## Glossary of Terms

- **“Service”** is the name of the Service/SKU purchased
- **“Service Period”** is your contract duration.
- **“Subscribed Quantity”** is the quantity you have purchased for the corresponding Cloud Service and is current as of the last successful data collection date.
- **“Authorized User Quantity”** is the number of individuals you have authorized to access the Cloud Service.
- **“Remaining Quantity”** is calculated as “Subscribed Quantity” minus “Authorized User Quantity” for the most recent month. A positive figure indicates the quantity available to be authorized. A negative figure indicates you have authorized more users than you are contractually entitled.
- **“Subscription Usage”** is the amount of Authorized User Quantity used in the last Month and is represented as a percentage of your Subscribed Quantity.
- **“Highest Use”** is the highest number recorded during the period noted in the table.

## Introduction

Your usage data is included in the SaaS Service Usage Metrics Report. This report is generated and delivered daily to your console. It shows the products included in your subscription and their subscribed quantities, how much you're using for the current Service Interval as well as the last three Service Intervals. It also shows products that you're using but are not part of your subscription.

Although the report is generated daily, your usage numbers will likely not change on a daily basis because most products are measured as the peak number for the month.

At Oracle's discretion, changes to the way Oracle determines usage may be updated from time to time to (i) address subscription requirements associated with the release of new Enterprise Performance Management Cloud Services, or new metrics or functionality for Enterprise Performance Management Cloud Services; (ii) increase accuracy of, or facilitate greater understanding of, subscription requirements for Enterprise Performance Management Cloud Services; or (iii) include other information or changes.

## Access & Download Your SaaS Service Usage Metrics Report

To access the SaaS Service Usage Metrics Report in your Cloud Console, you should be one of the following:

- Tenancy administrator for the tenancy where your environment is located.
- Member of a group that includes specific policies that allow access to the report.

Relevant documentation:

- [Commercial Measurement Usage Metrics](#)
- More information for customers who were converted to Cloud Console – [Post-Conversion Tasks](#)

## Steps to download your SaaS Service Usage Metrics Report

To download the Usage Metrics Report from the Cloud Console, sign into the portal, go to the Fusion Applications environment details page, under **Resources**, click **Subscriptions**, click the **subscription ID** link. On the Subscriptions detail page, under **Resources**, click **Usage**. For more details, see the [Commercial Measurement Usage Metrics](#) section in the Oracle Cloud Infrastructure documentation.

## How to get help with the SaaS Service Usage Metrics Report

Please contact [My Oracle Support](#) if you have any questions.

## How to read the SaaS Service Usage Metrics Report

The report provides a snapshot of your current usage compared to your contractual entitlement. It also describes some best practices when managing your subscriptions.

Usage metrics are organized into tables for four licensing metrics:

- Hosted Named User
- Hosted Employee
- Records
- Hosted Environment

For each licensing metric, the tables show how you're using:

- What you've purchased
- What you haven't purchased – your unexpected usage

Here's what's included in each table.

### Hosted Named User – Usage

The Hosted Named Users – Usage table shows the number of users who can access each subscribed service compared to the quantity purchased.

Figure 1. How to read section: Hosted Named User – Usage

Part #	Service Application Instance	Authorized User Quantity			Subscribed Quantity May	Remaining Quantity May	Subscription Usage May	Highest Use Jun 1–14
		Mar	Apr	May				
B73946	Oracle Planning and Budgeting Cloud Services – Hosted Named User A [REDACTED] PLANNING9	175	176	176	30	-148	593%	176
B73946	Oracle Planning and Budgeting Cloud Service – Hosted Named User A [REDACTED] PLANNING2	144	146	146	30	-116	487%	146
B85802	Oracle Financial Consolidation and Close Cloud Service – Hosted Named User A [REDACTED] PLANNING Ends March 11, 2021	101	101	102	150	48	68%	79
B91073	Oracle Enterprise Performance Management Standard Cloud Service - Hosted Named User [REDACTED]	-	-	Error*	10	Error*	Error*	1
B86759	Oracle Financial Statement Planning - Hosted Named User A [REDACTED] EPM18	-	-	-	1	-	-	-

**Annotations:**

- The SKU numbers and names of the services you purchased:** Points to the Part # and Service Application Instance columns.
- Quantity used in respective months:** Points to the Authorized User Quantity columns (Mar, Apr, May).
- The quantity you purchased:** Points to the Subscribed Quantity May column.
- Subscribed Quantity minus Authorized User Quantity for the most recent full month:** Points to the Remaining Quantity May column.
- (Authorized User Quantity ÷ Subscribed Quantity) \* 100 for the most recent full month:** Points to the Subscription Usage May column.
- Highest Authorized User quantity for the current month:** Points to the Highest Use Jun 1–14 column.
- Instance Name:** Points to the Service Application Instance column.
- More users authorized than you are contractually entitled to:** Points to the Subscription Usage May column (e.g., 593%, 487%).
- The quantity available to be authorized:** Points to the Highest Use Jun 1–14 column.
- The service was not part of an active subscription for the given month:** Points to the Authorized User Quantity columns showing dashes.
- Metrics not available as the service was not being measured at the time the report was generated:** Points to the Authorized User Quantity columns showing dashes.
- An error occurred retrieving or calculating this value. Please contact support for further assistance:** Points to the Error\* values in the Authorized User Quantity and Remaining Quantity May columns.

## Hosted Named User – Unexpected Usage

The Hosted Named User – Unexpected Usage table shows the number of Hosted Named Users authorized to access each of the listed services, even though there are no associated active subscriptions.

Figure 2. How to read section: Hosted Named User – Unexpected Usage

The SKU numbers and names of the services you are using but did not purchase

Quantity used in respective months

Part #	Service Application Instance	Authorized User Quantity			
		Mar	Apr	May	Highest Use Jun 1 – 14
B86152	Oracle Profitability and Cost Management Cloud Service - Hosted Named User A [REDACTED]	28	27	27	26
B91074	Oracle Enterprise Performance Management Enterprise Cloud Service - Hosted Named User A [REDACTED] <i>Ended April 18, 2021</i>	–	8,948	8,931	8,942

Instance Name

Highest Authorized User quantity for the current month

Unexpected usage not observed during these months

## Detailed Usage

The Detailed Usage table shows detailed explanation for the usage against Hosted Named Users, which may exist in multiple environments but are only counted once. (Base SKU)

Figure 3. How to read section: Detailed Usage

The diagram illustrates how to read the Detailed Usage table. Red arrows point from labels to specific parts of the table:

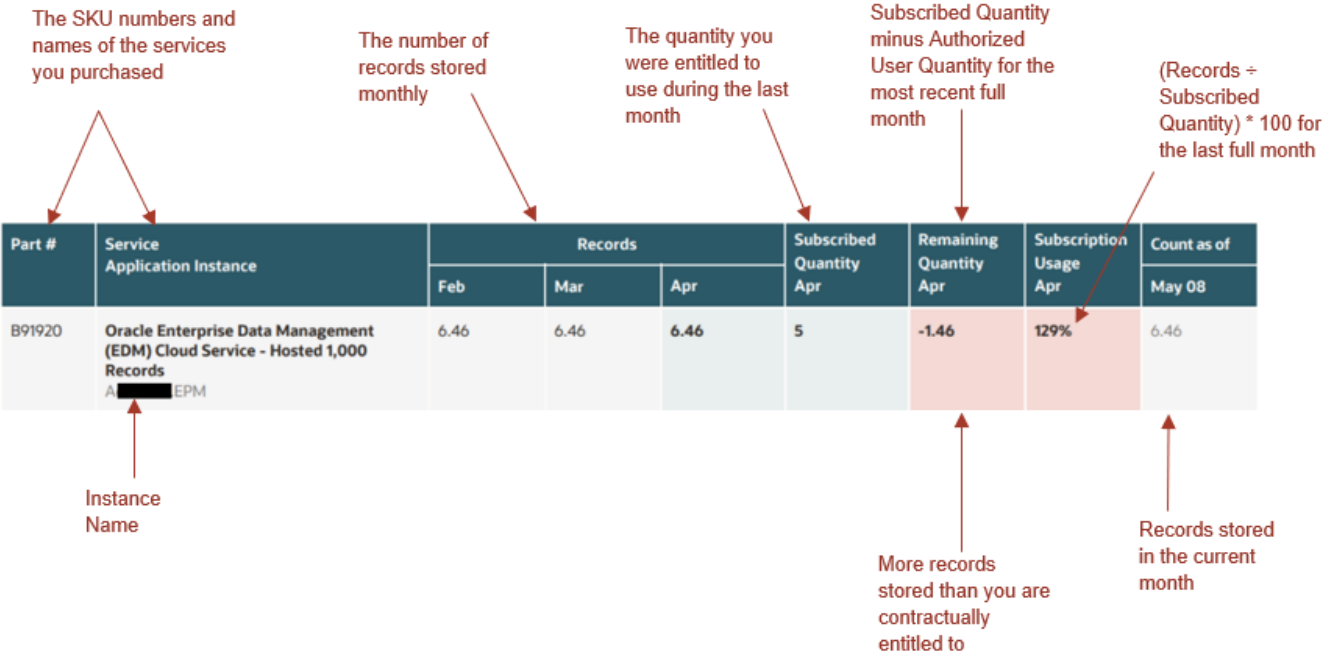

- Base SKU:** Points to the Part # B91073 in the first row.
- Instance Name:** Points to the Service description 'Oracle Enterprise Performance Management Enterprise Cloud Service - Hosted Named User' in the first row.
- Child SKU numbers:** Points to the Part # B91076 in the second, third, fourth, and fifth rows.
- Total count of Authorized Users on environments:** Points to the Gross User Quantity May value 2,275 in the first row.
- Count of unique Authorized Users on environments:** Points to the Unique User Quantity May value 4,003 in the second row.
- Total count of unique Authorized Users across all instances for the last service month including the base SKU:** Points to the Total Hosted Named Users: 8,974 at the bottom of the table.

Part #	Service Application Instance	Gross User Quantity May	Unique User Quantity May
B91073	Oracle Enterprise Performance Management Enterprise Cloud Service - Hosted Named User A [REDACTED] EPM1	2,275	2,275
B91076	Oracle Additional Application for Oracle Enterprise Performance Management Enterprise Cloud Service - Hosted Environment A [REDACTED] EPM4	4,893	4,003
B91076	Oracle Additional Application for Oracle Enterprise Performance Management Enterprise Cloud Service - Hosted Environment A [REDACTED] EPM5	3,789	0
B91076	Oracle Additional Application for Oracle Enterprise Performance Management Enterprise Cloud Service - Hosted Environment A [REDACTED] EPM6	4,206	2,696
B91076	Oracle Additional Application for Oracle Enterprise Performance Management Enterprise Cloud Service - Hosted Environment A [REDACTED] EPM7	0	0
Total Hosted Named Users:			8,974

Records – Usage

The Records Usage table shows the monthly quantity of records stored for services compared to the quantity purchased. Records quantity is measured per 1,000 records for many Cloud services.

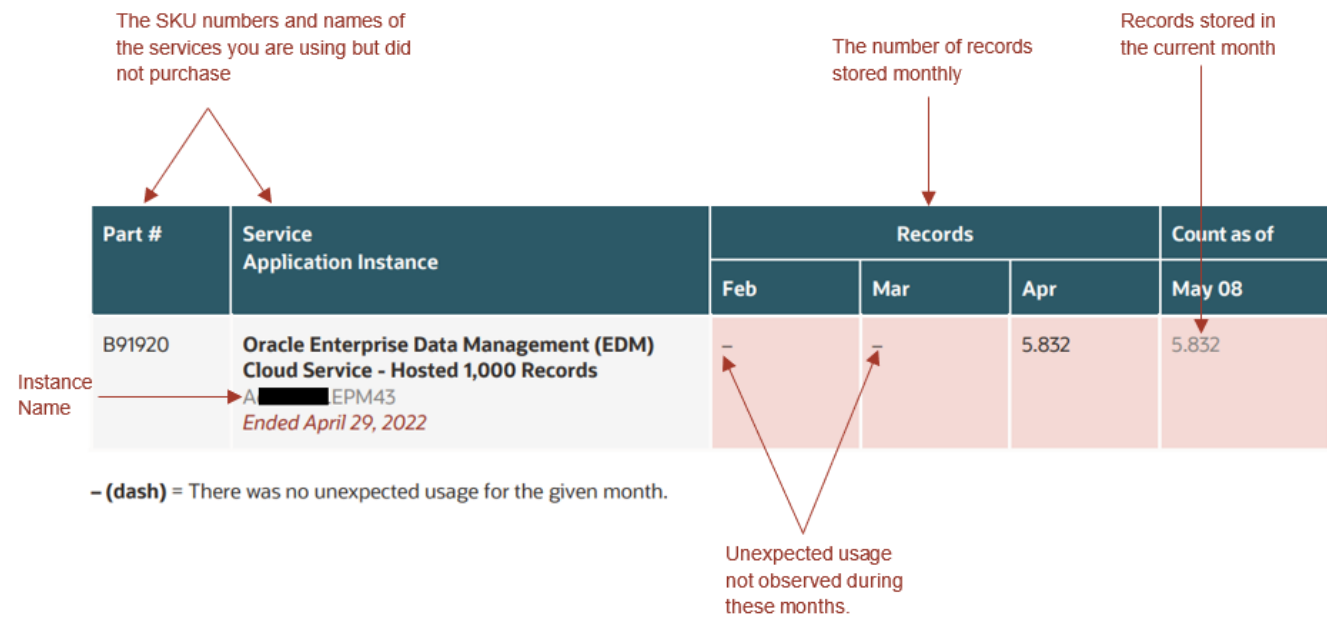

Figure 4. How to read section: Records – Usage

Records – Unexpected Usage

The Records Unexpected Usage table shows the monthly quantity of the relevant record type for each Cloud Service, even though there are no associated active subscriptions. Records quantity is measured per 1,000 records for many Cloud services.

Figure 5. How to read section: Records – Unexpected Usage

# Records – Shared Measurement Unexpected Usage

This table below shows unexpected usage which is associated with a set of possible part numbers.

Figure 6. How to read section: Records – Shared Measurement Unexpected Usage

The SKU numbers and names of the services you are using but did not purchase

The number of records stored monthly

Records stored in the current month

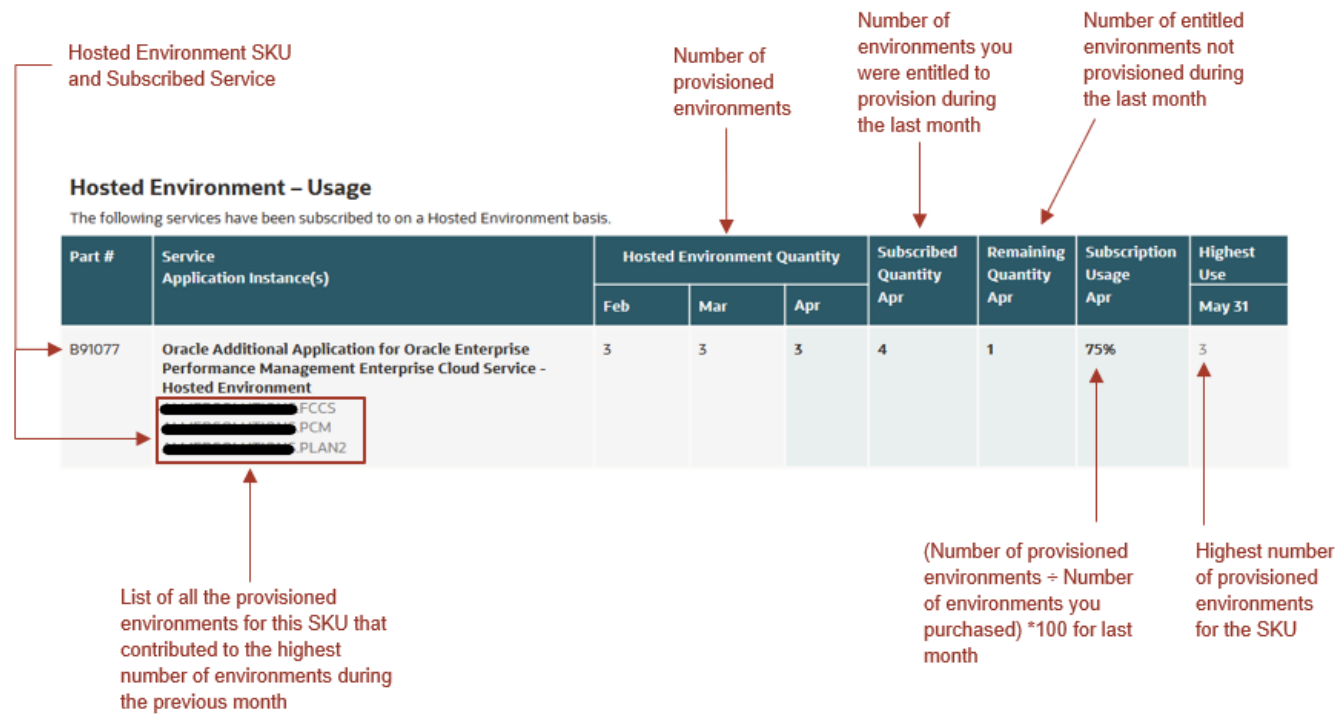

Part #	Service Application Instance	Records			Count as of
		Mar	Apr	May	Jun 1-14
B88773	Oracle Enterprise Data Management Cloud Service - Hosted 1000 Records	20.15	20.2	20.21	20.20
B91920	Oracle Enterprise Data Management (EDM) Cloud Service – Hosted 1,000 Records				

Shared Measurement Unexpected usage observed during these months

# Hosted Environment - Usage

This table shows the count of Hosted Environments. See the Fusion Service Descriptions for details about how Hosted Environments are measured.

Figure 7. How to read section: Hosted Environment – Usage
