeployments/{name}/subDeployments](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/customResources/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/customResources/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/customResources/{name}/subDeployments/{name}/subDeployments](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/customResources/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel=self**
This resource.
- [uri=/management/weblogic/{version}/edit/customResources/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel=subDeployments**
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/debugPatches

This resource manages a [weblogic.management.configuration.DebugPatchesMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.DebugPatchesMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.DebugPatchesMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/debugPatches](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/debugPatches](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.DebugPatchesMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.DebugPatchesMBean](#) entity.

/management/weblogic/{version}/edit/deploymentConfiguration

This resource manages a [weblogic.management.configuration.DeploymentConfigurationMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.DeploymentConfigurationMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.DeploymentConfigurationMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/deploymentConfiguration](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin](#) **rel**=deploymentValidationPlugin
This resource's deploymentValidationPlugin singleton resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/deploymentConfiguration](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.DeploymentConfigurationMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.DeploymentConfigurationMBean](#) entity.

/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin

This resource manages a [weblogic.management.configuration.DeploymentValidationPluginMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.DeploymentValidationPluginMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.DeploymentValidationPluginMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin/parameterCreateForm](#) **rel=parameterCreateForm**

The create form resource for this resource's parameters collection resource.

- [uri=/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin/parameters](#) **rel=parameters**

This resource's parameters collection resource.

- [uri=/management/weblogic/{version}/edit/deploymentConfiguration](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin](#) **rel=self**

This resource.

POST

POST

Update this [weblogic.management.configuration.DeploymentValidationPluginMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.DeploymentValidationPluginMBean](#) entity.

/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin/parameterCreateForm

This resource manages the create forms for the parameters collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ParameterMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the parameters collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ParameterMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin/parameterCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin/parameters](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin/parameterCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin/parameters

This resource manages a collection of [weblogic.management.configuration.ParameterMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ParameterMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ParameterMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin/parameters](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin/parameterCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin/parameters](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.ParameterMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ParameterMBean](#) entity.

/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin/parameters/{name}

This resource manages a [weblogic.management.configuration.ParameterMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ParameterMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ParameterMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ParameterMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin/parameters/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin/parameters](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/deploymentConfiguration/deploymentValidationPlugin/parameters/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.ParameterMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ParameterMBean](#) entity.

/management/weblogic/{version}/edit/embeddedLDAP

This resource manages a [weblogic.management.configuration.EmbeddedLDAPMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.EmbeddedLDAPMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.EmbeddedLDAPMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/embeddedLDAP](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/embeddedLDAP](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.EmbeddedLDAPMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.EmbeddedLDAPMBean](#) entity.

/management/weblogic/{version}/edit/fileStoreCreateForm

This resource manages the create forms for the fileStores collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.FileStoreMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the fileStores collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FileStoreMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/fileStoreCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/fileStores](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/fileStoreCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/fileStores

This resource manages a collection of [weblogic.management.configuration.FileStoreMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.FileStoreMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.FileStoreMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/fileStores](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/fileStoreCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/fileStores](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.FileStoreMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.FileStoreMBean](#) entity.

/management/weblogic/{version}/edit/fileStores/{name}

This resource manages a [weblogic.management.configuration.FileStoreMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.FileStoreMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.FileStoreMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FileStoreMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/fileStores/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/fileStores](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/fileStores/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.FileStoreMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.FileStoreMBean](#) entity.

/management/weblogic/{version}/edit/findConfigBeansWithTags

The resource supports the following methods:

- [POST](#)

POST

The resource supports the following methods:

- [POST](#)
- [POST](#)

POST

Find all ConfigurationMBeans of the specified config bean type that have the specified tag(s). The tag param may be a single tag or multiple tags. The config bean must have a matching tag for every tag specified. The type may be an empty string to get all types of config beans with the specified tags. The tag may include white spaces. White spaces will not be treated specially. If the user specifies the tags param as "santa clara", this is considered to be a single tag 'santa clara', not two. Spaces are not delimiters.

Roles

Admin

Request Body

Must contain a JSON object with the following fields:

type

type of the MBean (shortened version of the class name less the MBean)

Type: string

tags

tags

Type: array of string

Response Body

Contains a JSON object with a array of weblogic.management.configuration.ConfigurationMBean references return field.

POST

Find all ConfigurationMBeans of the specified config bean type that have the specified tag(s). The tag param may be a single tag or multiple tags. If matchAll is true the config bean must have a matching tag for every tag specified. If matchAll is false the config bean may match on any single tag specified. The type may be an empty string to get all types of config beans with the specified tags. The tag may include white spaces. White spaces will not be treated specially. If the user specifies the tags param as "santa clara", this is considered to be a single tag 'santa clara', not two. Spaces are not delimiters.

Roles

Admin

Request Body

Must contain a JSON object with the following fields:

type

type of the MBean (shortened version of the class name less the MBean)

Type: string

matchAll

false to match on any single tag, true to match on all tags

Type: boolean

tags

tags

Type: array of string

Response Body

Contains a JSON object with a array of `weblogic.management.configuration.ConfigurationMBean` references return field.

/management/weblogic/{version}/edit/findPartitionByID

The resource supports the following methods:

- [POST](#)

POST

Looks up a partition by the partition ID. The ID is a unique string that is NOT necessarily the same as the MBean name.

Roles

Admin

Request Body

Must contain a JSON object with the following fields:

id
the id of the partition to find

Type: string

Response Body

Contains a JSON object with a `weblogic.management.configuration.PartitionMBean` reference return field.

/management/weblogic/{version}/edit/foreignJNDIPProviderCreateForm

This resource manages the create forms for the foreignJNDIProviders collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ForeignJNDIProviderMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [foreignJNDIProviders](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDIProviderMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/foreignJNDIProviderCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/foreignJNDIProviders](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/foreignJNDIProviderCreateForm](#)
rel=self
This resource.

/management/weblogic/{version}/edit/foreignJNDIProviders

This resource manages a collection of [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ForeignJNDIProviderMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/foreignJNDIProviders](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/foreignJNDIProviderCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/foreignJNDIProviders](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDIProviderMBean](#) entity.

/management/weblogic/{version}/edit/foreignJNDIProviders/{name}

This resource manages a [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ForeignJNDIPProviderMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDIPProviderMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/foreignJNDIProviders/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/foreignJNDIProviders/{name}/foreignJNDILinkCreateForm](#) **rel**=foreignJNDILinkCreateForm
The create form resource for this resource's foreignJNDILinks collection resource.
- **uri**=[/management/weblogic/{version}/edit/foreignJNDIProviders/{name}/foreignJNDILinks](#) **rel**=foreignJNDILinks
This resource's foreignJNDILinks collection resource.
- **uri**=[/management/weblogic/{version}/edit/foreignJNDIProviders](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/foreignJNDIProviders/{name}](#)
rel=self
This resource.

POST

Update this [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDIProviderMBean](#) entity.

/management/weblogic/{version}/edit/foreignJNDIProviders/{name}/foreignJNDILinkCreateForm

This resource manages the create forms for the foreignJNDILinks collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ForeignJNDILinkMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the foreignJNDILinks collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDILinkMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/foreignJNDIProviders/{name}/foreignJNDILinkCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/foreignJNDIProviders/{name}/foreignJNDILinks](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/foreignJNDIProviders/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/foreignJNDIProviders/{name}/foreignJNDILinkCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/foreignJNDIProviders/{name}/foreignJNDILinks

This resource manages a collection of [weblogic.management.configuration.ForeignJNDILinkMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ForeignJNDILinkMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ForeignJNDILinkMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/foreignJNDIProviders/{name}/foreignJNDILinks](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/foreignJNDIProviders/{name}/foreignJNDILinkCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/foreignJNDIProviders/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/foreignJNDIProviders/{name}/foreignJNDILinks](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.ForeignJNDILinkMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDILinkMBean](#) entity.

/management/weblogic/{version}/edit/foreignJNDIProviders/{name}/foreignJNDILinks/{name}

This resource manages a [weblogic.management.configuration.ForeignJNDILinkMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ForeignJNDILinkMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ForeignJNDILinkMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDILinkMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/foreignJNDIProviders/{name}/foreignJNDILinks/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/foreignJNDIProviders/{name}/foreignJNDILinks](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/foreignJNDIProviders/{name}/foreignJNDILinks/{name}](#) **rel=self**
This resource.

POST

Update this [weblogic.management.configuration.ForeignJNDILinkMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDILinkMBean](#) entity.

/management/weblogic/{version}/edit/interceptors

This resource manages a [weblogic.management.configuration.InterceptorsMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.InterceptorsMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.InterceptorsMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/interceptors](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/interceptors/interceptorCreateForm](#)
rel=interceptorCreateForm
The create form resource for this resource's interceptors collection resource.
- **uri**=[/management/weblogic/{version}/edit/interceptors/interceptors](#)
rel=interceptors
This resource's interceptors collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/interceptors](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.InterceptorsMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.InterceptorsMBean](#) entity.

/management/weblogic/{version}/edit/interceptors/interceptorCreateForm

This resource manages the create forms for the interceptors collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.InterceptorMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the interceptors collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.InterceptorMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/interceptors/interceptorCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/interceptors/interceptors](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/interceptors](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/interceptors/interceptorCreateForm](#)
rel=self
This resource.

/management/weblogic/{version}/edit/interceptors/interceptors

This resource manages a collection of [weblogic.management.configuration.InterceptorMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.InterceptorMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.InterceptorMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/interceptors/interceptors](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/interceptors/interceptorCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit/interceptors](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/interceptors/interceptors](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.InterceptorMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.InterceptorMBean](#) entity.

/management/weblogic/{version}/edit/interceptors/interceptors/{name}

This resource manages a [weblogic.management.configuration.InterceptorMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.InterceptorMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.InterceptorMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.InterceptorMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/interceptors/interceptors/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/interceptors/interceptors](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/interceptors/interceptors/{name}](#)
rel=self
This resource.

POST

Update this [weblogic.management.configuration.InterceptorMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.InterceptorMBean](#) entity.

/management/weblogic/{version}/edit/internalAppDeployments

This resource manages a collection of [weblogic.management.configuration.AppDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.AppDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.AppDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/internalAppDeployments/{name}

This resource manages a [weblogic.management.configuration.AppDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.AppDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.AppDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments/{name}/createPlan](#) **rel**=action **title**=createPlan
This resource's createPlan action resource.
- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments](#)
rel=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments/{name}/redploy](#) **rel**=redploy
This resource's redploy resource.
- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments/{name}](#)
rel=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeploymentCreateForm](#) **rel**=subDeploymentCreateForm
The create form resource for this resource's subDeployments collection resource.
- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments](#) **rel**=subDeployments
This resource's subDeployments collection resource.
- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments/{name}/update](#) **rel**=update
This resource's update resource.

POST

Update this [weblogic.management.configuration.AppDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.AppDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/internalAppDeployments/{name}/createPlan

The resource supports the following methods:

- [POST](#)

POST

The resource supports the following methods:

- [POST](#)
- [POST](#)

POST

Create a deployment plan in the specified directory.

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

planPath

planPath

Type: string

Response Body

Contains a JSON object with a string return field.

POST

Create a deployment plan in a default directory

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/internalAppDeployments/{name}/redeploy

The resource supports the following methods:

- [POST](#)

POST

Use the multi-part form to redeploy this application.

- `sourcePath`: the deployment to upload (required)
- `planPath`: the deployment plan to upload (optional)
- `model`: JSONObject containing an `AppDeploymentMBean` entity that contains the rest of the deployment information. However, `deployment/plan` information is ignored. (required)

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeploymentCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/internalAppDeployments/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeploymentCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeploymentCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/internalAppDeployments/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments/{name}](#) **rel=self**
This resource.
- [uri=/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel=subDeployments**
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel**=self

This resource.

- **uri**=[/management/weblogic/{version}/edit/internalAppDeployments/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments](#)
rel=subDeployments

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/internalAppDeployments/{name}/update

The resource supports the following methods:

- [POST](#)

POST

Update this application.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See *About Synchronous and Asynchronous Operations*.

Roles

Admin, Deployer

/management/weblogic/{version}/edit/internalLibraries

This resource manages a collection of [weblogic.management.configuration.LibraryMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.LibraryMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.LibraryMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/internalLibraries](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/internalLibraries](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/internalLibraries/{name}

This resource manages a [weblogic.management.configuration.LibraryMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.LibraryMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.LibraryMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/internalLibraries/{name}/createPlan **rel**=createPlan
This resource's createPlan action resource.
- **uri**=/management/weblogic/{version}/edit/internalLibraries/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/internalLibraries **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/internalLibraries/{name}/redeploy **rel**=redeploy
This resource's redeploy resource.
- **uri**=/management/weblogic/{version}/edit/internalLibraries/{name} **rel**=self
This resource.
- **uri**=/management/weblogic/{version}/edit/internalLibraries/{name}/subDeploymentsCreateForm **rel**=subDeploymentCreateForm
The create form resource for this resource's subDeployments collection resource.
- **uri**=/management/weblogic/{version}/edit/internalLibraries/{name}/subDeployments **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.LibraryMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.LibraryMBean](#) entity.

/management/weblogic/{version}/edit/internalLibraries/{name}/createPlan

The resource supports the following methods:

- [POST](#)

POST

The resource supports the following methods:

- [POST](#)
- [POST](#)

POST

Create a deployment plan in the specified directory.

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

planPath

planPath

Type: string

Response Body

Contains a JSON object with a string return field.

POST

Create a deployment plan in a default directory

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/internalLibraries/{name}/redeploy

The resource supports the following methods:

- [POST](#)

POST

Use the multi-part form to redeploy a library.

- `sourcePath`: the deployment to upload (required)
- `model`: JSONObject containing a `LibraryMBean` entity that contains the rest of the deployment information (required)

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

/management/weblogic/{version}/edit/internalLibraries/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/internalLibraries/{name}/subDeploymentsCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/internalLibraries/{name}/subDeployments](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/internalLibraries/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/internalLibraries/{name}/subDeploymentsCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/internalLibraries/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/internalLibraries/{name}/subDeployments](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/internalLibraries/{name}/subDeploymentCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/internalLibraries/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/internalLibraries/{name}/subDeployments](#) **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/internalLibraries/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/internalLibraries/{name}/subDeployments/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/internalLibraries/{name}/subDeployments](#) **rel**=parent
The parent resource of this resource.

This resource.

/management/weblogic/{version}/edit/internalLibraries/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/internalLibraries/{name}/subDeployments/{name}/subDeployments/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/internalLibraries/{name}/subDeployments/{name}/subDeployments **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/internalLibraries/{name}/subDeployments/{name}/subDeployments/{name} **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/internalLibraries/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/JDBCStoreCreateForm

This resource manages the create forms for the JDBCStores collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JDBCStoreMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JDBCStores collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCStoreMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JDBCStoreCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCStores](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCStoreCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/JDBCStores

This resource manages a collection of [weblogic.management.configuration.JDBCStoreMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JDBCStoreMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JDBCStoreMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JDBCStores](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCStoreCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCStores](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.JDBCStoreMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JDBCStoreMBean](#) entity.

/management/weblogic/{version}/edit/JDBCStores/{name}

This resource manages a [weblogic.management.configuration.JDBCStoreMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JDBCStoreMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JDBCStoreMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCStoreMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JDBCStores/{name}](#) **rel**=canonical
This resource.
- **rel**=dataSource
This resource's dataSource reference to a [weblogic.management.configuration.JDBCSystemResourceMBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCStores](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCStores/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.JDBCStoreMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JDBCStoreMBean](#) entity.

/management/weblogic/{version}/edit/JDBCSystemResourceCreateForm

This resource manages the create forms for the JDBCSystemResources collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JDBCSystemResourceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JDBCSystemResources collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCSystemResourceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResourceCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResources](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResourceCreateForm](#)
rel=self
This resource.

/management/weblogic/{version}/edit/JDBCSystemResources

This resource manages a collection of [weblogic.management.configuration.JDBCSystemResourceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JDBCSystemResourceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JDBCSystemResourceMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResources](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResourceCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResources](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.JDBCSystemResourceMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JDBCSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}

This resource manages a [weblogic.management.configuration.JDBCSystemResourceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.management.configuration.JDBCSystemResourceMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JDBCSystemResourceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCSystemResourceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource](#) **rel**=JDBCResource
This resource's JDBCResource singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResources/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResources](#) **rel**=parent
The parent resource of this resource.
- **rel**=resource
This resource's resource reference to a [weblogic.descriptor.DescriptorBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResources/{name}](#) **rel**=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeploymentCreateForm](#) **rel**=subDeploymentCreateForm
The create form resource for this resource's subDeployments collection resource.
- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments](#) **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.JDBCSystemResourceMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JDBCSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCDataSourceBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCDataSourceBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCDataSourceBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCConnectionPoolParams **rel**=JDBCConnectionPoolParams
This resource's JDBCConnectionPoolParams singleton resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDataSourceParams **rel**=JDBCDataSourceParams
This resource's JDBCDataSourceParams singleton resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams **rel**=JBCDriverParams
This resource's JBCDriverParams singleton resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JBCOracleParams **rel**=JBCOracleParams
This resource's JBCOracleParams singleton resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JBCXAParams **rel**=JBCXAParams
This resource's JBCXAParams singleton resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties **rel**=internalProperties
This resource's internalProperties singleton resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource **rel**=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCDataSourceBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCDataSourceBean](#) entity.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) instance.

The resource supports the following methods:

- [GET](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties](#) **rel=properties**
This resource's properties collection resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties/propertyCreateForm](#) **rel=propertyCreateForm**
The create form resource for this resource's properties collection resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties

This resource manages a collection of [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties/propertyCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties](#) **rel=self**

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties/{name} **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties/propertyCreateForm

This resource manages the create forms for the properties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the properties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties/propertyCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/internalProperties/propertyCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCConnectionPoolParams

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCConnectionPoolParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCConnectionPoolParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCConnectionPoolParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCConnectionPoolParams](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCConnectionPoolParams](#) **rel=self**

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCConnectionPoolParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCConnectionPoolParamsBean](#) entity.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDataSourceParams

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDataSourceParams **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDataSourceParams **rel**=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) entity.

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCDataSource](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCDataSource](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDataSource rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDataSource/properties rel=properties](#)

This resource's properties singleton resource.

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDataSource rel=self](#)

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCdriverParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCdriverParamsBean](#) entity.

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/properties **rel**=properties

This resource's properties collection resource.

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/propertyCreateForm **rel**=propertyCreateForm

The create form resource for this resource's properties collection resource.

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties **rel**=self

This resource.

GET

Get this collection of [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/properties **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/propertyCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/properties **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams/properties/properties/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/properties/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/properties **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/properties/{name} **rel**=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/propertyCreateForm

This resource manages the create forms for the properties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the properties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams/properties/propertyCreateForm **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams/properties/properties **rel**=create
The collection resource for this create form resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams/properties **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams/properties/propertyCreateForm **rel**=self
This resource.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCOracleParams

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCOracleParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCOracleParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCOracleParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCOracleParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCOracleParams](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCOracleParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCOracleParamsBean](#) entity.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCXAParams

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCXAParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCXAParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCXAParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCXAParams](#) [rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource](#) [rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/JDBCResource/JDBCXAParams](#) [rel=self](#)
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCXAParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCXAParamsBean](#) entity.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeploymentCreateForm rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments rel=create](#)
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name} rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeploymentCreateForm rel=self](#)
This resource.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments](#) [rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeploymentCreateForm](#) [rel=create-form](#)
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}](#) [rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments](#) [rel=self](#)
This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments/{name}](#) **rel=self**
This resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel=subDeployments**
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments/{name} **rel**=self
This resource.
- **uri**=/management/weblogic/{version}/edit/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/JMSBridgeDestinationCreateForm

This resource manages the create forms for the JMSBridgeDestinations collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JMSBridgeDestinations collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSBridgeDestinationCreateForm](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSBridgeDestinations](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSBridgeDestinationCreateForm](#)
rel=self

This resource.

/management/weblogic/{version}/edit/JMSBridgeDestinations

This resource manages a collection of [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSBridgeDestinations](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSBridgeDestinationCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSBridgeDestinations](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entity.

/management/weblogic/{version}/edit/JMSBridgeDestinations/{name}

This resource manages a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSBridgeDestinations/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSBridgeDestinations](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSBridgeDestinations/{name}](#)
rel=self
This resource.

POST

Update this [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModuleCreateForm

This resource manages the create forms for the JMSInteropModules collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JMSInteropModuleMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JMSInteropModules collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSInteropModuleMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModuleCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModuleCreateForm](#)
rel=self
This resource.

/management/weblogic/{version}/edit/JMSInteropModules

This resource manages a collection of [weblogic.management.configuration.JMSInteropModuleMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JMSInteropModuleMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JMSInteropModuleMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModuleCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.JMSInteropModuleMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSInteropModuleMBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}

This resource manages a [weblogic.management.configuration.JMSInteropModuleMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JMSInteropModuleMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JMSInteropModuleMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSInteropModuleMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel**=JMSResource
This resource's JMSResource singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules](#) **rel**=parent
The parent resource of this resource.
- **rel**=resource
This resource's resource reference to a [weblogic.descriptor.DescriptorBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}](#) **rel**=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeploymentCreateForm](#) **rel**=subDeploymentCreateForm
The create form resource for this resource's subDeployments collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments](#) **rel**=subDeployments
This resource's subDeployments collection resource.

POST

POST

Update this [weblogic.management.configuration.JMSInteropModuleMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSInteropModuleMBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource

This resource manages a [weblogic.j2ee.descriptor.wl.JMSBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JMSBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JMSBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFErrorHandlingCreateForm](#) **rel**=SAFErrorHandlingCreateForm
The create form resource for this resource's SAFErrorHandlings collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFErrorHandlings](#) **rel**=SAFErrorHandlings
This resource's SAFErrorHandlings collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinationCreateForm](#) **rel**=SAFImportedDestinationCreateForm
The create form resource for this resource's SAFImportedDestinations collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations](#) **rel**=SAFImportedDestinations
This resource's SAFImportedDestinations collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContextCreateForm](#) **rel**=SAFRemoteContextCreateForm
The create form resource for this resource's SAFRemoteContexts collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContexts](#) **rel**=SAFRemoteContexts
This resource's SAFRemoteContexts collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories](#) **rel**=connectionFactories
This resource's connectionFactories collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactoryCreateForm](#) **rel**=connectionFactoryCreateForm
The create form resource for this resource's connectionFactories collection resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/destinationKeyCreateForm **rel**=destinationKeyCreateForm
The create form resource for this resource's destinationKeys collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/destinationKeys **rel**=destinationKeys
This resource's destinationKeys collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServerCreateForm **rel**=foreignServerCreateForm
The create form resource for this resource's foreignServers collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers **rel**=foreignServers
This resource's foreignServers collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queueCreateForm **rel**=queueCreateForm
The create form resource for this resource's queues collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues **rel**=queues
This resource's queues collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/quotaCreateForm **rel**=quotaCreateForm
The create form resource for this resource's quotas collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/quotas **rel**=quotas
This resource's quotas collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource **rel**=self
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templateCreateForm **rel**=templateCreateForm
The create form resource for this resource's templates collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates **rel**=templates
This resource's templates collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topicCreateForm **rel**=topicCreateForm
The create form resource for this resource's topics collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics **rel**=topics
This resource's topics collection resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueueCreateForm
rel=uniformDistributedQueueCreateForm
The create form resource for this resource's uniformDistributedQueues collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues **rel**=uniformDistributedQueues
This resource's uniformDistributedQueues collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopicCreateForm
rel=uniformDistributedTopicCreateForm
The create form resource for this resource's uniformDistributedTopics collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics **rel**=uniformDistributedTopics
This resource's uniformDistributedTopics collection resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JMSBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JMSBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories

This resource manages a collection of [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactoryCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories](#) **rel=self**

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/clientParams](#) **rel=clientParams**
This resource's clientParams singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams](#) **rel=defaultDeliveryParams**
This resource's defaultDeliveryParams singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/flowControlParams](#) **rel=flowControlParams**
This resource's flowControlParams singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams](#) **rel=loadBalancingParams**
This resource's loadBalancingParams singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/securityParams](#) **rel=securityParams**
This resource's securityParams singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}](#) **rel=self**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/transactionParams](#) **rel=transactionParams**
This resource's transactionParams singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/clientParams

This resource manages a [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/clientParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/clientParams](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams

This resource manages a [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/flowControlParams

This resource manages a [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/flowControlParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/flowControlParams](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams

This resource manages a [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams](#) **rel=self**

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/securityParams

This resource manages a [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/securityParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/securityParams](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/transactionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/transactionParams](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories/{name}/transactionParams](#) **rel=self**

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactoryCreateForm

This resource manages the create forms for the connectionFactories collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity populated with default values that can be customized then posted (using the POST method) to the connectionFactories collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactoryCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactories](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/connectionFactoryCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/destinationKeyCreateForm

This resource manages the create forms for the destinationKeys collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `destinationKeys` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/destinationKeyCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/destinationKeys](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/destinationKeyCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/destinationKeys

This resource manages a collection of [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/destinationKeys](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/destinationKeyCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/destinationKeys](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/destinationKeys/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/destinationKeys/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/destinationKeys](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/destinationKeys/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServerCreateForm

This resource manages the create forms for the foreignServers collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `foreignServers` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServerCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServerCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers

This resource manages a collection of [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServerCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers](#) **rel=self**

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/JNDIProperties](#) **rel=JNDIProperties**
This resource's JNDIProperties collection resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm](#) **rel=JNDIPropertyCreateForm**
The create form resource for this resource's JNDIProperties collection resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories](#) **rel=foreignConnectionFactories**
This resource's foreignConnectionFactories collection resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm](#) **rel=foreignConnectionFactoryCreateForm**
The create form resource for this resource's foreignConnectionFactories collection resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm](#) **rel=foreignDestinationCreateForm**
The create form resource for this resource's foreignDestinations collection resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignDestinations](#) **rel=foreignDestinations**
This resource's foreignDestinations collection resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}](#) **rel=self**
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories

This resource manages a collection of [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactory/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm

This resource manages the create forms for the foreignConnectionFactories collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `foreignConnectionFactories` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm

This resource manages the create forms for the foreignDestinations collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the foreignDestinations collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignDestinations](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignDestinations

This resource manages a collection of [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignDestinations](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignDestinations](#) **rel=self**

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignDestinations/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignDestinations/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignDestinations](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/foreignDestinations/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/JNDIProperties

This resource manages a collection of [weblogic.j2ee.descriptor.wl.PropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.PropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.PropertyBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/JNDIProperties](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/JNDIProperties](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/JNDIProperties/{key}

This resource manages a [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/JNDIProperties/{key}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/JNDIProperties](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/JNDIProperties/{key}](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm

This resource manages the create forms for the JNDIProperties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JNDIProperties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/JNDIProperties](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queueCreateForm

This resource manages the create forms for the queues collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity populated with default values that can be customized then posted (using the POST method) to the queues collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queueCreateForm rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues rel=create](#)

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queueCreateForm rel=self](#)

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues

This resource manages a collection of [weblogic.j2ee.descriptor.wl.QueueBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.QueueBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.QueueBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queuecreateForm rel=create-form](#)
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues rel=self](#)
This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.QueueBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/deliveryFailureParams](#) **rel=deliveryFailureParams**
This resource's `deliveryFailureParams` singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/deliveryParamsOverrides](#) **rel=deliveryParamsOverrides**
This resource's `deliveryParamsOverrides` singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/messageLoggingParams](#) **rel=messageLoggingParams**
This resource's `messageLoggingParams` singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues](#) **rel=parent**
The parent resource of this resource.
- **rel=quota**
This resource's quota reference to a `weblogic.j2ee.descriptor.wl.QuotaBean` resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}](#) **rel=self**
This resource.
- **rel=template**
This resource's template reference to a `weblogic.j2ee.descriptor.wl.TemplateBean` resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/thresholds](#) **rel=thresholds**
This resource's `thresholds` singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/deliveryFailureParams/findSubDeploymentName](#) **rel**=action **title**=findSubDeploymentName
This resource's findSubDeploymentName action resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/deliveryFailureParams](#) **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/deliveryFailureParams](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/deliveryParamsOverrides **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/deliveryParamsOverrides **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/messageLoggingParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/messageLoggingParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/thresholds **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/queues/{name}/thresholds **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/quotaCreateForm

This resource manages the create forms for the quotas collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity populated with default values that can be customized then posted (using the POST method) to the quotas collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/quotaCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/quotas](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/quotaCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/quotas

This resource manages a collection of [weblogic.j2ee.descriptor.wl.QuotaBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.QuotaBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.QuotaBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/quotas](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/quotaCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/quotas](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/quotas/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/quotas/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/quotas](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/quotas/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFErorHandlingCreateForm

This resource manages the create forms for the SAFErorHandlings collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFErrorHandlings collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFErrorHandlingCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFErrorHandlings **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFErrorHandlingCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFEErrorHandlings

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFErrorHandlings](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFErrorHandlingCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFErrorHandlings](#) **rel=self**

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFEErrorHandlings/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAErrorHandlingBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) entity.

This method can return the following links:

- **rel=SAFEErrorDestination**
This resource's SAFEErrorDestination reference to a [weblogic.j2ee.descriptor.wl.SAFDestinationBean](#) resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFEErrorHandlings/{name} rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFEErrorHandlings rel=parent**
The parent resource of this resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFEErrorHandlings/{name} rel=self**
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinationCreateForm

This resource manages the create forms for the SAFImportedDestinations collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFImportedDestinations collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinationCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinationCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinationCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

This method can return the following links:

- **rel=SAFErrorHandling**
This resource's SAFErrorHandling reference to a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm**
rel=SAFQueueCreateForm
The create form resource for this resource's SAFQueues collection resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues** **rel=SAFQueues**
This resource's SAFQueues collection resource.
- **rel=SAFRemoteContext**
This resource's SAFRemoteContext reference to a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm**
rel=SAFTopicCreateForm
The create form resource for this resource's SAFTopics collection resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics** **rel=SAFTopics**
This resource's SAFTopics collection resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}** **rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams**
rel=messageLoggingParams
This resource's messageLoggingParams singleton resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations** **rel=parent**
The parent resource of this resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}** **rel=self**

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm

This resource manages the create forms for the SAFQueues collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFQueues collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues](#) **rel=self**
This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

This method can return the following links:

- **rel=SAFErrorHandling**
This resource's SAFErrorHandling reference to a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name} rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams rel=messageLoggingParams**
This resource's messageLoggingParams singleton resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues rel=parent**
The parent resource of this resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name} rel=self**
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm

This resource manages the create forms for the SAFTopics collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFTopics collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics](#) **rel=self**

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

This method can return the following links:

- **rel=SAFErrorHandling**
This resource's SAFErrorHandling reference to a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name} rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams rel=messageLoggingParams**
This resource's messageLoggingParams singleton resource.

The parent resource of this resource.
- **uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name} rel=self**
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContextCreateForm

This resource manages the create forms for the SAFRemoteContexts collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFRemoteContexts collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContextCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContexts](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContextCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContexts

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContexts](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContextCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContexts](#) **rel=self**
This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContexts/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext rel=SAFLoginContext](#)
This resource's SAFLoginContext singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContexts/{name} rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContexts rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContexts/{name} rel=self](#)
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext

This resource manages a [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContexts/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templateCreateForm

This resource manages the create forms for the templates collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity populated with default values that can be customized then posted (using the POST method) to the templates collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templateCreateForm rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates rel=create](#)

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templateCreateForm rel=self](#)

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates

This resource manages a collection of [weblogic.j2ee.descriptor.wl.TemplateBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.TemplateBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.TemplateBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templateCreateForm rel=create-form](#)
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates rel=self](#)
This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/findErrorDestination](#) **rel=action**
title=findErrorDestination
This resource's findErrorDestination action resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/deliveryFailureParams](#) **rel=deliveryFailureParams**
This resource's deliveryFailureParams singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/deliveryParamsOverrides](#) **rel=deliveryParamsOverrides**
This resource's deliveryParamsOverrides singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/groupParamCreateForm](#) **rel=groupParamCreateForm**
The create form resource for this resource's groupParams collection resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/groupParams](#) **rel=groupParams**
This resource's groupParams collection resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/messageLoggingParams](#) **rel=messageLoggingParams**
This resource's messageLoggingParams singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/multicast](#) **rel=multicast**
This resource's multicast singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates](#) **rel=parent**
The parent resource of this resource.
- **rel=quota**
This resource's quota reference to a [weblogic.j2ee.descriptor.wl.QuotaBean](#) resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name} **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/thresholds **rel**=thresholds

This resource's thresholds singleton resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/topicSubscriptionParams **rel**=topicSubscriptionParams

This resource's topicSubscriptionParams singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/deliveryFailureParams/findSubDeploymentName](#) **rel**=action **title**=findSubDeploymentName
This resource's findSubDeploymentName action resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/deliveryFailureParams](#) **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/deliveryFailureParams](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/deliveryParamsOverrides](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/deliveryParamsOverrides](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/findErrorDestination

The resource supports the following methods:

- [POST](#)

POST

Finds the name of the error destination to use when a destination comes from a specific group

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

subDeploymentName

The subDeployment for which to find the quota

Type: string

Response Body

Contains a JSON object with a weblogic.j2ee.descriptor.wl.DestinationBean reference return field.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/groupParamCreateForm

This resource manages the create forms for the groupParams collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity populated with default values that can be customized then posted (using the POST method) to the groupParams collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/groupParamCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/groupParams **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/groupParamCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/groupParams

This resource manages a collection of [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/groupParams](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/groupParamCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/groupParams](#) **rel=self**

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/groupParams/{subDeploymentName}

This resource manages a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/groupParams/{subDeploymentName}](#) **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/groupParams](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/groupParams/{subDeploymentName}](#) **rel**=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/messageLoggingParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/messageLoggingParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/multicast

This resource manages a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/multicast](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/multicast](#) **rel=self**
This resource.
- **rel=templateBean**
This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/thresholds](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/thresholds](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/topicSubscriptionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/topicSubscriptionParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/templates/{name}/topicSubscriptionParams **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topicCreateForm

This resource manages the create forms for the topics collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity populated with default values that can be customized then posted (using the POST method) to the topics collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topicCreateForm rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics rel=create](#)

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topicCreateForm rel=self](#)

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics

This resource manages a collection of [weblogic.j2ee.descriptor.wl.TopicBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.TopicBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.TopicBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topicCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.TopicBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/deliveryFailureParams](#) **rel**=deliveryFailureParams
This resource's deliveryFailureParams singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/deliveryParamsOverrides](#) **rel**=deliveryParamsOverrides
This resource's deliveryParamsOverrides singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/messageLoggingParams](#) **rel**=messageLoggingParams
This resource's messageLoggingParams singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/multicast](#) **rel**=multicast
This resource's multicast singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics](#) **rel**=parent
The parent resource of this resource.
- **rel**=quota
This resource's quota reference to a [weblogic.j2ee.descriptor.wl.QuotaBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}](#) **rel**=self
This resource.
- **rel**=template
This resource's template reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/thresholds](#) **rel**=thresholds
This resource's thresholds singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/topicSubscriptionParams](#) **rel**=topicSubscriptionParams

This resource's topicSubscriptionParams singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/deliveryFailureParams/findSubDeploymentName](#) **rel**=action **title**=findSubDeploymentName
This resource's findSubDeploymentName action resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/deliveryFailureParams](#) **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/deliveryFailureParams](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/deliveryParamsOverrides](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/deliveryParamsOverrides](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/messageLoggingParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/messageLoggingParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/multicast

This resource manages a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/multicast](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/multicast](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/thresholds](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/thresholds](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/topicSubscriptionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/topicSubscriptionParams **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/topics/{name}/topicSubscriptionParams **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueueCreateForm

This resource manages the create forms for the uniformDistributedQueues collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `uniformDistributedQueues` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueueCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueueCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues

This resource manages a collection of [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueueCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues](#) **rel=self**

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams](#) **rel**=deliveryFailureParams
This resource's deliveryFailureParams singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides](#) **rel**=deliveryParamsOverrides
This resource's deliveryParamsOverrides singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams](#) **rel**=messageLoggingParams
This resource's messageLoggingParams singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues](#) **rel**=parent
The parent resource of this resource.
- **rel**=quota
This resource's quota reference to a [weblogic.j2ee.descriptor.wl.QuotaBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel**=self
This resource.
- **rel**=template
This resource's template reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds](#) **rel**=thresholds
This resource's thresholds singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams/findSubDeploymentName **rel**=action **title**=findSubDeploymentName
This resource's findSubDeploymentName action resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopicCreateForm

This resource manages the create forms for the uniformDistributedTopics collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `uniformDistributedTopics` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopicCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopicCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics

This resource manages a collection of [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopicCreateForm rel=create-form](#)

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics rel=self](#)

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams **rel**=deliveryFailureParams

This resource's deliveryFailureParams singleton resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides **rel**=deliveryParamsOverrides

This resource's deliveryParamsOverrides singleton resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams **rel**=messageLoggingParams

This resource's messageLoggingParams singleton resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/multicast **rel**=multicast

This resource's multicast singleton resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics **rel**=parent

The parent resource of this resource.

- **rel**=quota

This resource's quota reference to a [weblogic.j2ee.descriptor.wl.QuotaBean](#) resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name} **rel**=self

This resource.

- **rel**=template

This resource's template reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds **rel**=thresholds

This resource's thresholds singleton resource.

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/topicSubscriptionParams
rel=topicSubscriptionParams

This resource's topicSubscriptionParams singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams/findSubDeploymentName **rel**=action **title**=findSubDeploymentName
This resource's findSubDeploymentName action resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/multicast

This resource manages a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/multicast](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/multicast](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/topicSubscriptionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/topicSubscriptionParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/JMSResource/uniformDistributedTopics/{name}/topicSubscriptionParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeploymentCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeploymentCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeploymentCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments/{name} rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments/{name} rel=self](#)
This resource.
- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments/{name}/subDeployments rel=subDeployments](#)
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments/{name}/subDeployments](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments/{name}/subDeployments](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments/{name}/subDeployments](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel**=self

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSInteropModules/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel**=subDeployments

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/JMSServerCreateForm

This resource manages the create forms for the JMSServers collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JMSServerMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JMSServers collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSServerMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSServerCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSServers](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSServerCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/JMSServers

This resource manages a collection of [weblogic.management.configuration.JMSServerMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JMSServerMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JMSServerMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSServers](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSServerCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSServers](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.JMServerMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMServerMBean](#) entity.

/management/weblogic/{version}/edit/JMSServers/{name}

This resource manages a [weblogic.management.configuration.JMSServerMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JMServerMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JMSServerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSServerMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSServers/{name}/JMSSMessageLogFile](#) **rel**=JMSSMessageLogFile
This resource's JMSSMessageLogFile singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSServers/{name}](#) **rel**=canonical
This resource.
- [uri=/management/weblogic/{version}/edit/JMSServers](#) **rel**=parent
The parent resource of this resource.
- **rel**=persistentStore
This resource's persistentStore reference to a [weblogic.management.configuration.PersistentStoreMBean](#) resource.
- [uri=/management/weblogic/{version}/edit/JMSServers/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.JMSServerMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSServerMBean](#) entity.

/management/weblogic/{version}/edit/JMSServers/{name}/JMSMessageLogFile

This resource manages a [weblogic.management.configuration.JMSMessageLogFileMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.JMSMessageLogFileMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSMessageLogFileMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSServers/{name}/JMSMessageLogFile](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSServers/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSServers/{name}/JMSMessageLogFile](#) **rel=self**
This resource.

POST

Update this [weblogic.management.configuration.JMSMessageLogFileMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.JMSMessageLogFileMBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResourceCreateForm

This resource manages the create forms for the JMSSystemResources collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JMSSystemResourceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JMSSystemResources collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSSystemResourceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResourceCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResourceCreateForm](#)
rel=self
This resource.

/management/weblogic/{version}/edit/JMSSystemResources

This resource manages a collection of [weblogic.management.configuration.JMSSystemResourceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JMSSystemResourceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JMSSystemResourceMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResourceCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.JMSSystemResourceMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}

This resource manages a [weblogic.management.configuration.JMSSystemResourceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JMSSystemResourceMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JMSSystemResourceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSSystemResourceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel**=JMSResource
This resource's JMSResource singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources](#) **rel**=parent
The parent resource of this resource.
- **rel**=resource
This resource's resource reference to a [weblogic.descriptor.DescriptorBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}](#) **rel**=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeploymentCreateForm](#) **rel**=subDeploymentCreateForm
The create form resource for this resource's subDeployments collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments](#) **rel**=subDeployments
This resource's subDeployments collection resource.

POST

POST

Update this [weblogic.management.configuration.JMSSystemResourceMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource

This resource manages a [weblogic.j2ee.descriptor.wl.JMSBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JMSBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JMSBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFErrorHandlingCreateForm **rel**=SAFErrorHandlingCreateForm
The create form resource for this resource's SAFErrorHandlings collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFErrorHandlings **rel**=SAFErrorHandlings
This resource's SAFErrorHandlings collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinationCreateForm **rel**=SAFImportedDestinationCreateForm
The create form resource for this resource's SAFImportedDestinations collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations **rel**=SAFImportedDestinations
This resource's SAFImportedDestinations collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContextCreateForm **rel**=SAFRemoteContextCreateForm
The create form resource for this resource's SAFRemoteContexts collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts **rel**=SAFRemoteContexts
This resource's SAFRemoteContexts collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories **rel**=connectionFactories
This resource's connectionFactories collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactoryCreateForm **rel**=connectionFactoryCreateForm
The create form resource for this resource's connectionFactories collection resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/destinationKeyCreateForm **rel**=destinationKeyCreateForm
The create form resource for this resource's destinationKeys collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/destinationKeys **rel**=destinationKeys
This resource's destinationKeys collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServerCreateForm **rel**=foreignServerCreateForm
The create form resource for this resource's foreignServers collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers **rel**=foreignServers
This resource's foreignServers collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queueCreateForm **rel**=queueCreateForm
The create form resource for this resource's queues collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues **rel**=queues
This resource's queues collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/quotaCreateForm **rel**=quotaCreateForm
The create form resource for this resource's quotas collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/quotas **rel**=quotas
This resource's quotas collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource **rel**=self
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templateCreateForm **rel**=templateCreateForm
The create form resource for this resource's templates collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates **rel**=templates
This resource's templates collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topicCreateForm **rel**=topicCreateForm
The create form resource for this resource's topics collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics **rel**=topics
This resource's topics collection resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueueCreateForm
rel=uniformDistributedQueueCreateForm
The create form resource for this resource's uniformDistributedQueues collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues **rel**=uniformDistributedQueues
This resource's uniformDistributedQueues collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopicCreateForm
rel=uniformDistributedTopicCreateForm
The create form resource for this resource's uniformDistributedTopics collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics **rel**=uniformDistributedTopics
This resource's uniformDistributedTopics collection resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JMSBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JMSBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories

This resource manages a collection of [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactoryCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/clientParams](#) **rel=clientParams**

This resource's clientParams singleton resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams](#) **rel=defaultDeliveryParams**

This resource's defaultDeliveryParams singleton resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/flowControlParams](#) **rel=flowControlParams**

This resource's flowControlParams singleton resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams](#) **rel=loadBalancingParams**

This resource's loadBalancingParams singleton resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/securityParams](#) **rel=securityParams**

This resource's securityParams singleton resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}](#) **rel=self**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/transactionParams](#) **rel=transactionParams**

This resource's transactionParams singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/clientParams

This resource manages a [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/clientParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/clientParams](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams

This resource manages a [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams](#) **rel**=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/flowControlParams

This resource manages a [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/flowControlParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/flowControlParams](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/flowControl-

POST

Update this [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams

This resource manages a [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams **rel**=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/securityParams

This resource manages a [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/securityParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/securityParams](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/transactionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/transactionParams **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/transactionParams **rel**=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactoryCreateForm

This resource manages the create forms for the connectionFactories collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity populated with default values that can be customized then posted (using the POST method) to the connectionFactories collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactoryCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactories](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/connectionFactoryCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/destinationKeyCreateForm

This resource manages the create forms for the destinationKeys collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [destinationKeys](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource/destinationKeyCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource/destinationKeys](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource/destinationKeyCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/destinationKeys

This resource manages a collection of [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource/destinationKeys](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource/destinationKeyCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource/destinationKeys](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/destinationKeys/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/destinationKeys/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/destinationKeys](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/destinationKeys/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServerCreateForm

This resource manages the create forms for the foreignServers collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `foreignServers` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServerCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServerCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers

This resource manages a collection of [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServerCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties](#) **rel=JNDIProperties**
This resource's JNDIProperties collection resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm](#) **rel=JNDIPropertyCreateForm**
The create form resource for this resource's JNDIProperties collection resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories](#) **rel=foreignConnectionFactories**
This resource's foreignConnectionFactories collection resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm](#) **rel=foreignConnectionFactoryCreateForm**
The create form resource for this resource's foreignConnectionFactories collection resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm](#) **rel=foreignDestinationCreateForm**
The create form resource for this resource's foreignDestinations collection resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations](#) **rel=foreignDestinations**
This resource's foreignDestinations collection resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}](#) **rel=self**
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories

This resource manages a collection of [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactory/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm

This resource manages the create forms for the foreignConnectionFactories collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `foreignConnectionFactories` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm

This resource manages the create forms for the foreignDestinations collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the foreignDestinations collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations

This resource manages a collection of [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations/{name} **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties

This resource manages a collection of [weblogic.j2ee.descriptor.wl.PropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.PropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.PropertyBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties/{key}

This resource manages a [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties/{key} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties/{key} **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm

This resource manages the create forms for the JNDIProperties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JNDIProperties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queueCreateForm

This resource manages the create forms for the queues collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity populated with default values that can be customized then posted (using the POST method) to the queues collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queueCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queueCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues

This resource manages a collection of [weblogic.j2ee.descriptor.wl.QueueBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.QueueBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.QueueBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queuecreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues](#) **rel**=self
This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.QueueBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams](#) **rel=deliveryFailureParams**
This resource's `deliveryFailureParams` singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryParamsOverrides](#) **rel=deliveryParamsOverrides**
This resource's `deliveryParamsOverrides` singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/messageLoggingParams](#) **rel=messageLoggingParams**
This resource's `messageLoggingParams` singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues](#) **rel=parent**
The parent resource of this resource.
- **rel=quota**
This resource's quota reference to a `weblogic.j2ee.descriptor.wl.QuotaBean` resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}](#) **rel=self**
This resource.
- **rel=template**
This resource's template reference to a `weblogic.j2ee.descriptor.wl.TemplateBean` resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/thresholds](#) **rel=thresholds**
This resource's `thresholds` singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams/findSubDeploymentName](#) **rel**=action **title**=findSubDeploymentName
This resource's findSubDeploymentName action resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams](#) **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryParamsOverrides **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryParamsOverrides **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/messageLoggingParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/messageLoggingParams **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/thresholds **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/queues/{name}/thresholds **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/quotaCreateForm

This resource manages the create forms for the quotas collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity populated with default values that can be customized then posted (using the POST method) to the quotas collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/quotaCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/quotas](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/quotaCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/quotas

This resource manages a collection of [weblogic.j2ee.descriptor.wl.QuotaBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.QuotaBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.QuotaBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/quotas](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/quoteCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/quotas](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/quotas/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource/quotas/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource/quotas](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource/quotas/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlingCreateForm

This resource manages the create forms for the SAFEErrorHandlings collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [SAFEErrorHandlings](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlingCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlingCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFErrorHandlings](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFErrorHandlingCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFErrorHandlings](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAErrorHandlingBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) entity.

This method can return the following links:

- **rel=SAFEErrorDestination**
This resource's SAFEErrorDestination reference to a [weblogic.j2ee.descriptor.wl.SAFDestinationBean](#) resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings/{name} rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings rel=parent**
The parent resource of this resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings/{name} rel=self**
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinationCreateForm

This resource manages the create forms for the SAFImportedDestinations collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFImportedDestinations collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource/SAFImportedDestinationCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource/SAFImportedDestinations](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource/SAFImportedDestinationCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinationCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

This method can return the following links:

- **rel=SAFErrorHandling**
This resource's SAFErrorHandling reference to a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm**
rel=SAFQueueCreateForm
The create form resource for this resource's SAFQueues collection resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues** **rel=SAFQueues**
This resource's SAFQueues collection resource.
- **rel=SAFRemoteContext**
This resource's SAFRemoteContext reference to a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm**
rel=SAFTopicCreateForm
The create form resource for this resource's SAFTopics collection resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics** **rel=SAFTopics**
This resource's SAFTopics collection resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}** **rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams**
rel=messageLoggingParams
This resource's messageLoggingParams singleton resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations** **rel=parent**
The parent resource of this resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}** **rel=self**

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm

This resource manages the create forms for the SAFQueues collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFQueues collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm **rel**=create-form
The create form resource for this collection resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues **rel**=self
This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

This method can return the following links:

- **rel=SAFErrorHandling**
This resource's SAFErrorHandling reference to a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name} rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams rel=messageLoggingParams**
This resource's messageLoggingParams singleton resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues rel=parent**
The parent resource of this resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name} rel=self**
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm

This resource manages the create forms for the SAFTopics collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFTopics collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

This method can return the following links:

- **rel=SAFErrorHandling**
This resource's SAFErrorHandling reference to a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name} rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams rel=messageLoggingParams**
This resource's messageLoggingParams singleton resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics rel=parent**
The parent resource of this resource.
- **uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name} rel=self**
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContextCreateForm

This resource manages the create forms for the SAFRemoteContexts collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFRemoteContexts collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContextCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContextCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContextCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts](#) **rel**=self
This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext](#) **rel=SAFLoginContext**
This resource's SAFLoginContext singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}](#) **rel=self**
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext

This resource manages a [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templateCreateForm

This resource manages the create forms for the templates collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity populated with default values that can be customized then posted (using the POST method) to the templates collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templateCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templateCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates

This resource manages a collection of [weblogic.j2ee.descriptor.wl.TemplateBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.TemplateBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.TemplateBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templateCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates](#) **rel=self**
This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/findErrorDestination](#) **rel**=action
title=findErrorDestination
This resource's findErrorDestination action resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams](#) **rel**=deliveryFailureParams
This resource's deliveryFailureParams singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryParamsOverrides](#) **rel**=deliveryParamsOverrides
This resource's deliveryParamsOverrides singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParamCreateForm](#) **rel**=groupParamCreateForm
The create form resource for this resource's groupParams collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams](#) **rel**=groupParams
This resource's groupParams collection resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/messageLoggingParams](#) **rel**=messageLoggingParams
This resource's messageLoggingParams singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/multicast](#) **rel**=multicast
This resource's multicast singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates](#) **rel**=parent
The parent resource of this resource.
- **rel**=quota
This resource's quota reference to a [weblogic.j2ee.descriptor.wl.QuotaBean](#) resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name} **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/thresholds **rel**=thresholds

This resource's thresholds singleton resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/topicSubscriptionParams **rel**=topicSubscriptionParams

This resource's topicSubscriptionParams singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams/findSubDeploymentName
rel=action **title**=findSubDeploymentName
This resource's findSubDeploymentName action resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryParamsOverrides](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryParamsOverrides](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/findErrorDestination

The resource supports the following methods:

- [POST](#)

POST

Finds the name of the error destination to use when a destination comes from a specific group

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

subDeploymentName

The subDeployment for which to find the quota

Type: string

Response Body

Contains a JSON object with a weblogic.j2ee.descriptor.wl.DestinationBean reference return field.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParamCreateForm

This resource manages the create forms for the groupParams collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity populated with default values that can be customized then posted (using the POST method) to the groupParams collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParamCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParamCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams

This resource manages a collection of [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParamCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams/{subDeploymentName}

This resource manages a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams/{subDeploymentName} **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams/{subDeploymentName} **rel**=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/messageLoggingParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/messageLoggingParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/multicast

This resource manages a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/multicast **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/multicast **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/thresholds](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/thresholds](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/topicSubscriptionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/topicSubscriptionParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/templates/{name}/topicSubscriptionParams **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topicCreateForm

This resource manages the create forms for the topics collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity populated with default values that can be customized then posted (using the POST method) to the topics collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topicCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topicCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics

This resource manages a collection of [weblogic.j2ee.descriptor.wl.TopicBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.TopicBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.TopicBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topicCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.TopicBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams **rel**=deliveryFailureParams
This resource's deliveryFailureParams singleton resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryParamsOverrides **rel**=deliveryParamsOverrides
This resource's deliveryParamsOverrides singleton resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/messageLoggingParams **rel**=messageLoggingParams
This resource's messageLoggingParams singleton resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/multicast **rel**=multicast
This resource's multicast singleton resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics **rel**=parent
The parent resource of this resource.
- **rel**=quota
This resource's quota reference to a [weblogic.j2ee.descriptor.wl.QuotaBean](#) resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name} **rel**=self
This resource.
- **rel**=template
This resource's template reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/thresholds **rel**=thresholds
This resource's thresholds singleton resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/topicSubscriptionParams **rel**=topicSubscriptionParams

This resource's topicSubscriptionParams singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams/findSubDeploymentName](#) **rel**=action **title**=findSubDeploymentName
This resource's findSubDeploymentName action resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams](#) **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryParamsOverrides **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryParamsOverrides **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/messageLoggingParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/messageLoggingParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/multicast

This resource manages a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/multicast](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/multicast](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/thresholds](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/thresholds](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/topicSubscriptionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/topicSubscriptionParams **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/topics/{name}/topicSubscriptionParams **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueueCreateForm

This resource manages the create forms for the uniformDistributedQueues collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `uniformDistributedQueues` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueueCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueueCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues

This resource manages a collection of [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueueCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams](#) **rel**=deliveryFailureParams
This resource's deliveryFailureParams singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides](#) **rel**=deliveryParamsOverrides
This resource's deliveryParamsOverrides singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams](#) **rel**=messageLoggingParams
This resource's messageLoggingParams singleton resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues](#) **rel**=parent
The parent resource of this resource.
- **rel**=quota
This resource's quota reference to a [weblogic.j2ee.descriptor.wl.QuotaBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel**=self
This resource.
- **rel**=template
This resource's template reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds](#) **rel**=thresholds
This resource's thresholds singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams/findSubDeploymentName rel=action title=findSubDeploymentName](#)
This resource's findSubDeploymentName action resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams rel=canonical](#)
This resource.
- [rel=errorDestination](#)
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name} rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams rel=self](#)
This resource.
- [rel=templateBean](#)
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams](#) **rel=self**
This resource.
- **rel=templateBean**
This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/thresh-

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopicCreateForm

This resource manages the create forms for the uniformDistributedTopics collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `uniformDistributedTopics` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopicCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopicCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics

This resource manages a collection of [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopicCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams](#) **rel=deliveryFailureParams**
This resource's `deliveryFailureParams` singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides](#) **rel=deliveryParamsOverrides**
This resource's `deliveryParamsOverrides` singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams](#) **rel=messageLoggingParams**
This resource's `messageLoggingParams` singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/multicast](#) **rel=multicast**
This resource's `multicast` singleton resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics](#) **rel=parent**
The parent resource of this resource.
- **rel=quota**
This resource's `quota` reference to a `weblogic.j2ee.descriptor.wl.QuotaBean` resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel=self**
This resource.
- **rel=template**
This resource's `template` reference to a `weblogic.j2ee.descriptor.wl.TemplateBean` resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds](#) **rel=thresholds**

This resource's thresholds singleton resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSSResource/uniformDistributedTopics/{name}/topicSubscriptionParams
rel=topicSubscriptionParams

This resource's topicSubscriptionParams singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams/findSubDeploymentName **rel**=action **title**=findSubDeploymentName
This resource's findSubDeploymentName action resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/multicast

This resource manages a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/multicast](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/multicast](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/topicSubscriptionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/topicSubscriptionParams](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/topicSubscriptionParams](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeploymentCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeploymentCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments](#) [rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeploymentCreateForm](#) [rel=create-form](#)
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}](#) [rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments](#) [rel=self](#)
This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments/{name} **rel**=self
This resource.
- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments/{name}/subDeployments/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments/{name}/subDeployments **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments/{name}/subDeployments/{name} **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/JMSSystemResources/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/JMX

This resource manages a [weblogic.management.configuration.JMXMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.JMXBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMXBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JMX](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JMX](#) **rel**=self
This resource.

POST

POST

Update this [weblogic.management.configuration.JMXMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.JMXMBean](#) entity.

/management/weblogic/{version}/edit/joltConnectionPoolCreateForm

This resource manages the create forms for the joltConnectionPools collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JoltConnectionPoolMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `joltConnectionPools` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JoltConnectionPoolMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/joltConnectionPoolCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/joltConnectionPools](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/joltConnectionPoolCreateForm](#)
rel=self
This resource.

/management/weblogic/{version}/edit/joltConnectionPools

This resource manages a collection of [weblogic.management.configuration.JoltConnectionPoolMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JoltConnectionPoolMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JoltConnectionPoolMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/joltConnectionPools](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/joltConnectionPoolCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/joltConnectionPools](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.JoltConnectionPoolMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.JoltConnectionPoolMBean](#) entity.

/management/weblogic/{version}/edit/joltConnectionPools/{name}

This resource manages a [weblogic.management.configuration.JoltConnectionPoolMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JoltConnectionPoolMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.JoltConnectionPoolMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JoltConnectionPoolMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/joltConnectionPools/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/joltConnectionPools](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/joltConnectionPools/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.JoltConnectionPoolMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.JoltConnectionPoolMBean](#) entity.

/management/weblogic/{version}/edit/JPA

This resource manages a [weblogic.management.configuration.JPAMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.JPAMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JPAMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JPA](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JPA](#) **rel**=self
This resource.

POST

POST

Update this [weblogic.management.configuration.JPAMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.JPAMBean](#) entity.

/management/weblogic/{version}/edit/JTA

This resource manages a [weblogic.management.configuration.JTAMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.JTAMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JTAMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/JTA](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/JTA](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.JTAMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.JTAMBean](#) entity.

/management/weblogic/{version}/edit/libraries

This resource manages a collection of [weblogic.management.configuration.LibraryMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.LibraryMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.LibraryMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/libraries](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/libraries](#) **rel**=self
This resource.

POST

The resource supports the following methods:

- [POST accepting application/json](#)
- [POST accepting multipart/form-data](#)

POST accepting application/json

This resource is used to deploy libraries that are already on the administration server.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.LibraryMBean](#) entity.

To deploy a library, you must provide the name of the library, the path to the library, and the targets to which the library will be deployed.

Use the multi-part form to deploy a library.

- `sourcePath`: the deployment to upload (required)
- `model`: JSONObject containing a LibraryMBean entity that contains the rest of the deployment information (required)

POST accepting multipart/form-data

Upload a library from the client to the server then deploy it.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

Request Body

Use the multi-part form to upload a library from the client to the server then deploy it.

- `sourcePath`: the deployment to upload (required)
- `model`: JSONObject containing a LibraryMBean entity that contains the rest of the deployment information (required)

/management/weblogic/{version}/edit/libraries/{name}

This resource manages a [weblogic.management.configuration.LibraryMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Undeploy a library.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.LibraryMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.LibraryMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/libraries/{name}/createPlan](#)
[rel=action](#) [title=createPlan](#)
This resource's createPlan action resource.
- [uri=/management/weblogic/{version}/edit/libraries/{name}](#) [rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/libraries](#) [rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/libraries/{name}/redeploy](#)
[rel=redeploy](#)
This resource's redeploy resource.
- [uri=/management/weblogic/{version}/edit/libraries/{name}](#) [rel=self](#)
This resource.
- [uri=/management/weblogic/{version}/edit/libraries/{name}/subDeploymentCreateForm](#) [rel=subDeploymentCreateForm](#)
The create form resource for this resource's subDeployments collection resource.
- [uri=/management/weblogic/{version}/edit/libraries/{name}/subDeployments](#)
[rel=subDeployments](#)
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.LibraryMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.LibraryMBean](#) entity.

/management/weblogic/{version}/edit/libraries/{name}/createPlan

The resource supports the following methods:

- [POST](#)

POST

The resource supports the following methods:

- [POST](#)
- [POST](#)

POST

Create a deployment plan in the specified directory.

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

planPath

planPath

Type: string

Response Body

Contains a JSON object with a string return field.

POST

Create a deployment plan in a default directory

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/libraries/{name}/redeploy

The resource supports the following methods:

- [POST](#)

POST

Use the multi-part form to redeploy a library.

- `sourcePath`: the deployment to upload (required)
- `model`: JSONObject containing a LibraryMBean entity that contains the rest of the deployment information (required)

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

/management/weblogic/{version}/edit/libraries/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/libraries/{name}/subDeploymentCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/libraries/{name}/subDeployments](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/libraries/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/libraries/{name}/subDeploymentCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/libraries/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/libraries/{name}/subDeployments](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/libraries/{name}/subDeploymentCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/libraries/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/libraries/{name}/subDeployments](#)
rel=self

This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/libraries/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/libraries/{name}/subDeployments/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/libraries/{name}/subDeployments](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/libraries/{name}/subDeployments/{name}](#) **rel**=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/libraries/{name}/subDeployments/{name}/subDeployments](#) **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/libraries/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/libraries/{name}/subDeployments/{name}/subDeployments](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/libraries/{name}/subDeployments/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/libraries/{name}/subDeployments/{name}/subDeployments](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/libraries/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/libraries/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/libraries/{name}/subDeployments/{name}/subDeployments](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/libraries/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel**=self

This resource.

- **uri**=[/management/weblogic/{version}/edit/libraries/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel**=subDeployments

This resource's subDeployments collection resource.

POST

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/lifecycleManagerConfig

This resource manages a [weblogic.management.configuration.LifecycleManagerConfigMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.LifecycleManagerConfigMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.LifecycleManagerConfigMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/lifecycleManagerConfig](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/lifecycleManagerConfig/configuredEndPointCreateForm](#) **rel**=configuredEndPointCreateForm
The create form resource for this resource's configuredEndpoints collection resource.
- **uri**=[/management/weblogic/{version}/edit/lifecycleManagerConfig/configuredEndpoints](#) **rel**=configuredEndpoints
This resource's configuredEndpoints collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/lifecycleManagerConfig](#) **rel**=self
This resource.
- **rel**=target
This resource's target reference to a [weblogic.management.configuration.TargetMBean](#) resource.

POST

Update this [weblogic.management.configuration.LifecycleManagerConfigMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.LifecycleManagerConfigMBean](#) entity.

/management/weblogic/{version}/edit/lifecycleManagerConfig/configuredEndPointCreateForm

This resource manages the create forms for the configuredEndpoints collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.LifecycleManagerEndPointMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [configuredEndpoints](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.LifecycleManagerEndPointMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/lifecycleManagerConfig/configuredEndPointCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/lifecycleManagerConfig/configuredEndpoints](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/lifecycleManagerConfig](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/lifecycleManagerConfig/configuredEndPointCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/lifecycleManagerConfig/configuredEndpoints

This resource manages a collection of [weblogic.management.configuration.LifecycleManagerEndPointMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.LifecycleManagerEndPointMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.LifecycleManagerEndPointMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/lifecycleManagerConfig/configuredEndpoints](#) [rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/lifecycleManagerConfig/configuredEndPointCreateForm](#) [rel=create-form](#)
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/lifecycleManagerConfig](#) [rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/lifecycleManagerConfig/configuredEndpoints](#) [rel=self](#)
This resource.

POST

Add a new [weblogic.management.configuration.LifecycleManagerEndPointMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.LifecycleManagerEndPointMBean](#) entity.

/management/weblogic/{version}/edit/lifecycleManagerConfig/configuredEndpoints/{name}

This resource manages a [weblogic.management.configuration.LifecycleManagerEndPointMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.LifecycleManagerEndPointMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.LifecycleManagerEndPointMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.LifecycleManagerEndPointMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/lifecycleManagerConfig/configuredEndpoints/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/lifecycleManagerConfig/configuredEndpoints](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/lifecycleManagerConfig/configuredEndpoints/{name}](#) **rel=self**
This resource.

POST

POST

Update this [weblogic.management.configuration.LifecycleManagerEndPointMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.LifecycleManagerEndPointMBean](#) entity.

/management/weblogic/{version}/edit/listTags

The resource supports the following methods:

- [POST](#)

POST

List all tags of the specified config bean type. If the type param is empty string, then all tags used in the domain are returned.

Roles

Admin, Deployer, Monitor, Operator

Request Body

Must contain a JSON object with the following fields:

type

type of the MBean (shortened version of the class name less the MBean)

Type: string

Response Body

Contains a JSON object with a array of string return field.

/management/weblogic/{version}/edit/log

This resource manages a [weblogic.management.configuration.LogMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.LogMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.LogMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/log](#) **rel**=canonical
This resource.
- **rel**=domainLogBroadcastFilter
This resource's domainLogBroadcastFilter reference to a [weblogic.management.configuration.LogFilterMBean](#) resource.
- **rel**=logFileFilter
This resource's logFileFilter reference to a [weblogic.management.configuration.LogFilterMBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/log](#) **rel**=self
This resource.
- **rel**=stdoutFilter
This resource's stdoutFilter reference to a [weblogic.management.configuration.LogFilterMBean](#) resource.

POST

Update this [weblogic.management.configuration.LogMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.LogMBean](#) entity.

/management/weblogic/{version}/edit/logFilterCreateForm

This resource manages the create forms for the logFilters collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.LogFilterMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the logFilters collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.LogFilterMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/logFilterCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/logFilters](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/logFilterCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/logFilters

This resource manages a collection of [weblogic.management.configuration.LogFilterMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.LogFilterMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.LogFilterMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/logFilters](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/logFilterCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/logFilters](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.LogFilterMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.LogFilterMBean](#) entity.

/management/weblogic/{version}/edit/logFilters/{name}

This resource manages a [weblogic.management.configuration.LogFilterMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.management.configuration.LogFilterMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.LogFilterMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.LogFilterMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/logFilters/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/logFilters](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/logFilters/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.LogFilterMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.LogFilterMBean](#) entity.

/management/weblogic/{version}/edit/lookupSystemResource

The resource supports the following methods:

- [POST](#)

POST

Lookup a particular SystemResource in this domain.

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

name

name

Type: string

Response Body

Contains a JSON object with a
weblogic.management.configuration.SystemResourceMBean reference return field.

/management/weblogic/{version}/edit/lookupTarget

The resource supports the following methods:

- [POST](#)

POST

Roles

Admin, Deployer, Operator

Request Body

Must contain a JSON object with the following fields:

name

name

Type: string

Response Body

Contains a JSON object with a `weblogic.management.configuration.TargetMBean` reference return field.

/management/weblogic/{version}/edit/machinecreateForm

This resource manages the create forms for the machines collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.MachineMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the machines collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MachineMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/machineCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/machines](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/machineCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/machines

This resource manages a collection of [weblogic.management.configuration.MachineMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.MachineMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.MachineMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/machines](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/machinecreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/machines](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.MachineMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MachineMBean](#) entity.

/management/weblogic/{version}/edit/machines/{name}

This resource manages a [weblogic.management.configuration.MachineMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.MachineMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.MachineMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MachineMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/machines/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/machines/{name}/nodeManager](#)
rel=nodeManager
This resource's nodeManager singleton resource.
- **uri**=[/management/weblogic/{version}/edit/machines](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/machines/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.MachineMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MachineMBean](#) entity.

/management/weblogic/{version}/edit/machines/{name}/nodeManager

This resource manages a [weblogic.management.configuration.NodeManagerMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.NodeManagerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.NodeManagerMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/machines/{name}/nodeManager](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/machines/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/machines/{name}/nodeManager](#)
rel=self
This resource.

POST

POST

Update this [weblogic.management.configuration.NodeManagerMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.NodeManagerMBean](#) entity.

/management/weblogic/{version}/edit/mailSessioncreateForm

This resource manages the create forms for the mailSessions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.MailSessionMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the mailSessions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MailSessionMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/mailSessionCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/mailSessions](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/mailSessionCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/mailSessions

This resource manages a collection of [weblogic.management.configuration.MailSessionMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.MailSessionMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.MailSessionMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/mailSessions](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/mailSessionCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/mailSessions](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.MailSessionMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MailSessionMBean](#) entity.

/management/weblogic/{version}/edit/mailSessions/{name}

This resource manages a [weblogic.management.configuration.MailSessionMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.MailSessionMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.MailSessionMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MailSessionMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/mailSessions/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/mailSessions](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/mailSessions/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.MailSessionMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MailSessionMBean](#) entity.

/management/weblogic/{version}/edit/managedExecutorServiceCreateForm

This resource manages the create forms for the managedExecutorServices collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `managedExecutorServices` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/managedExecutorServiceCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/managedExecutorServices](#)
rel=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/managedExecutorServiceCreateForm](#)
rel=self
This resource.

/management/weblogic/{version}/edit/managedExecutorServices

This resource manages a collection of [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/managedExecutorServices](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/managedExecutorServiceCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/managedExecutorServices](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entity.

/management/weblogic/{version}/edit/managedExecutorServices/{name}

This resource manages a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/managedExecutorServices/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/managedExecutorServices](#)
rel=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/managedExecutorServices/{name}](#)
rel=self
This resource.

POST

Update this [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entity.

/management/weblogic/{version}/edit/managedExecutorServiceTemplateCreateForm

This resource manages the create forms for the managedExecutorServiceTemplates collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `managedExecutorServiceTemplates` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/managedExecutorServiceTemplateCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/managedExecutorServiceTemplates](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/managedExecutorServiceTemplateCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/managedExecutorServiceTemplates

This resource manages a collection of [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/managedExecutorServiceTemplates](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/managedExecutorServiceTemplateCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/managedExecutorServiceTemplates](#)
rel=self
This resource.

POST

Add a new [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) entity.

/management/weblogic/{version}/edit/managedExecutorServiceTemplates/{name}

This resource manages a [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this

[weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#)
instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/managedExecutorServiceTemplates/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/managedExecutorServiceTemplates](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/managedExecutorServiceTemplates/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) entity.

/management/weblogic/{version}/edit/managedScheduledExecutorServiceCreateForm

This resource manages the create forms for the managedScheduledExecutorServices collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the managedScheduledExecutorServices collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/managedScheduledExecutorServiceCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/managedScheduledExecutorServices](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/managedScheduledExecutorServiceCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/managedScheduledExecutorServices

This resource manages a collection of [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/managedScheduledExecutorServices](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/managedScheduledExecutorServiceCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/managedScheduledExecutorServices](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entity.

/management/weblogic/{version}/edit/managedScheduledExecutorServices/{name}

This resource manages a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/managedScheduledExecutorServices/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/managedScheduledExecutorServices/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/managedScheduledExecutorServices/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entity.

/management/weblogic/{version}/edit/managedScheduledExecutorServiceTemplateCreateForm

This resource manages the create forms for the managedScheduledExecutorServiceTemplates collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMBEAN](#) entity populated with default values that can be customized then posted (using the POST method) to the `managedScheduledExecutorServiceTemplates` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMBEAN](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/managedScheduledExecutorServiceTemplateCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/managedScheduledExecutorServiceTemplates](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/managedScheduledExecutorServiceTemplateCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/managedScheduledExecutorServiceTemplates

This resource manages a collection of [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMBEAN](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMBEAN](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/managedScheduledExecutorServiceTemplates](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/managedScheduledExecutorServiceTemplateCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/managedScheduledExecutorServiceTemplates](#) **rel**=self
This resource.

POST

Add a new

[weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#)
[ean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a

[weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#)
[ean](#) entity.

/management/weblogic/{version}/edit/managedScheduledExecutorServiceTemplates/{name}

This resource manages a [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMBEAN](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this

[weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#)
ean instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMBEAN](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMBEAN](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/managedScheduledExecutorServiceTemplates/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/managedScheduledExecutorServiceTemplates](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/managedScheduledExecutorServiceTemplates/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#) entity.

/management/weblogic/{version}/edit/managedThreadFactories

This resource manages a collection of [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/managedThreadFactories](#)
[rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/managedThreadFactoryCreateForm](#)
[rel=create-form](#)
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit](#) [rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/managedThreadFactories](#) [rel=self](#)
This resource.

POST

Add a new [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entity.

/management/weblogic/{version}/edit/managedThreadFactories/{name}

This resource manages a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/managedThreadFactories/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/managedThreadFactories](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/managedThreadFactories/{name}](#)
rel=self
This resource.

POST

Update this [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entity.

/management/weblogic/{version}/edit/managedThreadFactoryCreateForm

This resource manages the create forms for the managedThreadFactories collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `managedThreadFactories` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/managedThreadFactoryCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/managedThreadFactories](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/managedThreadFactoryCreateForm](#)
rel=self
This resource.

/management/weblogic/{version}/edit/managedThreadFactoryTemplateCreateForm

This resource manages the create forms for the managedThreadFactoryTemplates collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the managedThreadFactoryTemplates collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/managedThreadFactoryTemplateCreateForm rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/managedThreadFactoryTemplates rel=create](#)
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/managedThreadFactoryTemplateCreateForm rel=self](#)
This resource.

/management/weblogic/{version}/edit/managedThreadFactoryTemplates

This resource manages a collection of [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/managedThreadFactoryTemplates](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/managedThreadFactoryTemplateCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/managedThreadFactoryTemplates](#)
rel=self
This resource.

POST

Add a new [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) entity.

/management/weblogic/{version}/edit/managedThreadFactoryTemplates/{name}

This resource manages a [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this

[weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#)
instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/managedThreadFactoryTemplates/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/managedThreadFactoryTemplates](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/managedThreadFactoryTemplates/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) entity.

/management/weblogic/{version}/edit/messagingBridgeCreateForm

This resource manages the create forms for the messagingBridges collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.MessagingBridgeMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the messagingBridges collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MessagingBridgeMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/messagingBridgeCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/messagingBridges](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/messagingBridgeCreateForm](#)
rel=self
This resource.

/management/weblogic/{version}/edit/messagingBridges

This resource manages a collection of [weblogic.management.configuration.MessagingBridgeMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.MessagingBridgeMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.MessagingBridgeMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/messagingBridges](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/messagingBridgeCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/messagingBridges](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.MessagingBridgeMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.MessagingBridgeMBean](#) entity.

/management/weblogic/{version}/edit/messagingBridges/{name}

This resource manages a [weblogic.management.configuration.MessagingBridgeMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.MessagingBridgeMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.MessagingBridgeMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MessagingBridgeMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/messagingBridges/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/messagingBridges](#) **rel**=parent

- **uri**=[/management/weblogic/{version}/edit/messagingBridges/{name}](#) **rel**=self
This resource.
- **rel**=sourceDestination
This resource's sourceDestination reference to a [weblogic.management.configuration.BridgeDestinationCommonMBean](#) resource.
- **rel**=targetDestination
This resource's targetDestination reference to a [weblogic.management.configuration.BridgeDestinationCommonMBean](#) resource.

POST

Update this [weblogic.management.configuration.MessagingBridgeMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.MessagingBridgeMBean](#) entity.

/management/weblogic/{version}/edit/migratableTargetCreateForm

This resource manages the create forms for the migratableTargets collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.MigratableTargetMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `migratableTargets` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MigratableTargetMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/migratableTargetCreateForm](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/migratableTargets](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/migratableTargetCreateForm](#)
rel=self

This resource.

/management/weblogic/{version}/edit/migratableTargets

This resource manages a collection of [weblogic.management.configuration.MigratableTargetMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.MigratableTargetMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.MigratableTargetMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/migratableTargets](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/migratableTargetCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/migratableTargets](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.MigratableTargetMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MigratableTargetMBean](#) entity.

/management/weblogic/{version}/edit/migratableTargets/{name}

This resource manages a [weblogic.management.configuration.MigratableTargetMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.MigratableTargetMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.MigratableTargetMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MigratableTargetMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/migratableTargets/{name}](#) **rel**=canonical
This resource.
- **rel**=cluster
This resource's cluster reference to a [weblogic.management.configuration.ClusterMBean](#) resource.
- **rel**=hostingServer
This resource's hostingServer reference to a [weblogic.management.configuration.ServerMBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/migratableTargets](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/migratableTargets/{name}](#) **rel**=self
This resource.
- **rel**=userPreferredServer
This resource's userPreferredServer reference to a [weblogic.management.configuration.ServerMBean](#) resource.

POST

Update this [weblogic.management.configuration.MigratableTargetMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MigratableTargetMBean](#) entity.

/management/weblogic/{version}/edit/optionalFeatureDeployment

This resource manages a [weblogic.management.configuration.OptionalFeatureDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.OptionalFeatureDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.OptionalFeatureDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/optionalFeatureDeployment](#)
[rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/optionalFeatureDeployment/optionalFeatureCreateForm](#) [rel=optionalFeatureCreateForm](#)
The create form resource for this resource's optionalFeatures collection resource.
- [uri=/management/weblogic/{version}/edit/optionalFeatureDeployment/optionalFeatures](#) [rel=optionalFeatures](#)
This resource's optionalFeatures collection resource.
- [uri=/management/weblogic/{version}/edit](#) [rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/optionalFeatureDeployment](#) [rel=self](#)
This resource.

POST

POST

Update this [weblogic.management.configuration.OptionalFeatureDeploymentMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.OptionalFeatureDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/optionalFeatureDeployment/optionalFeatureCreateForm

This resource manages the create forms for the optionalFeatures collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.OptionalFeatureMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the optionalFeatures collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.OptionalFeatureMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/optionalFeatureDeployment/optionalFeatureCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/optionalFeatureDeployment/optionalFeatures](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/optionalFeatureDeployment](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/optionalFeatureDeployment/optionalFeatureCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/optionalFeatureDeployment/optionalFeatures

This resource manages a collection of [weblogic.management.configuration.OptionalFeatureMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.OptionalFeatureMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.OptionalFeatureMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/optionalFeatureDeployment/optionalFeatures](#) [rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/optionalFeatureDeployment/optionalFeatureCreateForm](#) [rel=create-form](#)

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/optionalFeatureDeployment](#) [rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/optionalFeatureDeployment/optionalFeatures](#) [rel=self](#)

This resource.

POST

Add a new [weblogic.management.configuration.OptionalFeatureMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.OptionalFeatureMBean](#) entity.

/management/weblogic/{version}/edit/optionalFeatureDeployment/optionalFeatures/{name}

This resource manages a [weblogic.management.configuration.OptionalFeatureMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.OptionalFeatureMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.OptionalFeatureMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.OptionalFeatureMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/optionalFeatureDeployment/optionalFeatures/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/optionalFeatureDeployment/optionalFeatures](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/optionalFeatureDeployment/optionalFeatures/{name}](#) **rel=self**

This resource.

POST

Update this [weblogic.management.configuration.OptionalFeatureMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.OptionalFeatureMBean](#) entity.

/management/weblogic/{version}/edit/osgiFrameworkCreateForm

This resource manages the create forms for the osgiFrameworks collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.OsgiFrameworkMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `osgiFrameworks` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.OsgiFrameworkMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/osgiFrameworkCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/osgiFrameworks](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/osgiFrameworkCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/osgiFrameworks

This resource manages a collection of [weblogic.management.configuration.OsgiFrameworkMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.OsgiFrameworkMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.OsgiFrameworkMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/osgiFrameworks](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/osgiFrameworkCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/osgiFrameworks](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.OsgiFrameworkMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.OsgiFrameworkMBean](#) entity.

/management/weblogic/{version}/edit/osgiFrameworks/{name}

This resource manages a [weblogic.management.configuration.OsgiFrameworkMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.OsgiFrameworkMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.OsgiFrameworkMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.OsgiFrameworkMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/osgiFrameworks/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/osgiFrameworks](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/osgiFrameworks/{name}](#) **rel**=self
This resource.

POST

POST

Update this [weblogic.management.configuration.OsgiFrameworkMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.OsgiFrameworkMBean](#) entity.

/management/weblogic/{version}/edit/partitioncreateForm

This resource manages the create forms for the partitions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.PartitionMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the partitions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.PartitionMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitionCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitionCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/partitions

This resource manages a collection of [weblogic.management.configuration.PartitionMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.PartitionMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.PartitionMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitionCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.PartitionMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.PartitionMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}

This resource manages a [weblogic.management.configuration.PartitionMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.PartitionMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.PartitionMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.PartitionMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrideCreateForm](#) [rel=JDBCSystemResourceOverrideCreateForm](#)
The create form resource for this resource's JDBCSystemResourceOverrides collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides](#) [rel=JDBCSystemResourceOverrides](#)
This resource's JDBCSystemResourceOverrides collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrideCreateForm](#) [rel=JMSSystemResourceOverrideCreateForm](#)
The create form resource for this resource's JMSSystemResourceOverrides collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides](#) [rel=JMSSystemResourceOverrides](#)
This resource's JMSSystemResourceOverrides collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JTAPartition](#) [rel=JTAPartition](#)
This resource's JTAPartition singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/findEffectiveServerNames](#) [rel=action](#) [title=findEffectiveServerNames](#)
This resource's findEffectiveServerNames action resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/lookupAvailableTarget](#) [rel=action](#) [title=lookupAvailableTarget](#)
This resource's lookupAvailableTarget action resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/adminVirtualTarget](#) [rel=adminVirtualTarget](#)
This resource's adminVirtualTarget singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}](#) [rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigCreateForm](#) [rel=coherencePartitionCacheConfigCreateForm](#)
The create form resource for this resource's coherencePartitionCacheConfigs collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs **rel**=coherencePartitionCacheConfigs
This resource's coherencePartitionCacheConfigs collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/configurationProperties **rel**=configurationProperties
This resource's configurationProperties collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/configurationPropertyCreateForm **rel**=configurationPropertyCreateForm
The create form resource for this resource's configurationProperties collection resource.
- **rel**=dataSourceForJobScheduler
This resource's dataSourceForJobScheduler reference to a weblogic.management.configuration.JDBCSystemResourceMBean resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/dataSourcePartition **rel**=dataSourcePartition
This resource's dataSourcePartition singleton resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrideCreateForm **rel**=foreignJNDIProviderOverrideCreateForm
The create form resource for this resource's foreignJNDIProviderOverrides collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrides **rel**=foreignJNDIProviderOverrides
This resource's foreignJNDIProviderOverrides collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments **rel**=internalAppDeployments
This resource's internalAppDeployments collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/internalLibraries **rel**=internalLibraries
This resource's internalLibraries collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/mailSessionOverrideCreateForm **rel**=mailSessionOverrideCreateForm
The create form resource for this resource's mailSessionOverrides collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/mailSessionOverrides **rel**=mailSessionOverrides
This resource's mailSessionOverrides collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/managedExecutorServiceTemplateCreateForm **rel**=managedExecutorServiceTemplateCreateForm
The create form resource for this resource's managedExecutorServiceTemplates collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/managedExecutorServiceTemplates **rel**=managedExecutorServiceTemplates
This resource's managedExecutorServiceTemplates collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/managedScheduledExecutorServiceTemplateCreateForm
rel=managedScheduledExecutorServiceTemplateCreateForm
The create form resource for this resource's managedScheduledExecutorServiceTemplates collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/managedScheduledExecutorServiceTemplates **rel**=managedScheduledExecutorServiceTemplates
This resource's managedScheduledExecutorServiceTemplates collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/managedThreadFactoryTemplateCreateForm **rel**=managedThreadFactoryTemplateCreateForm
The create form resource for this resource's managedThreadFactoryTemplates collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/managedThreadFactoryTemplates **rel**=managedThreadFactoryTemplates
This resource's managedThreadFactoryTemplates collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/partitionLog **rel**=partitionLog
This resource's partitionLog singleton resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/partitionWorkManager **rel**=partitionWorkManager
This resource's partitionWorkManager singleton resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/partitionWorkManagerCreateForm **rel**=partitionWorkManagerCreateForm
The create form resource for this resource's partitionWorkManager optional singleton resource.
- **rel**=partitionWorkManagerRef
This resource's partitionWorkManagerRef reference to a weblogic.management.configuration.PartitionWorkManagerMBean resource.
- **rel**=realm
This resource's realm reference to a weblogic.management.security.RealmMBean resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroupCreateForm **rel**=resourceGroupCreateForm
The create form resource for this resource's resourceGroups collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups **rel**=resourceGroups
This resource's resourceGroups collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceManager **rel**=resourceManager
This resource's resourceManager singleton resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceManagerCreateForm **rel**=resourceManagerCreateForm
The create form resource for this resource's resourceManager optional singleton resource.
- **rel**=resourceManagerRef
This resource's resourceManagerRef reference to a weblogic.management.configuration.ResourceManagerMBean resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name} **rel**=self
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/selfTuning **rel**=selfTuning
This resource's selfTuning singleton resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/systemFileSystem **rel**=systemFileSystem
This resource's systemFileSystem singleton resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/userFileSystem **rel**=userFileSystem
This resource's userFileSystem singleton resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/webService **rel**=webService
This resource's webService singleton resource.

POST

Update this [weblogic.management.configuration.PartitionMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.PartitionMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/adminVirtualTarget

This resource manages a [weblogic.management.configuration.AdminVirtualTargetMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.AdminVirtualTargetMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.AdminVirtualTargetMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/adminVirtualTarget](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/adminVirtualTarget](#)
rel=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/adminVirtualTarget/webServer](#) **rel**=webServer
This resource's webServer singleton resource.

POST

Update this [weblogic.management.configuration.AdminVirtualTargetMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.AdminVirtualTargetMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/adminVirtualTarget/webServer

This resource manages a [weblogic.management.configuration.WebServerMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.WebServerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WebServerMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/adminVirtualTarget/webServer rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/adminVirtualTarget rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/adminVirtualTarget/webServer rel=self](#)
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/adminVirtualTarget/webServer/webServerLog rel=webServerLog](#)
This resource's webServerLog singleton resource.

POST

Update this [weblogic.management.configuration.WebServerMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.WebServerMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/adminVirtualTarget/webServer/webServerLog

This resource manages a [weblogic.management.configuration.WebServerLogMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.WebServerLogMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WebServerLogMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/adminVirtualTarget/webServer/webServerLog](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/adminVirtualTarget/webServer](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/adminVirtualTarget/webServer/webServerLog](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.WebServerLogMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WebServerLogMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigCreateForm

This resource manages the create forms for the coherencePartitionCacheConfigs collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.CoherencePartitionCacheConfigMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the coherencePartitionCacheConfigs collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherencePartitionCacheConfigMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigCreateForm rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs rel=create](#)
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name} rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigCreateForm rel=self](#)
This resource.

/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs

This resource manages a collection of [weblogic.management.configuration.CoherencePartitionCacheConfigMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.CoherencePartitionCacheConfigMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.CoherencePartitionCacheConfigMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs](#) **rel=self**
This resource.

POST

POST

Add a new [weblogic.management.configuration.CoherencePartitionCacheConfigMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CoherencePartitionCacheConfigMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}

This resource manages a [weblogic.management.configuration.CoherencePartitionCacheConfigMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.management.configuration.CoherencePartitionCacheConfigMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.CoherencePartitionCacheConfigMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherencePartitionCacheConfigMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}/coherencePartitionCacheProperties](#) **rel=coherencePartitionCacheProperties**

This resource's coherencePartitionCacheProperties collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}/coherencePartitionCachePropertyCreateForm](#) **rel=coherencePartitionCachePropertyCreateForm**

The create form resource for this resource's coherencePartitionCacheProperties collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}](#) **rel=self**

This resource.

POST

POST

Update this [weblogic.management.configuration.CoherencePartitionCacheConfigMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CoherencePartitionCacheConfigMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}/coherencePartitionCacheProperties

This resource manages a collection of [weblogic.management.configuration.CoherencePartitionCachePropertyMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.CoherencePartitionCachePropertyMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.CoherencePartitionCachePropertyMBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}/coherencePartitionCacheProperties **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}/coherencePartitionCachePropertyCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}/coherencePartitionCacheProperties **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.CoherencePartitionCachePropertyMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CoherencePartitionCachePropertyMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}/coherencePartitionCacheProperties/{name}

This resource manages a [weblogic.management.configuration.CoherencePartitionCachePropertyMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this

[weblogic.management.configuration.CoherencePartitionCachePropertyMBean](#)
instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.CoherencePartitionCachePropertyMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherencePartitionCachePropertyMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}/coherencePartitionCacheProperties/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}/coherencePartitionCacheProperties](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}/coherencePartitionCacheProperties/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.CoherencePartitionCachePropertyMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CoherencePartitionCachePropertyMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}/coherencePartitionCachePropertyCreateForm

This resource manages the create forms for the coherencePartitionCacheProperties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.CoherencePartitionCachePropertyMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the coherencePartitionCacheProperties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CoherencePartitionCachePropertyMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}/coherencePartitionCachePropertyCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}/coherencePartitionCacheProperties](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/coherencePartitionCacheConfigs/{name}/coherencePartitionCachePropertyCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/configurationProperties

This resource manages a collection of [weblogic.management.configuration.ConfigurationPropertyMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ConfigurationPropertyMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ConfigurationPropertyMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/configurationProperties](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/configurationPropertyCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/configurationProperties](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.ConfigurationPropertyMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ConfigurationPropertyMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/configurationProperties/{name}

This resource manages a [weblogic.management.configuration.ConfigurationPropertyMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ConfigurationPropertyMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ConfigurationPropertyMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ConfigurationPropertyMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/configurationProperties/{name} rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/configurationProperties rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/configurationProperties/{name} rel=self](#)
This resource.

POST

Update this [weblogic.management.configuration.ConfigurationPropertyMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ConfigurationPropertyMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/configurationPropertyCreateForm

This resource manages the create forms for the configurationProperties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ConfigurationPropertyMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the configurationProperties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ConfigurationPropertyMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/configurationPropertyCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/configurationProperties](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/configurationPropertyCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/dataSourcePartition

This resource manages a [weblogic.management.configuration.DataSourcePartitionMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.DataSourcePartitionMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.DataSourcePartitionMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/dataSourcePartition](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/dataSourcePartition](#)
rel=self
This resource.

POST

Update this [weblogic.management.configuration.DataSourcePartitionMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.DataSourcePartitionMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/findEffectiveServerNames

The resource supports the following methods:

- [POST](#)

POST

Returns the names of servers for the partition's effective targets, with no duplicates.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a JSON object with a array of string return field.

/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrideCreateForm

This resource manages the create forms for the foreignJNDIProviderOverrides collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ForeignJNDIPProviderOverrideMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [foreignJNDIPProviderOverrides](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDIPProviderOverrideMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIPProviderOverrideCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIPProviderOverrides](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIPProviderOverrideCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrides

This resource manages a collection of [weblogic.management.configuration.ForeignJNDIProviderOverrideMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ForeignJNDIProviderOverrideMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ForeignJNDIProviderOverrideMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrides](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrideCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrides](#) **rel=self**
This resource.

POST

POST

Add a new [weblogic.management.configuration.ForeignJNDIProviderOverrideMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDIProviderOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIPProviderOverrides/{name}

This resource manages a [weblogic.management.configuration.ForeignJNDIPProviderOverrideMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ForeignJNDIProviderOverrideMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ForeignJNDIPProviderOverrideMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDIPProviderOverrideMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIPProviderOverrides/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIPProviderOverrides/{name}/foreignJNDILinkCreateForm](#) **rel=foreignJNDILinkCreateForm**

The create form resource for this resource's foreignJNDILinks collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIPProviderOverrides/{name}/foreignJNDILinks](#) **rel=foreignJNDILinks**

This resource's foreignJNDILinks collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIPProviderOverrides](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIPProviderOverrides/{name}](#) **rel=self**

This resource.

POST

POST

Update this [weblogic.management.configuration.ForeignJNDIProviderOverrideMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDIProviderOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderO verrides/{name}/foreignJNDILinkCreateForm

This resource manages the create forms for the foreignJNDILinks collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ForeignJNDILinkOverrideMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [foreignJNDILinks](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDILinkOverrideMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProvide](#)
[rOverrides/{name}/foreignJNDILinkCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProvide](#)
[rOverrides/{name}/foreignJNDILinks](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProvide](#)
[rOverrides/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProvide](#)
[rOverrides/{name}/foreignJNDILinkCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrides/{name}/foreignJNDILinks

This resource manages a collection of [weblogic.management.configuration.ForeignJNDILinkOverrideMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ForeignJNDILinkOverrideMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ForeignJNDILinkOverrideMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrides/{name}/foreignJNDILinks](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrides/{name}/foreignJNDILinkCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrides/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrides/{name}/foreignJNDILinks](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.ForeignJNDILinkOverrideMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDILinkOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrides/{name}/foreignJNDILinks/{name}

This resource manages a [weblogic.management.configuration.ForeignJNDILinkOverrideMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ForeignJNDILinkOverrideMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ForeignJNDILinkOverrideMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDILinkOverrideMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrides/{name}/foreignJNDILinks/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrides/{name}/foreignJNDILinks](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/foreignJNDIProviderOverrides/{name}/foreignJNDILinks/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.ForeignJNDILinkOverrideMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDILinkOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments

This resource manages a collection of [weblogic.management.configuration.AppDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.AppDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.AppDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}

This resource manages a [weblogic.management.configuration.AppDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.AppDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.AppDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/createPlan](#) **rel=action** **title=createPlan**
This resource's createPlan action resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/redeploy](#) **rel=redeploy**
This resource's redeploy resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}](#) **rel=self**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeploymentCreateForm](#) **rel=subDeploymentCreateForm**
The create form resource for this resource's subDeployments collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments](#) **rel=subDeployments**
This resource's subDeployments collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/update](#) **rel=update**
This resource's update resource.

POST

Update this [weblogic.management.configuration.AppDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.AppDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/createPlan

The resource supports the following methods:

- [POST](#)

POST

The resource supports the following methods:

- [POST](#)
- [POST](#)

POST

Create a deployment plan in the specified directory.

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

planPath

planPath

Type: string

Response Body

Contains a JSON object with a string return field.

POST

Create a deployment plan in a default directory

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/redeploy

The resource supports the following methods:

- [POST](#)

POST

Use the multi-part form to redeploy this application.

- `sourcePath`: the deployment to upload (required)
- `planPath`: the deployment plan to upload (optional)
- `model`: JSONObject containing an `AppDeploymentMBean` entity that contains the rest of the deployment information. However, deployment/plan information is ignored. (required)

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeploymentCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeploymentCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeploymentCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments/{name}](#) **rel=self**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel=subDeployments**

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel=self**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel=subDeployments**
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/internalAppDeployments/{name}/update

The resource supports the following methods:

- [POST](#)

POST

Update this application.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

/management/weblogic/{version}/edit/partitions/{name}/internalLibraries

This resource manages a collection of [weblogic.management.configuration.LibraryMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.LibraryMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.LibraryMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries](#)
rel=self
This resource.

/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}

This resource manages a [weblogic.management.configuration.LibraryMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.LibraryMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.LibraryMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/createPlan](#) **rel**=action **title**=createPlan
This resource's createPlan action resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/redeploy](#) **rel**=redeploy
This resource's redeploy resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}](#) **rel**=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeploymentCreateForm](#) **rel**=subDeploymentCreateForm
The create form resource for this resource's subDeployments collection resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments](#) **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.LibraryMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.LibraryMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/createPlan

The resource supports the following methods:

- [POST](#)

POST

The resource supports the following methods:

- [POST](#)
- [POST](#)

POST

Create a deployment plan in the specified directory.

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

planPath

planPath

Type: string

Response Body

Contains a JSON object with a string return field.

POST

Create a deployment plan in a default directory

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/redeploy

The resource supports the following methods:

- [POST](#)

POST

Use the multi-part form to redeploy a library.

- `sourcePath`: the deployment to upload (required)
- `model`: `JSONObject` containing a `LibraryMBean` entity that contains the rest of the deployment information (required)

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeploymentCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeploymentCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeploymentCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments](#) **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments/{name}](#) **rel=self**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments/{name}/subDeployments](#) **rel=subDeployments**

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments/{name}/subDeployments](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments/{name}/subDeployments](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments/{name}/subDeployments/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments/{name}/subDeployments **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments/{name}/subDeployments/{name} **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/internalLibraries/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrideCreateForm

This resource manages the create forms for the JDBCSystemResourceOverrides collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JDBCSystemResourceOverrideMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JDBCSystemResourceOverrides collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCSystemResourceOverrideMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrideCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrideCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides

This resource manages a collection of [weblogic.management.configuration.JDBCSystemResourceOverrideMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JDBCSystemResourceOverrideMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JDBCSystemResourceOverrideMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrideCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.JDBCSystemResourceOverrideMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.JDBCSystemResourceOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}

This resource manages a [weblogic.management.configuration.JDBCSystemResourceOverrideMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JDBCSystemResourceOverrideMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.JDBCSystemResourceOverrideMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCSystemResourceOverrideMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}/JDBCPropertyOverrideCreateForm](#)
[rel=JDBCPropertyOverrideCreateForm](#)

The create form resource for this resource's JDBCPropertyOverrides collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}/JDBCPropertyOverrides](#) [rel=JDBCPropertyOverrides](#)

This resource's JDBCPropertyOverrides collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}](#) [rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides](#) [rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}](#) [rel=self](#)

This resource.

POST

POST

Update this [weblogic.management.configuration.JDBCSystemResourceOverrideMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JDBCSystemResourceOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}/JDBCPropertyOverrideCreateForm

This resource manages the create forms for the JDBCPropertyOverrides collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JDBCPropertyOverrideMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JDBCPropertyOverrides collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCPropertyOverrideMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}/JDBCPropertyOverrideCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}/JDBCPropertyOverrides **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}/JDBCPropertyOverrideCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}/JDBCPropertyOverrides

This resource manages a collection of [weblogic.management.configuration.JDBCPropertyOverrideMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JDBCPropertyOverrideMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JDBCPropertyOverrideMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}/JDBCPropertyOverrides](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}/JDBCPropertyOverrideCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}/JDBCPropertyOverrides](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.JDBCPropertyOverrideMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JDBCPropertyOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}/JDBCPropertyOverrides/{name}

This resource manages a [weblogic.management.configuration.JDBCPropertyOverrideMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JDBCPropertyOverrideMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JDBCPropertyOverrideMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCPropertyOverrideMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}/JDBCPropertyOverrides/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}/JDBCPropertyOverrides](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/JDBCSystemResourceOverrides/{name}/JDBCPropertyOverrides/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.JDBCPropertyOverrideMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JDBCPropertyOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrideCreateForm

This resource manages the create forms for the JMSSystemResourceOverrides collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JMSSystemResourceOverrideMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JMSSystemResourceOverrides collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSSystemResourceOverrideMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrideCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrideCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides

This resource manages a collection of [weblogic.management.configuration.JMSSystemResourceOverrideMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JMSSystemResourceOverrideMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JMSSystemResourceOverrideMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrideCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.JMSSystemResourceOverrideMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.JMSSystemResourceOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}

This resource manages a [weblogic.management.configuration.JMSSystemResourceOverrideMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JMSSystemResourceOverrideMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.JMSSystemResourceOverrideMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSSystemResourceOverrideMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name} rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServerCreateForm rel=foreignServerCreateForm](#)

The create form resource for this resource's foreignServers collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers rel=foreignServers](#)

This resource's foreignServers collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name} rel=self](#)

This resource.

POST

Update this [weblogic.management.configuration.JMSSystemResourceOverrideMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSSystemResourceOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServerCreateForm

This resource manages the create forms for the foreignServers collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ForeignServerOverrideMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `foreignServers` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignServerOverrideMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServerCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServerCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers

This resource manages a collection of [weblogic.management.configuration.ForeignServerOverrideMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ForeignServerOverrideMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ForeignServerOverrideMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServerCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.ForeignServerOverrideMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.ForeignServerOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers/{name}

This resource manages a [weblogic.management.configuration.ForeignServerOverrideMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ForeignServerOverrideMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.ForeignServerOverrideMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignServerOverrideMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/JNDIProperties](#) **rel**=JNDIProperties

This resource's JNDIProperties collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/JNDIPropertyCreateForm](#) **rel**=JNDIPropertyCreateForm

The create form resource for this resource's JNDIProperties collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}](#) **rel**=canonical

This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignConnectionFactories](#) **rel**=foreignConnectionFactories

This resource's foreignConnectionFactories collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignConnectionFactoryCreateForm](#) **rel**=foreignConnectionFactoryCreateForm

The create form resource for this resource's foreignConnectionFactories collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignDestinationCreateForm](#) **rel**=foreignDestinationCreateForm

The create form resource for this resource's foreignDestinations collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignDestinations](#) **rel**=foreignDestinations

This resource's foreignDestinations collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers](#) **rel**=parent

The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.ForeignServerOverrideMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.ForeignServerOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignConnectionFactories

This resource manages a collection of [weblogic.management.configuration.ForeignConnectionFactoryOverrideMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ForeignConnectionFactoryOverrideMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ForeignConnectionFactoryOverrideMBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignConnectionFactories **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignConnectionFactoryCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignConnectionFactories **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.ForeignConnectionFactoryOverrideMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.ForeignConnectionFactoryOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignConnectionFactory/{name}

This resource manages a [weblogic.management.configuration.ForeignConnectionFactoryOverrideMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ForeignConnectionFactoryOverrideMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.ForeignConnectionFactoryOverrideMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignConnectionFactoryOverrideMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers/{name}/foreignConnectionFactories/{name}
rel=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers/{name}/foreignConnectionFactories
rel=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers/{name}/foreignConnectionFactories/{name}
rel=self
This resource.

POST

Update this [weblogic.management.configuration.ForeignConnectionFactoryOverrideMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.ForeignConnectionFactoryOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers/{name}/foreignConnectionFactoryCreateForm

This resource manages the create forms for the foreignConnectionFactories collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ForeignConnectionFactoryOverrideMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `foreignConnectionFactories` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignConnectionFactoryOverrideMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignConnectionFactoryCreateForm rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignConnectionFactories rel=create](#)

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name} rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignConnectionFactoryCreateForm rel=self](#)

This resource.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers/{name}/foreignDestinationCreateForm

This resource manages the create forms for the foreignDestinations collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ForeignDestinationOverrideMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `foreignDestinations` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignDestinationOverrideMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignDestinationCreateForm](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignDestinations](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignDestinationCreateForm](#)
rel=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignDestinations

This resource manages a collection of [weblogic.management.configuration.ForeignDestinationOverrideMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ForeignDestinationOverrideMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ForeignDestinationOverrideMBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignDestinations **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignDestinationCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignDestinations **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.ForeignDestinationOverrideMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.ForeignDestinationOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignDestinations/{name}

This resource manages a [weblogic.management.configuration.ForeignDestinationOverrideMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ForeignDestinationOverrideMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.ForeignDestinationOverrideMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignDestinationOverrideMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignDestinations/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignDestinations **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/foreignDestinations/{name} **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers/{name}/foreignD

POST

Update this [weblogic.management.configuration.ForeignDestinationOverrideMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.ForeignDestinationOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/JNDIProperties

This resource manages a collection of [weblogic.management.configuration.PartitionPropertyMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.PartitionPropertyMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.PartitionPropertyMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers/{name}/JNDIProperties](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers/{name}/JNDIPropertyCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers/{name}/JNDIProperties](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.PartitionPropertyMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.PartitionPropertyMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/JNDIProperties/{name}

This resource manages a [weblogic.management.configuration.PartitionPropertyMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.PartitionPropertyMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.PartitionPropertyMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.PartitionPropertyMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers/{name}/JNDIProperties/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers/{name}/JNDIProperties **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers/{name}/JNDIProperties/{name} **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.PartitionPropertyMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.PartitionPropertyMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResourceOverrides/{name}/foreignServers/{name}/JNDIPropertyCreateForm

This resource manages the create forms for the JNDIProperties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.PartitionPropertyMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JNDIProperties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.PartitionPropertyMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/JNDIPropertyCreateForm](#)
rel=canonical

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/JNDIProperties](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/JMSSystemResource Overrides/{name}/foreignServers/{name}/JNDIPropertyCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/JTAPartition

This resource manages a [weblogic.management.configuration.JTAPartitionMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.JTAPartitionMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JTAPartitionMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/JTAPartition](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/JTAPartition](#)
rel=self
This resource.

POST

Update this [weblogic.management.configuration.JTAPartitionMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.JTAPartitionMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/lookupAvailableTarget

The resource supports the following methods:

- [POST](#)

POST

Looks up the named available target.

Roles

Admin

Request Body

Must contain a JSON object with the following fields:

name

the name of the target to find

Type: string

Response Body

Contains a JSON object with a weblogic.management.configuration.TargetMBean reference return field.

/management/weblogic/{version}/edit/partitions/{name}/mailSessionOverrideCreateForm

This resource manages the create forms for the mailSessionOverrides collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.MailSessionOverrideMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the mailSessionOverrides collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MailSessionOverrideMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/mailSessionOverrideCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/mailSessionOverrides](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/mailSessionOverrideCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/mailSessionOverrides

This resource manages a collection of [weblogic.management.configuration.MailSessionOverrideMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.MailSessionOverrideMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.MailSessionOverrideMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/mailSessionOverrides](#) [rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/mailSessionOverrideCreateForm](#) [rel=create-form](#)
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}](#) [rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/mailSessionOverrides](#) [rel=self](#)
This resource.

POST

Add a new [weblogic.management.configuration.MailSessionOverrideMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MailSessionOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/mailSessionOverrides/{name}

This resource manages a [weblogic.management.configuration.MailSessionOverrideMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.management.configuration.MailSessionOverrideMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.MailSessionOverrideMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MailSessionOverrideMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/mailSessionOverrides/{name} rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/mailSessionOverrides rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/mailSessionOverrides/{name} rel=self](#)
This resource.

POST

Update this [weblogic.management.configuration.MailSessionOverrideMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MailSessionOverrideMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/managedExecutorServiceTemplateCreateForm

This resource manages the create forms for the managedExecutorServiceTemplates collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `managedExecutorServiceTemplates` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedExecutorServiceTemplateCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedExecutorServiceTemplates](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedExecutorServiceTemplateCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/partitions/{name}/managedExecutorServiceTemplates

This resource manages a collection of [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedExecutorServiceTemplates](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedExecutorServiceTemplateCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedExecutorServiceTemplates](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/managedExecutorServiceTemplates/{name}

This resource manages a [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this

[weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#)
instance.

Roles

Admin

GET

Get this

[weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a

[weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedExecutorServiceTemplates/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedExecutorServiceTemplates](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedExecutorServiceTemplates/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedExecutorServiceTemplateMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/managedScheduledExecutorServiceTemplateCreateForm

This resource manages the create forms for the managedScheduledExecutorServiceTemplates collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#) entity populated with default values that can be customized then posted (using the POST method) to the [managedScheduledExecutorServiceTemplates](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/managedScheduledExecutorServiceTemplateCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/managedScheduledExecutorServiceTemplates](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/managedScheduledExecutorServiceTemplateCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/managedScheduledExecutorServiceTemplates

This resource manages a collection of [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMBEAN](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#) [ean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#) [ean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/managedScheduledExecutorServiceTemplates](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/managedScheduledExecutorServiceTemplateCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/managedScheduledExecutorServiceTemplates](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#) [ean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#) [ean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/managedScheduledExecutorServiceTemplates/{name}

This resource manages a [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this

[weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#)
ean instance.

Roles

Admin

GET

Get this

[weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#)
[ean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a

[weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#)
[ean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/managedScheduledExecutorServiceTemplates/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/managedScheduledExecutorServiceTemplates](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/managedScheduledExecutorServiceTemplates/{name}](#) **rel=self**

This resource.

POST

Update this [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedScheduledExecutorServiceTemplateMB](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/managedThreadFactoryTemplateCreateForm

This resource manages the create forms for the managedThreadFactoryTemplates collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `managedThreadFactoryTemplates` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedThreadFactoryTemplateCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedThreadFactoryTemplates](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedThreadFactoryTemplateCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/partitions/{name}/managedThreadFactoryTemplates

This resource manages a collection of [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedThreadFactoryTemplates](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedThreadFactoryTemplateCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedThreadFactoryTemplates](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/managedThreadFactoryTemplates/{name}

This resource manages a [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this

[weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#)
instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedThreadFactoryTemplates/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedThreadFactoryTemplates](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/managedThreadFactoryTemplates/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedThreadFactoryTemplateMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/partitionLog

This resource manages a [weblogic.management.configuration.PartitionLogMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.PartitionLogMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.PartitionLogMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/partitionLog](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/partitionLog](#)
rel=self
This resource.

POST

POST

Update this [weblogic.management.configuration.PartitionLogMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.PartitionLogMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/partitionWorkManager

This resource manages a [weblogic.management.configuration.PartitionWorkManagerMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.PartitionWorkManagerMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.PartitionWorkManagerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.PartitionWorkManagerMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/partitionWorkManager](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/partitionWorkManagerCreateForm](#) **rel=create-form**
The create form resource for this optional singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/partitionWorkManager](#) **rel=self**
This resource.

POST

Update this [weblogic.management.configuration.PartitionWorkManagerMBean](#) instance if it exists; otherwise, create it.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.PartitionWorkManagerMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/partitionWorkManager CreateForm

This resource manages the create forms for the partitionWorkManager optional singleton instance.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.PartitionWorkManagerMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `partitionWorkManager` optional singleton resource to create a new instance if it currently does not exist.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.PartitionWorkManagerMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/partitionWorkManagerCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/partitionWorkManagerCreateForm](#) **rel**=create
The optional singleton resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/partitionWorkManagerCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroupCreateForm

This resource manages the create forms for the resourceGroups collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ResourceGroupMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the resourceGroups collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ResourceGroupMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroupCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroupCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups

This resource manages a collection of [weblogic.management.configuration.ResourceGroupMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ResourceGroupMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ResourceGroupMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroupCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups](#)
rel=self
This resource.

POST

Add a new [weblogic.management.configuration.ResourceGroupMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ResourceGroupMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}

This resource manages a [weblogic.management.configuration.ResourceGroupMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ResourceGroupMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ResourceGroupMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ResourceGroupMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCStoreCreateForm](#) **rel=JDBCStoreCreateForm**
The create form resource for this resource's JDBCStores collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCStores](#) **rel=JDBCStores**
This resource's JDBCStores collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResourceCreateForm](#) **rel=JDBCSystemResourceCreateForm**
The create form resource for this resource's JDBCSystemResources collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources](#) **rel=JDBCSystemResources**
This resource's JDBCSystemResources collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSBridgeDestinationCreateForm](#) **rel=JMSBridgeDestinationCreateForm**
The create form resource for this resource's JMSBridgeDestinations collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSBridgeDestinations](#) **rel=JMSBridgeDestinations**
This resource's JMSBridgeDestinations collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServerCreateForm](#) **rel=JMSServerCreateForm**
The create form resource for this resource's JMSServers collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServers](#) **rel=JMSServers**
This resource's JMSServers collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResourceCreateForm](#) **rel=JMSSystemResourceCreateForm**
The create form resource for this resource's JMSSystemResources collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources](#) **rel=JMSSystemResources**

This resource's JMSSystemResources collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgentCreateForm **rel**=SAFAgentCreateForm

The create form resource for this resource's SAFAgents collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgents **rel**=SAFAgents

This resource's SAFAgents collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResourceCreateForm **rel**=WLDFSystemResourceCreateForm

The create form resource for this resource's WLDFSystemResources collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources **rel**=WLDFSystemResources

This resource's WLDFSystemResources collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/findEffectiveTargets **rel**=action **title**=findEffectiveTargets

This resource's findEffectiveTargets action resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/lookupTarget **rel**=action **title**=lookupTarget

This resource's lookupTarget action resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments **rel**=appDeployments

This resource's appDeployments collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/fileStoreCreateForm **rel**=fileStoreCreateForm

The create form resource for this resource's fileStores collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/fileStores **rel**=fileStores

This resource's fileStores collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviderCreateForm **rel**=foreignJNDIProviderCreateForm

The create form resource for this resource's foreignJNDIProviders collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders **rel**=foreignJNDIProviders

This resource's foreignJNDIProviders collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries **rel**=libraries

This resource's libraries collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/mailSessionCreateForm **rel**=mailSessionCreateForm
The create form resource for this resource's mailSessions collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/mailSessions **rel**=mailSessions
This resource's mailSessions collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedExecutorServiceCreateForm **rel**=managedExecutorServiceCreateForm
The create form resource for this resource's managedExecutorServices collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedExecutorServices **rel**=managedExecutorServices
This resource's managedExecutorServices collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedScheduledExecutorServiceCreateForm **rel**=managedScheduledExecutorServiceCreateForm
The create form resource for this resource's managedScheduledExecutorServices collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedScheduledExecutorServices **rel**=managedScheduledExecutorServices
This resource's managedScheduledExecutorServices collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedThreadFactories **rel**=managedThreadFactories
This resource's managedThreadFactories collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedThreadFactoryCreateForm **rel**=managedThreadFactoryCreateForm
The create form resource for this resource's managedThreadFactories collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/messagingBridgeCreateForm **rel**=messagingBridgeCreateForm
The create form resource for this resource's messagingBridges collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/messagingBridges **rel**=messagingBridges
This resource's messagingBridges collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/osgiFrameworkCreateForm **rel**=osgiFrameworkCreateForm
The create form resource for this resource's osgiFrameworks collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/osgiFrameworks **rel**=osgiFrameworks
This resource's osgiFrameworks collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups
rel=parent
The parent resource of this resource.
- **rel**=resourceGroupTemplate
This resource's resourceGroupTemplate reference to a
weblogic.management.configuration.ResourceGroupTemplateMBean resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{n
ame} **rel**=self
This resource.

POST

POST

Update this [weblogic.management.configuration.ResourceGroupMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ResourceGroupMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments

This resource manages a collection of [weblogic.management.configuration.AppDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.AppDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.AppDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments](#) **rel**=self

This resource.

POST

The resource supports the following methods:

- [POST accepting application/json](#)
- [POST accepting multipart/form-data](#)

POST accepting application/json

This resource deploy is used to deploy applications that are already on the administration server. The application must be a supported package type (for example, an EAR or WAR module).

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.AppDeploymentMBean](#) entity.

To deploy an application you must provide the name of the application, the path to the source of the deployable unit on the administration server, and the targets to which the application will be deployed.

If the source path is relative, it is resolved relative to *InstallDir/app* if *InstallDir* is not null; otherwise, it is resolved relative to the domain root.

POST accepting multipart/form-data

Use the multi-part form to upload an application from the client to the server and then deploy it.

- `sourcePath`: the deployment to upload (required)
- `planPath`: the deployment plan to upload (optional)
- `model`: JSONObject containing an `AppDeploymentMBean` entity that contains the rest of the deployment information (however, `deployment/plan` information is ignored) (required)

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

Request Body

Use the multi-part form to deploy an application.

- `sourcePath`: the deployment to upload (required)
- `planPath`: the deployment plan to upload (optional)

- model: JSONObject containing an AppDeploymentMBean entity that contains the rest of the deployment information. However, deployment/plan information is ignored. (required)

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}

This resource manages a [weblogic.management.configuration.AppDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Undeploy an application.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.AppDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.AppDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/createPlan](#) **rel=action** **title=createPlan**
This resource's createPlan action resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/redeploy](#) **rel=redeploy**
This resource's redeploy resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}](#) **rel=self**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeploymentCreateForm](#) **rel=subDeploymentCreateForm**
The create form resource for this resource's subDeployments collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments](#) **rel=subDeployments**
This resource's subDeployments collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/update](#) **rel=update**
This resource's update resource.

POST

Update this [weblogic.management.configuration.AppDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.AppDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/createPlan

The resource supports the following methods:

- [POST](#)

POST

The resource supports the following methods:

- [POST](#)
- [POST](#)

POST

Create a deployment plan in the specified directory.

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

planPath

planPath

Type: string

Response Body

Contains a JSON object with a string return field.

POST

Create a deployment plan in a default directory

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/redeploy

The resource supports the following methods:

- [POST](#)

POST

Use the multi-part form to redeploy this application.

- `sourcePath`: the deployment to upload (required)
- `planPath`: the deployment plan to upload (optional)
- `model`: JSONObject containing an `AppDeploymentMBean` entity that contains the rest of the deployment information. However, deployment/plan information is ignored. (required)

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeploymentCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeploymentCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeploymentCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments](#) **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}](#) **rel**=self

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel**=subDeployments

This resource's subDeployments collection resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeploy-

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments](#)
rel=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments/{name} **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/appDeployments/{name}/update

The resource supports the following methods:

- [POST](#)

POST

Update this application.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/fileStoreCreateForm

This resource manages the create forms for the fileStores collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.FileStoreMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the fileStores collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FileStoreMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/fileStoreCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/fileStores](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/fileStoreCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/fileStores

This resource manages a collection of [weblogic.management.configuration.FileStoreMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.FileStoreMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.FileStoreMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/fileStores](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/fileStoreCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/fileStores](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.FileStoreMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.FileStoreMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/fileStores/{name}

This resource manages a [weblogic.management.configuration.FileStoreMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.FileStoreMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.FileStoreMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FileStoreMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/fileStores/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/fileStores](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/fileStores/{name}](#) **rel=self**

This resource.

POST

Update this [weblogic.management.configuration.FileStoreMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.FileStoreMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/findEffectiveTargets

The resource supports the following methods:

- [POST](#)

POST

Returns the targets actually used by this resource group, accounting for partition-level defaulting.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a JSON object with a array of `weblogic.management.configuration.TargetMBean` references return field.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIPProviderCreateForm

This resource manages the create forms for the foreignJNDIPProviders collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ForeignJNDIPProviderMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [foreignJNDIPProviders](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDIPProviderMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIPProviderCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIPProviders](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIPProviderCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders

This resource manages a collection of [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ForeignJNDIProviderMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviderCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.ForeignJNDIPProviderMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDIPProviderMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}

This resource manages a [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDIProviderMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinkCreateForm **rel**=foreignJNDILinkCreateForm

The create form resource for this resource's foreignJNDILinks collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinks **rel**=foreignJNDILinks

This resource's foreignJNDILinks collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name} **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDIProviderMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinkCreateForm

This resource manages the create forms for the foreignJNDILinks collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ForeignJNDILinkMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `foreignJNDILinks` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDILinkMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinkCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinks](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinkCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinks

This resource manages a collection of [weblogic.management.configuration.ForeignJNDILinkMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of `weblogic.management.configuration.ForeignJNDILinkMBean` instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of `weblogic.management.configuration.ForeignJNDILinkMBean` entities.

This method can return the following links:

- `uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinks` `rel=canonical`

This resource.

- `uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinkCreateForm` `rel=create-form`

The create form resource for this collection resource.

- `uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}` `rel=parent`

The parent resource of this resource.

- `uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinks` `rel=self`

This resource.

POST

Add a new [weblogic.management.configuration.ForeignJNDILinkMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDILinkMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinks/{name}

This resource manages a [weblogic.management.configuration.ForeignJNDILinkMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ForeignJNDILinkMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ForeignJNDILinkMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDILinkMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinks/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinks](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinks/{name}](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDIL-

POST

Update this [weblogic.management.configuration.ForeignJNDILinkMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDILinkMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCStoreCreateForm

This resource manages the create forms for the JDBCStores collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JDBCStoreMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JDBCStores collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCStoreMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCStoreCreateForm rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCStores rel=create](#)

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name} rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCStoreCreateForm rel=self](#)

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCStores

This resource manages a collection of [weblogic.management.configuration.JDBCStoreMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JDBCStoreMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JDBCStoreMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCStores](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCStoreCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCStores](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.JDBCStoreMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JDBCStoreMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCStores/{name}

This resource manages a [weblogic.management.configuration.JDBCStoreMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JDBCStoreMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JDBCStoreMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCStoreMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCStores/{name}](#) **rel**=canonical
This resource.
- **rel**=dataSource
This resource's dataSource reference to a [weblogic.management.configuration.JDBCSystemResourceMBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCStores](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCStores/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.JDBCStoreMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JDBCStoreMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResourceCreateForm

This resource manages the create forms for the JDBCSystemResources collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JDBCSystemResourceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [JDBCSystemResources](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCSystemResourceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResourceCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResourceCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources

This resource manages a collection of [weblogic.management.configuration.JDBCSystemResourceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JDBCSystemResourceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JDBCSystemResourceMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResourceCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources](#) **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.JDBCSystemResourceMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JDBCSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}

This resource manages a [weblogic.management.configuration.JDBCSystemResourceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JDBCSystemResourceMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JDBCSystemResourceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCSystemResourceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource](#) **rel**=JDBCResource
This resource's JDBCResource singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources](#) **rel**=parent
The parent resource of this resource.
- **rel**=resource
This resource's resource reference to a [weblogic.descriptor.DescriptorBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}](#) **rel**=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeploymentCreateForm](#) **rel**=subDeploymentCreateForm
The create form resource for this resource's subDeployments collection resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments](#) **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.JDBCSystemResourceMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JDBCSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCDataSourceBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCDataSourceBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCDataSourceBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCConnectionPoolParams rel=JDBCConnectionPoolParams](#)
This resource's JDBCConnectionPoolParams singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDataSourceParams rel=JDBCDataSourceParams](#)
This resource's JDBCDataSourceParams singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams rel=JBCDriverParams](#)
This resource's JBCDriverParams singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JBCOracleParams rel=JBCOracleParams](#)
This resource's JBCOracleParams singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JBCXAParams rel=JBCXAParams](#)
This resource's JBCXAParams singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties rel=internalProperties](#)
This resource's internalProperties singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name} rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource rel=self](#)
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCDataSourceBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCDataSourceBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) instance.

The resource supports the following methods:

- [GET](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties](#) **rel**=properties

This resource's properties collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/propertyCreateForm](#) **rel**=propertyCreateForm

The create form resource for this resource's properties collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties

This resource manages a collection of [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/propertyCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResourc

POST

Add a new [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/property CreateForm

This resource manages the create forms for the properties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the properties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/propertyCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/propertyCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCConnectionPoolParams

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCConnectionPoolParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCConnectionPoolParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCConnectionPoolParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCConnectionPoolParams](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCConnectionPoolParams](#) **rel=self**

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCConnectionPoolParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCConnectionPoolParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDataSourceParams

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDataSourceParams](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDataSourceParams](#)
rel=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCResourceParams

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCResourceParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCResource](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCResource](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCResource
rel=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource
rel=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCResource/JDBCResource/properties
rel=properties
This resource's properties singleton resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCResource
rel=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) entity.

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/properties rel=properties](#)

This resource's properties collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/propertyCreateForm rel=propertyCreateForm](#)

The create form resource for this resource's properties collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties rel=self](#)

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResourc

POST

Add a new [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

DELETE

Delete this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/properties/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/properties](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/properties/{name}](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResourc

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/propertyCreateForm

This resource manages the create forms for the properties collection resource.

The resource supports the following methods:

- [GET](#)

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCOracleParams

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCOracleParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCOracleParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCOracleParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCOracleParams
rel=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCOracleParams **rel**=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCOracleParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCOracleParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCXAParams

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCXAParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCXAParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCXAParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCXAParams](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCXAParams](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResourc

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCXAParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCXAParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeploymentCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeploymentCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeploymentCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name} **rel**=self
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments](#)
rel=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel**=self

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel**=subDeployments

This resource's subDeployments collection resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JDBCSystemResources/{name}/subDeploymen

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSBridgeDestinationCreateForm

This resource manages the create forms for the JMSBridgeDestinations collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [JMSBridgeDestinations](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSBridgeDestinationCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSBridgeDestinations](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSBridgeDestinationCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSBridgeDestinations

This resource manages a collection of [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSBridgeDestinations](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSBridgeDestinationCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSBridgeDestinations](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSBridgeDestinations/{name}

This resource manages a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSBridgeDestinations/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSBridgeDestinations](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSBridgeDestinations/{name}](#) **rel=self**

This resource.

POST

Update this [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServerCreateForm

This resource manages the create forms for the JMSservers collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JMSServerMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JMSServers collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSServerMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServerCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServers](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServerCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServers

This resource manages a collection of [weblogic.management.configuration.JMSServerMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JMSServerMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JMSServerMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServers](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServerCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServers](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.JMSServerMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSServerMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServers/{name}

This resource manages a [weblogic.management.configuration.JMSServerMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JMSServerMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JMSServerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSServerMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServers/{name}/JMSMessageLogFile](#) **rel**=JMSMessageLogFile
This resource's JMSMessageLogFile singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServers/{name}](#) **rel**=canonical
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServers](#) **rel**=parent
The parent resource of this resource.
- **rel**=persistentStore
This resource's persistentStore reference to a [weblogic.management.configuration.PersistentStoreMBean](#) resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServers/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.JMSServerMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSServerMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServers/{name}/JMSMessageLogFile

This resource manages a [weblogic.management.configuration.JMSMessageLogFileMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.JMSMessageLogFileMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSMessageLogFileMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServers/{name}/JMSMessageLogFile **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServers/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSServers/{name}/JMSMessageLogFile **rel**=self

This resource.

POST

POST

Update this [weblogic.management.configuration.JMSMessageLogFileMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.JMSMessageLogFileMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResourceCreateForm

This resource manages the create forms for the JMSSystemResources collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JMSSystemResourceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JMSSystemResources collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSSystemResourceMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResourceCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResourceCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources

This resource manages a collection of [weblogic.management.configuration.JMSSystemResourceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JMSSystemResourceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JMSSystemResourceMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResourceCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources](#) **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.JMSSystemResourceMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}

This resource manages a [weblogic.management.configuration.JMSSystemResourceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JMSSystemResourceMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JMSSystemResourceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSSystemResourceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=JMSResource
This resource's JMSResource singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources](#) **rel**=parent
The parent resource of this resource.
- **rel**=resource
This resource's resource reference to a [weblogic.descriptor.DescriptorBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}](#) **rel**=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeploymentCreateForm](#) **rel**=subDeploymentCreateForm
The create form resource for this resource's subDeployments collection resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments](#) **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.JMSSystemResourceMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource

This resource manages a [weblogic.j2ee.descriptor.wl.JMSBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JMSBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JMSBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFErrorHandlingCreateForm](#) [rel=SAFErrorHandlingCreateForm](#)

The create form resource for this resource's SAFErrorHandlings collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFErrorHandlings](#) [rel=SAFErrorHandlings](#)

This resource's SAFErrorHandlings collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinationCreateForm](#) [rel=SAFImportedDestinationCreateForm](#)

The create form resource for this resource's SAFImportedDestinations collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations](#) [rel=SAFImportedDestinations](#)

This resource's SAFImportedDestinations collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContextCreateForm](#) [rel=SAFRemoteContextCreateForm](#)

The create form resource for this resource's SAFRemoteContexts collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts](#) [rel=SAFRemoteContexts](#)

This resource's SAFRemoteContexts collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) [rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories](#) [rel=connectionFactories](#)

This resource's connectionFactories collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactoryCreateForm
rel=connectionFactoryCreateForm
The create form resource for this resource's connectionFactories collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeyCreateForm
rel=destinationKeyCreateForm
The create form resource for this resource's destinationKeys collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys
rel=destinationKeys
This resource's destinationKeys collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServerCreateForm
rel=foreignServerCreateForm
The create form resource for this resource's foreignServers collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers
rel=foreignServers
This resource's foreignServers collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queueCreateForm
rel=queueCreateForm
The create form resource for this resource's queues collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues **rel**=queues
This resource's queues collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotaCreateForm
rel=quotaCreateForm
The create form resource for this resource's quotas collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas **rel**=quotas
This resource's quotas collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=self
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templateCreateForm
rel=templateCreateForm

The create form resource for this resource's templates collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates **rel**=templates

This resource's templates collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topicCreateForm **rel**=topicCreateForm

The create form resource for this resource's topics collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics **rel**=topics

This resource's topics collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueueCreateForm **rel**=uniformDistributedQueueCreateForm

The create form resource for this resource's uniformDistributedQueues collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues **rel**=uniformDistributedQueues

This resource's uniformDistributedQueues collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopicCreateForm **rel**=uniformDistributedTopicCreateForm

The create form resource for this resource's uniformDistributedTopics collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics **rel**=uniformDistributedTopics

This resource's uniformDistributedTopics collection resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JMSBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JMSBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories

This resource manages a collection of [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactoryCreateForm](#)
rel=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/clientParams](#) **rel**=clientParams
This resource's clientParams singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams](#) **rel**=defaultDeliveryParams
This resource's defaultDeliveryParams singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/flowControlParams](#) **rel**=flowControlParams
This resource's flowControlParams singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams](#) **rel**=loadBalancingParams
This resource's loadBalancingParams singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories](#)
rel=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/securityParams](#) **rel**=securityParams
This resource's securityParams singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}](#)
rel=self
This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/c

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/transactionParams **rel**=transactionParams

This resource's transactionParams singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/clientParams

This resource manages a [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/clientParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/clientParams](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/c

POST

Update this [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams

This resource manages a [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/flowControlParams

This resource manages a [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/flowControlParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/flowControlParams](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams

This resource manages a [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams](#) **rel=self**

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/securityParams

This resource manages a [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/securityParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/securityParams](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/c

POST

Update this [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/transactionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/transactionParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/transactionParams **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactoryCreateForm

This resource manages the create forms for the connectionFactories collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity populated with default values that can be customized then posted (using the POST method) to the connectionFactories collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactoryCreateForm
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories
rel=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource
rel=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactoryCreateForm
rel=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeyCreateForm

This resource manages the create forms for the destinationKeys collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the destinationKeys collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeyCreateForm](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeyCreateForm](#)
rel=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys

This resource manages a collection of [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeyCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/d

POST

Add a new [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys/{name}](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys/{name}](#)
rel=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServerCreateForm

This resource manages the create forms for the foreignServers collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity populated with default values that can be customized then posted (using the POST method) to the foreignServers collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServerCreateForm
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServerCreateForm
rel=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers

This resource manages a collection of [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServerCreateForm **rel**=create-form
The create form resource for this collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers **rel**=self
This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties](#) **rel=JNDIProperties**
This resource's JNDIProperties collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm](#) **rel=JNDIPropertyCreateForm**
The create form resource for this resource's JNDIProperties collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}](#) **rel=canonical**
This resource.

This resource's foreignConnectionFactories collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm](#) **rel=foreignConnectionFactoryCreateForm**
The create form resource for this resource's foreignConnectionFactories collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm](#) **rel=foreignDestinationCreateForm**
The create form resource for this resource's foreignDestinations collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations](#) **rel=foreignDestinations**
This resource's foreignDestinations collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers](#) **rel=parent**
The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}
rel=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories

This resource manages a collection of [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories](#) **rel=self**

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories/{name} **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm

This resource manages the create forms for the foreignConnectionFactories collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `foreignConnectionFactories` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactories](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}](#)
rel=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm

This resource manages the create forms for the foreignDestinations collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `foreignDestinations` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}](#)
rel=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations

This resource manages a collection of [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}](#)
rel=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties

This resource manages a collection of [weblogic.j2ee.descriptor.wl.PropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.PropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.PropertyBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties](#) **rel=self**

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPr operties/{key}

This resource manages a [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties/{key} rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties/{key} rel=self](#)

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm

This resource manages the create forms for the JNDIProperties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JNDIProperties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queueCreateForm

This resource manages the create forms for the queues collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity populated with default values that can be customized then posted (using the POST method) to the queues collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queuecreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queuecreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues

This resource manages a collection of [weblogic.j2ee.descriptor.wl.QueueBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.QueueBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.QueueBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queuecreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.QueueBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams](#) **rel=deliveryFailureParams**
This resource's [deliveryFailureParams](#) singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryParamsOverrides](#) **rel=deliveryParamsOverrides**
This resource's [deliveryParamsOverrides](#) singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/messageLoggingParams](#) **rel=messageLoggingParams**
This resource's [messageLoggingParams](#) singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues](#) **rel=parent**
The parent resource of this resource.
- **rel=quota**
This resource's [quota](#) reference to a [weblogic.j2ee.descriptor.wl.QuotaBean](#) resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}](#) **rel=self**
This resource.
- **rel=template**
This resource's [template](#) reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/thresholds](#) **rel=thresholds**
This resource's [thresholds](#) singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams/findSubDeploymentName](#) **rel=action** **title=findSubDeploymentName**
This resource's findSubDeploymentName action resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams](#) **rel=canonical**
This resource.
- **rel=errorDestination**
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams](#) **rel=self**
This resource.
- **rel=templateBean**
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryParamsOverrides](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryParamsOverrides](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/q

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/messageLoggingParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/messageLoggingParams **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/thresholds](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/thresholds](#)
rel=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/q

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotaCreateForm

This resource manages the create forms for the quotas collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity populated with default values that can be customized then posted (using the POST method) to the quotas collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotaCreateForm
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotaCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas

This resource manages a collection of [weblogic.j2ee.descriptor.wl.QuotaBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.QuotaBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.QuotaBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotaCreateForm **rel**=create-form
The create form resource for this collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas **rel**=self
This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlingCreateForm

This resource manages the create forms for the SAFEErrorHandlings collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFErrorHandlings collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFErrorHandlingCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFErrorHandlings **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFErrorHandlingCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFErrorHandlings](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFErrorHandlingCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFErrorHandlings](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFErrorHandlings/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) entity.

This method can return the following links:

- **rel**=SAFErrorDestination
This resource's SAFErrorDestination reference to a [weblogic.j2ee.descriptor.wl.SAFDestinationBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFErrorHandlings/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFErrorHandlings](#)
rel=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFErrorHandlings/{name}](#)
rel=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinationCreateForm

This resource manages the create forms for the SAFImportedDestinations collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFImportedDestinations collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinationCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinationCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinationCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

This method can return the following links:

- **rel=SAFErrorHandling**
This resource's SAFErrorHandling reference to a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) resource.
- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm rel=SAFQueueCreateForm**
The create form resource for this resource's SAFQueues collection resource.
- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues rel=SAFQueues**
This resource's SAFQueues collection resource.
- **rel=SAFRemoteContext**
This resource's SAFRemoteContext reference to a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) resource.
- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm rel=SAFTopicCreateForm**
The create form resource for this resource's SAFTopics collection resource.
- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics rel=SAFTopics**
This resource's SAFTopics collection resource.
- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name} rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams rel=messageLoggingParams**
This resource's messageLoggingParams singleton resource.
- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations rel=parent**

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name} **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm

This resource manages the create forms for the SAFQueues collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFQueues collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of `weblogic.j2ee.descriptor.wl.SAFQueueBean` instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of `weblogic.j2ee.descriptor.wl.SAFQueueBean` entities.

This method can return the following links:

- `uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues` `rel=canonical`

This resource.

- `uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm` `rel=create-form`

The create form resource for this collection resource.

- `uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}` `rel=parent`

The parent resource of this resource.

- `uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues` `rel=self`

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

This method can return the following links:

- **rel=SAFErrorHandling**
This resource's SAFErrorHandling reference to a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) resource.
- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name} rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams rel=messageLoggingParams**
This resource's messageLoggingParams singleton resource.
- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues rel=parent**
The parent resource of this resource.
- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name} rel=self**
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm

This resource manages the create forms for the SAFTopics collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFTopics collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

This method can return the following links:

- **rel=SAFErrorHandling**
This resource's SAFErrorHandling reference to a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) resource.
- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name} rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams rel=messageLoggingParams**
This resource's messageLoggingParams singleton resource.
- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics rel=parent**
The parent resource of this resource.
- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name} rel=self**
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContextCreateForm

This resource manages the create forms for the SAFRemoteContexts collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFRemoteContexts collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContextCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContextCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContextCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext](#) **rel**=SAFLoginContext

This resource's SAFLoginContext singleton resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext

This resource manages a [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templateCreateForm

This resource manages the create forms for the templates collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity populated with default values that can be customized then posted (using the POST method) to the templates collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templateCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templateCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates

This resource manages a collection of [weblogic.j2ee.descriptor.wl.TemplateBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.TemplateBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.TemplateBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templateCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/findErrorDestination](#) **rel=action** **title=findErrorDestination**
This resource's findErrorDestination action resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams](#) **rel=deliveryFailureParams**
This resource's deliveryFailureParams singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryParamsOverrides](#) **rel=deliveryParamsOverrides**
This resource's deliveryParamsOverrides singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParamCreateForm](#) **rel=groupParamCreateForm**
The create form resource for this resource's groupParams collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams](#) **rel=groupParams**
This resource's groupParams collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/messageLoggingParams](#) **rel=messageLoggingParams**
This resource's messageLoggingParams singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/multicast](#) **rel=multicast**
This resource's multicast singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates](#) **rel=parent**

The parent resource of this resource.

- **rel=quota**

This resource's quota reference to a weblogic.j2ee.descriptor.wl.QuotaBean resource.

- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name} rel=self**

This resource.

- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/thresholds rel=thresholds**

This resource's thresholds singleton resource.

- **uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/topicSubscriptionParams rel=topicSubscriptionParams**

This resource's topicSubscriptionParams singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams/findSubDeploymentName](#) **rel**=action
title=findSubDeploymentName

This resource's findSubDeploymentName action resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams](#) **rel**=canonical

This resource.

- **rel**=errorDestination

This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryParamsOverrides **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryParamsOverrides **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/findErrorDestination

The resource supports the following methods:

- [POST](#)

POST

Finds the name of the error destination to use when a destination comes from a specific group

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

subDeploymentName

The subDeployment for which to find the quota

Type: string

Response Body

Contains a JSON object with a `weblogic.j2ee.descriptor.wl.DestinationBean` reference return field.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParamCreateForm

This resource manages the create forms for the groupParams collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity populated with default values that can be customized then posted (using the POST method) to the groupParams collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParamCreateForm rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams rel=create](#)

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name} rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParamCreateForm rel=self](#)

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams

This resource manages a collection of [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParamCreateForm rel=create-form](#)

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name} rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams rel=self](#)

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams/{subDeploymentName}

This resource manages a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams/{subDeploymentName}](#) **rel**=canonical

This resource.

- **rel**=errorDestination

This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams/{subDeploymentName}](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/messageLoggingParams **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/messageLoggingParams **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/multicast

This resource manages a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/multicast](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/multicast](#)
rel=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/thresholds
rel=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/thresholds
rel=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/topicSubscriptionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/topicSubscriptionParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/topicSubscriptionParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topicCreateForm

This resource manages the create forms for the topics collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity populated with default values that can be customized then posted (using the POST method) to the topics collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topicCreateForm
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topicCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics

This resource manages a collection of [weblogic.j2ee.descriptor.wl.TopicBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.TopicBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.TopicBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topicCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.TopicBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams](#) **rel=deliveryFailureParams**
This resource's `deliveryFailureParams` singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryParamsOverrides](#) **rel=deliveryParamsOverrides**
This resource's `deliveryParamsOverrides` singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/messageLoggingParams](#) **rel=messageLoggingParams**
This resource's `messageLoggingParams` singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/multicast](#) **rel=multicast**
This resource's `multicast` singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics](#) **rel=parent**
The parent resource of this resource.
- **rel=quota**
This resource's `quota` reference to a `weblogic.j2ee.descriptor.wl.QuotaBean` resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}](#) **rel=self**
This resource.
- **rel=template**
This resource's `template` reference to a `weblogic.j2ee.descriptor.wl.TemplateBean` resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/thresholds
rel=thresholds

This resource's thresholds singleton resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/topicSubscriptionParams **rel**=topicSubscriptionParams

This resource's topicSubscriptionParams singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams/findSubDeploymentName **rel**=action **title**=findSubDeploymentName
This resource's findSubDeploymentName action resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryParams Overrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryParamsOverrides](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryParamsOverrides](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/messageLoggingParams](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/messageLoggingParams](#) **rel=self**

This resource.

- **rel=templateBean**

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/multicast

This resource manages a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/multicast](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/multicast](#)
rel=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/thresholds
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/thresholds
rel=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/topicSubscriptionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/topicSubscriptionParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/topicSubscriptionParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueueCreateForm

This resource manages the create forms for the uniformDistributedQueues collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `uniformDistributedQueues` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueueCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueueCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues

This resource manages a collection of [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueueCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues](#)
rel=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams](#) **rel=deliveryFailureParams**

This resource's `deliveryFailureParams` singleton resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides](#) **rel=deliveryParamsOverrides**

This resource's `deliveryParamsOverrides` singleton resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams](#) **rel=messageLoggingParams**

This resource's `messageLoggingParams` singleton resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues](#) **rel=parent**

The parent resource of this resource.

- **rel=quota**

This resource's quota reference to a [weblogic.j2ee.descriptor.wl.QuotaBean](#) resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel=self**

This resource.

- **rel=template**

This resource's template reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds](#) **rel=thresholds**

This resource's thresholds singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams/findSubDeploymentName **rel**=action
title=findSubDeploymentName

This resource's findSubDeploymentName action resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams **rel**=canonical

This resource.

- **rel**=errorDestination

This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/u

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopicCreateForm

This resource manages the create forms for the uniformDistributedTopics collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `uniformDistributedTopics` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopicCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopicCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics

This resource manages a collection of [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopicCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics](#)
rel=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams](#) **rel=deliveryFailureParams**
This resource's `deliveryFailureParams` singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides](#) **rel=deliveryParamsOverrides**
This resource's `deliveryParamsOverrides` singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams](#) **rel=messageLoggingParams**
This resource's `messageLoggingParams` singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/multicast](#) **rel=multicast**
This resource's `multicast` singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics](#) **rel=parent**
The parent resource of this resource.
- **rel=quota**
This resource's quota reference to a [weblogic.j2ee.descriptor.wl.QuotaBean](#) resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel=self**
This resource.
- **rel=template**

This resource's template reference to a `weblogic.j2ee.descriptor.wl.TemplateBean` resource.

- **uri**=`/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds` **rel**=`thresholds`

This resource's `thresholds` singleton resource.

- **uri**=`/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/topicSubscriptionParams` **rel**=`topicSubscriptionParams`

This resource's `topicSubscriptionParams` singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams/findSubDeploymentName **rel**=action
title=findSubDeploymentName

This resource's findSubDeploymentName action resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams **rel**=canonical

This resource.

- **rel**=errorDestination

This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/u

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/multicast

This resource manages a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/multicast](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/multicast](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/u

POST

Update this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds](#) **rel=self**

This resource.

- **rel=templateBean**

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/topicSubscriptionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/topicSubscriptionParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/topicSubscriptionParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeploymentCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeploymentCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeploymentCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name} **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments](#)
rel=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel**=self

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel**=subDeployments

This resource's subDeployments collection resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/JMSSystemResources/{name}/subDeployment

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries

This resource manages a collection of [weblogic.management.configuration.LibraryMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.LibraryMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.LibraryMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name} rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries rel=self](#)
This resource.

POST

The resource supports the following methods:

- [POST accepting application/json](#)
- [POST accepting multipart/form-data](#)

POST accepting application/json

This resource is used to deploy libraries that are already on the administration server.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.LibraryMBean](#) entity.

To deploy a library, you must provide the name of the library, the path to the library, and the targets to which the library will be deployed.

Use the multi-part form to deploy a library.

- `sourcePath`: the deployment to upload (required)
- `model`: JSONObject containing a LibraryMBean entity that contains the rest of the deployment information (required)

POST accepting multipart/form-data

Upload a library from the client to the server then deploy it.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

Request Body

Use the multi-part form to upload a library from the client to the server then deploy it.

- `sourcePath`: the deployment to upload (required)
- `model`: JSONObject containing a LibraryMBean entity that contains the rest of the deployment information (required)

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}

This resource manages a [weblogic.management.configuration.LibraryMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Undeploy a library.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.LibraryMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.LibraryMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/createPlan **rel**=action **title**=createPlan
This resource's createPlan action resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/redeploy **rel**=redeploy
This resource's redeploy resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name} **rel**=self
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeploymentCreateForm **rel**=subDeploymentCreateForm
The create form resource for this resource's subDeployments collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.LibraryMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.LibraryMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/createPlan

The resource supports the following methods:

- [POST](#)

POST

The resource supports the following methods:

- [POST](#)
- [POST](#)

POST

Create a deployment plan in the specified directory.

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

planPath

planPath

Type: string

Response Body

Contains a JSON object with a string return field.

POST

Create a deployment plan in a default directory

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/redeploy

The resource supports the following methods:

- [POST](#)

POST

Use the multi-part form to redeploy a library.

- `sourcePath`: the deployment to upload (required)
- `model`: JSONObject containing a LibraryMBean entity that contains the rest of the deployment information (required)

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeploymentCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeploymentCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeploymentCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments/{name}](#) **rel**=self

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments](#)
rel=subDeployments

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments **rel**=self
This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments/{name}
rel=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments/{name}
rel=self
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments
This resource's subDeployments collection resource.

POST

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/lookupTarget

The resource supports the following methods:

- [POST](#)

POST

Find a particular target with a given name.

Roles

Admin

Request Body

Must contain a JSON object with the following fields:

name

the name of the target to find

Type: string

Response Body

Contains a JSON object with a `weblogic.management.configuration.TargetMBean` reference return field.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/mailSessionCreateForm

This resource manages the create forms for the mailSessions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.MailSessionMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the mailSessions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MailSessionMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/mailSessionCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/mailSessions](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/mailSessionCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/mailSessions

This resource manages a collection of [weblogic.management.configuration.MailSessionMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.MailSessionMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.MailSessionMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/mailSessions](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/mailSessionCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/mailSessions](#) **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.MailSessionMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MailSessionMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/mailSessions/{name}

This resource manages a [weblogic.management.configuration.MailSessionMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.MailSessionMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.MailSessionMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MailSessionMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/mailSessions/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/mailSessions](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/mailSessions/{name}](#) **rel=self**

This resource.

POST

Update this [weblogic.management.configuration.MailSessionMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MailSessionMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedExecutorServiceCreateForm

This resource manages the create forms for the managedExecutorServices collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `managedExecutorServices` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedExecutorServiceCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedExecutorServices](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedExecutorServiceCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedExecutorServices

This resource manages a collection of [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedExecutorServices](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedExecutorServiceCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedExecutorServices](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedExecutorServices/{name}

This resource manages a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedExecutorServices/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedExecutorServices](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedExecutorServices/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedScheduledExecutorServiceCreateForm

This resource manages the create forms for the managedScheduledExecutorServices collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `managedScheduledExecutorServices` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedScheduledExecutorServiceCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedScheduledExecutorServices](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedScheduledExecutorServiceCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedScheduledExecutorServices

This resource manages a collection of [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedScheduledExecutorServices](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedScheduledExecutorServiceCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedScheduledExecutorServices](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedScheduledExecutorServices/{name}

This resource manages a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this

[weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#)
instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedScheduledExecutorServices/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedScheduledExecutorServices](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedScheduledExecutorServices/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedThreadFactories

This resource manages a collection of [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedThreadFactories](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedThreadFactoryCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedThreadFactories](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedThreadFactories/{name}

This resource manages a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedThreadFactories/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedThreadFactories **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedThreadFactories/{name} **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedThreadFactoryCreateForm

This resource manages the create forms for the managedThreadFactories collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `managedThreadFactories` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedThreadFactoryCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedThreadFactories](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/managedThreadFactoryCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/messagingBridgeCreateForm

This resource manages the create forms for the messagingBridges collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.MessagingBridgeMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `messagingBridges` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MessagingBridgeMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/messagingBridgeCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/messagingBridges](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/messagingBridgeCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/messagingBridges

This resource manages a collection of [weblogic.management.configuration.MessagingBridgeMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.MessagingBridgeMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.MessagingBridgeMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/messagingBridges](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/messagingBridgeCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/messagingBridges](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.MessagingBridgeMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.MessagingBridgeMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/messagingBridges/{name}

This resource manages a [weblogic.management.configuration.MessagingBridgeMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.MessagingBridgeMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.MessagingBridgeMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MessagingBridgeMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/messagingBridges/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/messagingBridges](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/messagingBridges/{name}](#) **rel**=self

This resource.

- **rel**=sourceDestination

This resource's sourceDestination reference to a [weblogic.management.configuration.BridgeDestinationCommonMBean](#) resource.

- **rel**=targetDestination

This resource's targetDestination reference to a [weblogic.management.configuration.BridgeDestinationCommonMBean](#) resource.

POST

Update this [weblogic.management.configuration.MessagingBridgeMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.MessagingBridgeMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/osgiFrameworkCreateForm

This resource manages the create forms for the osgiFrameworks collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.OsgiFrameworkMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `osgiFrameworks` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.OsgiFrameworkMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/osgiFrameworkCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/osgiFrameworks](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/osgiFrameworkCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/osgiFrameworks

This resource manages a collection of [weblogic.management.configuration.OsgiFrameworkMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.OsgiFrameworkMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.OsgiFrameworkMBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/osgiFrameworks **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/osgiFrameworkCreateForm **rel**=create-form
The create form resource for this collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/osgiFrameworks **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.OsgiFrameworkMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.OsgiFrameworkMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/osgiFrameworks/{name}

This resource manages a [weblogic.management.configuration.OsgiFrameworkMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.OsgiFrameworkMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.OsgiFrameworkMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.OsgiFrameworkMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/osgiFrameworks/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/osgiFrameworks](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/osgiFrameworks/{name}](#) **rel=self**
This resource.

POST

Update this [weblogic.management.configuration.OsgiFrameworkMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.OsgiFrameworkMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgentCreateForm

This resource manages the create forms for the SAFAgents collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SAFAgentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFAgents collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SAFAgentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgentCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgents](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgentCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgents

This resource manages a collection of [weblogic.management.configuration.SAFAgentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SAFAgentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SAFAgentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgents](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgentCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgents](#) **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.SAFAgentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SAFAgentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgents/{name}

This resource manages a [weblogic.management.configuration.SAFAMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SAFAgentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SAFAgentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SAFAgentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgents/{name}/JMSSAFMessageLogFile](#) **rel**=JMSSAFMessageLogFile
This resource's JMSSAFMessageLogFile singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgents/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgents](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgents/{name}](#) **rel**=self
This resource.
- **rel**=store
This resource's store reference to a [weblogic.management.configuration.PersistentStoreMBean](#) resource.

POST

Update this [weblogic.management.configuration.SAFAgentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SAFAgentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgents/{name}/JMSSAFMessageLogFile

This resource manages a [weblogic.management.configuration.JMSSAFMessageLogFileMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.JMSSAFMessageLogFileMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSSAFMessageLogFileMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgents/{name}/JMSSAFMessageLogFile](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgents/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/SAFAgents/{name}/JMSSAFMessageLogFile](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.JMSSAFMessageLogFileMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.JMSSAFMessageLogFileMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResourceCreateForm

This resource manages the create forms for the WLDFSystemResources collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.WLDFSystemResourceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [WLDFSystemResources](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WLDFSystemResourceMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResourceCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResourceCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources

This resource manages a collection of [weblogic.management.configuration.WLDFSystemResourceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.WLDFSystemResourceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.WLDFSystemResourceMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResourceCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources](#) **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.WLDFSystemResourceMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WLDFSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}

This resource manages a [weblogic.management.configuration.WLDFSystemResourceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.WLDFSystemResourceMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.WLDFSystemResourceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WLDFSystemResourceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource](#) **rel**=WLDFResource
This resource's WLDFResource singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources](#) **rel**=parent
The parent resource of this resource.
- **rel**=resource
This resource's resource reference to a [weblogic.descriptor.DescriptorBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}](#) **rel**=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeploymentCreateForm](#) **rel**=subDeploymentCreateForm
The create form resource for this resource's subDeployments collection resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments](#) **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.WLDFSystemResourceMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.WLDFSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeploymentCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeploymentCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeploymentCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}](#) **rel=self**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel=subDeployments**

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel**=self

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel**=subDeployments

This resource's subDeployments collection resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployme

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource

This resource manages a [weblogic.diagnostics.descriptor.WLDFResourceBean](#) instance.

The resource supports the following methods:

- [GET](#)

GET

Get this [weblogic.diagnostics.descriptor.WLDFResourceBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFResourceBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester **rel**=harvester
This resource's harvester singleton resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation **rel**=instrumentation
This resource's instrumentation singleton resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource **rel**=self
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=watchNotification
This resource's watchNotification singleton resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester

This resource manages a [weblogic.diagnostics.descriptor.WLDFHarvesterBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.diagnostics.descriptor.WLDFHarvesterBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFHarvesterBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypeCreateForm](#) **rel=harvestedTypeCreateForm**

The create form resource for this resource's harvestedTypes collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes](#) **rel=harvestedTypes**

This resource's harvestedTypes collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester](#) **rel=self**

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFHarvesterBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFHarvesterBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypeC reateForm

This resource manages the create forms for the harvestedTypes collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) entity populated with default values that can be customized then posted (using the POST method) to the harvestedTypes collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypeCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypeCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes/CreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes](#) **rel**=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes/{name}](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDSystemResources/{name}/WLDResource

POST

Update this [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation

This resource manages a [weblogic.diagnostics.descriptor.WLDFInstrumentationBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.diagnostics.descriptor.WLDFInstrumentationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFInstrumentationBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitorCreateForm
rel=WLDFInstrumentationMonitorCreateForm

The create form resource for this resource's WLDFInstrumentationMonitors collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors **rel**=WLDFInstrumentationMonitors

This resource's WLDFInstrumentationMonitors collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFInstrumentationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFInstrumentationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitorCreateForm

This resource manages the create forms for the WLDFInstrumentationMonitors collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [WLDFInstrumentationMonitors](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitorCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitorCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitorCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors](#) **rel**=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification

This resource manages a [weblogic.diagnostics.descriptor.WLDFWatchNotificationBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.diagnostics.descriptor.WLDFWatchNotificationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFWatchNotificationBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotificationCreateForm](#) **rel**=JMSNotificationCreateForm

The create form resource for this resource's JMSNotifications collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications](#) **rel**=JMSNotifications

This resource's JMSNotifications collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotificationCreateForm](#) **rel**=JMXNotificationCreateForm

The create form resource for this resource's JMXNotifications collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications](#) **rel**=JMXNotifications

This resource's JMXNotifications collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotificationCreateForm](#) **rel**=RESTNotificationCreateForm

The create form resource for this resource's RESTNotifications collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications](#) **rel**=RESTNotifications

This resource's RESTNotifications collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotificationCreateForm](#) **rel**=SMTPNotificationCreateForm

The create form resource for this resource's SMTPNotifications collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications](#) **rel**=SMTPNotifications

This resource's SMTPNotifications collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotificationCreateForm **rel**=SNMPNotificationCreateForm
The create form resource for this resource's SNMPNotifications collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications **rel**=SNMPNotifications
This resource's SNMPNotifications collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/lookupActions **rel**=action **title**=lookupActions
This resource's lookupActions action resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/lookupNotification **rel**=action **title**=lookupNotification
This resource's lookupNotification action resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actionCreateForm **rel**=actionCreateForm
The create form resource for this resource's actions collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions **rel**=actions
This resource's actions collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActionCreateForm **rel**=heapDumpActionCreateForm
The create form resource for this resource's heapDumpActions collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions **rel**=heapDumpActions
This resource's heapDumpActions collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotificationCreateForm **rel**=imageNotificationCreateForm
The create form resource for this resource's imageNotifications collection resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications **rel**=imageNotifications
This resource's imageNotifications collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActionCreateForm **rel**=logActionCreateForm

The create form resource for this resource's logActions collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions **rel**=logActions

This resource's logActions collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActionCreateForm **rel**=scaleDownActionCreateForm

The create form resource for this resource's scaleDownActions collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions **rel**=scaleDownActions

This resource's scaleDownActions collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActionCreateForm **rel**=scaleUpActionCreateForm

The create form resource for this resource's scaleUpActions collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActions **rel**=scaleUpActions

This resource's scaleUpActions collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActionCreateForm **rel**=scriptActionCreateForm

The create form resource for this resource's scriptActions collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions **rel**=scriptActions

This resource's scriptActions collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActionCreateForm **rel**=threadDumpActionCreateForm

The create form resource for this resource's threadDumpActions collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions **rel**=threadDumpActions

This resource's threadDumpActions collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watcheCreateForm **rel**=watcheCreateForm

The create form resource for this resource's watches collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches **rel**=watches

This resource's watches collection resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFWatchNotificationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFWatchNotificationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actionCreateForm

This resource manages the create forms for the actions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFActionBean](#) entity populated with default values that can be customized then posted (using the POST method) to the actions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFActionBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actionCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actionCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFActionBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFActionBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFActionBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actionCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFActionBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFActionBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFActionBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFActionBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFActionBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFActionBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayProperties](#) **rel=arrayProperties**

This resource's arrayProperties collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayPropertyCreateForm](#) **rel=arrayPropertyCreateForm**

The create form resource for this resource's arrayProperties collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/configurationProperties](#) **rel=configurationProperties**

This resource's configurationProperties collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encryptedProperties](#) **rel=encryptedProperties**

This resource's encryptedProperties collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encryptedPropertyCreateForm](#) **rel=encryptedPropertyCreateForm**

The create form resource for this resource's encryptedProperties collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties](#) **rel=mapProperties**

This resource's mapProperties collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapPropertyCreateForm](#) **rel=mapPropertyCreateForm**

The create form resource for this resource's mapProperties collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDSystemResources/{name}/WLDResource/watchNotification/actions **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDSystemResources/{name}/WLDResource/watchNotification/actions/{name}/properties **rel**=properties

This resource's properties collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDSystemResources/{name}/WLDResource/watchNotification/actions/{name}/propertyCreateForm **rel**=propertyCreateForm

The create form resource for this resource's properties collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDSystemResources/{name}/WLDResource/watchNotification/actions/{name} **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFActionBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFActionBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayProperties

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayProperties **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayPropertyCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayProperties **rel**=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayProperties/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) instance.

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/configurationProperties **rel**=configurationProperties

This resource's configurationProperties collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/encryptedProperties **rel**=encryptedProperties

This resource's encryptedProperties collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/encryptedPropertyCreateForm **rel**=encryptedPropertyCreateForm

The create form resource for this resource's encryptedProperties collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/properties **rel**=properties

This resource's properties collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/propertyCreateForm **rel**=propertyCreateForm

The create form resource for this resource's properties collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name} **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/configurationProperties

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFConfigurationPropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFConfigurationPropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFConfigurationPropertyBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/configurationProperties](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/configurationProperties](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/configurationProperties/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFConfigurationPropertyBean](#) instance.

The resource supports the following methods:

- [GET](#)

GET

Get this [weblogic.diagnostics.descriptor.WLDFConfigurationPropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFConfigurationPropertyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/configurationProperties/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/configurationProperties](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/configurationProperties/{name}](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/encryptedProperties

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/encryptedProperties](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/encryptedPropertyCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/encryptedProperties](#) **rel**=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/encryptedProperties/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/encryptedProperties/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/encryptedProperties](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/encryptedProperties/{name}](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDSystemResources/{name}/WLDResource

POST

Update this [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/encryptedPropertyCreateForm

This resource manages the create forms for the encryptedProperties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the encryptedProperties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/encryptedPropertyCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/encryptedProperties **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/encryptedPropertyCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/properties

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/properties](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/propertyCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/properties](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/properties/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/properties/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/properties **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/properties/{name} **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/propertyCreateForm

This resource manages the create forms for the properties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the properties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/propertycreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/properties](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/propertycreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapPropertyCreateForm

This resource manages the create forms for the mapProperties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFConfigurationPropertiesBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `mapProperties` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFConfigurationPropertiesBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapPropertyCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapPropertyCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/properties

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/properties](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/propertyCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/properties](#) **rel**=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/properties/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDPropertyBean](#) instance.

Roles

Admin

GET

Get this [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/properties/{name}](#) **rel**=canonical

This resource.

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/properties/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDPropertyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDPropertyBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/propertyCreateForm

This resource manages the create forms for the properties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the properties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/propertycreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/properties](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/propertycreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActionCreateForm

This resource manages the create forms for the heapDumpActions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) entity populated with default values that can be customized then posted (using the POST method) to the heapDumpActions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActionCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActionCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActionCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions/{name}](#) **rel=self**

This resource.

POST

POST

Update this [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotificationCreateForm

This resource manages the create forms for the imageNotifications collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `imageNotifications` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotificationCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotificationCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotificationCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDImageNotificationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications/{name}](#) **rel**=canonical

This resource.

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications/{name}](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDSystemResources/{name}/WLDResource

POST

Update this [weblogic.diagnostics.descriptor.WLDImageNotificationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDImageNotificationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotificationCreateForm

This resource manages the create forms for the JMSNotifications collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JMSNotifications collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotificationCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotificationCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotificationCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications **rel**=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications/{name} **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotificationCreateForm

This resource manages the create forms for the JMXNotifications collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JMXNotifications collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotificationCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotificationCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotificationCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActionCreateForm

This resource manages the create forms for the logActions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) entity populated with default values that can be customized then posted (using the POST method) to the logActions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActionCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActionCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActionCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions/{name} **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/lookupActions

The resource supports the following methods:

- [POST](#)

POST

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

typeName

typeName

Type: string

Response Body

Contains a JSON object with a array of
weblogic.diagnostics.descriptor.WLDFActionBean references return field.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/lookupNotification

The resource supports the following methods:

- [POST](#)

POST

Looks up an action with the given name.

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

name

name

Type: string

Response Body

Contains a JSON object with a `weblogic.diagnostics.descriptor.WLDFNotificationBean` reference return field.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotificationCreateForm

This resource manages the create forms for the RESTNotifications collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the RESTNotifications collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotificationCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotificationCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotificationCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications/{name}](#) **rel**=canonical

This resource.

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDSystemResources/{name}/WLDResource

POST

Update this [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActionCreateForm

This resource manages the create forms for the scaleDownActions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) entity populated with default values that can be customized then posted (using the POST method) to the scaleDownActions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActionCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActionCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActionCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions/{name}](#) **rel=self**

This resource.

POST

POST

Update this [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActionCreateForm

This resource manages the create forms for the scaleUpActions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `scaleUpActions` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActionCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActions](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActionCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUp Actions

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActions](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActionCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActions](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActions/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActions/{name}](#) **rel**=canonical

This resource.

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResourc

POST

Update this [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActionCreateForm

This resource manages the create forms for the scriptActions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) entity populated with default values that can be customized then posted (using the POST method) to the scriptActions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActionCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActionCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActionCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions **rel**=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions/{name}](#) **rel=self**

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotificationCreateForm

This resource manages the create forms for the SMTPNotifications collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SMTPNotifications collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotificationCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotificationCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotificationCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPTNotifications/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications/{name}](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResourc

POST

Update this [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotificationCreateForm

This resource manages the create forms for the SNMPNotifications collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SNMPNotifications collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotificationCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotificationCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotificationCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications/{name} **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActionCreateForm

This resource manages the create forms for the threadDumpActions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) entity populated with default values that can be customized then posted (using the POST method) to the threadDumpActions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActionCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActionCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActionCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDSystemResources/{name}/WLDResource

POST

Add a new [weblogic.diagnostics.descriptor.WLDThreadDumpActionBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDThreadDumpActionBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDThreadDumpActionBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDThreadDumpActionBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watcher/createForm

This resource manages the create forms for the watches collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFWatchBean](#) entity populated with default values that can be customized then posted (using the POST method) to the watches collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFWatchBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watcheCreateForm rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches rel=create](#)

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watcheCreateForm rel=self](#)

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFWatchBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFWatchBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFWatchBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watcheCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches **rel**=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFWatchBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFWatchBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFWatchBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFWatchBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFWatchBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFWatchBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name} **rel**=canonical

This resource.

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name}/schedule **rel**=schedule

This resource's schedule singleton resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name} **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFWatchBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFWatchBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name}/schedule

This resource manages a [weblogic.diagnostics.descriptor.WLDFScheduleBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.diagnostics.descriptor.WLDFScheduleBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFScheduleBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name}/schedule](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name}/schedule](#) **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFScheduleBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFScheduleBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager

This resource manages a [weblogic.management.configuration.ResourceManagerMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ResourceManagerMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ResourceManagerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ResourceManagerMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceManagerMBean](#) **rel**=canonical

This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization](#) **rel**=cpuUtilization

This resource's cpuUtilization singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilizationCreateForm](#) **rel**=cpuUtilizationCreateForm

The create form resource for this resource's cpuUtilization optional singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceManager/createForm](#) **rel**=create-form

The create form resource for this optional singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen](#) **rel**=fileOpen

This resource's fileOpen singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpenCreateForm](#) **rel**=fileOpenCreateForm

The create form resource for this resource's fileOpen optional singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained](#) **rel**=heapRetained

This resource's heapRetained singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetainedCreateForm](#) **rel**=heapRetainedCreateForm

The create form resource for this resource's heapRetained optional singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent

The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceManager/restartLoopProtection](#) **rel**=restartLoopProtection

This resource's restartLoopProtection singleton resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceManager
l=self
This resource.

POST

Update this [weblogic.management.configuration.ResourceManagerMBean](#) instance if it exists; otherwise, create it.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ResourceManagerMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization

This resource manages a [weblogic.management.configuration.CpuUtilizationMBean](#) instance.

The resource supports the following methods:

Admin

GET

Get this [weblogic.management.configuration.FairShareConstraintMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FairShareConstraintMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/fairShareConstraint](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/fairShareConstraintCreateForm](#) **rel=create-form**
The create form resource for this optional singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/fairShareConstraint](#) **rel=self**
This resource.

POST

Update this [weblogic.management.configuration.FairShareConstraintMBean](#) instance if it exists; otherwise, create it.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.FairShareConstraintMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/fairShareConstraintCreateForm

This resource manages the create forms for the fairShareConstraint optional singleton instance.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.FairShareConstraintMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [fairShareConstraint](#) optional singleton resource to create a new instance if it currently does not exist.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FairShareConstraintMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/fairShareConstraintCreateForm rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/fairShareConstraintCreateForm rel=create](#)
The optional singleton resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/fairShareConstraintCreateForm rel=self](#)
This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/triggerCreateForm

This resource manages the create forms for the triggers collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.TriggerMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the triggers collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.TriggerMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/triggerCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/triggers](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/triggerCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/triggers

This resource manages a collection of [weblogic.management.configuration.TriggerMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.TriggerMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.TriggerMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/triggers](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/triggerCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/triggers](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.TriggerMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.TriggerMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/triggers/{name}

This resource manages a [weblogic.management.configuration.TriggerMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.TriggerMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.TriggerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.TriggerMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/triggers/{name} rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/triggers rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilization/triggers/{name} rel=self](#)
This resource.

POST

Update this [weblogic.management.configuration.TriggerMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.TriggerMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilizationCreateForm

This resource manages the create forms for the cpuUtilization optional singleton instance.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.CpuUtilizationMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `cpuUtilization` optional singleton resource to create a new instance if it currently does not exist.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CpuUtilizationMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilizationCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilizationCreateForm](#) **rel=create**
The optional singleton resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/parent](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/cpuUtilizationCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen

This resource manages a [weblogic.management.configuration.FileOpenMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.FileOpenMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.FileOpenMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FileOpenMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen/createForm](#) **rel=create-form**
The create form resource for this optional singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen](#) **rel=self**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen/triggers/createForm](#) **rel=triggerCreateForm**
The create form resource for this resource's triggers collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen/triggers](#) **rel=triggers**
This resource's triggers collection resource.

POST

Update this [weblogic.management.configuration.FileOpenMBean](#) instance if it exists; otherwise, create it.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.FileOpenMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen/triggerCreateForm

This resource manages the create forms for the triggers collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.TriggerMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the triggers collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.TriggerMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen/triggerCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen/triggers](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen/triggerCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen/triggers

This resource manages a collection of [weblogic.management.configuration.TriggerMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.TriggerMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.TriggerMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen/triggers](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen/triggerCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen/triggers](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.TriggerMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.TriggerMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen/triggers/{name}

This resource manages a [weblogic.management.configuration.TriggerMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.TriggerMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.TriggerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.TriggerMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen/triggers/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen/triggers **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpen/triggers/{name} **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.TriggerMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.TriggerMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpenCreateForm

This resource manages the create forms for the fileOpen optional singleton instance.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.FileOpenMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the fileOpen optional singleton resource to create a new instance if it currently does not exist.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FileOpenMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpenCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpenCreateForm](#) **rel=create**
The optional singleton resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/fileOpenCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained

This resource manages a [weblogic.management.configuration.HeapRetainedMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.HeapRetainedMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.HeapRetainedMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.HeapRetainedMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetainedCreateForm](#) **rel=create-form**
The create form resource for this optional singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/fairShareConstraint](#) **rel=fairShareConstraint**
This resource's fairShareConstraint singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/fairShareConstraintCreateForm](#) **rel=fairShareConstraintCreateForm**
The create form resource for this resource's fairShareConstraint optional singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained](#) **rel=self**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/triggerCreateForm](#) **rel=triggerCreateForm**
The create form resource for this resource's triggers collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/triggers](#) **rel=triggers**
This resource's triggers collection resource.

POST

Update this [weblogic.management.configuration.HeapRetainedMBean](#) instance if it exists; otherwise, create it.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.HeapRetainedMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/fairShareConstraint

This resource manages a [weblogic.management.configuration.FairShareConstraintMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.FairShareConstraintMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.FairShareConstraintMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FairShareConstraintMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/fairShareConstraint](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/fairShareConstraintCreateForm](#) **rel=create-form**
The create form resource for this optional singleton resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/fairShareConstraint](#) **rel=self**
This resource.

POST

Update this [weblogic.management.configuration.FairShareConstraintMBean](#) instance if it exists; otherwise, create it.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.FairShareConstraintMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/fairShareConstraintCreateForm

This resource manages the create forms for the fairShareConstraint optional singleton instance.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.FairShareConstraintMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [fairShareConstraint](#) optional singleton resource to create a new instance if it currently does not exist.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FairShareConstraintMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/fairShareConstraintCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/fairShareConstraintCreateForm](#) **rel=create**

The optional singleton resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/fairShareConstraintCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/triggerCreateForm

This resource manages the create forms for the triggers collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.TriggerMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the triggers collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.TriggerMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/triggerCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/triggers](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/triggerCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/triggers

This resource manages a collection of [weblogic.management.configuration.TriggerMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.TriggerMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.TriggerMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/triggers](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/triggerCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/triggers](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.TriggerMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.TriggerMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/triggers/{name}

This resource manages a [weblogic.management.configuration.TriggerMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.TriggerMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.TriggerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.TriggerMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/triggers/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/triggers](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetained/triggers/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.TriggerMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.TriggerMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetainedCreateForm

This resource manages the create forms for the heapRetained optional singleton instance.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.HeapRetainedMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the heapRetained optional singleton resource to create a new instance if it currently does not exist.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.HeapRetainedMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetainedCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetainedCreateForm](#) **rel=create**

The optional singleton resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetainedCreateForm](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/heapRetainedCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/resourceManager/restartLoopProtection

This resource manages a [weblogic.management.configuration.RestartLoopProtectionMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.RestartLoopProtectionMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.RestartLoopProtectionMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/restartLoopProtection](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/resourceManager/restartLoopProtection](#) **rel=self**
This resource.

POST

Update this [weblogic.management.configuration.RestartLoopProtectionMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.RestartLoopProtectionMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/resourceManagerCreateForm

This resource manages the create forms for the resourceManager optional singleton instance.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ResourceManagerMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the resourceManager optional singleton resource to create a new instance if it currently does not exist.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ResourceManagerMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceManagerCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceManagerCreateForm](#) **rel**=create
The optional singleton resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/resourceManagerCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning

This resource manages a [weblogic.management.configuration.SelfTuningMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SelfTuningMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SelfTuningMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning](#)
[rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/capacities](#)
[rel=capacities](#)
This resource's capacities collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/capacityCreateForm](#)
[rel=capacityCreateForm](#)
The create form resource for this resource's capacities collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClassCreateForm](#)
[rel=contextRequestClassCreateForm](#)
The create form resource for this resource's contextRequestClasses collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses](#)
[rel=contextRequestClasses](#)
This resource's contextRequestClasses collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/fairShareRequestClassCreateForm](#)
[rel=fairShareRequestClassCreateForm](#)
The create form resource for this resource's fairShareRequestClasses collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/fairShareRequestClasses](#)
[rel=fairShareRequestClasses](#)
This resource's fairShareRequestClasses collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/maxThreadsConstraintCreateForm](#)
[rel=maxThreadsConstraintCreateForm](#)
The create form resource for this resource's maxThreadsConstraints collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/maxThreadsConstraints](#)
[rel=maxThreadsConstraints](#)
This resource's maxThreadsConstraints collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/minThreadsConstraintCreateForm](#)
[rel=minThreadsConstraintCreateForm](#)

The create form resource for this resource's minThreadsConstraints collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/minThreadsConstraints **rel**=minThreadsConstraints

This resource's minThreadsConstraints collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/responseTimeRequestClassCreateForm **rel**=responseTimeRequestClassCreateForm

The create form resource for this resource's responseTimeRequestClasses collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/responseTimeRequestClasses **rel**=responseTimeRequestClasses

This resource's responseTimeRequestClasses collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/selfTuning **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagerCreateForm **rel**=workManagerCreateForm

The create form resource for this resource's workManagers collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers **rel**=workManagers

This resource's workManagers collection resource.

POST

POST

Update this [weblogic.management.configuration.SelfTuningMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.SelfTuningMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/capacities

This resource manages a collection of [weblogic.management.configuration.CapacityMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.CapacityMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.CapacityMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/capacities](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/capacityCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/capacities](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.CapacityMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CapacityMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/capacities/{name}

This resource manages a [weblogic.management.configuration.CapacityMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.CapacityMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.CapacityMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CapacityMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/capacities/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/capacities](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/capacities/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.CapacityMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.CapacityMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/capacityCreateForm

This resource manages the create forms for the capacities collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.CapacityMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the capacities collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.CapacityMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/capacityCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/capacities](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/capacityCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClassCreateForm

This resource manages the create forms for the contextRequestClasses collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ContextRequestClassMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the contextRequestClasses collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ContextRequestClassMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClassCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClassCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses

This resource manages a collection of [weblogic.management.configuration.ContextRequestClassMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ContextRequestClassMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ContextRequestClassMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClassCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.ContextRequestClassMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ContextRequestClassMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}

This resource manages a [weblogic.management.configuration.ContextRequestClassMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.management.configuration.ContextRequestClassMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ContextRequestClassMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ContextRequestClassMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCaseCreateForm](#) **rel=contextCaseCreateForm**
The create form resource for this resource's contextCases collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases](#) **rel=contextCases**
This resource's contextCases collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}](#) **rel=self**
This resource.

POST

Update this [weblogic.management.configuration.ContextRequestClassMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ContextRequestClassMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCaseCreateForm

This resource manages the create forms for the contextCases collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ContextCaseMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the contextCases collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ContextCaseMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCaseCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCaseCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases

This resource manages a collection of [weblogic.management.configuration.ContextCaseMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ContextCaseMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ContextCaseMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCaseCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.ContextCaseMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ContextCaseMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}

This resource manages a [weblogic.management.configuration.ContextCaseMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ContextCaseMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ContextCaseMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ContextCaseMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/fairShareRequestClass](#) **rel=fairShareRequestClass**

This resource's fairShareRequestClass singleton resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/fairShareRequestClassCreateForm](#) **rel=fairShareRequestClassCreateForm**

The create form resource for this resource's fairShareRequestClass optional singleton resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/responseTimeRequestClass](#) **rel=responseTimeRequestClass**

This resource's responseTimeRequestClass singleton resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/responseTimeRequestClassCreateForm](#) **rel=responseTimeRequestClassCreateForm**

The create form resource for this resource's responseTimeRequestClass optional singleton resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}](#) **rel=self**

This resource.

POST

Update this [weblogic.management.configuration.ContextCaseMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ContextCaseMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/fairShareRequestClass

This resource manages a [weblogic.management.configuration.FairShareRequestClassMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.FairShareRequestClassMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.FairShareRequestClassMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FairShareRequestClassMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/fairShareRequestClass](#)
rel=canonical

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/fairShareRequestClassCreateForm](#)
rel=create-form

The create form resource for this optional singleton resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/fairShareRequestClass](#) **rel=self**

This resource.

POST

Update this [weblogic.management.configuration.FairShareRequestClassMBean](#) instance if it exists; otherwise, create it.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.FairShareRequestClassMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/fairShareRequestClassCreateForm

This resource manages the create forms for the fairShareRequestClass optional singleton instance.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.FairShareRequestClassMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [fairShareRequestClass](#) optional singleton resource to create a new instance if it currently does not exist.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FairShareRequestClassMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/fairShareRequestClassCreateForm](#)
rel=canonical

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/fairShareRequestClassCreateForm](#)
rel=create

The optional singleton resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/fairShareRequestClassCreateForm](#)
rel=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/responseTimeRequestClass

This resource manages a [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/responseTimeRequestClass](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/responseTimeRequestClassCreateForm](#) **rel**=create-form

The create form resource for this optional singleton resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/responseTimeRequestClass](#)
rel=self

This resource.

POST

Update this [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) instance if it exists; otherwise, create it.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/responseTimeRequestClassCreateForm

This resource manages the create forms for the responseTimeRequestClass optional singleton instance.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the responseTimeRequestClass optional singleton resource to create a new instance if it currently does not exist.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/responseTimeRequestClassCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/responseTimeRequestClassCreateForm](#) **rel=create**

The optional singleton resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/contextRequestClasses/{name}/contextCases/{name}/responseTimeRequestClassCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/fairShareRequestClassCreateForm

This resource manages the create forms for the fairShareRequestClasses collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.FairShareRequestClassMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [fairShareRequestClasses](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FairShareRequestClassMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/fairShareRequestClassCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/fairShareRequestClasses](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/fairShareRequestClassCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/fairShareRequestClasses

This resource manages a collection of [weblogic.management.configuration.FairShareRequestClassMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.FairShareRequestClassMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.FairShareRequestClassMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/fairShareRequestClasses](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/fairShareRequestClassCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/fairShareRequestClasses](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.FairShareRequestClassMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.FairShareRequestClassMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/fairShareRequestClasses/{name}

This resource manages a [weblogic.management.configuration.FairShareRequestClassMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.FairShareRequestClassMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.FairShareRequestClassMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FairShareRequestClassMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/fairShareRequestClasses/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/fairShareRequestClasses](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/fairShareRequestClasses/{name}](#) **rel=self**

This resource.

POST

Update this [weblogic.management.configuration.FairShareRequestClassMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.FairShareRequestClassMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/maxThreadsConstraintCreateForm

This resource manages the create forms for the maxThreadsConstraints collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.MaxThreadsConstraintMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `maxThreadsConstraints` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MaxThreadsConstraintMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/maxThreadsConstraintCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/maxThreadsConstraints](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning](#)
rel=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/maxThreadsConstraintCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/maxThreadsConstraints

This resource manages a collection of [weblogic.management.configuration.MaxThreadsConstraintMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.MaxThreadsConstraintMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.MaxThreadsConstraintMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/maxThreadsConstraints](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/maxThreadsConstraintCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/maxThreadsConstraints](#) **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.MaxThreadsConstraintMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MaxThreadsConstraintMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/maxThreadsConstraints/{name}

This resource manages a [weblogic.management.configuration.MaxThreadsConstraintMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.MaxThreadsConstraintMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.MaxThreadsConstraintMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MaxThreadsConstraintMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/maxThreadsConstraints/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/maxThreadsConstraints](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/maxThreadsConstraints/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.MaxThreadsConstraintMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MaxThreadsConstraintMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/minThreadsConstraintCreateForm

This resource manages the create forms for the minThreadsConstraints collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.MinThreadsConstraintMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the minThreadsConstraints collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MinThreadsConstraintMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/minThreadsConstraintCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/minThreadsConstraints](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/minThreadsConstraintCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/minThreadsConstraints

This resource manages a collection of [weblogic.management.configuration.MinThreadsConstraintMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.MinThreadsConstraintMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.MinThreadsConstraintMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/minThreadsConstraints](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/minThreadsConstraintCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/minThreadsConstraints](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.MinThreadsConstraintMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MinThreadsConstraintMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/minThreadsConstraints/{name}

This resource manages a [weblogic.management.configuration.MinThreadsConstraintMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.MinThreadsConstraintMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.MinThreadsConstraintMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MinThreadsConstraintMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/minThreadsConstraints/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/minThreadsConstraints](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/minThreadsConstraints/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.MinThreadsConstraintMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MinThreadsConstraintMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/responseTimeRequestClassCreateForm

This resource manages the create forms for the responseTimeRequestClasses collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [responseTimeRequestClasses](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/responseTimeRequestClassCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/responseTimeRequestClasses](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/responseTimeRequestClassCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/responseTimeRequestClasses

This resource manages a collection of [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/responseTimeRequestClasses](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/responseTimeRequestClassCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/responseTimeRequestClasses](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/responseTimeRequestClasses/{name}

This resource manages a [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/responseTimeRequestClasses/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/responseTimeRequestClasses](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/responseTimeRequestClasses/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagerCreateForm

This resource manages the create forms for the workManagers collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.WorkManagerMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the workManagers collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WorkManagerMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagerCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagerCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers

This resource manages a collection of [weblogic.management.configuration.WorkManagerMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.WorkManagerMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.WorkManagerMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagerCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.WorkManagerMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WorkManagerMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers/{name}

This resource manages a [weblogic.management.configuration.WorkManagerMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.management.configuration.WorkManagerMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.WorkManagerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WorkManagerMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers/{name}](#) **rel**=canonical
This resource.
- **rel**=capacity
This resource's capacity reference to a [weblogic.management.configuration.CapacityMBean](#) resource.
- **rel**=contextRequestClass
This resource's contextRequestClass reference to a [weblogic.management.configuration.ContextRequestClassMBean](#) resource.
- **rel**=fairShareRequestClass
This resource's fairShareRequestClass reference to a [weblogic.management.configuration.FairShareRequestClassMBean](#) resource.
- **rel**=maxThreadsConstraint
This resource's maxThreadsConstraint reference to a [weblogic.management.configuration.MaxThreadsConstraintMBean](#) resource.
- **rel**=minThreadsConstraint
This resource's minThreadsConstraint reference to a [weblogic.management.configuration.MinThreadsConstraintMBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers](#) **rel**=parent
The parent resource of this resource.
- **rel**=responseTimeRequestClass
This resource's responseTimeRequestClass reference to a [weblogic.management.configuration.ResponseTimeRequestClassMBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers/{name}](#) **rel**=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers/{name}/workManagerShutdownTrigger](#) **rel**=workManagerShutdownTrigger
This resource's workManagerShutdownTrigger singleton resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers/{name}/workManagerShutdownTriggerCreateForm
rel=workManagerShutdownTriggerCreateForm

The create form resource for this resource's workManagerShutdownTrigger optional singleton resource.

POST

Update this [weblogic.management.configuration.WorkManagerMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WorkManagerMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers/{name}/workManagerShutdownTrigger

This resource manages a [weblogic.management.configuration.WorkManagerShutdownTriggerMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this

[weblogic.management.configuration.WorkManagerShutdownTriggerMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.WorkManagerShutdownTriggerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WorkManagerShutdownTriggerMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers/{name}/workManagerShutdownTrigger **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers/{name}/workManagerShutdownTriggerCreateForm **rel**=create-form

The create form resource for this optional singleton resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers/{name}/workManagerShutdownTrigger **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.WorkManagerShutdownTriggerMBean](#) instance if it exists; otherwise, create it.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WorkManagerShutdownTriggerMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers/{name}/workManagerShutdownTriggerCreateForm

This resource manages the create forms for the workManagerShutdownTrigger optional singleton instance.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.WorkManagerShutdownTriggerMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the workManagerShutdownTrigger optional singleton resource to create a new instance if it currently does not exist.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WorkManagerShutdownTriggerMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers/{name}/workManagerShutdownTriggerCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers/{name}/workManagerShutdownTriggerCreateForm](#) **rel=create**
The optional singleton resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/selfTuning/workManagers/{name}/workManagerShutdownTriggerCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/partitions/{name}/systemFileSystem

This resource manages a [weblogic.management.configuration.PartitionFileSystemMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.PartitionFileSystemMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.PartitionFileSystemMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/systemFileSystem](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/systemFileSystem](#)
rel=self
This resource.

POST

POST

Update this [weblogic.management.configuration.PartitionFileSystemMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.PartitionFileSystemMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/userFileSystem

This resource manages a [weblogic.management.configuration.PartitionUserFileSystemMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.PartitionUserFileSystemMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.PartitionUserFileSystemMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/userFileSystem](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/userFileSystem](#)
rel=self
This resource.

POST

Update this [weblogic.management.configuration.PartitionUserFileSystemMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.PartitionUserFileSystemMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/webService

This resource manages a [weblogic.management.configuration.WebServiceMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.WebServiceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WebServiceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService](#)
rel=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceBuffering](#) **rel**=webServiceBuffering
This resource's webServiceBuffering singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence](#) **rel**=webServicePersistence
This resource's webServicePersistence singleton resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceReliability](#) **rel**=webServiceReliability
This resource's webServiceReliability singleton resource.

POST

POST

Update this [weblogic.management.configuration.WebServiceMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WebServiceMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceBuffering

This resource manages a [weblogic.management.configuration.WebServiceBufferingMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.WebServiceBufferingMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WebServiceBufferingMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceBuffering](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceBuffering](#) **rel**=self

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceBuffering/webServiceRequestBufferingQueue](#) **rel**=webServiceRequestBufferingQueue

This resource's webServiceRequestBufferingQueue singleton resource.

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceBuffering/webServiceResponseBufferingQueue](#) **rel**=webServiceResponseBufferingQueue

This resource's webServiceResponseBufferingQueue singleton resource.

POST

Update this [weblogic.management.configuration.WebServiceBufferingMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WebServiceBufferingMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceBuffering/webServiceRequestBufferingQueue

This resource manages a [weblogic.management.configuration.WebServiceRequestBufferingQueueMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.WebServiceRequestBufferingQueueMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WebServiceRequestBufferingQueueMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceBuffering/webServiceRequestBufferingQueue](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceBuffering](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceBuffering/webServiceRequestBufferingQueue](#) **rel=self**

This resource.

POST

Update this [weblogic.management.configuration.WebServiceRequestBufferingQueueMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WebServiceRequestBufferingQueueMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceBuffering/webServiceResponseBufferingQueue

This resource manages a [weblogic.management.configuration.WebServiceResponseBufferingQueueMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.WebServiceResponseBufferingQueueMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WebServiceResponseBufferingQueueMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceBuffering/webServiceResponseBufferingQueue](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceBuffering](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceBuffering/webServiceResponseBufferingQueue](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.WebServiceResponseBufferingQueueMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WebServiceResponseBufferingQueueMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence

This resource manages a [weblogic.management.configuration.WebServicePersistenceMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.WebServicePersistenceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WebServicePersistenceMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence](#) **rel=self**
This resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServiceLogicalStoreCreateForm](#) **rel=webServiceLogicalStoreCreateForm**
The create form resource for this resource's webServiceLogicalStores collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServiceLogicalStores](#) **rel=webServiceLogicalStores**
This resource's webServiceLogicalStores collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServicePhysicalStoreCreateForm](#) **rel=webServicePhysicalStoreCreateForm**
The create form resource for this resource's webServicePhysicalStores collection resource.
- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServicePhysicalStores](#) **rel=webServicePhysicalStores**
This resource's webServicePhysicalStores collection resource.

POST

Update this [weblogic.management.configuration.WebServicePersistenceMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WebServicePersistenceMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServiceLogicalStoreCreateForm

This resource manages the create forms for the webServiceLogicalStores collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.WebServiceLogicalStoreMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [webServiceLogicalStores](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WebServiceLogicalStoreMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServiceLogicalStoreCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServiceLogicalStores](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServiceLogicalStoreCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServiceLogicalStores

This resource manages a collection of [weblogic.management.configuration.WebServiceLogicalStoreMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.WebServiceLogicalStoreMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.WebServiceLogicalStoreMBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServiceLogicalStores **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServiceLogicalStoreCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServiceLogicalStores **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.WebServiceLogicalStoreMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WebServiceLogicalStoreMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServiceLogicalStores/{name}

This resource manages a [weblogic.management.configuration.WebServiceLogicalStoreMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.WebServiceLogicalStoreMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.WebServiceLogicalStoreMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WebServiceLogicalStoreMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServiceLogicalStores/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServiceLogicalStores **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServiceLogicalStores/{name} **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.WebServiceLogicalStoreMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WebServiceLogicalStoreMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServicePhysicalStoreCreateForm

This resource manages the create forms for the webServicePhysicalStores collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.WebServicePhysicalStoreMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `webServicePhysicalStores` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WebServicePhysicalStoreMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServicePhysicalStoreCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServicePhysicalStores](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServicePhysicalStoreCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServicePhysicalStores

This resource manages a collection of [weblogic.management.configuration.WebServicePhysicalStoreMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.WebServicePhysicalStoreMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.WebServicePhysicalStoreMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServicePhysicalStores](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServicePhysicalStoreCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServicePhysicalStores](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.WebServicePhysicalStoreMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WebServicePhysicalStoreMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServicePhysicalStores/{name}

This resource manages a [weblogic.management.configuration.WebServicePhysicalStoreMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.WebServicePhysicalStoreMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.WebServicePhysicalStoreMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WebServicePhysicalStoreMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServicePhysicalStores/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServicePhysicalStores **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/partitions/{name}/webService/webServicePersistence/webServicePhysicalStores/{name} **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.WebServicePhysicalStoreMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WebServicePhysicalStoreMBean](#) entity.

/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceReliability

This resource manages a [weblogic.management.configuration.WebServiceReliabilityMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.WebServiceReliabilityMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WebServiceReliabilityMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceReliability](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitions/{name}/webService/webServiceReliability](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.WebServiceReliabilityMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WebServiceReliabilityMBean](#) entity.

/management/weblogic/{version}/edit/partitionWorkManagerCreateForm

This resource manages the create forms for the partitionWorkManagers collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.PartitionWorkManagerMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `partitionWorkManagers` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.PartitionWorkManagerMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitionWorkManagerCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/partitionWorkManagers](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/partitionWorkManagerCreateForm](#)
rel=self
This resource.

/management/weblogic/{version}/edit/partitionWorkManagers

This resource manages a collection of [weblogic.management.configuration.PartitionWorkManagerMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.PartitionWorkManagerMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.PartitionWorkManagerMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/partitionWorkManagers](#)
[rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/partitionWorkManagerCreateForm](#)
[rel=create-form](#)
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit](#) [rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/partitionWorkManagers](#) [rel=self](#)
This resource.

POST

Add a new [weblogic.management.configuration.PartitionWorkManagerMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.PartitionWorkManagerMBean](#) entity.

/management/weblogic/{version}/edit/partitionWorkManagers/{name}

This resource manages a [weblogic.management.configuration.PartitionWorkManagerMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.PartitionWorkManagerMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.PartitionWorkManagerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.PartitionWorkManagerMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/partitionWorkManagers/{name}](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/partitionWorkManagers](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/partitionWorkManagers/{name}](#)
rel=self

This resource.

POST

Update this [weblogic.management.configuration.PartitionWorkManagerMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.PartitionWorkManagerMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroupCreateForm

This resource manages the create forms for the resourceGroups collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ResourceGroupMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the resourceGroups collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ResourceGroupMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroupCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroupCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/resourceGroups

This resource manages a collection of [weblogic.management.configuration.ResourceGroupMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ResourceGroupMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ResourceGroupMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroupCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.ResourceGroupMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ResourceGroupMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}

This resource manages a [weblogic.management.configuration.ResourceGroupMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ResourceGroupMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ResourceGroupMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ResourceGroupMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCStoreCreateForm](#) [rel=JDBCStoreCreateForm](#)

The create form resource for this resource's JDBCStores collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCStores](#) [rel=JDBCStores](#)

This resource's JDBCStores collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResourceCreateForm](#) [rel=JDBCSystemResourceCreateForm](#)

The create form resource for this resource's JDBCSystemResources collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources](#) [rel=JDBCSystemResources](#)

This resource's JDBCSystemResources collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSBridgeDestinationCreateForm](#) [rel=JMSBridgeDestinationCreateForm](#)

The create form resource for this resource's JMSBridgeDestinations collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSBridgeDestinations](#) [rel=JMSBridgeDestinations](#)

This resource's JMSBridgeDestinations collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServerCreateForm](#) [rel=JMSServerCreateForm](#)

The create form resource for this resource's JMSServers collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServers](#) [rel=JMSServers](#)

This resource's JMSServers collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResourceCreateForm](#) [rel=JMSSystemResourceCreateForm](#)

The create form resource for this resource's JMSSystemResources collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources](#) [rel=JMSSystemResources](#)

This resource's JMSSystemResources collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgentCreateForm **rel**=SAFAgentCreateForm

The create form resource for this resource's SAFAgents collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgentCreateForm **rel**=SAFAgentCreateForm

This resource's SAFAgents collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResourceCreateForm **rel**=WLDFSystemResourceCreateForm

The create form resource for this resource's WLDFSystemResources collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources **rel**=WLDFSystemResources

This resource's WLDFSystemResources collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/findEffectiveTargets **rel**=action **title**=findEffectiveTargets

This resource's findEffectiveTargets action resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/lookupTarget **rel**=action **title**=lookupTarget

This resource's lookupTarget action resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments **rel**=appDeployments

This resource's appDeployments collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/fileStoreCreateForm **rel**=fileStoreCreateForm

The create form resource for this resource's fileStores collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/fileStores **rel**=fileStores

This resource's fileStores collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviderCreateForm **rel**=foreignJNDIProviderCreateForm

The create form resource for this resource's foreignJNDIProviders collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviders **rel**=foreignJNDIProviders

This resource's foreignJNDIProviders collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries **rel**=libraries

This resource's libraries collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/mailSessionCreateForm **rel**=mailSessionCreateForm
The create form resource for this resource's mailSessions collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/mailSessions **rel**=mailSessions
This resource's mailSessions collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/managedExecutorServiceCreateForm **rel**=managedExecutorServiceCreateForm
The create form resource for this resource's managedExecutorServices collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/managedExecutorServices **rel**=managedExecutorServices
This resource's managedExecutorServices collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/managedScheduledExecutorServiceCreateForm **rel**=managedScheduledExecutorServiceCreateForm
The create form resource for this resource's managedScheduledExecutorServices collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/managedScheduledExecutorServices **rel**=managedScheduledExecutorServices
This resource's managedScheduledExecutorServices collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/managedThreadFactories **rel**=managedThreadFactories
This resource's managedThreadFactories collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/managedThreadFactoryCreateForm **rel**=managedThreadFactoryCreateForm
The create form resource for this resource's managedThreadFactories collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/messagingBridgeCreateForm **rel**=messagingBridgeCreateForm
The create form resource for this resource's messagingBridges collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/messagingBridges **rel**=messagingBridges
This resource's messagingBridges collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/osgiFrameworkCreateForm **rel**=osgiFrameworkCreateForm
The create form resource for this resource's osgiFrameworks collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/osgiFrameworks **rel**=osgiFrameworks
This resource's osgiFrameworks collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups **rel**=parent
The parent resource of this resource.

- **rel=resourceGroupTemplate**
This resource's resourceGroupTemplate reference to a weblogic.management.configuration.ResourceGroupTemplateMBean resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name} rel=self**
This resource.

POST

Update this [weblogic.management.configuration.ResourceGroupMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ResourceGroupMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments

This resource manages a collection of [weblogic.management.configuration.AppDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.AppDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.AppDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments](#) **rel**=self
This resource.

POST

The resource supports the following methods:

- [POST accepting application/json](#)
- [POST accepting multipart/form-data](#)

POST accepting application/json

This resource deploy is used to deploy applications that are already on the administration server. The application must be a supported package type (for example, an EAR or WAR module).

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.AppDeploymentMBean](#) entity.

To deploy an application you must provide the name of the application, the path to the source of the deployable unit on the administration server, and the targets to which the application will be deployed.

If the source path is relative, it is resolved relative to *InstallDir/app* if *InstallDir* is not null; otherwise, it is resolved relative to the domain root.

POST accepting multipart/form-data

Use the multi-part form to upload an application from the client to the server and then deploy it.

- `sourcePath`: the deployment to upload (required)
- `planPath`: the deployment plan to upload (optional)
- `model`: JSONObject containing an `AppDeploymentMBean` entity that contains the rest of the deployment information (however, `deployment/plan` information is ignored) (required)

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

Request Body

Use the multi-part form to deploy an application.

- `sourcePath`: the deployment to upload (required)
- `planPath`: the deployment plan to upload (optional)

- model: JSONObject containing an AppDeploymentMBean entity that contains the rest of the deployment information. However, deployment/plan information is ignored. (required)

/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}

This resource manages a [weblogic.management.configuration.AppDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Undeploy an application.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.AppDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.AppDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/createPlan](#) **rel=action** **title=createPlan**
This resource's createPlan action resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/redeploy](#) **rel=redeploy**
This resource's redeploy resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}](#) **rel=self**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeploymentCreateForm](#) **rel=subDeploymentCreateForm**
The create form resource for this resource's subDeployments collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments](#) **rel=subDeployments**
This resource's subDeployments collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/update](#) **rel=update**
This resource's update resource.

POST

Update this [weblogic.management.configuration.AppDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.AppDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/createPlan

The resource supports the following methods:

- [POST](#)

POST

The resource supports the following methods:

- [POST](#)
- [POST](#)

POST

Create a deployment plan in the specified directory.

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

planPath

planPath

Type: string

Response Body

Contains a JSON object with a string return field.

POST

Create a deployment plan in a default directory

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/redeploy

The resource supports the following methods:

- [POST](#)

POST

Use the multi-part form to redeploy this application.

- `sourcePath`: the deployment to upload (required)
- `planPath`: the deployment plan to upload (optional)
- `model`: JSONObject containing an `AppDeploymentMBean` entity that contains the rest of the deployment information. However, deployment/plan information is ignored. (required)

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeploymentCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeploymentCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeploymentCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments](#) **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}](#) **rel**=self

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel**=subDeployments

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments/{name} **rel**=self
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments
This resource's subDeployments collection resource.

POST

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/appDeployments/{name}/update

The resource supports the following methods:

- [POST](#)

POST

Update this application.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

/management/weblogic/{version}/edit/resourceGroups/{name}/fileStoreCreateForm

This resource manages the create forms for the fileStores collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.FileStoreMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the fileStores collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FileStoreMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/fileStoreCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/fileStores](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/fileStoreCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/fileStores

This resource manages a collection of [weblogic.management.configuration.FileStoreMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.FileStoreMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.FileStoreMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/fileStores](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/fileStoreCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/fileStores](#)
rel=self

This resource.

POST

Add a new [weblogic.management.configuration.FileStoreMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.FileStoreMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/fileStores/{name}

This resource manages a [weblogic.management.configuration.FileStoreMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.FileStoreMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.FileStoreMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.FileStoreMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/fileStores/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/fileStores](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/fileStores/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.FileStoreMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.FileStoreMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/findEffectiveTargets

The resource supports the following methods:

- [POST](#)

POST

Returns the targets actually used by this resource group, accounting for partition-level defaulting.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a JSON object with a array of weblogic.management.configuration.TargetMBean references return field.

/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviderCreateForm

This resource manages the create forms for the foreignJNDIProviders collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ForeignJNDIPProviderMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [foreignJNDIPProviders](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDIPProviderMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIPProviderCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIPProviders](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIPProviderCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviders

This resource manages a collection of [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ForeignJNDIProviderMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviders](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviderCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviders](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDIProviderMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviders/{name}

This resource manages a [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDIProviderMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviders/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinkCreateForm](#) **rel=foreignJNDILinkCreateForm**
The create form resource for this resource's foreignJNDILinks collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinks](#) **rel=foreignJNDILinks**
This resource's foreignJNDILinks collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviders](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviders/{name}](#) **rel=self**
This resource.

POST

Update this [weblogic.management.configuration.ForeignJNDIProviderMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDIProviderMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinkCreateForm

This resource manages the create forms for the foreignJNDILinks collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ForeignJNDILinkMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [foreignJNDILinks](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDILinkMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProversiders/{name}/foreignJNDILinkCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProversiders/{name}/foreignJNDILinks](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProversiders/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProversiders/{name}/foreignJNDILinkCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinks

This resource manages a collection of [weblogic.management.configuration.ForeignJNDILinkMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ForeignJNDILinkMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ForeignJNDILinkMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProversiders/{name}/foreignJNDILinks](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProversiders/{name}/foreignJNDILinkCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProversiders/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProversiders/{name}/foreignJNDILinks](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.ForeignJNDILinkMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDILinkMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProviders/{name}/foreignJNDILinks/{name}

This resource manages a [weblogic.management.configuration.ForeignJNDILinkMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ForeignJNDILinkMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ForeignJNDILinkMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ForeignJNDILinkMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProversiders/{name}/foreignJNDILinks/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProversiders/{name}/foreignJNDILinks](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/foreignJNDIProversiders/{name}/foreignJNDILinks/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.ForeignJNDILinkMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ForeignJNDILinkMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCStoreCreateForm

This resource manages the create forms for the JDBCStores collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JDBCStoreMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JDBCStores collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCStoreMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCStoreCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCStores](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCStoreCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCStores

This resource manages a collection of [weblogic.management.configuration.JDBCStoreMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JDBCStoreMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JDBCStoreMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCStores](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCStoreCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCStores](#)
rel=self
This resource.

POST

Add a new [weblogic.management.configuration.JDBCStoreMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JDBCStoreMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCStores/{name}

This resource manages a [weblogic.management.configuration.JDBCStoreMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.management.configuration.JDBCStoreMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JDBCStoreMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCStoreMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCStores/{name}](#) **rel**=canonical
This resource.
- **rel**=dataSource
This resource's dataSource reference to a [weblogic.management.configuration.JDBCSystemResourceMBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCStores/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCStores/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.JDBCStoreMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JDBCStoreMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResourceCreateForm

This resource manages the create forms for the JDBCSystemResources collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JDBCSystemResourceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [JDBCSystemResources](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCSystemResourceMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResourceCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResourceCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources

This resource manages a collection of [weblogic.management.configuration.JDBCSystemResourceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JDBCSystemResourceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JDBCSystemResourceMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResourceCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.JDBCSystemResourceMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JDBCSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}

This resource manages a [weblogic.management.configuration.JDBCSystemResourceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JDBCSystemResourceMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JDBCSystemResourceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JDBCSystemResourceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource](#) **rel**=JDBCResource
This resource's JDBCResource singleton resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources](#) **rel**=parent
The parent resource of this resource.
- **rel**=resource
This resource's resource reference to a [weblogic.descriptor.DescriptorBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}](#) **rel**=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeploymentCreateForm](#) **rel**=subDeploymentCreateForm
The create form resource for this resource's subDeployments collection resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments](#) **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.JDBCSystemResourceMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JDBCSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCDataSourceBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCDataSourceBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCDataSourceBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCConnectionPoolParams
rel=JDBCConnectionPoolParams
This resource's JDBCConnectionPoolParams singleton resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDataSourceParams
rel=JDBCDataSourceParams
This resource's JDBCDataSourceParams singleton resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams **rel**=JBCDriverParams
This resource's JBCDriverParams singleton resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JBCOracleParams **rel**=JBCOracleParams
This resource's JBCOracleParams singleton resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JBCXAParams **rel**=JBCXAParams
This resource's JBCXAParams singleton resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties **rel**=internalProperties
This resource's internalProperties singleton resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource **rel**=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCDataSourceBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCDataSourceBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) instance.

The resource supports the following methods:

- [GET](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties](#) **rel**=properties

This resource's properties collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/propertyCreateForm](#) **rel**=propertyCreateForm

The create form resource for this resource's properties collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties

This resource manages a collection of [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/propertyCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProper-

POST

Add a new [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties/{name}](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/propertyCreateForm

This resource manages the create forms for the properties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the properties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/propertyCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/properties](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/internalProperties/propertyCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCConnectionPoolParams

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCConnectionPoolParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCConnectionPoolParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCConnectionPoolParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCConnectionPoolParams **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCConnectionPoolParams **rel**=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCConnectionPoolParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCConnectionPoolParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDataSourceParams

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDataSourceParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDataSourceParams](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDataSour-

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) entity.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCDataSourceParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCResourceParams/properties

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) instance.

The resource supports the following methods:

- [GET](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertiesBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams/properties](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams/properties/properties](#) **rel=properties**

This resource's properties collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams/properties/propertyCreateForm](#) **rel=propertyCreateForm**

The create form resource for this resource's properties collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams/properties](#) **rel=self**

This resource.

GET

Get this collection of [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams/properties/properties](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams/properties/propertyCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams/properties](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JBCDriverParams/properties/properties](#)
rel=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/properties/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCPropertyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/properties/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/properties](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/properties/{name}](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCDriverParams/properties/propertyCreateForm

This resource manages the create forms for the properties collection resource.

The resource supports the following methods:

- [GET](#)

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCOracleParams

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCOracleParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCOracleParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCOracleParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCOracleParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCOracleParams **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCOracleParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCOracleParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCXAParams

This resource manages a [weblogic.j2ee.descriptor.wl.JDBCXAParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JDBCXAParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JDBCXAParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCXAParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/JDBCResource/JDBCXAParams **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JDBCXAParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JDBCXAParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeploymentCreateForm **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments **rel**=create
The collection resource for this create form resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeploymentCreateForm **rel**=self
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeploymentCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name} **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments/{name} **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments

This resource's subDeployments collection resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JDBCSystemResources/{name}/subDeployments/{name}/subDep

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSBridgeDestinationCreateForm

This resource manages the create forms for the JMSBridgeDestinations collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [JMSBridgeDestinations](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSBridgeDestinationCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSBridgeDestinations](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSBridgeDestinationCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSBridgeDestinations

This resource manages a collection of [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSBridgeDestinations](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSBridgeDestinationCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSBridgeDestinations](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSBridgeDestinations/{name}

This resource manages a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSBridgeDestinations/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSBridgeDestinations](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSBridgeDestinations/{name}](#) **rel=self**
This resource.

POST

Update this [weblogic.management.configuration.JMSBridgeDestinationMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSBridgeDestinationMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServerCreateForm

This resource manages the create forms for the JMSServers collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JMSServerMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JMSServers collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSServerMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServerCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServers](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServerCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServers

This resource manages a collection of [weblogic.management.configuration.JMSServerMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JMSServerMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JMSServerMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServerMBeans](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServerCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServerMBeans](#) **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.JMSServerMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSServerMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServers/{name}

This resource manages a [weblogic.management.configuration.JMSServerMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JMSServerMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JMSServerMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSServerMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServers/{name}/JMSMessageLogFile](#) **rel**=JMSMessageLogFile
This resource's JMSMessageLogFile singleton resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServers/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServers/{name}](#) **rel**=parent
The parent resource of this resource.
- **rel**=persistentStore
This resource's persistentStore reference to a [weblogic.management.configuration.PersistentStoreMBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServers/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.JMSServerMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSServerMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServers/{name}/JMSMessageLogFile

This resource manages a [weblogic.management.configuration.JMSMessageLogFileMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.JMSMessageLogFileMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSMessageLogFileMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServers/{name}/JMSMessageLogFile **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServers/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSServers/{name}/JMSMessageLogFile **rel**=self
This resource.

POST

POST

Update this [weblogic.management.configuration.JMSMessageLogFileMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.JMSMessageLogFileMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResourceCreateForm

This resource manages the create forms for the JMSSystemResources collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.JMSSystemResourceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JMSSystemResources collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSSystemResourceMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResourceCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResourceCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources

This resource manages a collection of [weblogic.management.configuration.JMSSystemResourceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.JMSSystemResourceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.JMSSystemResourceMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResourceCreateForm](#) **rel**=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.JMSSystemResourceMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}

This resource manages a [weblogic.management.configuration.JMSSystemResourceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.JMSSystemResourceMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.JMSSystemResourceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSSystemResourceMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=JMSResource
This resource's JMSResource singleton resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources **rel**=parent
The parent resource of this resource.
- **rel**=resource
This resource's resource reference to a weblogic.descriptor.DescriptorBean resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name} **rel**=self
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeploymentCreateForm **rel**=subDeploymentCreateForm
The create form resource for this resource's subDeployments collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.JMSSystemResourceMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.JMSSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource

This resource manages a [weblogic.j2ee.descriptor.wl.JMSBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.JMSBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JMSBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlingCreateForm](#)
[rel=SAFEErrorHandlingCreateForm](#)

The create form resource for this resource's SAFEErrorHandlings collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings](#) [rel=SAFEErrorHandlings](#)

This resource's SAFEErrorHandlings collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinationCreateForm](#)
[rel=SAFImportedDestinationCreateForm](#)

The create form resource for this resource's SAFImportedDestinations collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations](#)
[rel=SAFImportedDestinations](#)

This resource's SAFImportedDestinations collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContextCreateForm](#)
[rel=SAFRemoteContextCreateForm](#)

The create form resource for this resource's SAFRemoteContexts collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts](#) [rel=SAFRemoteContexts](#)

This resource's SAFRemoteContexts collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) [rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories](#) [rel=connectionFactories](#)

This resource's connectionFactories collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactoryCreateForm](#)
[rel=connectionFactoryCreateForm](#)

The create form resource for this resource's connectionFactories collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeyCreateForm
rel=destinationKeyCreateForm

The create form resource for this resource's destinationKeys collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys **rel**=destinationKeys

This resource's destinationKeys collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServerCreateForm
rel=foreignServerCreateForm

The create form resource for this resource's foreignServers collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers **rel**=foreignServers

This resource's foreignServers collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queueCreateForm **rel**=queueCreateForm

The create form resource for this resource's queues collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues **rel**=queues

This resource's queues collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotaCreateForm **rel**=quotaCreateForm

The create form resource for this resource's quotas collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas **rel**=quotas

This resource's quotas collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templateCreateForm **rel**=templateCreateForm

The create form resource for this resource's templates collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates **rel**=templates

This resource's templates collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topicCreateForm **rel**=topicCreateForm

The create form resource for this resource's topics collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics **rel**=topics

This resource's topics collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueueCreateForm **rel**=uniformDistributedQueueCreateForm

The create form resource for this resource's uniformDistributedQueues collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues **rel**=uniformDistributedQueues

This resource's uniformDistributedQueues collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopicCreateForm **rel**=uniformDistributedTopicCreateForm

The create form resource for this resource's uniformDistributedTopics collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics **rel**=uniformDistributedTopics

This resource's uniformDistributedTopics collection resource.

POST

Update this [weblogic.j2ee.descriptor.wl.JMSBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JMSBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories

This resource manages a collection of [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactoryCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/clientParams **rel**=clientParams

This resource's clientParams singleton resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams **rel**=defaultDeliveryParams

This resource's defaultDeliveryParams singleton resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/flowControlParams **rel**=flowControlParams

This resource's flowControlParams singleton resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams **rel**=loadBalancingParams

This resource's loadBalancingParams singleton resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/securityParams **rel**=securityParams

This resource's securityParams singleton resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name} **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/transactionParams **rel**=transactionParams

This resource's transactionParams singleton resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFacto-

POST

Update this [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/clientParams

This resource manages a [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/clientParams
rel=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}
rel=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/clientParams
rel=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ClientParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams

This resource manages a [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/defaultDeliveryParams **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DefaultDeliveryParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/flowControlParams

This resource manages a [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/flowControlParams
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/flowControlParams
rel=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.FlowControlParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams

This resource manages a [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/loadBalancingParams](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.LoadBalancingParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/securityParams

This resource manages a [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/securityParams
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/securityParams
rel=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SecurityParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/transactionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/transactionParams
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories/{name}/transactionParams
rel=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TransactionParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactoryCreateForm

This resource manages the create forms for the connectionFactories collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity populated with default values that can be customized then posted (using the POST method) to the connectionFactories collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.JMSConnectionFactoryBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactoryCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactories **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/connectionFactoryCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeyCreateForm

This resource manages the create forms for the destinationKeys collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the destinationKeys collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeyCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeyCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys

This resource manages a collection of [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeyCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys](#) **rel=self**

This resource.

POST

POST

Add a new [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/destinationKeys/{name} **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DestinationKeyBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServerCreateForm

This resource manages the create forms for the foreignServers collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `foreignServers` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServerCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServerCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers

This resource manages a collection of [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServerCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties
rel=JNDIProperties

This resource's JNDIProperties collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm
rel=JNDIPropertyCreateForm

The create form resource for this resource's JNDIProperties collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCollections
rel=foreignConnectionFactoryCollections

This resource's foreignConnectionFactoryCollections collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm
rel=foreignConnectionFactoryCreateForm

The create form resource for this resource's foreignConnectionFactoryCollections collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm
rel=foreignDestinationCreateForm

The create form resource for this resource's foreignDestinations collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations
rel=foreignDestinations

This resource's foreignDestinations collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name} **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignServerBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryes

This resource manages a collection of [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of `weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean` instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of `weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean` entities.

This method can return the following links:

- **uri**=`/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryies` **rel**=canonical

This resource.

- **uri**=`/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm` **rel**=create-form

The create form resource for this collection resource.

- **uri**=`/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}` **rel**=parent

The parent resource of this resource.

- **uri**=`/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryies` **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{na

POST

Add a new [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryies/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnections/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnections](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnections/{name}](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{na

POST

Update this [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm

This resource manages the create forms for the foreignConnectionFactories collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `foreignConnectionFactories` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignConnectionFactoryBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignConnectionFactoryCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreate Form

This resource manages the create forms for the foreignDestinations collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the foreignDestinations collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations

This resource manages a collection of [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinationCreateForm
rel=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations
rel=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/foreignDestinations/{name} **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ForeignDestinationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties

This resource manages a collection of [weblogic.j2ee.descriptor.wl.PropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.PropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.PropertyBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm](#)
rel=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{na

POST

Add a new [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties/{key}

This resource manages a [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties/{key}](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties/{key}](#)
rel=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{na

POST

Update this [weblogic.j2ee.descriptor.wl.PropertyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm

This resource manages the create forms for the JNDIProperties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JNDIProperties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.PropertyBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIProperties **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/foreignServers/{name}/JNDIPropertyCreateForm
rel=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queueCreateForm

This resource manages the create forms for the queues collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity populated with default values that can be customized then posted (using the POST method) to the queues collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queueCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queueCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues

This resource manages a collection of [weblogic.j2ee.descriptor.wl.QueueBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.QueueBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.QueueBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queuecreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.QueueBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams](#) **rel=deliveryFailureParams**
This resource's `deliveryFailureParams` singleton resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryParamsOverrides](#) **rel=deliveryParamsOverrides**
This resource's `deliveryParamsOverrides` singleton resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/messageLoggingParams](#) **rel=messageLoggingParams**
This resource's `messageLoggingParams` singleton resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues](#) **rel=parent**
The parent resource of this resource.
- **rel=quota**
This resource's quota reference to a `weblogic.j2ee.descriptor.wl.QuotaBean` resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}](#) **rel=self**
This resource.
- **rel=template**
This resource's template reference to a `weblogic.j2ee.descriptor.wl.TemplateBean` resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/thresholds](#) **rel=thresholds**
This resource's `thresholds` singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.QueueBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QueueBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams/findSubDeploymentName](#) **rel**=action **title**=findSubDeploymentName
This resource's findSubDeploymentName action resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams](#) **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deli

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deli

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryParamsOverrides
rel=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/deliveryParamsOverrides **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/messageLoggingParams](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/messageLoggingParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/me

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/thresholds **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/queues/{name}/thresholds **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotaCreateForm

This resource manages the create forms for the quotas collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity populated with default values that can be customized then posted (using the POST method) to the quotas collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotaCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotaCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas

This resource manages a collection of [weblogic.j2ee.descriptor.wl.QuotaBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.QuotaBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.QuotaBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotaCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/quotas/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.QuotaBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.QuotaBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlingCreateForm

This resource manages the create forms for the SAFEErrorHandlings collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFEErrorHandlings collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlingCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlingCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlingCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAErrorHandlingBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFEErrorHandlingBean](#) entity.

This method can return the following links:

- **rel=SAFEErrorDestination**
This resource's SAFEErrorDestination reference to a [weblogic.j2ee.descriptor.wl.SAFDestinationBean](#) resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings/{name} rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings rel=parent**
The parent resource of this resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFEErrorHandlings/{name} rel=self**
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinationCreateForm

This resource manages the create forms for the SAFImportedDestinations collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFImportedDestinations collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinationCreateForm
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinationCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinationCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDesti-

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

This method can return the following links:

- **rel=SAFErrorHandling**
This resource's SAFErrorHandling reference to a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm rel=SAFQueueCreateForm**
The create form resource for this resource's SAFQueues collection resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues rel=SAFQueues**
This resource's SAFQueues collection resource.
- **rel=SAFRemoteContext**
This resource's SAFRemoteContext reference to a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm rel=SAFTopicCreateForm**
The create form resource for this resource's SAFTopics collection resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics rel=SAFTopics**
This resource's SAFTopics collection resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name} rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams rel=messageLoggingParams**
This resource's messageLoggingParams singleton resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations rel=parent**
The parent resource of this resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDesti-

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name} **rel**=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFImportedDestinationsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/messageLoggingParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFIImportedDesti

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm

This resource manages the create forms for the SAFQueues collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFQueues collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueueCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues
rel=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

This method can return the following links:

- **rel=SAFErrorHandling**
This resource's SAFErrorHandling reference to a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name} rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams rel=messageLoggingParams**
This resource's messageLoggingParams singleton resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues rel=parent**
The parent resource of this resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name} rel=self**
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFQueueBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFQueues/{name}/messageLoggingParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm

This resource manages the create forms for the SAFTopics collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFTopics collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopicCreateForm
rel=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics
rel=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

This method can return the following links:

- **rel=SAFErrorHandling**
This resource's SAFErrorHandling reference to a [weblogic.j2ee.descriptor.wl.SAFErrorHandlingBean](#) resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name} rel=canonical**
This resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams rel=messageLoggingParams**
This resource's messageLoggingParams singleton resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics rel=parent**
The parent resource of this resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name} rel=self**
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFTopicBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFImportedDestinations/{name}/SAFTopics/{name}/messageLoggingParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContextCreateForm

This resource manages the create forms for the SAFRemoteContexts collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFRemoteContexts collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContextCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContextCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts

This resource manages a collection of [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContextCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts](#) **rel=self**
This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext
rel=SAFLoginContext
This resource's SAFLoginContext singleton resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name} **rel**=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFRemoteContextBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext

This resource manages a [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/SAFRemoteContexts/{name}/SAFLoginContext
rel=self

This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.SAFLoginContextBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templateCreateForm

This resource manages the create forms for the templates collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity populated with default values that can be customized then posted (using the POST method) to the templates collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templateCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templateCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates

This resource manages a collection of [weblogic.j2ee.descriptor.wl.TemplateBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.TemplateBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.TemplateBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templateCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/findErrorDestination
rel=action **title**=findErrorDestination
This resource's findErrorDestination action resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams
rel=deliveryFailureParams
This resource's deliveryFailureParams singleton resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryParamsOverrides
rel=deliveryParamsOverrides
This resource's deliveryParamsOverrides singleton resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParamCreateForm
rel=groupParamCreateForm
The create form resource for this resource's groupParams collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams
rel=groupParams
This resource's groupParams collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/messageLoggingParams
rel=messageLoggingParams
This resource's messageLoggingParams singleton resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/multicast **rel**=multicast
This resource's multicast singleton resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates **rel**=parent
The parent resource of this resource.

- **rel=quota**
This resource's quota reference to a `weblogic.j2ee.descriptor.wl.QuotaBean` resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name} rel=self**
This resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/thresholds rel=thresholds**
This resource's thresholds singleton resource.
- **uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/topicSubscriptionParams rel=topicSubscriptionParams**
This resource's topicSubscriptionParams singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TemplateBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TemplateBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams/findSubDeploymentName **rel**=action **title**=findSubDeploymentName
This resource's findSubDeploymentName action resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryParamsOverrides](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/deliveryParamsOverrides](#)
rel=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/d

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/findErrorDestination

The resource supports the following methods:

- [POST](#)

POST

Finds the name of the error destination to use when a destination comes from a specific group

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

subDeploymentName

The subDeployment for which to find the quota

Type: string

Response Body

Contains a JSON object with a weblogic.j2ee.descriptor.wl.DestinationBean reference return field.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParamCreateForm

This resource manages the create forms for the groupParams collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity populated with default values that can be customized then posted (using the POST method) to the groupParams collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParamCreateForm
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParamCreateForm
rel=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams

This resource manages a collection of [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParamCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams/{subDeploymentName}

This resource manages a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams/{subDeploymentName} **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/groupParams/{subDeploymentName} **rel**=self
This resource.

POST

Update this [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.GroupParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/messageLoggingParams](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/messageLoggingParams](#)
rel=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/multicast

This resource manages a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/multicast **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/multicast **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/thresholds](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/thresholds](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/topicSubscriptionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/topicSubscriptionParams
rel=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/templates/{name}/topicSubscriptionParams
rel=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topicCreateForm

This resource manages the create forms for the topics collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity populated with default values that can be customized then posted (using the POST method) to the topics collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topicCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topicCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics

This resource manages a collection of [weblogic.j2ee.descriptor.wl.TopicBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.TopicBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.TopicBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topicCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.TopicBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams **rel**=deliveryFailureParams

This resource's deliveryFailureParams singleton resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryParamsOverrides **rel**=deliveryParamsOverrides

This resource's deliveryParamsOverrides singleton resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/messageLoggingParams **rel**=messageLoggingParams

This resource's messageLoggingParams singleton resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/multicast **rel**=multicast

This resource's multicast singleton resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics **rel**=parent

The parent resource of this resource.

- **rel**=quota

This resource's quota reference to a [weblogic.j2ee.descriptor.wl.QuotaBean](#) resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name} **rel**=self

This resource.

- **rel**=template

This resource's template reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/thresholds **rel**=thresholds

This resource's thresholds singleton resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/topicSubscriptionParams
rel=topicSubscriptionParams

This resource's topicSubscriptionParams singleton resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams/findSubDeploymentName](#) **rel**=action **title**=findSubDeploymentName
This resource's findSubDeploymentName action resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams](#) **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams](#) **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliv

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryParamsOverrides
rel=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/deliveryParamsOverrides **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/messageLoggingParams](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/messageLoggingParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/mes

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/multicast

This resource manages a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/multicast **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/multicast **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/thresholds](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/thresholds](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/topicSubscriptionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/topicSubscriptionParams
rel=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}
rel=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/topics/{name}/topicSubscriptionParams
rel=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueueCreateForm

This resource manages the create forms for the uniformDistributedQueues collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `uniformDistributedQueues` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueueCreateForm](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueueCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues

This resource manages a collection of [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueueCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues](#) **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel=canonical**
 This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams](#) **rel=deliveryFailureParams**
 This resource's [deliveryFailureParams](#) singleton resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides](#) **rel=deliveryParamsOverrides**
 This resource's [deliveryParamsOverrides](#) singleton resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams](#) **rel=messageLoggingParams**
 This resource's [messageLoggingParams](#) singleton resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues](#) **rel=parent**
 The parent resource of this resource.
- **rel=quota**
 This resource's [quota](#) reference to a [weblogic.j2ee.descriptor.wl.QuotaBean](#) resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel=self**
 This resource.
- **rel=template**
 This resource's [template](#) reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds](#) **rel=thresholds**
 This resource's [thresholds](#) singleton resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributed-

POST

Update this [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedQueueBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams/findSubDeploymentName **rel**=action **title**=findSubDeploymentName
This resource's findSubDeploymentName action resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/deliveryParamsOverrides](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/messageLoggingParams **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedQueues/{name}/thresholds](#)
rel=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopicCreateForm

This resource manages the create forms for the uniformDistributedTopics collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity populated with default values that can be customized then posted (using the POST method) to the uniformDistributedTopics collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopicCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopicCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics

This resource manages a collection of [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopicCreateForm **rel**=create-form

The create form resource for this collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics **rel**=self

This resource.

POST

Add a new [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}

This resource manages a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams](#) **rel=deliveryFailureParams**
This resource's `deliveryFailureParams` singleton resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides](#) **rel=deliveryParamsOverrides**
This resource's `deliveryParamsOverrides` singleton resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams](#) **rel=messageLoggingParams**
This resource's `messageLoggingParams` singleton resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/multicast](#) **rel=multicast**
This resource's `multicast` singleton resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics](#) **rel=parent**
The parent resource of this resource.
- **rel=quota**
This resource's `quota` reference to a `weblogic.j2ee.descriptor.wl.QuotaBean` resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel=self**
This resource.
- **rel=template**
This resource's `template` reference to a `weblogic.j2ee.descriptor.wl.TemplateBean` resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds
rel=thresholds

This resource's thresholds singleton resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/topicSubscriptionParams **rel**=topicSubscriptionParams

This resource's topicSubscriptionParams singleton resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributed-

POST

Update this [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.UniformDistributedTopicBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams/findSubDeploymentName **rel**=action **title**=findSubDeploymentName
This resource's findSubDeploymentName action resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams **rel**=canonical
This resource.
- **rel**=errorDestination
This resource's errorDestination reference to a [weblogic.j2ee.descriptor.wl.DestinationBean](#) resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryFailureParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryFailureParams/findSubDeploymentName

The resource supports the following methods:

- [POST](#)

POST

This is used to find the sub-deployment-name for this destination.

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides

This resource manages a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/deliveryParamsOverrides](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.DeliveryParamsOverridesBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams

This resource manages a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/messageLoggingParams **rel**=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MessageLoggingParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/multicast

This resource manages a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/multicast](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/multicast](#)
rel=self

This resource.

- **rel**=templateBean

This resource's `templateBean` reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.MulticastParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds

This resource manages a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds
rel=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/thresholds
rel=self
This resource.
- **rel**=templateBean
This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.ThresholdParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/topicSubscriptionParams

This resource manages a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/topicSubscriptionParams](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/JMSResource/uniformDistributedTopics/{name}/topicSubscriptionParams](#) **rel**=self

This resource.

- **rel**=templateBean

This resource's templateBean reference to a [weblogic.j2ee.descriptor.wl.TemplateBean](#) resource.

POST

Update this [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.j2ee.descriptor.wl.TopicSubscriptionParamsBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeploymentCreateForm rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments rel=create](#)
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name} rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeploymentCreateForm rel=self](#)
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeploymentCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name} **rel**=self
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name} **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments/{name}](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel**=self

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel**=subDeployments

This resource's subDeployments collection resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/JMSSystemResources/{name}/subDeployments/{name}/subDe-

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/libraries

This resource manages a collection of [weblogic.management.configuration.LibraryMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.LibraryMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.LibraryMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/libraries](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/libraries](#)
rel=self
This resource.

POST

The resource supports the following methods:

- [POST accepting application/json](#)
- [POST accepting multipart/form-data](#)

POST accepting application/json

This resource is used to deploy libraries that are already on the administration server.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.LibraryMBean](#) entity.

To deploy a library, you must provide the name of the library, the path to the library, and the targets to which the library will be deployed.

Use the multi-part form to deploy a library.

- `sourcePath`: the deployment to upload (required)
- `model`: JSONObject containing a LibraryMBean entity that contains the rest of the deployment information (required)

POST accepting multipart/form-data

Upload a library from the client to the server then deploy it.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

Request Body

Use the multi-part form to upload a library from the client to the server then deploy it.

- `sourcePath`: the deployment to upload (required)
- `model`: JSONObject containing a LibraryMBean entity that contains the rest of the deployment information (required)

/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}

This resource manages a [weblogic.management.configuration.LibraryMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Undeploy a library.

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.LibraryMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.LibraryMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/createPlan](#) **rel=action** **title=createPlan**
This resource's createPlan action resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/redeploy](#) **rel=redeploy**
This resource's redeploy resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}](#) **rel=self**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeploymentCreateForm](#) **rel=subDeploymentCreateForm**
The create form resource for this resource's subDeployments collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments](#) **rel=subDeployments**
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.LibraryMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.LibraryMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/createPlan

The resource supports the following methods:

- [POST](#)

POST

The resource supports the following methods:

- [POST](#)
- [POST](#)

POST

Create a deployment plan in the specified directory.

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

planPath

planPath

Type: string

Response Body

Contains a JSON object with a string return field.

POST

Create a deployment plan in a default directory

Roles

Admin, Deployer

Response Body

Contains a JSON object with a string return field.

/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/redeploy

The resource supports the following methods:

- [POST](#)

POST

Use the multi-part form to redeploy a library.

- `sourcePath`: the deployment to upload (required)
- `model`: JSONObject containing a LibraryMBean entity that contains the rest of the deployment information (required)

This method supports both asynchronous and best effort synchronous invocations. The behavior is controlled by the 'Prefer' header. See [About Synchronous and Asynchronous Operations](#).

Roles

Admin, Deployer

/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeploymentCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeploymentCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeploymentCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments](#) **rel=self**

This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments/{name} **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments/{name} **rel**=self

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/libraries/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments **rel**=subDeployments

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/lookupTarget

The resource supports the following methods:

- [POST](#)

POST

Find a particular target with a given name.

Roles

Admin

Request Body

Must contain a JSON object with the following fields:

name

the name of the target to find

Type: string

Response Body

Contains a JSON object with a `weblogic.management.configuration.TargetMBean` reference return field.

/management/weblogic/{version}/edit/resourceGroups/{name}/mailSessionCreateForm

This resource manages the create forms for the mailSessions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.MailSessionMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the mailSessions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MailSessionMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/mailSessionC
reateForm rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/mailSessions
rel=create](#)
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name} rel=parent](#)
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/mailSessionC
reateForm rel=self](#)
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/mailSessions

This resource manages a collection of [weblogic.management.configuration.MailSessionMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.MailSessionMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.MailSessionMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/mailSessions](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/mailSessionC](#)
[reateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/mailSessions](#)
rel=self

This resource.

POST

Add a new [weblogic.management.configuration.MailSessionMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MailSessionMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/mailSessions/{name}

This resource manages a [weblogic.management.configuration.MailSessionMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.MailSessionMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.MailSessionMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MailSessionMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/mailSessions/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/mailSessions](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/mailSessions/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.MailSessionMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.MailSessionMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/managedExecutorServiceCreateForm

This resource manages the create forms for the managedExecutorServices collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `managedExecutorServices` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/managedExecutorServiceCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/managedExecutorServices](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/managedExecutorServiceCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/managedExecutorServices

This resource manages a collection of [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/managedExecutorServices](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/managedExecutorServiceCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/managedExecutorServices](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/managedExecutorServices/{name}

This resource manages a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/managedExecutorServices/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/managedExecutorServices](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/managedExecutorServices/{name}](#) **rel=self**
This resource.

POST

Update this [weblogic.management.configuration.ManagedExecutorServiceMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedExecutorServiceMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/managedScheduledExecutorServiceCreateForm

This resource manages the create forms for the managedScheduledExecutorServices collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `managedScheduledExecutorServices` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/managedScheduledExecutorServiceCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/managedScheduledExecutorServices](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/managedScheduledExecutorServiceCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/managedScheduledExecutorServices

This resource manages a collection of [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/managedScheduledExecutorServices](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/managedScheduledExecutorServiceCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/managedScheduledExecutorServices](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/managedScheduledExecutorServices/{name}

This resource manages a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this

[weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#)
instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/managedScheduledExecutorServices/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/managedScheduledExecutorServices](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/managedScheduledExecutorServices/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedScheduledExecutorServiceMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/managedThreadFactories

This resource manages a collection of [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/managedThreadFactories](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/managedThreadFactoryCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/managedThreadFactories](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/managedThreadFactories/{name}

This resource manages a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/managedThreadFactories/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/managedThreadFactories **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/managedThreadFactories/{name} **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.ManagedThreadFactoryMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/managedThreadFactoryCreateForm

This resource manages the create forms for the managedThreadFactories collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `managedThreadFactories` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ManagedThreadFactoryMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/managedThreadFactoryCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/managedThreadFactories](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/managedThreadFactoryCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/messagingBridgeCreateForm

This resource manages the create forms for the messagingBridges collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.MessagingBridgeMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `messagingBridges` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MessagingBridgeMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/messagingBridgeCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/messagingBridges](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/messagingBridgeCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/messagingBridges

This resource manages a collection of [weblogic.management.configuration.MessagingBridgeMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.MessagingBridgeMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.MessagingBridgeMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/messagingBridges](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/messagingBridgeCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/messagingBridges](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.MessagingBridgeMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.MessagingBridgeMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/messagingBridges/{name}

This resource manages a [weblogic.management.configuration.MessagingBridgeMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.MessagingBridgeMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.MessagingBridgeMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.MessagingBridgeMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/messagingBridges/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/messagingBridges](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/messagingBridges/{name}](#) **rel**=self
This resource.
- **rel**=sourceDestination
This resource's sourceDestination reference to a [weblogic.management.configuration.BridgeDestinationCommonMBean](#) resource.
- **rel**=targetDestination
This resource's targetDestination reference to a [weblogic.management.configuration.BridgeDestinationCommonMBean](#) resource.

POST

Update this [weblogic.management.configuration.MessagingBridgeMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.MessagingBridgeMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/osgiFrameworkCreateForm

This resource manages the create forms for the osgiFrameworks collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.OsgiFrameworkMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `osgiFrameworks` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.OsgiFrameworkMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/osgiFrameworkCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/osgiFrameworks](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/osgiFrameworkCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/osgiFramework s

This resource manages a collection of [weblogic.management.configuration.OsgiFrameworkMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.OsgiFrameworkMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.OsgiFrameworkMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/osgiFrameworks](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/osgiFrameworkCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/osgiFrameworks](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.OsgiFrameworkMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.OsgiFrameworkMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/osgiFrameworks/{name}

This resource manages a [weblogic.management.configuration.OsgiFrameworkMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.management.configuration.OsgiFrameworkMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.OsgiFrameworkMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.OsgiFrameworkMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/osgiFrameworks/{name}](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/osgiFrameworks](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/osgiFrameworks/{name}](#) **rel=self**
This resource.

POST

POST

Update this [weblogic.management.configuration.OsgiFrameworkMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.OsgiFrameworkMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgentCreateForm

This resource manages the create forms for the SAFAgents collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SAFAgentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SAFAgents collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SAFAgentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgentCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgentCreateForm](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgentCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgents

This resource manages a collection of [weblogic.management.configuration.SAFAgentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SAFAgentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SAFAgentMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgentMBean](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgentCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgentMBean](#) **rel**=self

This resource.

POST

Add a new [weblogic.management.configuration.SAFAgentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SAFAgentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgents/{name}

This resource manages a [weblogic.management.configuration.SAFAMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.SAFAgentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SAFAgentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SAFAgentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgents/{name}/JMSSAFMessageLogFile](#) **rel**=JMSSAFMessageLogFile
This resource's JMSSAFMessageLogFile singleton resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgents/{name}](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgents/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgents/{name}](#) **rel**=self
This resource.
- **rel**=store
This resource's store reference to a [weblogic.management.configuration.PersistentStoreMBean](#) resource.

POST

Update this [weblogic.management.configuration.SAFAgentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SAFAgentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgents/{name}/JMSSAFMessageLogFile

This resource manages a [weblogic.management.configuration.JMSSAFMessageLogFileMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.JMSSAFMessageLogFileMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.JMSSAFMessageLogFileMBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgents/{name}/JMSSAFMessageLogFile **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgents/{name} **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/SAFAgents/{name}/JMSSAFMessageLogFile **rel**=self
This resource.

POST

Update this [weblogic.management.configuration.JMSSAFMessageLogFileMBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.JMSSAFMessageLogFileMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResourceCreateForm

This resource manages the create forms for the WLDFSystemResources collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.WLDFSystemResourceMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [WLDFSystemResources](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WLDFSystemResourceMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResourceCreateForm](#) **rel**=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResourceCreateForm](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources

This resource manages a collection of [weblogic.management.configuration.WLDFSystemResourceMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.WLDFSystemResourceMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.WLDFSystemResourceMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResourceCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.WLDFSystemResourceMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.WLDFSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}

This resource manages a [weblogic.management.configuration.WLDFSystemResourceMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.WLDFSystemResourceMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.WLDFSystemResourceMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.WLDFSystemResourceMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource](#) **rel**=WLDFResource
This resource's WLDFResource singleton resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}](#) **rel**=canonical
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources](#) **rel**=parent
The parent resource of this resource.
- **rel**=resource
This resource's resource reference to a [weblogic.descriptor.DescriptorBean](#) resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}](#) **rel**=self
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeploymentCreateForm](#) **rel**=subDeploymentCreateForm
The create form resource for this resource's subDeployments collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments](#) **rel**=subDeployments
This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.WLDFSystemResourceMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.WLDFSystemResourceMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeploymentCreateForm

This resource manages the create forms for the subDeployments collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.SubDeploymentMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the subDeployments collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeploymentCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeploymentCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeploymentCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments](#) **rel=self**
This resource.

POST

Add a new [weblogic.management.configuration.SubDeploymentMBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}](#) **rel=self**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel=subDeployments**

This resource's subDeployments collection resource.

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments

This resource manages a collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.management.configuration.SubDeploymentMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.SubDeploymentMBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments/{name}

This resource manages a [weblogic.management.configuration.SubDeploymentMBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments/{name}](#) **rel**=self
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDeployments/{name}/subDeployments](#) **rel**=subDeployments
This resource's subDeployments collection resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/subDeployments/{name}/subDe

POST

Update this [weblogic.management.configuration.SubDeploymentMBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.management.configuration.SubDeploymentMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource

This resource manages a [weblogic.diagnostics.descriptor.WLDFResourceBean](#) instance.

The resource supports the following methods:

- [GET](#)

GET

Get this [weblogic.diagnostics.descriptor.WLDFResourceBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFResourceBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester](#) **rel=harvester**
This resource's harvester singleton resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation](#) **rel=instrumentation**
This resource's instrumentation singleton resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource](#) **rel=self**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=watchNotification**
This resource's watchNotification singleton resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester

This resource manages a [weblogic.diagnostics.descriptor.WLDFHarvesterBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.diagnostics.descriptor.WLDFHarvesterBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFHarvesterBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypecreateForm](#) **rel=harvestedTypecreateForm**

The create form resource for this resource's harvestedTypes collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes](#) **rel=harvestedTypes**

This resource's harvestedTypes collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester](#) **rel=self**

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFHarvesterBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFHarvesterBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypeCreateForm

This resource manages the create forms for the harvestedTypes collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `harvestedTypes` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypeCreateForm](#)
rel=canonical

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypeCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypeCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harvestedTypes/{name}](#) **rel**=self
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/harvester/harve

POST

Update this [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFHarvestedTypeBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation

This resource manages a [weblogic.diagnostics.descriptor.WLDFInstrumentationBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.diagnostics.descriptor.WLDFInstrumentationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFInstrumentationBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitorCreateForm](#) **rel**=WLDFInstrumentationMonitorCreateForm

The create form resource for this resource's WLDFInstrumentationMonitors collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors](#) **rel**=WLDFInstrumentationMonitors

This resource's WLDFInstrumentationMonitors collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation](#) **rel**=canonical

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource](#) **rel**=parent

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation](#) **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFInstrumentationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFInstrumentationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitorCreateForm

This resource manages the create forms for the WLDFInstrumentationMonitors collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) entity populated with default values that can be customized then posted (using the POST method) to the [WLDFInstrumentationMonitors](#) collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitorCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitorCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitorCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/instrumentation/WLDFInstrumentationMonitors/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFInstrumentationMonitorBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification

This resource manages a [weblogic.diagnostics.descriptor.WLDFWatchNotificationBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.diagnostics.descriptor.WLDFWatchNotificationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFWatchNotificationBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotificationCreateForm](#) **rel=JMSNotificationCreateForm**

The create form resource for this resource's JMSNotifications collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications](#) **rel=JMSNotifications**

This resource's JMSNotifications collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotificationCreateForm](#) **rel=JMXNotificationCreateForm**

The create form resource for this resource's JMXNotifications collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications](#) **rel=JMXNotifications**

This resource's JMXNotifications collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotificationCreateForm](#) **rel=RESTNotificationCreateForm**

The create form resource for this resource's RESTNotifications collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications](#) **rel=RESTNotifications**

This resource's RESTNotifications collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotificationCreateForm](#) **rel=SMTPNotificationCreateForm**

The create form resource for this resource's SMTPNotifications collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications](#) **rel=SMTPNotifications**

This resource's SMTPNotifications collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotificationCreateForm **rel**=SNMPNotificationCreateForm
The create form resource for this resource's SNMPNotifications collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications **rel**=SNMPNotifications
This resource's SNMPNotifications collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/lookupActions **rel**=action **title**=lookupActions
This resource's lookupActions action resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/lookupNotification **rel**=action **title**=lookupNotification
This resource's lookupNotification action resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actionCreateForm **rel**=actionCreateForm
The create form resource for this resource's actions collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions **rel**=actions
This resource's actions collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActionCreateForm **rel**=heapDumpActionCreateForm
The create form resource for this resource's heapDumpActions collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions **rel**=heapDumpActions
This resource's heapDumpActions collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotificationCreateForm **rel**=imageNotificationCreateForm
The create form resource for this resource's imageNotifications collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications **rel**=imageNotifications
This resource's imageNotifications collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActionCreateForm
rel=logActionCreateForm
The create form resource for this resource's logActions collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions **rel**=logActions
This resource's logActions collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActionCreateForm **rel**=scaleDownActionCreateForm
The create form resource for this resource's scaleDownActions collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions **rel**=scaleDownActions
This resource's scaleDownActions collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActionCreateForm **rel**=scaleUpActionCreateForm
The create form resource for this resource's scaleUpActions collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActions **rel**=scaleUpActions
This resource's scaleUpActions collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActionCreateForm **rel**=scriptActionCreateForm
The create form resource for this resource's scriptActions collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions **rel**=scriptActions
This resource's scriptActions collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=self
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActionCreateForm **rel**=threadDumpActionCreateForm
The create form resource for this resource's threadDumpActions collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions
rel=threadDumpActions

This resource's threadDumpActions collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watchCreateForm
rel=watchCreateForm

The create form resource for this resource's watches collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches **rel**=watches

This resource's watches collection resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotifica-

POST

Update this [weblogic.diagnostics.descriptor.WLDFWatchNotificationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFWatchNotificationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actionCreateForm

This resource manages the create forms for the actions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFActionBean](#) entity populated with default values that can be customized then posted (using the POST method) to the actions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFActionBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actionCreateForm](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions](#) **rel=create**
The collection resource for this create form resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actionCreateForm](#) **rel=self**
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFActionBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFActionBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFActionBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actionCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions](#) **rel=self**
This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFActionBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFActionBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFActionBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFActionBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFActionBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFActionBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayProperties rel=arrayProperties](#)
This resource's arrayProperties collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayPropertyCreateForm rel=arrayPropertyCreateForm](#)
The create form resource for this resource's arrayProperties collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name} rel=canonical](#)
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/configurationProperties rel=configurationProperties](#)
This resource's configurationProperties collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encryptedProperties rel=encryptedProperties](#)
This resource's encryptedProperties collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encryptedPropertyCreateForm rel=encryptedPropertyCreateForm](#)
The create form resource for this resource's encryptedProperties collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties rel=mapProperties](#)
This resource's mapProperties collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapPropertyCreateForm rel=mapPropertyCreateForm](#)
The create form resource for this resource's mapProperties collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDSystemResources/{name}/WLDResource/watchNotification/actions **rel**=parent
The parent resource of this resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDSystemResources/{name}/WLDResource/watchNotification/actions/{name}/properties **rel**=properties
This resource's properties collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDSystemResources/{name}/WLDResource/watchNotification/actions/{name}/propertyCreateForm **rel**=propertyCreateForm
The create form resource for this resource's properties collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDSystemResources/{name}/WLDResource/watchNotification/actions/{name} **rel**=self
This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFActionBean](#) instance.

Roles

Admin

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFActionBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayProperties

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayProperties](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayPropertyCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayProperties](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayProperties/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) instance.

Roles

Admin

GET

Get this [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayProperties/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayProperties](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayProperties/{name}](#) **rel=self**

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayPropertyCreateForm

This resource manages the create forms for the arrayProperties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the arrayProperties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFArrayPropertyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayPropertyCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayProperties](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/arrayPropertyCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/configurationProperties

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFConfigurationPropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFConfigurationPropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFConfigurationPropertyBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/configurationProperties](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}](#)
rel=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/configurationProperties](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/configurationProperties/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFConfigurationPropertyBean](#) instance.

The resource supports the following methods:

- [GET](#)

GET

Get this [weblogic.diagnostics.descriptor.WLDFConfigurationPropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFConfigurationPropertyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/configurationProperties/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/configurationProperties](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/configurationProperties/{name}](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encrypted Properties

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encryptedProperties](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encryptedPropertyCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encryptedProperties](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encryptedProperties/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) instance.

Roles

Admin

GET

Get this [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encryptedProperties/{name} rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encryptedProperties rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encryptedProperties/{name} rel=self](#)

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encryptedPropertyCreateForm

This resource manages the create forms for the encryptedProperties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the encryptedProperties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFEncryptedPropertyBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encryptedPropertyCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encryptedProperties](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/encryptedPropertyCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFConfigurationPropertiesBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFConfigurationPropertiesBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFConfigurationPropertiesBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapPropertyCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}](#) **rel=parent**

The parent resource of this resource.

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/propertyCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/properties](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties/{name}/propertyCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapPropertyCreateForm

This resource manages the create forms for the mapProperties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFConfigurationPropertiesBean](#) entity populated with default values that can be customized then posted (using the POST method) to the mapProperties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFConfigurationPropertiesBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapPropertyCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapProperties](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/mapPropertyCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/properties

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/properties](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/propertyCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/properties](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/properties/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instance.

Roles

Admin

GET

Get this [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/properties/{name} rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/properties rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/properties/{name} rel=self](#)

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/propertyCreateForm

This resource manages the create forms for the properties collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entity populated with default values that can be customized then posted (using the POST method) to the properties collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFPropertyBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/propertyCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/properties](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/actions/{name}/propertyCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActionCreateForm

This resource manages the create forms for the heapDumpActions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) entity populated with default values that can be customized then posted (using the POST method) to the heapDumpActions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActionCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActionCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActionCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions](#)
rel=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/heapDumpActions/{name}](#) **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFHeapDumpActionBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotificationCreateForm

This resource manages the create forms for the imageNotifications collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the imageNotifications collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotificationCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotificationCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotificationCreateForm](#)
rel=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications](#)
rel=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications/{name} **}**

This resource manages a [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications/{name}](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/imageNotifications/{name}](#) **rel=self**

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFImageNotificationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotificationCreateForm

This resource manages the create forms for the JMSNotifications collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JMSNotifications collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotificationCreateForm rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications rel=create](#)

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotificationCreateForm rel=self](#)

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotificationCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications/{name}](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMSNotifications](#)
rel=parent

The parent resource of this resource.

rel=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFJMSNotificationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotificationCreateForm

This resource manages the create forms for the JMXNotifications collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the JMXNotifications collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotificationCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotificationCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications](#)
rel=canonical

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotificationCreateForm](#)
rel=create-form

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#)
rel=parent

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications](#)
rel=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications/{name}
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications
rel=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/JMXNotifications/{name}
rel=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFJMXNotificationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActionCreateForm

This resource manages the create forms for the logActions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) entity populated with default values that can be customized then posted (using the POST method) to the logActions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActionCreateForm
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActionCreateForm
rel=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActionCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions](#) **rel=self**
This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/logActions/{name}](#)
rel=self
This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFLogActionBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/lookupActions

The resource supports the following methods:

- [POST](#)

POST

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

typeName

typeName

Type: string

Response Body

Contains a JSON object with a array of weblogic.diagnostics.descriptor.WLDFActionBean references return field.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/lookupNotification

The resource supports the following methods:

- [POST](#)

POST

Looks up an action with the given name.

Roles

Admin, Deployer

Request Body

Must contain a JSON object with the following fields:

name

name

Type: string

Response Body

Contains a JSON object with a weblogic.diagnostics.descriptor.WLDFNotificationBean reference return field.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotificationCreateForm

This resource manages the create forms for the RESTNotifications collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the RESTNotifications collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotificationCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotificationCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotificationCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications](#)
rel=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications/{name}
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications
rel=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/RESTNotifications/{name}
rel=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFRESTNotificationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActionCreateForm

This resource manages the create forms for the scaleDownActions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) entity populated with default values that can be customized then posted (using the POST method) to the `scaleDownActions` collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActionCreateForm](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions](#) **rel**=create

The collection resource for this create form resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActionCreateForm](#) **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActionCreateForm](#) **rel**=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions](#)
rel=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions/{name} **}**

This resource manages a [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions/{name}](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions](#)
rel=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleDownActions/{name}](#)
rel=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFScaleDownActionBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActionCreateForm

This resource manages the create forms for the scaleUpActions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) entity populated with default values that can be customized then posted (using the POST method) to the scaleUpActions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActionCreateForm rel=canonical](#)

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActions rel=create](#)

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification rel=parent](#)

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActionCreateForm rel=self](#)

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActions

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActions](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActionCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActions](#) **rel=self**

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActions/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActions/{name}
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActions
rel=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scaleUpActions/{name}
rel=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFScaleUpActionBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActionCreateForm

This resource manages the create forms for the scriptActions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) entity populated with default values that can be customized then posted (using the POST method) to the scriptActions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActionCreateForm
rel=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActionCreateForm
rel=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActionCreateForm](#)
rel=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions](#) **rel**=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/scriptActions/{name}](#)
rel=self
This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFScriptActionBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotificationCreateForm

This resource manages the create forms for the SMTPNotifications collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SMTPNotifications collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotificationCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotificationCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications](#)
rel=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotificationCreateForm](#)
rel=create-form

The create form resource for this collection resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel**=parent

The parent resource of this resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications](#)
rel=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SMTPNotifications/{name} **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFSMTPNotificationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotificationCreateForm

This resource manages the create forms for the SNMPNotifications collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) entity populated with default values that can be customized then posted (using the POST method) to the SNMPNotifications collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotificationCreateForm **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications **rel**=create

The collection resource for this create form resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotificationCreateForm **rel**=self

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications](#)
rel=canonical

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotificationCreateForm](#) **rel=create-form**

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications](#)
rel=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications/{name}
}

This resource manages a [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications/{name}](#) **rel**=canonical

This resource.

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/SNMPNotifications](#) **rel**=parent

The parent resource of this resource.

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFSNMPNotificationBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActionCreateForm

This resource manages the create forms for the threadDumpActions collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) entity populated with default values that can be customized then posted (using the POST method) to the threadDumpActions collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActionCreateForm](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions](#) **rel=create**

The collection resource for this create form resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActionCreateForm](#) **rel=self**

This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions](#)
rel=canonical

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActionCreateForm](#)
rel=create-form

The create form resource for this collection resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#)
rel=parent

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions](#)
rel=self

This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) entity.

This method can return the following links:

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions/{name} **rel**=canonical

This resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions **rel**=parent

The parent resource of this resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/threadDumpActions/{name} **rel**=self

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFThreadDumpActionBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watchCreateForm

This resource manages the create forms for the watches collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.diagnostics.descriptor.WLDFWatchBean](#) entity populated with default values that can be customized then posted (using the POST method) to the watches collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFWatchBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watchCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watchCreateForm](#)
rel=self
This resource.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches

This resource manages a collection of [weblogic.diagnostics.descriptor.WLDFWatchBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.diagnostics.descriptor.WLDFWatchBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.diagnostics.descriptor.WLDFWatchBean](#) entities.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches](#) **rel=canonical**
This resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watchCreateForm](#) **rel=create-form**
The create form resource for this collection resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification](#) **rel=parent**
The parent resource of this resource.
- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches](#) **rel=self**
This resource.

POST

Add a new [weblogic.diagnostics.descriptor.WLDFWatchBean](#) instance to this collection.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFWatchBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name}

This resource manages a [weblogic.diagnostics.descriptor.WLDFWatchBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.diagnostics.descriptor.WLDFWatchBean](#) instance.

Roles

Admin, Deployer

GET

Get this [weblogic.diagnostics.descriptor.WLDFWatchBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFWatchBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name}](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name}/schedule](#) **rel**=schedule
This resource's schedule singleton resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name}](#) **rel**=self
This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFWatchBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFWatchBean](#) entity.

/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name}/schedule

This resource manages a [weblogic.diagnostics.descriptor.WLDFScheduleBean](#) instance.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this [weblogic.diagnostics.descriptor.WLDFScheduleBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.diagnostics.descriptor.WLDFScheduleBean](#) entity.

This method can return the following links:

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name}/schedule](#) **rel=canonical**

This resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name}](#) **rel=parent**

The parent resource of this resource.

- [uri=/management/weblogic/{version}/edit/resourceGroups/{name}/WLDFSystemResources/{name}/WLDFResource/watchNotification/watches/{name}/schedule](#) **rel=self**

This resource.

POST

Update this [weblogic.diagnostics.descriptor.WLDFScheduleBean](#) instance.

Roles

Admin, Deployer

Request Body

Must contain a [weblogic.diagnostics.descriptor.WLDFScheduleBean](#) entity.

/management/weblogic/{version}/edit/resourceGroupTemplateCreateForm

This resource manages the create forms for the resourceGroupTemplates collection resource.

The resource supports the following methods:

- [GET](#)

GET

This resource returns a [weblogic.management.configuration.ResourceGroupTemplateMBean](#) entity populated with default values that can be customized then posted (using the POST method) to the resourceGroupTemplates collection resource to create a new instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ResourceGroupTemplateMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroupTemplateCreateForm](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroupTemplates](#) **rel**=create
The collection resource for this create form resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroupTemplateCreateForm](#)
rel=self
This resource.

/management/weblogic/{version}/edit/resourceGroupTemplates

This resource manages a collection of [weblogic.management.configuration.ResourceGroupTemplateMBean](#) instances.

The resource supports the following methods:

- [GET](#)
- [POST](#)

GET

Get this collection of [weblogic.management.configuration.ResourceGroupTemplateMBean](#) instances.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a list of [weblogic.management.configuration.ResourceGroupTemplateMBean](#) entities.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroupTemplates](#)
rel=canonical
This resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroupTemplateCreateForm](#)
rel=create-form
The create form resource for this collection resource.
- **uri**=[/management/weblogic/{version}/edit](#) **rel**=parent
The parent resource of this resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroupTemplates](#) **rel**=self
This resource.

POST

Add a new [weblogic.management.configuration.ResourceGroupTemplateMBean](#) instance to this collection.

Roles

Admin

Request Body

Must contain a [weblogic.management.configuration.ResourceGroupTemplateMBean](#) entity.

/management/weblogic/{version}/edit/resourceGroupTemplates/{name}

This resource manages a [weblogic.management.configuration.ResourceGroupTemplateMBean](#) instance.

The resource supports the following methods:

- [DELETE](#)
- [GET](#)
- [POST](#)

DELETE

Delete this [weblogic.management.configuration.ResourceGroupTemplateMBean](#) instance.

Roles

Admin

GET

Get this [weblogic.management.configuration.ResourceGroupTemplateMBean](#) instance.

Roles

Admin, Deployer, Monitor, Operator

Response Body

Contains a [weblogic.management.configuration.ResourceGroupTemplateMBean](#) entity.

This method can return the following links:

- **uri**=[/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/JDBCStoreCreateForm](#) **rel**=JDBCStoreCreateForm
The create form resource for this resource's JDBCStores collection resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/JDBCStores](#) **rel**=JDBCStores
This resource's JDBCStores collection resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/JDBCSystemResourceCreateForm](#) **rel**=JDBCSystemResourceCreateForm
The create form resource for this resource's JDBCSystemResources collection resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/JDBCSystemResources](#) **rel**=JDBCSystemResources
This resource's JDBCSystemResources collection resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/JMSBridgeDestinationCreateForm](#) **rel**=JMSBridgeDestinationCreateForm
The create form resource for this resource's JMSBridgeDestinations collection resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/JMSBridgeDestinations](#) **rel**=JMSBridgeDestinations
This resource's JMSBridgeDestinations collection resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/JMSServerCreateForm](#) **rel**=JMSServerCreateForm
The create form resource for this resource's JMSServers collection resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/JMSServers](#) **rel**=JMSServers
This resource's JMSServers collection resource.
- **uri**=[/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/JMSSystemResourceCreateForm](#) **rel**=JMSSystemResourceCreateForm
The create form resource for this resource's JMSSystemResources collection resource.

- **uri**=/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/JMSSystemResources **rel**=JMSSystemResources
This resource's JMSSystemResources collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/SAFAgentCreateForm **rel**=SAFAgentCreateForm
The create form resource for this resource's SAFAgents collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/SAFAgents **rel**=SAFAgents
This resource's SAFAgents collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/WLDFSystemResourceCreateForm **rel**=WLDFSystemResourceCreateForm
The create form resource for this resource's WLDFSystemResources collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/WLDFSystemResources **rel**=WLDFSystemResources
This resource's WLDFSystemResources collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/appDeployments **rel**=appDeployments
This resource's appDeployments collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroupTemplates/{name} **rel**=canonical
This resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/fileStoreCreateForm **rel**=fileStoreCreateForm
The create form resource for this resource's fileStores collection resource.
- **uri**=/management/weblogic/{version}/edit/resourceGroupTemplates/{name}/fileStores **rel**=fileStores
This resource's fileStores collection resource.
